

Madison County

Management Agencies Responsible for Sewage Collection and Treatment (includes prescriptions for sewage treatment options)

The Agency's review of water quality conditions and present wastewater facility needs indicates that large scale regional planning of sewer and treatment capacity is appropriate and necessary at this time in central Ohio counties (see Chapter 8). The existing Management Agencies responsible for Publicly Owned Treatment Works in Madison County are listed below. Specific prescriptions regarding wastewater collection and treatment responsibilities are listed where recent facility planning work was available to the Agency and it met the criteria listed in Chapter 9. In other situations generic prescriptions regarding wastewater collection and treatment responsibilities are provided that reflect existing legal authorities and responsibilities under State laws and regulations (generic prescriptions found on page 3). Local communities may be asked to update facility planning information as a means to create specific prescriptions in subsequent State 208 Plan updates. Refer to the Introduction on page 1 for more information on the Table's content.

County government officials in Madison County have prepared master sewer plans for their County. It covers all communities within the county, including municipalities. A steering committee composed of utility personnel and other community members worked with a consultant to prepare a draft plan that

all parties agreed to. This plan was made available for general public review and comment in April 2005. A final plan was prepared and accepted by the Madison County Commissioners in June 2005. Technical problems with the original submission of mapped information have been solved. The County and six municipal entities are established in this State 208 Plan as appropriate management agencies for sewer and wastewater planning and providing this service within Madison County. However, the inclusion of the specifically defined facility planning areas for the six municipal community systems will require a formal resolutions or letters of support from each municipal government.

In 2023, the Mid-Ohio Water and Sewer District (MOWSD) was established under Ohio Revised Code 6119. MOWSD entered into agreements to take over ownership, operation and planning for the London WWTP, Plain City WWTP, and County's Sanitary Sewer District No. 1 and No. 2 facilities. MOWSD is the wastewater management agency for these facilities.

Comments

49-C1 - The County Commissioners have prepared and voted to accept the County-wide sewer master plan that states there will be no development on central sewers in areas outside the defined facility planning areas. Therefore generic prescriptions number 9 is not included as a wastewater option for the unincorporated areas of the County.

Specific Prescriptions for Wastewater Treatment

49-P1 The ~~Mid-Ohio Water & Sewer District County-Commissioners-are~~ responsible for sewage collection and treatment in the Sewer District No. 1 FPA and Sewer District No. 2 FPA. All new development within these Sewer Districts shall connect to central sewers immediately, or if sewers are not immediately

available, connection to central sewers shall occur within a period of five years. Where sewers are not available, approval of individual home sewage treatment systems (HSTS) is the responsibility of the County health department or local health department and shall follow applicable sanitary codes. Where sewers are not available, on-lot sewage treatment systems for semi-public, private, or industrial entities may be installed if permitted by Ohio EPA or, if the county health department has permitting authority for small systems (less than 1,000 gallons per day), permitted by the county health department. New development being defined as requiring rezoning or construction on a nonagricultural parcel with average daily flow exceeding the equivalent dwelling unit (EDU) under current zoning.
