Project Overview

A. Project Description

Cleveland State University (CSU) is seeking architectural/engineering services for renovations to Fenn Hall, one of the university's most prominent historical buildings. Originally constructed in 1924 as an automobile showroom and service department. It was purchased by Fenn College and substantially renovated in 1959. For over half a century, Fenn Hall has provided training for area engineers and provided Fenn College--and now Cleveland State University--with much-needed engineering spaces that CSU hopes to continue to expand.

B. Scope of Services

The scope of this project includes critical repairs and improvements to the building's East and West façades, which are currently in significant disrepair. The façade work will represent the majority of the project's overall cost and is a critical component of this renovation. In addition to the exterior upgrades, CSU intends to renovate portions of the building's 4th floor to create new state-of-the-art spaces that support biomedical research and enhance CSU's recruitment and retention of students and faculty. The 4th floor renovation will include laboratories, auxiliary and support spaces, seminar and conference rooms, break areas, and other academic and collaborative environments. Upgrades to mechanical, electrical, and plumbing (MEP) systems serving these areas are also included in the scope of work. We will need the architect to help CSU program and space plan faculty and staff in the best approach possible, likely multi-phased approach, that is the most cost effective and least disruptive to our campus.

For projects advertised with an appropriately developed Program of Requirements ("POR"), upon award of the Agreement, commence with Design. For projects without such a POR, upon award of the Agreement, commence by developing the Program of Requirements.

The selected Architecture or Engineering Consultant, as a portion of its required Scope of Services and prior to submitting its proposals, will discuss and clarify with the Owner and/or the Contracting Authority the cost breakdown of the A/E Agreement detailed cost components to address the Owner's project requirements. Participate in the Encouraging Diversity, Growth & Equity (EDGE) Program as required by statute and the Agreement.

As required by the Agreement, and as properly authorized, provide the following categories of services: Program Verification, Schematic Design, Design Development, Construction Document Preparation, Bid and Award Support, Conformed Documents, Construction Administration, Post-Construction, and Additional Services of all types.

Refer to the *Ohio Facilities Construction Manual* for additional information about the type and extent of services required for each. A copy of the standard Agreement can be obtained at the OFCC website at <https://ofcc.ohio.gov>.

Request for Qualifications (Architect / Engineer) continued

Please list all major scope services needed to complete the selection process for successful project delivery. The specific scope of services must state particular building types, functional design or specialized professional services required to evaluate the level of experience of each applicant firm (e.g. parking garage, kitchen design, correctional facility, medical facility). The scope of services should also define the types of basic and additional professional design and administration services necessary for the project (e.g. LEED credentials and experience, previous experience with local jurisdiction or similar sites, previous experience working with the State of Ohio, Building Information Modeling (“BIM”) experience and training, specific BIM and Owner-defined requirements, level of development to be achieved within BIM models, BIM deliverables, and Owner’s intended use of BIM models after construction). This information will be used by each applicant to populate the Relevant Project Experience Matrix in Section F of Form F110-330.
