Project Overview

A. Project Description

Kent State University at Ashtabula Campus was founded in 1958 and is part of the Kent State University's 8 campus system, which sits on over 80 acres overlooking Lake Erie. It offers state-of-the-art learning across its four-building footprint, including that of Stocker Hall, built in 1965.

Stocker Hall is home to most of the educational programs and classes offered at Kent State Ashtabula. The 109,000 square foot building is heavily utilized and consists of the "A wing" student services, the "B wing" Auditorium and Gymnasium and the "C wing" classroom spaces. It has undergone transformational capital improvements throughout the past decade through several phases, including the enhancement of student-focused spaces and learning environments.

The focus of this project will be on the 30,920 sq. ft. C wing of Stocker Hall. The deferred maintenance project will address the failing HVAC pneumatic controls and dual duct infrastructure that is original to the construction of the C wing. The new design shall include modern and reliable digital HVAC controls base on Kent State standards, as well as an updated HVAC system, including mixing boxes and ductwork appropriate for the current space usages throughout the C wing. This project will also address the lack of critical life safety infrastructure in the C wing by extending the fire suppression system for proper coverage and evaluating the replacement of the emergency generator. The deferred maintenance project will parallel a separate but concurrent C wing space renovation project.

B. Scope of Services

The selected A/E, as a portion of its required Scope of Services and prior to submitting its proposals, will discuss and clarify with the Owner and/or the Contracting Authority, the cost breakdown of the A/E Agreement detailed cost components to address the Owner's project requirements. Participate in the Encouraging Diversity, Growth & Equity (EDGE) Program as required by statute and the Agreement.

As required by the Agreement, and as properly authorized, provide the following categories of services: Program Verification, Schematic Design, Design Development, Construction Document Preparation, Bid and Award Support, Conformed Documents, Construction Administration, Post-Construction, and Additional Services of all types.
