# 2024 Population Estimates Cities, Villages and Townships by County

The following report contains the 2024 subcounty resident population estimates produced by the U.S. Census Bureau. The estimates are produced annually and reflect the population on July 1, 2024, and adjustments to prior years.

Subcounty areas consist of incorporated places, such as cities and villages, and townships. The subcounty areas are geographically updated by the Census Bureau each year to reflect legal boundary changes reported in the Bureaus' Boundary and Annexation Survey. This subcounty estimates report reflects the governmental hierarchy as reported to the Census Bureau by the local governmental entities.

The subcounty estimates are created by developing population estimates for households and group quarters separately then combining them to calculate the resident population. These numbers are controlled to the current published county-level estimate. The county-level estimates are created using an administrative record-based component of change method which updates the latest census figure using data on births, deaths, and migration.

In Ohio, all three of the subcounty areas – cities, villages, and townships – can cross county boundaries, which are reflected in the individual county pages. For example, the city of Columbus is reported in Franklin, Delaware, and Fairfield Counties, while the total population of the city is reported in 2024 Population Estimates – Whole Places. Also, there are four townships, Canaan, Fairfield, Perry, and Washington with published counts in multiple counties as reported to the Census Bureau. These are identified in the individual county footnotes.

For a more detailed methodology, visit the U.S. Census Bureaus' site.
