

0:0:0.0 --> 0:0:0.240

Walters, Kevin

Play.

0:0:0.250 --> 0:0:1.340

Walters, Kevin

You can see that gender now.

0:0:4.360 --> 0:0:4.510

Anastasia Milakovic

Yes.

0:0:6.400 --> 0:0:6.800

Walters, Kevin

Thank you.

0:0:10.130 --> 0:0:12.270

Walters, Kevin

Community screen come in here, OK?

0:0:14.160 --> 0:0:15.380

Walters, Kevin

So we'll go ahead and get started.

0:0:15.390 --> 0:0:17.210

Walters, Kevin

We have several things on the list for today.

0:0:19.280 --> 0:0:24.510

Walters, Kevin

The first one just real quick with the data reporter form that was last Thursday.

0:0:24.520 --> 0:0:28.770

Walters, Kevin

That always be the second Thursday of the week before our liaison meeting.

0:0:28.920 --> 0:0:38.990

Walters, Kevin

And some of you were there, but we had several topics there and several of them were around the AP file and Ed Bearer and some other things.

0:0:39.0 --> 0:0:54.190

Walters, Kevin

And we're working on some validations and changes there, which originally was on here is a update, which we're probably gonna postpone a little bit because we're still ohh figuring out what we're gonna do with some things and updating some things.

0:0:54.200 --> 0:1:2.390

Walters, Kevin

So but just wanted to mention that the Data Reporter Forum is on the resource page as well.

0:1:2.400 --> 0:1:9.620

Walters, Kevin

So if you wanna see anything that we had the transcript, the video and the questions are all be available.

0:1:11.770 --> 0:1:13.830

Walters, Kevin

There are any questions on that before I move on?

0:1:18.210 --> 0:1:18.490

Walters, Kevin

OK.

0:1:19.580 --> 0:1:20.50

Walters, Kevin

Uh.

0:1:20.60 --> 0:1:28.830

Walters, Kevin

Second one you gonna hear probably the next few months, the multi factor authentication is due to start sometime in the fall.

0:1:28.940 --> 0:1:33.900

Walters, Kevin

The best that we know so far, it'll be around the September time frame, which probably is an ideal.

0:1:35.0 --> 0:1:48.220

Walters, Kevin

It's probably a busy time for you, but just a warning that you will have to have MFA set up for you and all your users to be able to sign in to the HCI systems sometime around this this fall so.

0:1:51.520 --> 0:1:56.90

Walters, Kevin

And that's pretty much just a just a warning is coming and I don't know anything more.

0:1:56.140 --> 0:1:59.560

Walters, Kevin

Unfortunately, this time either other than it, it's going to happen so.

0:2:0.570 --> 0:2:0.860

Brittingham, Todd

The.

0:2:2.440 --> 0:2:2.890

Walters, Kevin

OK.

0:2:3.790 --> 0:2:4.120

Brittingham, Todd

Do you?

0:2:3.460 --> 0:2:5.640

Walters, Kevin

Third one on the list is another go ahead.

0:2:6.880 --> 0:2:10.880

Brittingham, Todd

Do you know I I know you just said you don't know anything else about it, but.

0:2:12.150 --> 0:2:13.410

Brittingham, Todd

Umm does it?

0:2:13.420 --> 0:2:13.700

Brittingham, Todd

Does it?

0:2:14.430 --> 0:2:17.430

Brittingham, Todd

Is it going to be dependent upon each of us some maintaining?

0:2:19.710 --> 0:2:28.220

Brittingham, Todd

Our our personal cell phone with either a piece of software or or receiving texts through our cell phones personal cell phones.

0:2:29.240 --> 0:2:32.550

Walters, Kevin

I don't know for sure, but I would assume it will be something like that.

0:2:32.940 --> 0:2:34.880

Walters, Kevin

That's the way most the state ones run.

0:2:35.210 --> 0:2:37.600

Walters, Kevin

No, you just receive a.

0:2:37.910 --> 0:2:40.960

Walters, Kevin

You can either have it set up as an app or as a text message.

0:2:40.970 --> 0:2:42.410

Walters, Kevin

Typically you can.

0:2:43.0 --> 0:2:50.20

Walters, Kevin

I set up the app to receive it or the text, but I don't know all the specifics on how they're doing that.

0:2:50.30 --> 0:3:2.390

Walters, Kevin

So we just are beginning to get our ID set up, so we see what it looks like and hopefully next month or so we can at least give you a more idea of what it will look like.

0:3:2.400 --> 0:3:12.230

Walters, Kevin

So and yeah, some of the questions that came to my mind are like, OK, if I'm working in one part of HI, do I have to keep authenticating if I go into something else?

0:3:12.240 --> 0:3:18.510

Walters, Kevin

So some things like that will just have to see where they go so.

0:3:19.870 --> 0:3:20.580

Brittingham, Todd

I I would.

0:3:20.640 --> 0:3:21.960

Brittingham, Todd

I would go on record that.

0:3:25.320 --> 0:3:32.140

Brittingham, Todd

Text messaging for other kinds of communication that come through a cell phone.

0:3:34.640 --> 0:3:36.130

Brittingham, Todd

That are linked directly to that.

0:3:36.220 --> 0:3:59.440

Brittingham, Todd

That phone number are not secure, and those have been kind of discredited by anybody who's ever had their their phone number ported away illegally, which I have had that happen to me, some Tracfone operator down in Florida as the ability to umm for my number over at will and it happened.

0:4:1.100 --> 0:4:1.220

Walters, Kevin

Yeah.

0:3:59.650 --> 0:4:5.680

Brittingham, Todd

So after that I'm like I will not use my personal cell phone for any authentication.

0:4:6.430 --> 0:4:6.730

Meyer, Fran (meyerfr)

Umm.

0:4:5.730 --> 0:4:10.690

Brittingham, Todd

I'll use an app like AUTHENTICATOR but not my cell phone number.

0:4:11.290 --> 0:4:11.820

Walters, Kevin

Yeah.

0:4:11.890 --> 0:4:12.60

Walters, Kevin

Yeah.

0:4:12.70 --> 0:4:16.990

Walters, Kevin

The state typically uses an app and I don't know if that'll follow the same for this particular thing or not.

0:4:17.270 --> 0:4:19.0

Walters, Kevin

And one note on your porting.

0:4:19.90 --> 0:4:26.540

Walters, Kevin

Sometimes your carriers will offer an option where they can't do that without certain permissions, so you may want to check into that.

0:4:26.550 --> 0:4:28.870

Walters, Kevin

I have mine set up so that it can't happen.

0:4:30.470 --> 0:4:35.550

Brittingham, Todd

Ohh, it's supposedly not supposed to happen in any situation, but it can be it.

0:4:32.780 --> 0:4:35.680

Walters, Kevin

Well, yeah, but right, yeah.

0:4:35.610 --> 0:4:36.500

Brittingham, Todd

It can be thwarted.

0:4:36.510 --> 0:4:36.880

Brittingham, Todd

It can.

0:4:38.990 --> 0:4:39.360

Walters, Kevin

Yeah.

0:4:36.990 --> 0:4:41.620

Brittingham, Todd

They can be talked into it, and if you've ever spent days on the.

0:4:39.370 --> 0:4:43.300

Walters, Kevin

Supposedly they have to get permission through mining before they can do it, but yeah.

0:4:42.560 --> 0:4:44.470

Brittingham, Todd

Yeah, yeah.

0:4:44.480 --> 0:4:50.730

Brittingham, Todd

If you've ever spent days on the phone with the operators at cell phone places, they don't even follow the wrong rules.

0:4:50.740 --> 0:5:5.400

Brittingham, Todd

You can have security on there and you can call back the next day and ask to make changes, and they're not following their own security procedures, so trusting the the the currently hired, you know operators on those is not a security level.

0:5:5.410 --> 0:5:9.350

Brittingham, Todd

I think we should, you know, build a foundation on.

0:5:13.50 --> 0:5:13.240

Brittingham, Todd

I'm not.

0:5:11.620 --> 0:5:14.310

Walters, Kevin

Yeah, that's gonna let you down and says, but more than likely.

0:5:14.540 --> 0:5:16.950

Walters, Kevin

An app smoke, and the more likely way it'll probably go.

0:5:18.730 --> 0:5:19.930

Walters, Kevin

Misty, you had your hand up.

0:5:19.940 --> 0:5:20.960

Walters, Kevin

Did you still have a question?

0:5:21.820 --> 0:5:23.650

Sommers, Misty

Yeah, I was just gonna say I know there were.

0:5:23.720 --> 0:5:24.360

Sommers, Misty

There were a couple.

0:5:26.320 --> 0:5:46.260

Sommers, Misty

Software companies that we have to log into when we authenticate it like even for like International Baccalaureate and things like that and College Board, college, college source, I don't know they they have an option that sends an authentication to your email address not your cell phone number.

0:5:46.270 --> 0:5:52.30

Sommers, Misty

But you can still get to your email from your cell phone, which is a whole other security aspect.

0:5:52.40 --> 0:5:53.910

Sommers, Misty

So yeah, I just, yeah.

0:5:55.730 --> 0:5:56.130

Walters, Kevin

Yeah.

0:5:56.140 --> 0:6:2.100

Walters, Kevin

It's either that or like ours is actually an app that you just received the notification in and you prove we're deny.

0:6:2.580 --> 0:6:4.910

Walters, Kevin

So OK.

0:6:5.120 --> 0:6:7.70

Walters, Kevin

Any other thoughts or questions on that for me?

0:6:7.80 --> 0:6:7.380

Walters, Kevin

Move on.

0:6:11.340 --> 0:6:11.800

Walters, Kevin

OK.

0:6:12.860 --> 0:6:16.120

Walters, Kevin

Next on the list is just another here.

0:6:16.180 --> 0:6:16.930

Walters, Kevin

It's a warning.

0:6:16.940 --> 0:6:17.930

Walters, Kevin

It's coming up again.

0:6:17.940 --> 0:6:29.840

Walters, Kevin

The HCI user audit starts again July 1st, so all users, if you're the data liaison, financial aid liaison, I review your users and approve them again.

0:6:30.210 --> 0:6:46.910

Walters, Kevin

And as I did in the January 1, if you're the data liaison, I will be sending you an email early July asking you to verify your account with me, because I need to approve your your account as a dated liaison, so.

0:6:48.850 --> 0:6:55.950

Walters, Kevin

Just a warning that will be coming sometime early in July is when I'll be sending that and I'll send a reminder too again but.

0:6:58.470 --> 0:7:0.160

Walters, Kevin

That that process will kick off again.

0:7:0.170 --> 0:7:2.340

Walters, Kevin

Then in a questions on that.

0:7:5.740 --> 0:7:6.320

Walters, Kevin

OK.

0:7:7.30 --> 0:7:15.390

Walters, Kevin

OK, next we have a Paula Compton and Joy Livergood who are joining us from our articulation and transfer.

0:7:15.930 --> 0:7:24.920

Walters, Kevin

And they wanted to go a little bit over or some AC file, credit coding and training that they have available and I'll let them take over from there.

0:7:31.770 --> 0:7:33.820

Walters, Kevin

You're muted there, pal, if you're talk.

0:7:33.290 --> 0:7:33.930

Compton, Paula

Thank you.

0:7:34.0 --> 0:7:34.290

Compton, Paula

Yeah.

0:7:34.300 --> 0:7:35.350

Compton, Paula

Good morning, everyone.

0:7:35.460 --> 0:7:42.300

Compton, Paula

Thank you for allowing us to meet with you during this time to give you an update on a very important project that we're doing.

0:7:42.490 --> 0:7:49.710

Compton, Paula

It's called the coding project and so we just want a few minutes of your time to let you know what it's about.

0:7:49.920 --> 0:7:55.590

Compton, Paula

And then to invite you to a meeting that we're gonna be hosting, and I'm gonna turn over to Joy Livergood.

0:7:59.170 --> 0:8:0.180

Compton, Paula

Your are you there?

0:8:0.280 --> 0:8:0.930

Compton, Paula

There she goes.

0:8:0.740 --> 0:8:2.570

Livergood, Joy

Yes, just had to unmute.

0:8:2.650 --> 0:8:3.730

Livergood, Joy

Ah, thank you, Paula.

0:8:3.790 --> 0:8:6.870

Livergood, Joy

A lot of familiar faces on here, so that's that's a good thing.

0:8:7.80 --> 0:8:9.490

Livergood, Joy

I see Stephanie and Kelly and Thomas.

0:8:10.320 --> 0:8:12.140

Livergood, Joy

So this is this is some good stuff.

0:8:13.510 --> 0:8:23.800

Livergood, Joy

We basically went through and did a review of the coding data and realized that things weren't exactly what we thought they would be.

0:8:23.810 --> 0:8:25.940

Livergood, Joy

And there's a need for clarity.

0:8:26.150 --> 0:8:33.480

Livergood, Joy

So just to give you an introduction here, mostly all a good many of you know what the coding project is about.

0:8:33.490 --> 0:8:46.180

Livergood, Joy

Basically, it's the assistance that we provide so that the coding can everybody doing the coding can be on the same page and then once that happens, we can all.

0:8:48.710 --> 0:8:55.320

Livergood, Joy

Submitting the same sort of things and the data can be used to, you know, for various purposes of evaluation.

0:8:55.810 --> 0:8:56.260

Livergood, Joy

Umm.

0:8:56.810 --> 0:8:57.690

Livergood, Joy

Much of that work?

0:8:57.950 --> 0:9:5.760

Livergood, Joy

Umm is done at ODHE, so we are very interested in, you know, getting things right.

0:9:8.780 --> 0:9:8.960

Aaron M

Yeah.

0:9:6.610 --> 0:9:19.820

Livergood, Joy

So we've spent the last couple months going through, you know everything from beginning to end about what the coding project is about and realize basically there was a need to clarify.

0:9:21.490 --> 0:9:21.790

Aaron M

Ah.

0:9:24.580 --> 0:9:25.210

Aaron M

That's enough.

0:9:25.240 --> 0:9:25.830

Livergood, Joy

I I keep.

0:9:26.560 --> 0:9:27.130

Livergood, Joy

I'm sorry.

0:9:27.200 --> 0:9:28.300

Livergood, Joy

Was somebody asking the question?

0:9:30.260 --> 0:9:30.750

Livergood, Joy

I'm sorry.

0:9:30.800 --> 0:9:49.670

Livergood, Joy

OK, so we need to we realized the need to clarify the project definition and its goal, the coding and the coding processes, the concept of source for in state initiatives, out-of-state credits and other credits that may be come into the institutions.

0:9:50.100 --> 0:9:55.50

Livergood, Joy

We also realized that we needed to go over the tools and clarify their use.

0:9:55.60 --> 0:10:2.210

Livergood, Joy

They have been revised and hopefully simplified, and then we wanted to talk about in this training the timely reporting.

0:10:2.520 --> 0:10:12.130

Livergood, Joy

So essentially this is what we've developed a training around and we will be providing that training in an outcome based learning approach.

0:10:12.460 --> 0:10:28.540

Livergood, Joy

So the outcome based learning approach basically is an opportunity for the learners to be able to hear the information and then apply it to different scenarios and use the tools to have some practicality to it.

0:10:29.570 --> 0:10:30.980

Livergood, Joy

So that is our goal.

0:10:31.250 --> 0:10:36.40

Livergood, Joy

And then and in the training as part of the training, we'll have a follow up plan that will present.

0:10:37.290 --> 0:10:42.140

Livergood, Joy

This training will be held on July 12th from 1:00 to 2:30.

0:10:42.330 --> 0:10:46.520

Livergood, Joy

It will be via Webex and all of you all will get an invitation.

0:10:47.890 --> 0:11:4.370

Livergood, Joy

Right now I have a invitation invitee list composed and there's well over 150 people, but do feel free to share this with other folks that you think could benefit from the training and.

0:11:6.190 --> 0:11:7.280

Livergood, Joy

That's all we got.

0:11:8.130 --> 0:11:11.20

Livergood, Joy

So this this hopefully felt like a commercial.

0:11:11.90 --> 0:11:12.500

Livergood, Joy

That's exactly what it is.

0:11:12.710 --> 0:11:14.920

Livergood, Joy

We we were really want you guys to attend.

0:11:15.350 --> 0:11:25.590

Livergood, Joy

You guys are really crucial to the process of having success with the coding project and are there any questions?

0:11:29.810 --> 0:11:30.800

Livergood, Joy

No questions, Kelly.

0:11:33.730 --> 0:11:34.570

Livergood, Joy

Alright, thank you.

0:11:33.800 --> 0:11:36.560

Anastasia Milakovic

Can you just repeat the date and time real quick joy.

0:11:37.650 --> 0:11:39.890

Livergood, Joy

July 12th, from 1:00 to 2:30.

0:11:40.870 --> 0:11:41.800

Anastasia Milakovic

Like thanks.

0:11:41.30 --> 0:11:42.910

Walters, Kevin

Right now decide the.

0:11:41.330 --> 0:11:43.150

Livergood, Joy

It was that Stephanie.

0:11:44.950 --> 0:11:45.750

Livergood, Joy

Who asked the question?

0:11:45.400 --> 0:11:45.750

Anastasia Milakovic

It was.

0:11:46.190 --> 0:11:47.890

Anastasia Milakovic

It was me, Annie at Columbus State.

0:11:47.880 --> 0:11:48.270

Livergood, Joy

Any.

0:11:48.320 --> 0:11:48.690

Livergood, Joy

OK.

0:11:48.700 --> 0:11:49.790

Livergood, Joy

Andy, you're on my list.

0:11:49.880 --> 0:11:50.320

Livergood, Joy

I got you.

0:11:50.110 --> 0:11:51.550

Anastasia Milakovic

Yeah. Thanks.

0:11:51.170 --> 0:11:51.880

Livergood, Joy

Yeah.

0:11:51.930 --> 0:11:54.260

Livergood, Joy

So yeah.

0:11:52.970 --> 0:11:57.610

Walters, Kevin

And join Thursday is the 11th if I'm looking at the right thing here.

0:11:59.460 --> 0:11:59.980

Walters, Kevin

So.

0:11:59.620 --> 0:12:1.220

Livergood, Joy

Uh, no.

0:12:2.970 --> 0:12:3.260

Parrot, Benjamin

Alright.

0:12:1.230 --> 0:12:6.630

Livergood, Joy

Our coding training will actually be on July 12th at 1:00 to 2:30.

0:12:7.140 --> 0:12:8.290

Parrot, Benjamin

Which is a Friday joy.

0:12:9.110 --> 0:12:10.320

Walters, Kevin

Yeah, that's what I was getting at.

0:12:10.650 --> 0:12:10.810

Parrot, Benjamin

Yeah.

0:12:12.750 --> 0:12:13.110

Livergood, Joy

OK.

0:12:10.330 --> 0:12:14.280

Walters, Kevin

It's either a yeah, either the day or the day was, yeah.

0:12:14.470 --> 0:12:15.550

Livergood, Joy

You're you, you guys.

0:12:15.560 --> 0:12:16.420

Livergood, Joy

You guys got me.

0:12:16.480 --> 0:12:17.170

Livergood, Joy

You guys got me.

0:12:17.180 --> 0:12:17.720

Livergood, Joy

You're good.

0:12:17.790 --> 0:12:19.60

Livergood, Joy

Yes, it is a Friday.

0:12:19.190 --> 0:12:22.970

Livergood, Joy

It was originally scheduled for Thursday, so I will make that adjustment.

0:12:23.70 --> 0:12:24.640

Livergood, Joy

Thank you for bringing that to my attention.

0:12:24.970 --> 0:12:28.20

Livergood, Joy

It'll be on Friday, July 12th, 1:00 to 2:30.

0:12:28.110 --> 0:12:28.900

Livergood, Joy

Thank you.

0:12:29.270 --> 0:12:29.740

Zimmerman, Alissa

Joe will.

0:12:28.990 --> 0:12:30.930

Livergood, Joy

Thank you, Kevin, for allowing allowing us.

0:12:31.560 --> 0:12:32.820

Zimmerman, Alissa

Joe, will that be recorded?

0:12:32.830 --> 0:12:33.880

Zimmerman, Alissa

Because I will be on vacation.

0:12:34.840 --> 0:12:35.470

Livergood, Joy

It will.

0:12:35.520 --> 0:12:36.290

Livergood, Joy

Yes, it will.

0:12:36.300 --> 0:12:43.180

Livergood, Joy

And on that, on that note as well, all the online information will be updated.

0:12:43.190 --> 0:12:50.540

Livergood, Joy

So if you're familiar with the interactive decision tree as well as the flow chart also on the AC file page, there are a couple definitions.

0:12:50.550 --> 0:12:55.800

Livergood, Joy

We've updated all those so all that information will be available also on the transfer website.

0:12:56.720 --> 0:13:1.930

Livergood, Joy

We have a coding page where information will be refreshed as well.

0:13:3.370 --> 0:13:5.750

Livergood, Joy

So anything else?

0:13:7.620 --> 0:13:12.720

Livergood, Joy

Thank you again Kevin, for allowing us to have this opportunity to speak with this group.

0:13:13.960 --> 0:13:14.140

Walters, Kevin

Yeah.

0:13:13.980 --> 0:13:15.990

Compton, Paula

Thank you and thank you for your interest too.

0:13:16.0 --> 0:13:17.60

Compton, Paula

We appreciate it very much.

0:13:22.590 --> 0:13:29.760

Walters, Kevin

Right next item on the list was Senate Bill 135. Submissions status.

0:13:29.810 --> 0:13:31.670

Walters, Kevin

Uh, Fred, did you wanna talk to that?

0:13:36.250 --> 0:13:36.900

Church, Fred

Yeah. Fine.

0:13:36.910 --> 0:13:39.180

Church, Fred

Kevin, Umm, here's what I do.

0:13:39.190 --> 0:13:42.330

Church, Fred

My hamlet impression and suffer the slings and arrows.

0:13:42.960 --> 0:13:45.60

Church, Fred

Umm, I think that.

0:13:47.500 --> 0:13:50.420

Church, Fred

Almost everybody has submitted at this point.

0:13:50.670 --> 0:13:52.800

Church, Fred

Umm, a number of you.

0:13:52.810 --> 0:14:7.750

Church, Fred

We tried to contact every single one of you individually, umm, and either in some cases just say thank you for submitting and a lot of cases mention a couple of things.

0:14:7.760 --> 0:14:14.10

Church, Fred

Maybe that the we're different in your report than in the updated scorecard or?

0:14:16.350 --> 0:14:22.900

Church, Fred

In some cases mentioned that there was something in the PSE O data that was not quite the way that you reported it.

0:14:22.910 --> 0:14:24.450

Church, Fred

Those were the two most common things.

0:14:25.50 --> 0:14:25.580

Church, Fred

Umm.

0:14:26.110 --> 0:14:30.780

Church, Fred

Updates to the scorecard that required some adjustment on your part.

0:14:30.790 --> 0:14:37.840

Church, Fred

Or, umm, something in the pseo data that was not clear and so that required some adjustment.

0:14:37.850 --> 0:14:40.850

Church, Fred

There was the issue for the university.

0:14:40.860 --> 0:14:42.710

Church, Fred

Some of the universities of using the.

0:14:44.620 --> 0:14:54.310

Church, Fred

iPad's graduation rates, rather than our published graduation rates in the those were really restricted to the cases where.

0:14:56.460 --> 0:15:8.910

Church, Fred

Out of the university had a very large number or maybe even all of their students that were reported as using as an with an academic intention code of unknown.

0:15:9.500 --> 0:15:16.770

Church, Fred

Because we rely on those academic intention codes to form the first time full-time degree seeking cohort.

0:15:16.780 --> 0:15:21.330

Church, Fred

So again, in some of the university cases, those were different than iPads.

0:15:21.340 --> 0:15:43.170

Church, Fred

Because of that academic intention, code issue and and so where those were the case and you asked to use the iPad's graduation rate rather than the AGEI reported graduation rate on our website, we said, you know, do that those those were the major things that we've had.

0:15:44.570 --> 0:15:59.480

Church, Fred

We've contacted you about possibly uh submitting in a revised report, so we have either initial reports or revised reports from almost everybody.

0:16:0.840 --> 0:16:6.750

Church, Fred

We are planning to publish them on our DHE website next week.

0:16:7.600 --> 0:16:11.390

Church, Fred

I I see that we have gotten some even today this morning.

0:16:12.80 --> 0:16:13.350

Church, Fred

So thank you for those.

0:16:14.210 --> 0:16:15.850

Church, Fred

And if there are?

0:16:18.890 --> 0:16:20.200

Church, Fred

Still outstanding questions.

0:16:20.210 --> 0:16:23.80

Church, Fred

I know that both Thomas and Chris Dahl had.

0:16:24.860 --> 0:16:27.60

Church, Fred

Pointed out that there was a.

0:16:28.890 --> 0:16:35.790

Church, Fred

He difference between the interactive scorecard percent of students receiving federal loans and.

0:16:37.90 --> 0:16:37.600

Church, Fred

Who?

0:16:37.810 --> 0:16:45.900

Church, Fred

The federal loan, the percentage of students receiving federal loans in the data template.

0:16:45.960 --> 0:16:54.820

Church, Fred

One of them looks at just the first time full-time students and the other one is all undergrads and the interactive.

0:16:57.320 --> 0:17:3.410

Church, Fred

Scorecard actually uses the all undergrads number and so that's the one that we've been asking for.

0:17:5.250 --> 0:17:16.510

Church, Fred

When we've been asking you to issue a revised report, and, as I said, Thomas and Chris both said, well, OK, but that's not what's actually in the template, right? You're there.

0:17:16.520 --> 0:17:27.90

Church, Fred

You were looking for the the variable that was just the first time full time, so I apologize for that and we will clear that up in the template.

0:17:27.100 --> 0:17:47.200

Church, Fred

I think for this year we really have been trying to mirror the interactive scorecard as much as possible, and one of the things that I said to Thomas and an email is that, you know, if we get feedback right, which I'm kind of hoping that we do and that this hasn't all been for you know, we publish all this stuff and then nobody looks at it and sends us any feedback.

0:17:47.840 --> 0:17:57.370

Church, Fred

Umm, if we get feedback, I'm hoping that we get a better sense of how important it is to the users, to the viewers, to to mirror the interactive scorecard.

0:17:57.380 --> 0:18:0.550

Church, Fred

Right, because that has been one of our goals we've tried to.

0:18:0.620 --> 0:18:9.990

Church, Fred

We've tried to make it so that you know, there's not confusion where if they look at your numbers and your cynical 135 report and they look at your numbers and the interactive scorecard, they'll match up.

0:18:12.570 --> 0:18:13.870

Church, Fred

Kelly, I see your hand is up.

0:18:16.910 --> 0:18:17.930

Kelly Neriani

Yeah.

0:18:17.970 --> 0:18:20.140

Kelly Neriani

So I'm a jerk, Fred.

0:18:20.690 --> 0:18:29.70

Kelly Neriani

I forgot that I owed you that revised report, so if you're publishing next week, ohhh.

0:18:29.350 --> 0:18:30.760

Kelly Neriani

What's when?

0:18:31.130 --> 0:18:34.840

Kelly Neriani

So I can get this done and be in compliance.

0:18:38.790 --> 0:18:39.290

Kelly Neriani

Oh really?

0:18:35.680 --> 0:18:39.490

Church, Fred

I mean, we can push it till later in the week, if that helps.

0:18:40.100 --> 0:18:40.300

Church, Fred

Yeah.

0:18:40.300 --> 0:18:41.520

Kelly Neriani

OK, because I.

0:18:41.170 --> 0:18:44.50

Church, Fred

I mean our our publishing, we can push until later in the week, yeah.

0:18:44.140 --> 0:18:45.50

Kelly Neriani

OK, cool.

0:18:45.220 --> 0:18:53.250

Kelly Neriani

Because I don't know if you noticed what Laurel and put in the chat about those of us who did this, like Johnny on the spot.

0:18:53.260 --> 0:18:56.430

Kelly Neriani

Like you guys actually use me as the example.

0:18:57.40 --> 0:18:57.440

Church, Fred

We did.

0:18:57.410 --> 0:19:2.230

Kelly Neriani

Umm, so my stuff is now out of date because I was first.

0:19:4.410 --> 0:19:4.530

Church, Fred

Yes.

0:19:3.100 --> 0:19:14.950

Kelly Neriani

Umm, so we might wanna try to align the timing of when it's due to when everything gets updated so that we're not doing it a couple times.

0:19:15.30 --> 0:19:15.710

Kelly Neriani

You know what I mean?

0:19:15.350 --> 0:19:16.730

Church, Fred

Yeah, and yeah, and.

0:19:28.470 --> 0:19:28.690

Kelly Neriani

Yeah.

0:19:18.890 --> 0:19:32.380

Church, Fred

We if there was a published scorecard update schedule before they actually did the update, I was not aware of it, right?

0:19:32.470 --> 0:19:33.320

Kelly Neriani

I don't think there was.

0:19:32.390 --> 0:19:33.520

Church, Fred

I know that there is a change.

0:19:33.530 --> 0:19:34.760

Church, Fred

I know that there is a change log.

0:19:35.610 --> 0:19:35.790

Kelly Neriani

Yeah.

0:19:36.440 --> 0:19:40.330

Church, Fred

And so you're the one of the problems with the change log.

0:19:40.340 --> 0:19:49.440

Church, Fred

And again, I don't know USD's intentions going forward is that if you look at it, it's, I mean, they're not precise dates, right?

0:19:49.450 --> 0:19:55.610

Church, Fred

It's like, well, we do one kind of in the fall in September and October and another one that's like in April or May.

0:19:55.670 --> 0:19:56.990

Church, Fred

A, umm.

0:19:57.370 --> 0:20:2.940

Church, Fred

And so we kind of got taken by surprise by this latest one that was done on May 6th.

0:20:3.70 --> 0:20:6.480

Church, Fred

We didn't know it was coming, and so we didn't.

0:20:6.490 --> 0:20:15.250

Church, Fred

You know, we kind of weren't aware of the fact that if you complied with the April 30th date, you're going to be out of step with the scorecard update that was published on May 6th.

0:20:16.40 --> 0:20:28.680

Church, Fred

Umm for next year, I think the intent you know, either we're going to have to do it very late again, which is not ideal, right?

0:20:36.840 --> 0:20:37.50

Walters, Kevin

Good.

0:20:28.820 --> 0:20:45.960

Church, Fred

If they publish another update in the spring and it's as late as say, you know May 6th was this year or you know we ask for it at such a time, you know, let's say January, February, when we're sure to have the fall update, right.

0:20:47.690 --> 0:20:47.830

Doll, Christopher

No.

0:20:46.350 --> 0:20:51.480

Church, Fred

And we don't worry about it being out of sync with whatever they do in April or May.

0:20:54.950 --> 0:20:56.550

Church, Fred

And I think I see Chris's hand up.

0:20:56.730 --> 0:20:59.20

Doll, Christopher

Ohh, just just a minor point.

0:20:59.30 --> 0:21:3.380

Doll, Christopher

When I went out to update our data this morning and pull it down, they actually did a update.

0:21:3.390 --> 0:21:7.650

Doll, Christopher

As of last week exactly, we could go on June 13th.

0:21:9.610 --> 0:21:11.150

Church, Fred

Oh, that's right, yeah.

0:21:10.770 --> 0:21:11.700

Doll, Christopher

Yeah, which caused me.

0:21:11.710 --> 0:21:14.390

Doll, Christopher

No amount of amusement and bemusement at the same time.

0:21:16.870 --> 0:21:17.150

Church, Fred

Yeah.

0:21:17.160 --> 0:21:19.10

Church, Fred

And we hadn't anticipated that one either.

0:21:19.280 --> 0:21:19.390

Doll, Christopher

Yeah.

0:21:19.60 --> 0:21:20.60

Church, Fred

I don't know.

0:21:20.130 --> 0:21:22.810

Church, Fred

I don't know what changed in that one, Chris.

0:21:22.820 --> 0:21:27.880

Church, Fred

I mean in the May 1, some of the variables changed a number of them didn't.

0:21:28.800 --> 0:21:35.540

Church, Fred

Umm for example, the the debt percentage ones did not change and we can't keep.

0:21:35.550 --> 0:21:36.920

Church, Fred

We can't keep updating, right?

0:21:37.820 --> 0:21:38.120

Doll, Christopher

Right.

0:21:36.930 --> 0:21:41.470

Church, Fred

If they're going to do it, you know every few weeks or something, I mean, as of this time, I think.

0:21:43.80 --> 0:21:45.610

Church, Fred

Being In Sync with the May scorecard is the best we can do.

0:21:46.320 --> 0:21:46.600

Doll, Christopher

OK.

0:21:52.550 --> 0:21:53.520

Walters, Kevin

All right, yeah.

0:21:53.590 --> 0:21:57.200

Walters, Kevin

You gotta point out the comment for Moreland too as well that you mentioned Kelly.

0:21:57.970 --> 0:22:5.280

Walters, Kevin

So last item on the list is House Bill 33, and I know Todd Brittingham had a come in early on about that Friday before you joined.

0:22:5.290 --> 0:22:7.580

Walters, Kevin

So if you wanna start with that, maybe Todd or.

0:22:11.550 --> 0:22:12.0

Walters, Kevin

You're muted.

0:22:16.480 --> 0:22:16.800

Brittingham, Todd

Thank you.

0:22:17.790 --> 0:22:22.780

Brittingham, Todd

Umm, I guess I I want to hear which who?

0:22:22.790 --> 0:22:23.860

Brittingham, Todd

Who put it together?

0:22:23.870 --> 0:22:42.220

Brittingham, Todd

And and that it's out for our comments and I don't know if they wanted like critical feedback or if they just you know is it at a stage where where they're ready to make modifications, if if our group were to have changes we wanted made.

0:22:43.540 --> 0:22:46.20

Church, Fred

Yeah, I I think as far as I know the answer is yes.

0:22:46.520 --> 0:22:54.420

Church, Fred

Umm so the the report was actually drafted Todd by the consultants, right?

0:22:54.430 --> 0:22:57.310

Church, Fred

The HMM consultants who have been working closely with.

0:22:59.20 --> 0:23:8.320

Church, Fred

A group that includes OC staff and some of the IR staff on in this meeting today like Kelly.

0:23:9.60 --> 0:23:14.830

Church, Fred

Umm, it has, as you say, went out on June 7th.

0:23:16.40 --> 0:23:16.540

Church, Fred

It went to.

0:23:18.390 --> 0:23:34.460

Church, Fred

The all three of the sectors that are mentioned in the uncodified law, the community colleges, the OTC's and the university regional campuses, umm and my understanding is yes.

0:23:34.470 --> 0:23:45.770

Church, Fred

If you have critical comments where you're, you know, suggesting something different in terms of the recommendations, not just, you know, in other words, not not cosmetic things, substantive things.

0:23:45.780 --> 0:23:50.520

Church, Fred

Yes, I think that they are looking for those in advance of the well.

0:23:50.530 --> 0:23:51.620

Church, Fred

The deadline is tomorrow.

0:23:51.690 --> 0:23:55.60

Church, Fred

Actually, June 21 is the end of the public comment period.

0:23:56.40 --> 0:23:56.480

Brittingham, Todd

Right.

0:23:56.860 --> 0:23:58.950

Brittingham, Todd

It was sent to my president last Thursday.

0:23:59.380 --> 0:24:1.430

Brittingham, Todd

So and I got it on Friday.

0:24:1.440 --> 0:24:5.380

Brittingham, Todd

So he didn't get it before that date.

0:24:7.150 --> 0:24:9.160

Church, Fred

OK, it went to.

0:24:11.810 --> 0:24:21.780

Church, Fred

I believe it went to the associations on June 7th and then I think that they were distributing it to all the individual Members.

0:24:22.130 --> 0:24:26.830

Church, Fred

So umm, if he didn't get it until.

0:24:28.950 --> 0:24:31.740

Church, Fred

I guess you're saying June 13th.

0:24:31.750 --> 0:24:34.770

Church, Fred

Was it or something like that?

0:24:33.850 --> 0:24:34.950

Brittingham, Todd

Yes, last Thursday.

0:24:34.820 --> 0:24:35.680

Church, Fred

Yeah, yeah.

0:24:40.870 --> 0:24:41.150

Brittingham, Todd

The.

0:24:38.940 --> 0:24:45.800

Church, Fred

If that means that you need an extension to the public comment period, right beyond tomorrow?

0:24:46.800 --> 0:24:47.300

Church, Fred

Umm.

0:24:48.990 --> 0:24:56.510

Church, Fred

If you tell me I can contact the ECM folks and ask if they can take comments.

0:24:56.590 --> 0:24:58.510

Church, Fred

You know, for example, as late as next Monday.

0:25:3.60 --> 0:25:5.270

Kelly Neriani

Aren't we meeting tomorrow about this?

0:25:5.320 --> 0:25:5.760

Kelly Neriani

Am I wrong?

0:25:6.210 --> 0:25:7.300

Church, Fred

Yes, there is a meeting.

0:25:7.310 --> 0:25:10.200

Church, Fred

Two, I will not be at that meeting, but yes, there is a meeting tomorrow, Kelly.

0:25:10.930 --> 0:25:12.270

Kelly Neriani

OK, so it might be.

0:25:11.920 --> 0:25:16.740

Church, Fred

And so that would be, that would be another opportunity for you, Todd, to if you don't have them all written up.

0:25:17.630 --> 0:25:19.300

Church, Fred

Umm, you could.

0:25:22.750 --> 0:25:22.970

Church, Fred

Yeah.

0:25:21.150 --> 0:25:26.580

Kelly Neriani

You could just email one of us or like let us know.

0:25:26.670 --> 0:25:37.880

Kelly Neriani

I mean, I ideally it would be good if we had it before tomorrow's meeting so that we knew what we were doing in our final draft.

0:25:37.890 --> 0:25:44.880

Kelly Neriani

Cause I think we're we're really needing to get that final draft done like ASAP, sorry.

0:25:48.280 --> 0:26:4.910

Brittingham, Todd

The the email that was sent to our president said that the responses were to be submitted no later than Friday at, you know, end of day, which is not going to be in time for a meeting.

0:26:4.920 --> 0:26:6.140

Brittingham, Todd

If you have a meeting during the day.

0:26:8.540 --> 0:26:8.860

Brittingham, Todd

Right.

0:26:7.860 --> 0:26:9.920

Kelly Neriani

Sorry, Kelly didn't set the time.

0:26:11.510 --> 0:26:11.850

Brittingham, Todd

Kelly.

0:26:16.480 --> 0:26:16.610

Doll, Christopher

But.

0:26:14.910 --> 0:26:17.580

Kelly Neriani

Sorry Todd, Ohh own it.

0:26:17.590 --> 0:26:19.330

Kelly Neriani

But I didn't spend the time.

0:26:18.990 --> 0:26:20.300

Brittingham, Todd

OK, you.

0:26:22.550 --> 0:26:23.980

Brittingham, Todd

I just didn't know if there was another killing.

0:26:26.250 --> 0:26:26.520

Brittingham, Todd

Speak.

0:26:27.320 --> 0:26:34.140

Brittingham, Todd

Umm OK, so I I kind of want that's what I was asking at the beginning of the meeting was I was trying to figure out like, who's the audience?

0:26:34.150 --> 0:26:36.930

Brittingham, Todd

Who is who has drafted this?

0:26:37.580 --> 0:26:39.210

Brittingham, Todd

And I didn't wanna like.

0:26:41.570 --> 0:26:46.460

Brittingham, Todd

You know, it was just this HCM group and they had done it without consultation with us.

0:26:48.530 --> 0:26:49.390

Kelly Neriani

Now it was.

0:26:46.470 --> 0:26:57.430

Brittingham, Todd

Then I would have said ohh OK I know I know how to phrase things better, but if it's if it's coming from you know our group or it's with with a lot of input from our group.

0:26:57.950 --> 0:26:59.170

Church, Fred

It's with a lot of input, yeah.

0:26:58.300 --> 0:27:1.730

Kelly Neriani

Group ask yes and and yes it is.

0:27:1.820 --> 0:27:3.570

Kelly Neriani

It is the funding consultation group.

0:27:3.580 --> 0:27:4.550

Kelly Neriani

Sorry, Todd.

0:27:4.650 --> 0:27:12.70

Kelly Neriani

When when people say House Bill number Kelly has no idea what you're talking about because I can't keep up with these house bills.

0:27:12.80 --> 0:27:18.760

Kelly Neriani

But yes, this is the short term certificate funding consultation work and.

0:27:20.880 --> 0:27:21.670

Kelly Neriani

Yeah.

0:27:21.680 --> 0:27:26.840

Kelly Neriani

So we've been working on this for I I wanna say since September.

0:27:36.320 --> 0:27:36.590

Brittingham, Todd

The.

0:27:28.370 --> 0:27:43.470

Kelly Neriani

Uh, and we've put a lot of thought into it, but we do need feedback from other schools because, I mean, Thomas and I can't drive everything based on our thoughts.

0:27:46.750 --> 0:27:47.570

Brittingham, Todd

Sure, sure.

0:27:49.250 --> 0:27:53.40

Kelly Neriani

No laurelin it is not just credited certificates.

0:27:53.50 --> 0:27:58.390

Kelly Neriani

We're also looking at bringing in the short term workforce ones, so.

0:27:58.50 --> 0:27:58.440

Church, Fred

Hmm.

0:28:0.580 --> 0:28:2.980

Kelly Neriani

Yeah, please give comments.

0:28:6.720 --> 0:28:12.820

Kelly Neriani

Especially if you're looking at it and you're saying I can't do this, that's we, we really need feedback on that.

0:28:12.640 --> 0:28:13.580

Taylor, Loralyn

I can't do this.

0:28:14.690 --> 0:28:15.280

Kelly Neriani

OK.

0:28:15.530 --> 0:28:16.460

Kelly Neriani

Thank you.

0:28:16.470 --> 0:28:16.890

Kelly Neriani

But that's.

0:28:19.830 --> 0:28:20.620

Kelly Neriani

You're better.

0:28:21.140 --> 0:28:21.810

Taylor, Loralyn

Is that enough?

0:28:20.710 --> 0:28:22.20

Kelly Neriani

You better come up to that.

0:28:22.610 --> 0:28:24.90

Kelly Neriani

Yes, that's great, but.

0:28:25.890 --> 0:28:28.320

Kelly Neriani

Listen, I wanted to see that too.

0:28:28.390 --> 0:28:31.140

Kelly Neriani

However, I'm told that's not an option.

0:28:31.150 --> 0:28:31.700

Kelly Neriani

Laura Lynn.

0:28:32.980 --> 0:28:35.760

Taylor, Loralyn

It rarely is, but it should be.

0:28:35.830 --> 0:28:37.850

Kelly Neriani

I agreed.

0:28:38.500 --> 0:28:38.720

Brittingham, Todd

There's.

0:28:38.20 --> 0:28:49.850

Kelly Neriani

But yeah, if you if you do look at it and you say this timeline is horrible, you're free to suggest like, hey, it would be better if you moved the timeline to XY and Z.

0:28:52.180 --> 0:28:52.370

Brittingham, Todd

Here.

0:28:51.720 --> 0:29:8.160

Church, Fred

And and that was one of the things that the survey, uh, that went out was trying to capture right on how doable it was, for example to incorporate non credit work in particular right into.

0:29:10.860 --> 0:29:16.790

Church, Fred

You're learning management system reports and your student information system.

0:29:18.110 --> 0:29:18.390

Brittingham, Todd

The.

0:29:18.240 --> 0:29:27.400

Church, Fred

Reports and so that those responses should have informed the timeline that's in the draft report.

0:29:31.810 --> 0:29:34.550

Brittingham, Todd

Here's a real basic question if I may.

0:29:36.320 --> 0:29:54.410

Brittingham, Todd

The recommendation, you know, starts out in the first paragraph, explaining that, you know, we have to make this recommendation pursuant to House Bill 33, and then they give the specific sub paragraph or code somewhere further down.

0:29:56.700 --> 0:30:6.920

Brittingham, Todd

And the language in the House Bill 33 that they refer to specifically talks all about collecting data, you know, having to, you know, submit data so that.

0:30:7.70 --> 0:30:21.180

Brittingham, Todd

The you know that it's a requirement of the grant, but it it does not specifically suggest anything about wage related data or evaluating employment outcomes.

0:30:23.70 --> 0:30:28.580

Brittingham, Todd

Did did that get added at some point or is that referenced somewhere else in the House bill?

0:30:29.690 --> 0:30:30.580

Church, Fred

No, it's not.

0:30:30.670 --> 0:30:32.60

Church, Fred

It's not in the law.

0:30:32.790 --> 0:30:33.70

Brittingham, Todd

OK.

0:30:32.330 --> 0:30:43.330

Church, Fred

That was added by the consultation group as a way of getting at the value of the certificates or credentials that are granted.

0:30:45.780 --> 0:30:46.230

Brittingham, Todd

OK.

0:30:46.740 --> 0:30:50.940

Brittingham, Todd

So that was that's that's a recommendation coming from us, not from the legislators.

0:30:52.910 --> 0:30:53.310

Church, Fred

Yes.

0:30:54.670 --> 0:30:54.850

Brittingham, Todd

OK.

0:30:54.570 --> 0:30:55.340

Kelly Neriani

Yeah.

0:31:1.680 --> 0:31:1.950

Brittingham, Todd

The.

0:30:55.550 --> 0:31:9.640

Kelly Neriani

So to be fair, so we we understand we're gonna start receiving funding for our short term credentials in our SSI or some somewhere we'll get funding from the state for this.

0:31:9.810 --> 0:31:18.940

Kelly Neriani

So to justify why the state would want to pay us for awarding short term credentials, we need to show their value.

0:31:29.640 --> 0:31:29.930

Brittingham, Todd

The.

0:31:19.50 --> 0:31:35.840

Kelly Neriani

OK, so if we can say, hey, this person went from earning \$10.00 an hour, they're earning \$25.00 an hour after they've got this short term credential that gives us a little more weight behind it to say here's why government you wanna fund this?

0:31:36.240 --> 0:31:38.610

Kelly Neriani

Does that make sense for why we did it, Todd?

0:31:39.390 --> 0:31:40.720

Brittingham, Todd

I understand your rationale, yes.

0:31:42.250 --> 0:31:43.690

Kelly Neriani

I know it's a pita, sorry.

0:31:45.420 --> 0:31:49.790

Walters, Kevin

Those men, there's a bunch of comments and things in the chat as well.

0:31:50.360 --> 0:31:53.90

Walters, Kevin

One thing that someone mentioned was a timeline.

0:31:53.100 --> 0:31:58.970

Walters, Kevin

Is there a like a real quick timeline you can give on this cause the the deadline for comments tomorrow, right?

0:31:58.980 --> 0:32:2.260

Walters, Kevin

But it's submission and things like that aren't happening yet.

0:32:3.330 --> 0:32:4.640

Kelly Neriani

No, no submission.

0:32:5.880 --> 0:32:6.90

Church, Fred

No.

0:32:4.650 --> 0:32:6.380

Kelly Neriani

Who wants to share the timeline?

0:32:7.440 --> 0:32:8.990

Kelly Neriani

Our proposed timeline, anybody?

0:32:12.630 --> 0:32:12.900

Kelly Neriani

Fred.

0:32:14.530 --> 0:32:15.440

Church, Fred

Yeah, I can pull it up.

0:32:16.210 --> 0:32:16.490

Kelly Neriani

OK.

0:32:18.360 --> 0:32:18.600

Kelly Neriani

OK.

0:32:16.840 --> 0:32:18.760

Church, Fred

It'll take me a minute. Umm.

0:32:20.990 --> 0:32:24.960

Church, Fred

Yeah, the recommendations are just those, right?

0:32:27.20 --> 0:32:30.830

Church, Fred

It doesn't end, and they're broad recommendations.

0:32:31.20 --> 0:32:38.220

Church, Fred

So you know it's not going to come with like for example a file submission format or anything like that.

0:32:38.230 --> 0:32:48.190

Church, Fred

There's not going to be an appendix to the report that says, you know, here's a new non credit data file submission template.

0:32:48.200 --> 0:32:50.50

Church, Fred

And here's what you're going to have to report.

0:32:50.60 --> 0:32:53.310

Church, Fred

And you're going to have to report it by X date, right?

0:32:53.700 --> 0:32:54.670

Church, Fred

That's not part of it.

0:32:54.680 --> 0:33:20.230

Church, Fred

I mean, there's a recognition that I'm there is going to be like in order to make this real in order to operationalize it, there will have to be discussions beyond this June 30th time that's in the law where we say, OK, these are the specific variables that are going to be reported.

0:33:20.240 --> 0:33:28.180

Church, Fred

And here's the definition of those variables, and that will eventually turn into a template, right?

0:33:28.230 --> 0:33:35.950

Church, Fred

A real file submission template, and once we decide on that, then there will be a certain number of months.

0:33:36.360 --> 0:33:42.240

Church, Fred

You know, after this decided on that you have to comply, I mean as you know it's usually 6, right?

0:33:42.590 --> 0:33:48.510

Church, Fred

So six months after that's decided on, you'll actually have to start submitting a file of that noncredit data.

0:33:49.190 --> 0:33:53.720

Church, Fred

Umm, so while I've been talking, I've been looking for that timeline.

0:33:55.10 --> 0:34:2.780

Kelly Neriani

So and just to clarify to everybody who's saying we don't have non credit in our SSIS, we know that.

0:34:3.360 --> 0:34:3.460

Church, Fred

Yes.

0:34:2.850 --> 0:34:11.120

Kelly Neriani

I don't know if non credit in my SSIS either, so what's going to happen is we're gonna start with baby steps.

0:34:11.510 --> 0:34:21.230

Kelly Neriani

So putting in non credit credentials awarded could be two years down the line like we're we're talking.

0:34:21.240 --> 0:34:29.190

Kelly Neriani

We're just want you to know that right now, we'll we'll start with like maybe four credit and then we're going.

0:34:29.230 --> 0:34:34.170

Kelly Neriani

We're gonna work up to this in baby steps because trust me, I know how bad this is.

0:34:37.460 --> 0:34:37.730

Church, Fred

Yeah.

0:34:37.740 --> 0:34:43.610

Church, Fred

And the survey that I referred to was meant to get a sense of how difficult it would.

0:34:43.620 --> 0:34:50.480

Church, Fred

It did not presume that you had these things in your information systems instead.

0:34:52.420 --> 0:34:58.920

Church, Fred

It was asking about how difficult it would be to incorporate them in your information systems.

0:35:13.90 --> 0:35:14.860

Church, Fred

Sorry, Kelly, I'm still looking for.

0:35:14.870 --> 0:35:16.350

Church, Fred

I have a draft version of this.

0:35:21.600 --> 0:35:21.680

Kelly Neriani

I.

0:35:16.360 --> 0:35:23.300

Church, Fred

What I'm doing is I'm looking for a finalized version can because I'm not sure I want to trust the draft.

0:35:23.730 --> 0:35:24.780

Kelly Neriani

No, I hear you.

0:35:24.790 --> 0:35:25.580

Kelly Neriani

Why don't?

0:35:25.650 --> 0:35:42.430

Kelly Neriani

What if we like agree to email it once we've had our meeting, so that'll make people feel more confident that we're not coming up with things that are totally unrealistic.

0:35:42.440 --> 0:35:43.720

Kelly Neriani

Would that make you all feel better?

0:35:48.570 --> 0:35:53.430

Kelly Neriani

I hope you all trust me when I say I I look out for you in our meetings.

0:35:54.430 --> 0:35:55.890

Kelly Neriani

I'm the first to say the word no.

0:36:0.520 --> 0:36:0.770

Kelly Neriani

Talk.

0:35:58.320 --> 0:36:1.460

Thomas Benjamin

Unless it's me, I look out, too, Kelly night together.

0:36:0.800 --> 0:36:4.230

Kelly Neriani

I agree Thomas is just as vigorous as me.

0:36:5.30 --> 0:36:5.290

Brittingham, Todd

The.

0:36:4.380 --> 0:36:12.200

Kelly Neriani

We're not trying to make this some onerous task y'all know, I'm a short crew here at Clark State College.

0:36:12.210 --> 0:36:13.250

Kelly Neriani

There are two of us.

0:36:16.190 --> 0:36:17.400

Church, Fred

So I have Kelly.

0:36:16.510 --> 0:36:17.500

Brittingham, Todd

And they're both named Kelly.

0:36:18.730 --> 0:36:23.210

Church, Fred

I have the Gantt chart, but the Gantt chart you know refers to.

0:36:25.380 --> 0:36:25.670

Brittingham, Todd

The.

0:36:24.890 --> 0:36:27.680

Church, Fred

Phases and so it doesn't really have.

0:36:27.690 --> 0:36:34.40

Church, Fred

I mean you need to combine it with the description of the phases to really get a sense of, you know what this means.

0:36:35.210 --> 0:36:35.530

Kelly Neriani

OK.

0:36:34.190 --> 0:36:39.900

Church, Fred

So I'm not sure I'm not so sure that displaying that is going to be all that helpful, right?

0:36:40.500 --> 0:36:41.480

Kelly Neriani

Well, OK.

0:36:43.320 --> 0:36:44.410

Kelly Neriani

Sorry about that, Fred.

0:36:44.480 --> 0:36:48.610

Kelly Neriani

I don't mean to put you on the spot there cause surely I don't have it either.

0:36:52.140 --> 0:36:53.790

Church, Fred

Yeah, I'm just.

0:36:53.860 --> 0:36:55.30

Church, Fred

I'm scrolling through here.

0:37:0.460 --> 0:37:7.490

Walters, Kevin

You want to just publish it if we find something or wait or take Kelly's suggestion and published in after the meeting tomorrow.

0:37:10.540 --> 0:37:18.130

Church, Fred

I'll see if there's something that's more if there's something that's more detailed, umm, you know that has all.

0:37:18.140 --> 0:37:20.850

Church, Fred

I'll show you the again, I'll show you what I mean with the Gantt chart.

0:37:20.860 --> 0:37:21.70

Church, Fred

Right.

0:37:21.80 --> 0:37:23.860

Church, Fred

And you'll see what I mean by the fact that it's not terribly useful.

0:37:29.400 --> 0:37:31.850

Church, Fred

Right, so this is the Gantt chart that I see.

0:37:33.340 --> 0:37:37.520

Church, Fred

And you know, if you don't know what exactly is within these phase two and phase three.

0:37:39.380 --> 0:37:43.120

Church, Fred

These definitions have phase two, and phase three is not wildly helpful to you, right?

0:37:46.190 --> 0:37:49.330

Church, Fred

My memory is that in fiscal year 25.

0:37:51.760 --> 0:37:58.80

Church, Fred

The phase two we're really talking about program level information, right?

0:37:58.90 --> 0:38:7.830

Church, Fred

So it's going to be what programs you offer and I think a measure of completions right of those programs and then?

0:38:7.380 --> 0:38:12.580

Kelly Neriani

And and I think the completions might have just been for credit.

0:38:14.160 --> 0:38:14.600

Kelly Neriani

Right.

0:38:15.760 --> 0:38:27.730

Kelly Neriani

So we were going to do program all programs in fiscal 25 credit and non credit and for credit I think we were going to do number of completions.

0:38:27.960 --> 0:38:29.100

Kelly Neriani

Thomas, correct me if I'm wrong.

0:38:31.630 --> 0:38:40.350

Thomas Benjamin

I think the intention was with the non credit program file to collect a raw numbers of credentials awarded, not the student level data which would be the later phase.

0:38:41.60 --> 0:38:41.180

Church, Fred

Yes.

0:38:46.170 --> 0:38:46.570

Kelly Neriani

Ohh.

0:38:41.450 --> 0:38:47.100

Thomas Benjamin

I think the the numbers of noncredit completions was still a earlier phase goal.

0:38:47.160 --> 0:38:47.520

Church, Fred

Yeah.

0:38:47.530 --> 0:39:10.630

Church, Fred

So so if you had, you know, 25 completions of noncredit welding programs, you would report that but without, as Thomas says, any of the backing student level information, right, that says who those students were, what their demographic characteristics were, would eventually happen to them when they went into the workforce, et cetera.

0:39:10.640 --> 0:39:13.70

Church, Fred

You'd just be reporting up raw completions number.

0:39:15.220 --> 0:39:15.630

Kelly Neriani

In car.

0:39:15.230 --> 0:39:19.490

Church, Fred

And then all all the more complex data would come after that.

0:39:21.330 --> 0:39:21.520

Kelly Neriani

Yeah.

0:39:24.50 --> 0:39:32.990

Kelly Neriani

And to make people feel better, I feel like the state was offering to do a lot of this work for us as much as possible.

0:39:35.300 --> 0:39:35.540

Kelly Neriani

Alright.

0:39:42.110 --> 0:39:42.310

Kelly Neriani

Yeah.

0:39:36.240 --> 0:39:45.770

Church, Fred

On that giant short that you saw, I think everything that was labeled data integration right was meant to be, you know, so for example.

0:39:47.610 --> 0:39:50.130

Church, Fred

As long as we have and this is kind of another.

0:39:52.330 --> 0:39:57.150

Church, Fred

This can lead down another path with its own questions, I guess is how I would say it but.

0:39:59.140 --> 0:40:6.850

Church, Fred

As long as we have SSNS right, we can do the matching on finding out the employment outcomes.

0:40:7.360 --> 0:40:7.720

Kelly Neriani

Right.

0:40:8.70 --> 0:40:11.570

Church, Fred

We do that now with the four and the four credit world.

0:40:13.130 --> 0:40:14.590

Church, Fred

Both through.

0:40:16.20 --> 0:40:24.890

Church, Fred

Matching with the JFS data for those students who end U working in Ohio, as long as they're covered by the unemployment insurance system.

0:40:24.900 --> 0:40:30.640

Church, Fred

Right or with the census PO data for the ones who work outside the states borders.

0:40:30.930 --> 0:40:33.220

Church, Fred

O that's not a new thing.

0:40:33.730 --> 0:40:37.800

Church, Fred

We can continue to do it if you know if we have.

0:40:39.140 --> 0:40:41.390

Church, Fred

SSNS for the noncredit completers.

0:40:41.400 --> 0:40:46.480

Church, Fred

We can do the same things that we do with the SSNS for the credit to for credit completers.

0:40:49.410 --> 0:40:49.890

Church, Fred

Similarly.

0:40:51.950 --> 0:40:55.150

Church, Fred

We don't have these mechanisms in place, but.

0:40:56.650 --> 0:41:8.860

Church, Fred

Finding out you know who has passed licensure exams etcetera is something that, at least theoretically, can be done in the state data integration side, right?

0:41:9.90 --> 0:41:13.400

Church, Fred

And it's not necessarily something that has to be reported by the institutions themselves.

0:41:13.890 --> 0:41:17.660

Church, Fred

So I think that's what's meant by that state integration portion of the Gantt chart.

0:41:21.680 --> 0:41:22.700

Walters, Kevin

Now you had a question.

0:41:25.610 --> 0:41:25.730

Brittingham, Todd

Yes.

0:41:27.610 --> 0:41:28.140

Brittingham, Todd

Do you do?

0:41:28.530 --> 0:41:28.920

Brittingham, Todd

Umm.

0:41:29.500 --> 0:41:32.450

Brittingham, Todd

SSN matching with pseo data.

0:41:32.510 --> 0:41:33.920

Brittingham, Todd

Since this Bureau pseo data.

0:41:34.890 --> 0:41:38.950

Church, Fred

We don't do the matching ourselves, Todd, but we send them the data and they do it.

0:41:45.540 --> 0:41:45.920

Brittingham, Todd

Thank you, Sir.

0:41:49.140 --> 0:41:49.440

Walters, Kevin

Alright.

0:41:50.520 --> 0:41:55.390

Walters, Kevin

Any other thoughts or comments on the House Bill 33 before we?

0:41:58.550 --> 0:41:58.720

Walters, Kevin

OK.

0:41:59.730 --> 0:42:1.120

Walters, Kevin

Ohh that was our last topic.

0:42:1.130 --> 0:42:3.740

Walters, Kevin

So does everyone, when they were running a little past.

0:42:3.750 --> 0:42:5.960

Walters, Kevin

Does anyone have anything else they wanna do?

0:42:6.270 --> 0:42:7.540

Walters, Kevin

Anything they want to discuss.

0:42:10.50 --> 0:42:11.840

Doll, Christopher

Lived close discussion and adjourn.

0:42:15.870 --> 0:42:16.450

Walters, Kevin

I'm good with that.

0:42:16.320 --> 0:42:25.590

Taylor, Loralyn

Up before we adjourn, I I dropped it in the thing, but did anybody hear anything about when PSO is gonna update?

0:42:25.600 --> 0:42:26.940

Taylor, Loralyn

Because I heard they were gonna.

0:42:26.990 --> 0:42:28.960

Taylor, Loralyn

They were planning on updating this month.

0:42:30.600 --> 0:42:31.790

Church, Fred

They were, yeah.

0:42:31.800 --> 0:42:45.510

Church, Fred

What what I had been told by the small group of economists who runs the PSO program at the census was that the new cohort data, if that's what you're referring to, right?

0:42:45.680 --> 0:42:45.980

Taylor, Loralyn

Correct.

0:42:45.520 --> 0:42:47.290

Church, Fred
So the. Yeah.

0:42:59.930 --> 0:43:0.260

Taylor, Loralyn
Umm.

0:42:47.300 --> 0:43:3.240

Church, Fred
So that 11 that 2011 through 2015 cohort for associates degrees certificates, masters pH D's is pretty old by now and they were going to be releasing the in 2016 through 2020 data.

0:43:3.550 --> 0:43:7.750

Church, Fred
I haven't seen it out there, but my understanding is that that's still their target.

0:43:7.760 --> 0:43:8.750

Church, Fred
That will come out this month.

0:43:9.720 --> 0:43:10.800

Taylor, Loralyn
OK, that's great.

0:43:10.950 --> 0:43:24.840

Taylor, Loralyn
And I know that you were or others had said, that it it wasn't possible to give us back our matched files from matching with the PSU data, but as we.

0:43:25.880 --> 0:43:33.680

Taylor, Loralyn
The Renew that relationship or whatever, that would be a huge help to our campuses if we could get that match data back.

0:43:35.460 --> 0:43:38.50

Church, Fred
You're not the only one who has expressed that desire.

0:43:39.0 --> 0:43:40.500

Taylor, Loralyn
Because it's good for all of us.

0:43:41.140 --> 0:43:41.640

Church, Fred

Yeah.

0:43:41.650 --> 0:43:46.200

Church, Fred

We haven't had any success with it yet, but we can, we can tell them that you're still looking for it.

0:43:49.530 --> 0:43:49.850

Taylor, Loralyn

Awesome.

0:43:52.890 --> 0:43:55.510

Walters, Kevin

If there's not anything else, we'll wrap this one up then.

0:43:57.980 --> 0:43:58.420

Walters, Kevin

Right.

0:43:58.460 --> 0:43:59.30

Walters, Kevin

Thank you.

0:43:59.560 --> 0:43:59.920

Church, Fred

Thank you.

0:43:59.750 --> 0:43:59.960

Doll, Christopher

Alright.

0:44:0.40 --> 0:44:2.80

Walters, Kevin

Everything will be on the website as soon as possible.
