Project Overview

A. Project Description

This text is an example and is instructional. Insert a very brief description of the project. Include the purpose or function of the completed project. Include type or types of facilities, general business functions or each, basic functional needs, etc. Briefly describe site(s), including location, special features, and restrictions, etc. Attach appropriately developed Program of Requirements ("POR") or indicate that the Architect/Landscape Architect/Engineer ("A/E") will prepare the POR as an Additional Service.

The existing chillers at Russ Engineering have experienced significant failures and are past the point of repair. This project will remove the existing air-cooled chillers and install two new air-cooled chillers designed to operate in a lead-lag configuration and provide 100% redundancy. Also included in this work is the engineering and verification of the existing system capacity and loads, rework of the associated piping and the installation of new controls

B. Scope of Services

representation comprised of the A/E and its consultant staff involved in the primary design of the project, all having relevant and appropriate types of construction administration experience.

Please list all major scope services needed to complete the selection process for successful project delivery. The specific scope of services must state particular building types, functional design or specialized professional services required to evaluate the level of experience of each applicant firm (e.g. parking garage, kitchen design, correctional facility, medical facility).
