### Project Overview

#### A. Project Description

The State intends to select an Architect/Engineering (A/E) team to provide design and construction administration services for a renovation project at the Madison Correctional Institution (MACI). MACI is located on 1851 OH-56 London, Ohio, and can house up to 2,258 inmates. MACI was opened in 1987 and consists of two separate secure zones (Zone A & B) that have a mixture of cell and dormitory style housing areas.

Madison Correctional has the capacity to house inmates with disciplinary infractions in a high-level security unit in Zone A consisting of 25 cells. Each of these cells require renovations to the individual shower unit, replacement of plumbing fixtures with stainless steel combi units, electronic plumbing control system, tamper proof hardware; this work will require the enlargement of the access panels to each plumbing chase (13 total). Evaluation of the building supply plumbing and drain systems are to be included and any necessary improvements and/or replacements completed as part of this scope.

Zone B work will include the renovation of showers in 8 dormitory style housing units. Each unit contains 6 shower stalls that require tile, drain and fixture replacement – 48 total.

Project will also replace the failed cooling system that provides climate control for the food service/dining areas in Zone A.

Also, address the failing dock levelers at three receiving areas within the institution. The scope will include the assessment of 9 dock levelers (3 exterior levelers in Zone A, 4 exterior levelers in Zone B and 2 interior levelers at the Central Warehouse) resulting in design and specification of new units. Where necessary, full replacement to include new dock plates/levelers, bumpers. Several will require extensive concrete work, impacting existing metal railings and security hardware.

#### B. Scope of Services

For projects advertised with an appropriately developed Program of Requirements (“POR”), upon award of the Agreement, commence with Design. For projects without such a POR, upon award of the Agreement, commence by developing the Program of Requirements.

The selected A/E, as a portion of its required Scope of Services and prior to submitting its proposals, will discuss and clarify with the Owner and/or the Contracting Authority, the cost breakdown of the Architect/Engineer Agreement detailed cost components to address the Owner’s project requirements. Participate in the Encouraging Diversity, Growth & Equity (EDGE) Program as required by statute and the Agreement.

As required by the Agreement, and as properly authorized, provide the following categories of services: Program Verification, Schematic Design, Design Development, Construction Document Preparation, Bid and Award Support, Conformed Documents, Construction Administration, Post-Construction, and Additional Services of all types.
