SUBSURFACE INFORMATION CATALOG

GENERAL INFORMATION

This catalog is a record of subsurface information available for public consultation at the Subsurface Geology Section of the Ohio Division of Geological Survey, as of December 31, 1961. It is a list of wells for which cuttings, cores, insoluble residues, core analyses, electrical logs, plotted strip logs, and written sample descriptions have been placed on file for inspection by the general public. Locations of the wells are shown on plate 1, and township names are shown on plate 2. Each year an appendix to this catalog will be published showing material acquired during the preceding year. This catalog replaces Information Circular 19, published in 1956.

Cuttings and cores. - Well cuttings (samples) are on file in ore sample envelopes kept in cardboard file boxes in the sample library of the Survey. Facilities are available for examination of these samples by the public, but binocular microscopes are not furnished. Samples cannot be mailed or taken outside the city of Columbus. Cores are also on file in cardboard boxes in the sample library. Insoluble residues are on file in glass vials, kept in trays in the sample library.

Electrical logs. - Full scale electrical logs are on file in log pockets for examination. The file includes not only self-potential and resistivity logs, but also gamma ray-neutron, laterolog, sonic, gamma gamma density, induction, and other types of radioactivity logs. The Survey cannot make copies for distribution. Ohio electrical and radioactivity logs may be obtained from the Appalachian Log Service, 1218 Empire Building, Pittsburgh 22, Pa.

Strip logs. - The Subsurface Section maintains an open file of strip logs which it has built up over the years. These are available for study at the Survey office, but copies are not available for public distribution.

Core analyses and sample descriptions. - Written sample descriptions and some core analyses are on file at the Survey. These are on standard sized paper (8½x11 inches), from which thermofax copies may be obtained upon request.
