

## Standardized Label Template

The Division of Cannabis Control (DCC or Division) is providing the following standardized label templates to licensees to outline, in a visual format, information required by rule to be displayed on product facts labels.

Each package of cannabis intended for direct customer sale must be permanently affixed with a label that includes all of the required information provided in legible English.

- Licensees are permitted to place *some* of the required information on a Quick Response code that is then affixed to the label. Please refer to the [Packaging & Labeling Guidance](#) for more information.

Warning labels and disclosures are required to be provided in legible English and permanently affixed either:

1. On the product facts label; OR
2. Printed directly onto the package in a conspicuous and unobstructed location which is clearly visible upon normal inspection of the package.

For the purposes of these examples, warnings and disclosures are provided on the label.

It is each cultivator and processor's responsibility to present the information in a manner that is clear and not misleading to the customer.

While licensees are not required to use these label templates, they are examples of the information required to be provided to the customer and in a manner that is clear.

All information must be provided in legible English. To be compliant with this requirement, the chosen font and size must be at least as legible as Arial 5pt applied to the same space.

For further information, please refer to Ohio Administrative Code (OAC) [1301:18-4-19](#), [1301:18-4-20](#), [1301:18-4-21](#), and [1301:18-4-23](#), and the [Packaging & Labeling Guidance](#).

### Example: Flower/Bud
