Project Overview

A. Project Description

The Chillicothe Correctional Institution (CCI), located at 15802 OH-104 Chillicothe Ohio was originally opened as a State of Ohio prison in 1966. It is a former site of a military camp during the Civil War that later became a federal penitentiary. CCI is currently a medium security prison with the capacity to house approximately 2,950 men.

This Request for Qualifications (RFQ) is being issued to obtain Professional Architectural/Engineering (A/E) services for replacement of major portions of the sanitary sewer system that feeds the CCI wastewater treatment plant. This plant and collection system serves CCI, RCI and numerous surrounding properties and entities such as Unioto Schools, VA Center, residences and businesses in the immediate area.

The sanitary sewer system that feeds into this treatment plant is aging and in dire need of repair and/or replacement. This project will replace the sanitary trunk lines from the location of RCI to the location of the treatment plant at CCI. It involves excavation, demolition, pipe and structure construction and installation, tie in of all smaller collector sewers that feed to the plant, testing, inspection and operational startup of the new system.

The development of a complete Program of Requirements (POR) will be necessary and included as part of this award. This POR development will include investigation and review of all existing and potential future flows in the surrounding area. Various entities will be involved as informational sources as this program is developed, including local government entities and users that tie into this system. Evaluation of the project schedule will also be part of the POR stage.

This project will utilize the Construction Manager-at-Risk (CMR) delivery model. It is desirable to issue one Guaranteed Maximum Price (GMP) negotiated according to the General Conditions (CM at Risk Project). It is feasible there may be more than one GMP if determined to be in the best interest of the project. The CMR procurement process will occur simultaneously with this A/E procurement; both the design and the construction team is anticipated to be in place during the POR phase of the project.

B. Scope of Services

The selected A/E, as a portion of its required Scope of Services and prior to submitting its proposals, will discuss and clarify with the Owner and/or the Contracting Authority, the cost breakdown of the A/E Agreement detailed cost components to address the Owner's project requirements. Participate in the Encouraging Diversity, Growth & Equity (EDGE) Program as required by statute and the Agreement.

Request for Qualifications (Registered Design Professional) continued
