

Coordinated Specialty Care for First Episode Psychosis

Ohio Coordinated Specialty Care for First Episode Psychosis Treatment Programs

With the right treatment and support, people affected by a first episode of psychosis **can** and **do** get better. The opportunities for living a quality life are much greater if they receive Coordinated Specialty Care for First Episode Psychosis (CSC for FEP) **as soon as possible after symptoms begin**. CSC for FEP is appropriate for individuals between the ages of 15-35 with recent onset of psychotic symptoms.

CSC for FEP treatment is available at community mental health agencies in the Ohio counties highlighted below.

- Please refer to the list that follows to find the phone number for the CSC for FEP program in the county where the individual resides. This list is updated periodically; the most current information may be found at mha.ohio.gov/GetHelpEarly.
- You may leave a voicemail on the confidential phone line. A CSC for FEP team member will follow up.
- For counties without CSC for FEP programs, please visit findtreatment.samhsa.gov/locator.
