Project Overview

A. Project Description

The Chillicothe Correctional Institution (CCI), located at 15802 OH-104 Chillicothe Ohio, originally opened as a State of Ohio prison in 1966. It is a former site of a military camp during the Civil War that later became a federal penitentiary. CCI is currently a medium security prison with the capacity to house approximately 2,950 men.

The Request for Qualifications (RFQ) is being issued to obtain Professional Architectural / Engineering services for the repair of the masonry block on a couple different Housing unit buildings. The current brick on the units are starting to buckle and fall off the walls.

The buildings are aging and in dire need of repair or replacement. The buildings will need to be studied to determine the cause and the safety of the structural components.

The development of a complete Program of Requirements (POR) will be necessary and included as part of this award. This POR development will include investigation and review of all existing structural concerns and the fix for the brick masonry repairs. Evaluation of the project schedule and budget will also be part of the POR stage.

The specific scope of services must state particular building types, functional design or specialized professional services required to evaluate the level of experience of each applicant firm (e.g. parking garage, kitchen design, correctional facility, medical
