## MyCare Ohio overview

### What is MyCare Ohio?

MyCare Ohio is a managed care program designed for Ohioans who receive BOTH Medicaid and Medicare benefits. This program has a team approach to coordinating care based on a member's needs – a team with the member at the center.

The MyCare Ohio plan that a member chooses provides all the same benefits that Medicare and Medicaid offer, including long-term care services and mental/behavioral health services. The plan may also include additional services for its members.

Members have two choices for receiving their MyCare Ohio benefits:

1. **Dual benefits:** A MyCare Ohio plan provides both the Medicare and Medicaid benefits for members. Members are eligible to receive added benefits the plan might offer, like \$0 copayments for prescription drugs covered by Medicare and additional transportation services.
2. **Medicaid-only benefits:** A MyCare Ohio plan only provides Medicaid-covered services. Members continue to receive prescription drugs through their Part D plans and pay any associated co-payments. Your Medicare benefits are provided through traditional Medicare or through a private insurance company, commonly referred to as a “Part C” plan.

### What changes are coming to MyCare Ohio?

The Ohio Department of Medicaid (ODM) has selected the managed care plans to serve as the Next Generation MyCare Ohio plans as we transition out of the current demonstration and move toward a Fully Integrated Dual-Eligible Special Needs Plan (FIDE SNP) model. Beginning in January of 2026, the selected FIDE SNPs will cover the full Medicare and Medicaid benefits for those who qualify in the current 29 demonstration counties, followed by statewide expansion as soon as possible.

### What benefits will I receive from the Next Generation MyCare program?
