FIREFIGHTER I	PRACTICAL SKILL EVALUATION									
4-1 SELF CONTAINED BREATHING APPARATUS (SCBA) INSPECTION					NFPA 1001 4.5.1					
Candidate Instructions: Conduct a pre-use operational check of your SCBA, including removing and replacing the air cylinder, announcing out loud what you are checking, equipment is clean and maintained according to manufacturers or departmental guidelines, maintenance is recorded, and equipment is placed in a ready state or reported otherwise & what conditions you find as you proceed and indicating when you are done. Steps can be completed in any order. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: Checks to see that low pressure alarm is in working condition and operates at the appropriate cylinder volume, based on the current edition of NFPA 1981: Standard on Open-Circuit Self-Contained Breathing Apparatus (SCBA) for Emergency Services. Provide proper recording/reporting instrument to candidates. Candidates must complete each step, but do not have to complete them in the exact order listed on the skill sheet except checking the condition of seals/O-rings prior to making connections. 5 MINUTE TIME LIMIT.										
PERFORMANCE STEPS					TEST 1		RETEST 2		RETEST 3	
Safely performs the following steps:					P	F	P	F	P	F
Removes cylinder from pack and checks manufacturer date and hydrostatic test dates. Checks that cylinder is no less than 90% full. Check O-ring/plastic ring on high pressure airline before replacing and reconnecting to cylinder (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
Checks to ensure that the harness system is in good condition and that all straps are in the fully extended position					☐	☐	☐	☐	☐	☐
Prior to pressurization, checks to ensure that all hose connections are tight. If applicable, inspects the Universal Air Connection (UAC) to be sure it is free from dirt and debris (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
After pressurization, checks to make sure system including hoses are free of leaks (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
Checks to ensure that the face piece is in good condition and the straps are in the fully extended position					☐	☐	☐	☐	☐	☐
Checks that all gauges work. Cylinder and regulator gauge should read within 10% of each other and if equipped, ensures the heads-up display is working properly and coincides with the cylinder and regulator gauge pressure (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
Checks Personal Alert Safety System (PASS) device to make sure it cycles through all phases of activation (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
Manually activates PASS device (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
Checks to ensure that all valves (i.e. bypass, mainline, exhalation) are operational. Bypass valve should be fully closed (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
Checks cleanliness of unit (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
Checks to see that low-pressure alarm is in working condition and operates at the appropriate cylinder volume (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
Demonstrates the ability to select correct tools for various parts of equipment					☐	☐	☐	☐	☐	☐
Follows department / agency guidelines					☐	☐	☐	☐	☐	☐
Completes recording and reporting procedures					☐	☐	☐	☐	☐	☐
NO UNSAFE ACTS COMMITTED DURING EVALUATION (CRITICAL POINT)					☐	☐	☐	☐	☐	☐
Candidate must have at least 13/15 for skill and perform all critical points

4-2 DON PERSONAL PROTECTIVE CLOTHING (PPC)					NFPA 1001 4.1.2					
<u>Candidate Instructions:</u> Don personal protective clothing (PPC), given full PPC. The exact sequence of donning the PPC is not graded, however, once completed all components must be correctly worn and ready for firefighting operations. When you have completed all donning procedures, clap your hands or verbalize completion and wait for the evaluator to check all equipment. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? <u>Evaluator Instructions:</u> Candidates must complete each step, but do not have to complete them in the exact order listed on the skill sheet. 90 SECOND TIME LIMIT.										
PERFORMANCE STEPS					TEST 1		RETEST 2		RETEST 3	
Safely performs the following steps:					P	F	P	F	P	F
Dons boots and trousers					☐	☐	☐	☐	☐	☐

4-3 DON SELF CONTAINED BREATHING APPARATUS (SCBA)	NFPA 1001 4.3.1					
Candidate Instructions: Use self-contained breathing apparatus (SCBA) during emergency operations, given SCBA and other PPE, while wearing full protective clothing (helmet and gloves off hood-on and pulled back) demonstrate donning of SCBA. The exact sequence of donning the SCBA is not graded, however, once completed, all components must be correctly worn and ready to enter a hazardous environment. When you have completed all donning procedures, clap your hands and wait for the evaluator to check all equipment. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: Candidate shall start with full PPC, helmet and gloves off, and hood pulled back, as the candidate should complete donning SCBA skill after completing the donning of PPC skill. *The candidate should already be wearing full protective clothing prior to the beginning of this SCBA-donning procedure. In addition to fully donning and activating the SCBA, the candidate should also replace any personal protective clothing (i.e., gloves, protective hood, helmet, etc.) displaced during the donning procedure and activate the personal alert safety system (PASS) device. 90 SECOND TIME LIMIT.

FIREFIGHTER I	PRACTICAL SKILL EVALUATION
4-4 CONSERVE AIR / SELF CONTAINED BREATHING APPARATUS (SCBA) FAILURE	NFPA 1001 4.3.1, 4.2.3, & 4.2.4

Candidate Instructions: Verbalize and demonstrate controlled breathing techniques, given obscured vision conditions, full PPE, SCBA, a fire department radio and operating procedures, when instructed to do so activate an emergency call for assistance, so that the information is accurate, complete, clear, and relayed within the time established by the AHJ so that the candidate can be located and rescued. On command the candidate shall rapidly exit the Immediately Dangerous to Life or Health (IDLH) environment by a restricted passage prior to air depletion. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: Examples of controlled breathing techniques could include staying calm, assuring good seals and no leaks, skip breathing or humming, etc.

*An emergency call for assistance must be initiated using a radio, pass device, and possible additional means to alert others to a firefighter's need of emergency assistance. This should also include the term MAYDAY, firefighter down, or comparable language as determined by the program director (AHJ).

Examples of attempts to correct the problem could include hand goes to the face piece and regulator, checking by-pass valve, uses bypass or cylinder valve to control air flow (depending on free flow or no flow as needed), assuring the air cylinder is on, etc.

Warning: No emergency breathing technique is recognized by manufacturers, IFSTA, ANSI, or any other regulating agency. These procedures should be used only as a last resort in life threatening situations. **5 MINUTE TIME LIMIT.**

PERFORMANCE STEPS	TEST 1		RETEST 2		RETEST 3	
Safely performs the following steps:	P	F	P	F	P	F
SCBA is correctly donned	☐	☐	☐	☐	☐	☐
Scba is correctly worn	☐	☐	☐	☐	☐	☐
Verbalize and demonstrate controlled breathing techniques	☐	☐	☐	☐	☐	☐
SCBA FAILURE Transmit MAYDAY report per approved method (e.g. LUNAR/Who, What, Where). The candidate demonstrates the ability to operate radio equipment and discriminate between routine and emergency traffic, so that the information is accurate, complete, clear, and relayed within the time established by the AHJ.	☐	☐	☐	☐	☐	☐
Notifies partner of SCBA problem	☐	☐	☐	☐	☐	☐
Activates PASS device (The candidate demonstrates the ability to use other methods of emergency calls for assistance)	☐	☐	☐	☐	☐	☐
Attempts to correct problem, if possible	☐	☐	☐	☐	☐	☐
Exits simulated IDLH environment utilizing a restricted passage prior to air depletion	☐	☐	☐	☐	☐	☐
Respiratory protection is not intentionally compromised	☐	☐	☐	☐	☐	☐
NO UNSAFE ACTS COMMITTED DURING EVALUATION	☐	☐	☐	☐	☐	☐

4-5 FIELD DECONTAMINATION				NFPA 1001 4.1.2					
Candidate Instructions: As a member of a team, given full PPE and SCBA perform self-field reduction of contaminants and prepare for reuse. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: Set up of decontamination at the scene shall be set up prior to the evaluation of the candidates. Under normal conditions it is appropriate to decontaminate using water with a brush. When temperatures are below freezing the candidate shall wear an SCBA and use a brush to avoid the inhalation of the fine debris and dust. An additional instructor/evaluator may assist as a team member with direction from candidate. 5 MINUTE TIME LIMIT.									
PERFORMANCE STEPS				TEST 1		RETEST 2		RETEST 3	
Safely performs the following steps:				P	F	P	F	P	F
Candidate completes one of the following:									
☐ Utilizes water and brush to remove debris ☐ Wears SCBA on air and only uses a brush in below freezing conditions				☐	☐	☐	☐	☐	☐
Removes and places gear in supplied container				☐	☐	☐	☐	☐	☐
Wipes exposed skin, to include at least head, neck, jaw, throat, and hands				☐	☐	☐	☐	☐	☐
PPE was not placed in the cab of the apparatus				☐	☐	☐	☐	☐	☐
NO UNSAFE ACTS COMMITTED DURING EVALUATION				☐	☐	☐	☐	☐	☐

4-6 FORCED ENTRY	NFPA 1001 4.3.4

Candidate Instructions: Force entry into a building, given full PPE, tools, and an assignment, so that the tools are used as designed, the barrier is removed, and the opening is in a safe condition and ready for entry. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: *The candidate should be able to force entry through wood, glass and metal doors that open in and out, overhead doors, and windows common to the community or service area.

Only one of these conditions needs to be conducted for skill testing. Candidate should try before they pry to make entry, although this is not an automatic failure. Forcible entry door simulators are acceptable for skill testing.

Another candidate may be used to assist with all forcible entry testing, but only one candidate may be tested at a time.

Some examples of safety issues would include not checking a door for heat before forcing, breaking a window in a manner that falling glass may strike the candidate, not securing an overhead door from closing, etc. **5 MINUTE TIME LIMIT.**

PERFORMANCE STEPS	TEST 1		RETEST 2		RETEST 3

4-7 EXIT A HAZARDOUS AREA				NFPA 1001 4.3.5					
Candidate Instructions: Exit a hazardous area operating as a member of a (2-person) search & rescue team, given vision-obscured conditions, so that a safe haven is found before exhausting the air supply, others are not endangered, and the team integrity is maintained. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: *When training exercises are intended to simulate emergency conditions, smoke-generating devices that do not create a threat are required. Several accidents have occurred when smoke bombs, hay, or other smoke-generating devices that produce a toxic atmosphere have been used for training exercises. All exercises should be conducted in accordance with the requirements of the current edition of NFPA 1404. Operating as a team (with a partner) the candidates may individually or both fail the skill for any of the following reasons, only the candidate/candidates that fail any of the listed items will fail the skill. • Failure to maintain situational awareness • Fail to maintain correct body posture • Failure to identify building opening and features • Failure to maintain contact with the team member physically and verbally Candidate should be given areas to search, generally not to exceed about 300-400 square feet, but must consist of multiple room areas. Room areas may be simulated using false or simulated walls, etc. The charter may reduce the time based on the size of space being searched but cannot exceed 15 minutes. 15 MINUTE TIME LIMIT.

4-8 SEARCH AND RESCUE	NFPA 1001 4.3.9

Candidate Instructions: Conduct a search and rescue in a structure operating as a member of a (2-person) search & rescue team, given an assignment, obscured vision conditions, personal protective equipment, a flashlight, forcible entry tools, hose lines, and ladders when necessary, so that ladders are correctly placed when used, all assigned areas are searched, all victims are located and removed, team integrity is maintained, and team members' safety — including respiratory protection — is not compromised. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: *This skill is not intended to prevent a candidate from partially or completely removing the backpack assembly, as an emergency procedure only, to exit through a restricted passage, without removing the face piece or compromising the air supply in any manner.

Operating as a team (with a partner) the candidates may individually or both fail the skill for any of the following reasons, only the candidate/candidates that fail any of the listed items will fail the skill.

- Failure to maintain situational awareness
- Fail to maintain correct body posture
- Failure to identify building opening and features
- Failure to assist in the removal of the victim
- Failure to maintain contact with the team member physically and verbally

Candidate should be given areas to search, generally not to exceed about 300-400 square feet, but must consist of multiple room areas. Room areas may be simulated using false or simulated walls, etc. Ladders, if used are properly placed based on the conditions given. Candidate are not required to perform a ladder rescue to successfully complete this skill. A rescue dummy of a minimum of 110lbs. must be used. The charter may reduce the time based on the size of space being searched but cannot exceed 15 minutes. **15 MINUTE TIME LIMIT.**

PERFORMANCE STEPS	TEST 1		RETEST 2		RETEST 3	
Safely performs the following steps:	P	F	P	F	P	F
Checks door for heat level before entering. Assesses areas to determine tenability and evaluates areas for threats and recognizes a safe haven	☐	☐	☐	☐	☐	☐

4-9 FIRE ATTACK - EXTERIOR	NFPA 1001 4.3.8

Candidate Instructions: Extinguish fires in exterior Class A materials, given fires in stacked or piled and small unattached structures or storage containers that can be fought from the exterior, attack lines, hand tools and master stream devices, and an assignment, so that exposures are protected, the spread of fire is stopped, collapse hazards are avoided, water application is effective, the fire is extinguished, and signs of the origin area(s) and arson are preserved.. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: *The candidate should be able to extinguish fires in stacked or piled materials such as hay or straw bales, pallets, lumber, piles of mulch, sawdust, other bulk Class A materials, or small unattached structures that are attacked from the exterior. The tactics for extinguishing each of these types of fires are similar enough to be included in one JPR.

*Live fire evolutions shall be conducted in accordance with the requirements of NFPA 1403. It is further recommended that prior to involvement in live fire evolutions, the candidate demonstrates the use of SCBA in smoke and elevated temperature conditions.

*In areas where environmental or other concerns restrict the use of Class A fuels for training evolutions, properly installed and monitored gas-fueled fire simulators might be substituted.

This skill may not be combined with Firefighter II skill 5-3. Dumpster or container fires are not acceptable for this skill.

TIME LIMIT IS BASED ON THE AMOUNT OF TIME REQUIRED TO COMPLETE A LIVE FIRE EVOLUTION AS PART OF A CREW.

PERFORMANCE STEPS	TEST 1		RETEST 2		RETEST 3	
Safely performs the following steps:	P	F	P	F	P	F
Candidate extinguishes a Class A exterior fire in one of the following: ☐ Stacked Materials ☐ Piled Materials ☐ Unattached Small Structure	☐	☐	☐	☐	☐	☐
Candidate demonstrates the ability to recognize hazards associated with the burning material's configuration & collapse hazards are avoided	☐	☐	☐	☐	☐	☐
Exposures are protected and the spread of fire is stopped	☐	☐	☐	☐	☐	☐
Operates hand lines, master streams, or other water application devices effectively	☐	☐	☐	☐	☐	☐

4-10 FIRE ATTACK - INTERIOR	NFPA 1001 4.3.10

Candidate Instructions: Attack an interior structure fire operating as a member of a team, given an attack line, ladders when needed, PPE, tools and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: Only the candidate operating the nozzle will be evaluated during each evolution.

*The candidate should be proficient in the various attack approaches for room and content fires at three different levels (at grade, above grade, and below grade). Maintenance of body posture in the standard refers to staying low during initial attack, protecting oneself from falling objects, and otherwise using common sense given the state of the fire's growth or suppression. Live fire evolutions must be conducted in accordance with the requirements of current edition of NFPA 1403. It is further recommended that prior to involvement in live fire evolutions, the candidate demonstrate the use of SCBA in smoke and elevated temperature conditions. In areas where environmental or other concerns restrict the use of Class A fuels for training evolutions, properly installed and monitored gas-fueled fire simulators might be substituted.

Candidate shall at no time advance an uncharged hose line into the unprotected live fire area and shall not make entry until nozzle pattern and flow have been verified. These actions are critical performance safety criteria.

Scenarios:

1. Ground floor single room fire attack from interior hallway.
2. Ground floor two rooms fire attack form interior hallway.
3. Second floor one room fire, access from interior stairway.
4. Ground floor single room fire, enter from exterior second floor (simulates basement fire).
5. Second floor one room fire, attack from ladder via window.

TIME LIMIT IS BASED ON THE AMOUNT OF TIME REQUIRED TO COMPLETE A LIVE FIRE EVOLUTION AS PART OF A CREW.

4-11 SECURE BUILDING UTILITIES	NFPA 1001 4.3.18

Candidate Instructions: Turn off building utilities, given tools and an assignment, so that the assignment is safely completed. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: The assignment given must include inactivating both natural gas and electric utilities. These can both be simulated without active utility service connections.

When shutting down electric the candidate **should** operate the main switch and leave individual circuit breakers as found to assist in fire cause and determination. Not following this advice would **not** constitute a critical performance failure.

4-13 VERTICAL VENTILATION					NFPA 1001 4.3.12		
Candidate Instructions: Perform vertical ventilation on a structure as part of a team, given an assignment, PPE, ground and roof ladders and tools, so that ladders are positioned for ventilation, a specified opening is created, all ventilation barriers are removed, structural integrity is not compromised, products of combustion are released from the structure, and the team retreats from the area when ventilation is accomplished. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: A roof simulator approved by the program director (AHJ) may be used but must include the use of a smoke-generating device. An elevated roof simulator should be used if available. Two candidates may be evaluated simultaneously if each candidate makes 2 cuts on the ventilation opening. 10 MINUTE TIME LIMIT.							
PERFORMANCE STEPS				TEST 1		RETEST 2	RETEST 3
Safely performs the following steps:				P	F	P	F

The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: Using a wall and/or ceiling simulator with drywall inserts, candidates may demonstrate opening walls and/or ceilings to check for extension. Straw may be used within the prop to demonstrate the removal of smoldering materials. Using a pressurized water extinguisher (PW can) and an ash bucket or metal trash can, the candidate may demonstrate the removal of hot and/or smoldering materials from the structure and proper extinguishment.

Protecting and/or demonstrating signs of arson may include:

- Verbalizing waiting for instructions from the fire investigator
- Identifying obvious signs of arson
- Accelerant cans
- Simulated accelerant balloons (water balloons) hanging from the ceiling
- Use of toilet paper as tracers

4-22 INSPECT VENTILATION EQUIPMENT, SALVAGE EQUIPMENT, OR HAND TOOLS					NFPA 1001 4.5.1				
Candidate Instructions: Clean and check ventilation equipment, salvage equipment, or hand tools, given cleaning tools, cleaning supplies, and an assignment, so that equipment is clean and maintained according to manufacturer's or departmental guidelines, maintenance is recorded, and equipment is placed in a ready state or reported otherwise. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: A general equipment inspection record form approved by the program director (AHJ) should be provided for the candidate to complete. 5 MINUTE TIME LIMIT.									
PERFORMANCE STEPS				TEST 1		RETEST		RETEST 3	
Safely performs the following steps:				P	F	P	F	P	F
The candidate shall perform <u>ONE</u> of the following inspections:									
INSPECT SALVAGE TOOLS									
The candidate demonstrates the ability to perform <u>all</u> of the following:									
☐ Selects correct cleaning tools and supplies				☐	☐	☐	☐	☐	☐
☐ Cleans provided salvage equipment (clean, brush, and rinse salvage cover)									
☐ Inspects and identifies any damage

4-23 VEHICLE FIRE					NFPA 1001 4.3.2, 4.3.3, & 4.3.7			
<u>Candidate Instructions:</u> Respond on apparatus to an emergency scene, given personal protective clothing and other necessary PPE, so that the apparatus is correctly mounted and dismounted, seat belts are used while the vehicle is in motion, and other personal protective equipment is correctly used. Establish and operate in work areas at emergency scenes, given protective equipment, traffic and scene control devices, structure fire and roadway emergency scenes, traffic hazards and downed electrical wires, photovoltaic power systems, battery storage systems, an assignment, and SOPs, so that procedures are followed, protective equipment is worn, protected work areas are established as directed using traffic and scene control devices, and the candidate performs assigned tasks only in established, protected work areas. Attack a passenger vehicle fire operating as a member of a team, given PPE, an attack line, and hand tools, so that hazards are avoided, leaking flammable liquids are identified and controlled, protection from flash fires is maintained, all vehicle compartments are overhauled, and the fire is extinguished. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? <u>Evaluator Instructions:</u> *Passenger vehicles include automobiles, light trucks, and vans. This skill can be completed as a member of a team. Examples of unsafe acts would include: - Not properly approaching the fire from uphill/upwind and from safe distance - Not starting with a direct attack and widening stream pattern while advancing to vehicle - Not approaching at a 45 degree angle, avoiding bumpers, hood struts, etc. - Not maintaining situational awareness of traffic - Not aware of alternative fuel vehicles (i.e., CNG, Electric, etc.) 15 MINUTE TIME LIMIT.

4-26 HOSE INSPECTING, ROLLING, & RELOADING					NFPA 1001 4.5.2					
Candidate Instructions: Clean, inspect, and return fire hose to service, wearing appropriate PPC, given washing equipment, water, detergent, tools, and replacement gaskets, so that any damage is noted and corrected, the hose is clean, and the equipment is placed in a ready state for service. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: Reference NFPA 1962 – Hose Inspection Form. Create a generic HOSE inspection form to be used. Cleaned hose section must be at least 1 ½” diameter and at least 25 feet in length. Hose used for for roll hose skill must be at least a 50’ section. If the reloading hose skill is being completed as a member of a team, the candidate being evaluated must verbally direct the assistant(s) in loading the hose. Hose being used for the reload hose skill must be at least 150’ total length when completed. 15 MINUTE TIME LIMIT.										
PERFORMANCE STEPS					TEST 1		RETEST 2		RETEST 3	
Safely performs the following steps:					P	F	P	F	P	F
Fire hose cleaned properly using appropriate supplied washing and drying equipment, water, detergent, and tools					☐	☐	☐	☐	☐	☐
The candidate physically inspects the fire hose and ensures all of the following: ☐ Free of debris ☐ No evidence of mildew or rot ☐ No chemical or heat damage ☐ No cuts or abrasions ☐ No sign of delamination of the liner ☐ No damaged threads, corrosion, out of round, hose slippage, lose collars, or other defects with couplings					☐	☐	☐	☐	☐	☐
Replaces coupling gaskets, as needed					☐	☐	☐	☐	☐	☐

Candidate Instructions: Combat a ground cover fire operating as a member of a team, given PPC, SCBA (if needed), hose lines, extinguishers or hand tools, and an assignment, so that threats to property are reported, threats to personal safety are recognized, retreat is quickly accomplished when warranted, and the assignment is completed. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: *Protective clothing is not personal protective clothing (PPC) as used throughout the rest of this NFPA 1001 document. Some jurisdictions provide firefighters with different clothing for ground cover fires than is worn for structural fires. This clothing can be substituted for structural protective clothing in order to meet the intent of this JPR.

Skill must be conducted under live fire conditions. Ground cover fire may be accomplished by spreading hay or straw.

5-1 ESTABLISH COMMAND AND COORDINATE CREW					NFPA 5.1.2 & 5.2.2			
Candidate Instructions: Candidate shall determine the need for command, organize and coordinate an incident management system until command is transferred, and function within an assigned role in an incident management system. Communicate the need for team assistance, given fire department communications equipment, SOPs, and a team, so that the supervisor is consistently informed of team needs, departmental SOPs are followed, and the assignment is accomplished safely. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: This skill may be simulated by providing the candidate with a photo image of a working structure fire, or through the use of program director (AHJ) approved simulation software programs. Candidate's assignment is as the officer on the first-arriving engine company. Evaluator may act as the supervisor as needed. Departmental SOPs are as determined by the AHJ. *The candidate could be assigned to accomplish or coordinate tasks away from direct supervision. Many of these tasks could result in the need for additional or replacement personnel due to the ever-changing conditions on the scene of an emergency. The candidate is expected to identify these needs and effectively communicate this information within an incident management system. Use of radio communication necessitates that these communications be accurate and efficient. 5 MINUTE TIME LIMIT

5-3 IGNITABLE LIQUID FIRE	NFPA 5.3.1

Candidate Instructions: Extinguish an ignitable liquid fire, operating as a member of a team, given an assignment, attack line, PPE, a foam proportioning device, a nozzle, foam concentrates, and a water supply, so that the correct type of foam concentrate is selected for the given fuel and conditions, a properly proportioned foam stream is applied to the surface of the fuel to create and maintain a foam blanket, fire is extinguished, reignition is prevented, team protection is maintained with a foam stream, and the hazard is faced until retreat to safe haven is reached. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: *The backup line must be established before igniting fuel.*

*The candidate should be able to accomplish this task with each type of foam concentrate used by the AHJ. This could include the use of both Class A and Class B foam concentrates on appropriate fires. When using Class B foams to attack flammable or combustible liquid fires, the candidate should extinguish a fire of at least 100 ft². The candidate is not expected to calculate application rates and densities. The intent of this JPR can be met in training through the use of training foam concentrates or gas-fired training props. **15 minute time limit**

5-4 COORDINATE AN INTERIOR ATTACK					NFPA 5.3.2			
Candidate Instructions: Coordinate an interior attack line for a team's accomplishment of an assignment in a structure fire, given attack lines, personnel, PPE, and tools, so that crew integrity is established; attack techniques are selected for the given level of the fire (e.g., attic, grade level, upper levels, or basement); attack techniques are communicated to the attack teams; constant team coordination is maintained; fire growth and development is continuously evaluated; search, rescue, and ventilation requirements are communicated or managed; hazards are reported to the attack teams; and incident command is apprised of changing conditions. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: The attack line shall be 1.5" or larger. The candidate should be able to coordinate the actions of the interior attack line team at common residential fires and small business fires in the AHJ's district. Complex or large interior fire management should be left to the officers; however, this JPR will facilitate the development of the candidate toward effectively handling specific assignments within large fires. 10 minute time limit

FIREFIGHTER II	PRACTICAL SKILL EVALUATION (Flip the Switch)									
5-5 FLAMMABLE GAS FIRE					NFPA 5.3.3					
Candidate Instructions: Control a flammable gas cylinder fire, operating as a member of a team, given an assignment, a cylinder outside of a structure, an attack line, PPE, and tools, so that crew integrity is maintained, contents are identified, safe havens are identified prior to advancing, open valves are closed, flames are not extinguished unless the leaking gas is eliminated, the cylinder is cooled, cylinder integrity is evaluated, hazardous conditions are recognized and acted upon, and the cylinder is faced during approach and retreat. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: <i>The backup line must be established before igniting fuel (Safety Team). Use at least two 1.5" attack lines or larger with adjustable nozzles.</i> *Controlling flammable gas cylinder fires can be a very dangerous operation. The candidate should act as a team member, under the direct supervision of an officer, during these operations. 10 minute time limit										
PERFORMANCE STEPS					TEST 1		RETEST 2		RETEST 3	
Safely performs the following steps:					P	F	P	F	P	F
Dons PPE and SCBA and maintains team integrity and accountability					☐	☐	☐	☐	☐	☐

5-6 PROTECTING EVIDENCE	NFPA 5.3.4

Candidate Instructions: Protect evidence of fire cause and origin, given a flashlight and overhaul tools, so that the evidence is noted and protected from further disturbance until investigators can arrive on the scene. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: This skill may be completed by utilizing a burn pod (Shipping container prepared as residential room and contents)

*The candidate should be able to recognize important evidence as to a fire's cause and maintain the evidence so that further testing can be done without contamination or chain-of-custody problems. Evidence should be left in place (when possible; otherwise, chain-of-custody must be established), not altered by improper handling, walking, and so forth, and not destroyed. Possible means to protect evidence is to avoid touching, protect with salvage covers during overhaul, or rope off the area where the evidence lies. The candidate is not intended to be highly proficient at origin and cause determination. **10 minute time limit**

PERFORMANCE STEPS	TEST 1		RETEST 2		RETEST 3

5-7 VEHICLE EXTRICATION	NFPA 5.4.1

Candidate Instructions: Extricate a victim entrapped in a motor vehicle as part of a team given stabilization and extrication tools, so that the vehicle is stabilized, the victim is disentangled without further injury, and hazards are managed. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: *In the context of this standard, the term *extricate* refers to those activities required to allow emergency medical personnel access to the victim, stabilization of the vehicle, the displacement or removal of vehicle components obstructing victim removal, and the protection of the victim and response personnel from hazards associated with motor vehicle accidents and the use of hand and power tools on a motor vehicle.

*As persons performing extrication can be different from those performing medical functions, this standard does not address medical care of the victim. An awareness of the needs and responsibilities of emergency medical functions is recommended to allow for efficient coordination between the "extrication" team and the "medical" team.

5-9 HOME FIRE SAFETY SURVEY					NFPA 5.5.1					
Candidate Instructions: Perform a fire safety survey in an occupied structure, given survey forms and procedures so that fire and life safety hazards are identified, recommendations for their correction are made to the occupant, and unresolved issues are referred to the proper authority. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions? Evaluator Instructions: Provide candidate with a survey form approved by the program director (AHJ) containing preapproved recommendations. Evaluator may act as occupant/owner of structure. *It is recognized that not all programs have access to private dwellings in their area. The term <i>occupied structure</i> allows for greater flexibility and for the AHJ to determine which structures could be used for performing a fire safety survey. A fire safety survey is intended to be a basic survey of the property to identify major hazards such as locked exits, nonoperational fire protection and detection systems, a lack of smoke alarms in residential occupancies, nonoperational water supplies, hazardous interior finishes, hazardous storage, and other items identified on the survey form. It is not intended to be a fire inspection conducted to the job performance requirements of a Fire Inspector as identified in NFPA 1031. 20 minute time limit										
PERFORMANCE STEPS					TEST 1		RETEST 2		RETEST 3	
Safely performs the following steps:					P	F	P	F	P	F
Demonstrates ability to recognize life safety hazards					☐	☐	☐	☐	☐	☐

5-10 FIRE AND LIFE SAFETY EDUCATION	NFPA 5.5.2

Candidate Instructions: Present fire safety information to station visitors or small groups, given prepared materials, so that all information is presented, the information is accurate, and questions are answered or referred. The evaluator may stop this evaluation at any time due to an unsafe act. Do you have any questions?

Evaluator Instructions: The evaluator may act as a station visitor or member of a small group.

*The candidate should be able to present basic information on how to do the following:

- Stop, drop, and roll when someone's clothes are on fire
- Crawl low under smoke
- Plan and practice a home escape plan with two ways out of each room (especially sleeping rooms), a meeting place, and how to call the fire department (from the neighbor's house)
- Alert others to an emergency
- Call the fire department
- Test and maintain residential smoke alarms according to manufacturer's instructions

*The candidate is not expected to be an accomplished speaker or instructor
