

# Ohio Volunteer Firefighter Weekend

April 5 – 6, 2025

## Offered Courses

### **Pumps and Mobile Water Supply**

This course meets the requirements of NFPA 1010 Chapter 17, Mobile Water Supply Apparatus Driver/Operator, and focuses on safe and efficient tanker/tender operations during water shuttle operations. It provides an overview of tanker/tender design, handling, and safety considerations as well as fill site and dump site operations. Students will demonstrate the ability to conduct pre-operational inspections of tanker/tender apparatus, to position tanker/tender apparatus at the fill site and dump site, the ability to set up a dump site, and the ability to effectively communicate via radio and telephone. (Classroom and hands on PPE required, no SCBA)

### **Fire Dynamics**

This class is intended for all members of the fire service including suppression, investigation, code enforcement, public education and CRR staff. Students will review traditional fire dynamics as we have understood them, how fire dynamics have changed in the last twenty to thirty years and the implication of those changes. Topics covered include fire dynamics, flow path, smoke as a fuel, the significance of door and ventilation control, the impact of temperature and pressure on fire development, water mapping and air entrainment. Students will then consider the impact this information has on the fireground operations, fire code application, fire investigations and Community Risk Reduction

**REQUIREMENTS:** No PPE Required, just the desire to better understand our job and how to keep everyone safe. (Classroom and Water Mapping Prop No PPE)

### **Vehicle Extrication and Alternative Fuel Vehicles**

Vehicle Extrication, focusing on common passenger vehicles and a discussion on alternative fuel vehicles and the hazards they present. Student will understand the differences in Awareness, Operations and Tech Level extrications. Students will have hands on training with scenarios that allow for critical thinking and building your rescue skills. (Classroom and hands on PPE required, no SCBA)

### **Structural Fire Attack Lab**

This course is a must for all firefighters, both new and seasoned veterans. The OFA brings live fire into the classroom and demonstrate the destructive force and power fire has utilizing the OFA's Fire Behavior Lab's Flashover trailer. A lack of understanding fire behavior can lead to inaccurate predictions, the destruction of property and the loss of life. A long with The Mobile Structural Fire Attack Lab (MSFAL),. The MSFAL features three live-fire training props, as well as a roof ventilation simulator. The unit supports a number of training scenarios including structural and transitional fire attack, vent enter-search, basement fires, industrial fires, rescue, and ventilation from ground ladders and aerial devices. (PPE and SCBA are required for this Course)
