PLACE NAMES DIRECTORY: SOUTHEAST OHIO

compiled by

Madge R. Fitak

INTRODUCTION

The state of Ohio has been mapped completely on 7.5-minute topographic quadrangle maps; coverage for the entire state consists of 789 maps, which are published by the U.S. Geological Survey. This guide is intended to be used with these maps, which are at a scale of 1:24,000, or 1 inch equals 2,000 feet (1 centimeter equals 240 meters). Each quadrangle map covers approximately 62 square miles (161 square kilometers).

The guide is organized by county, and the counties are grouped according to the districts used by the Ohio Department of Transportation. Included in this guide are 17 counties in eastern-southeastern Ohio (fig. 1): Athens, Belmont, Carroll, Coshocton, Guernsey, Harrison, Hocking, Holmes, Jefferson, Meigs, Monroe, Morgan, Muskingum, Noble, Perry, Tuscarawas, and Washington. Guides to place names in other areas of Ohio will be published as the inventories are completed.

All place names which appear on the topographic maps are listed by county and in alphabetical order, and the name of the map (or maps) on which that place name can be found is indicated. Included in this listing are townships, cities, villages, communities, streams, lakes, schools, churches, cemeteries, and other named natural and cultural features. The stream or body of water into which a stream flows is indicated in parentheses. The classifications of the 1970 Ohio Population Report (Brown, 1970) are followed in this guide and are included in parentheses to indicate the status of a community. In the 1970 Ohio Population Report a city is defined as any municipal corporation with a population over 5,000; a village is defined as any municipal corporation with a population less than 5,000; an unincorporated place is an unincorporated community with a population over 1,000. Any unincorporated community with fewer than 1,000 inhabitants is classified as a community in this listing. A few entries, such as State Public Hunting Area or Game Refuge Area, are included because they appear in that form on the topographic map and may be useful to users of this directory.

In some instances a printed map name is known to be misspelled, to have been changed, or to have a variant spelling. In such a case the correction or variant spelling is given in brackets. Any errors or omissions noticed by users of this guide should be forwarded to the Division of Geological Survey.

U.S. Geological Survey 7.5-minute maps for the state of Ohio may be purchased from the following agencies:

PLACE NAMES DIRECTORY: SOUTHEAST OHIO

compiled by

Madge R. Fitak

INTRODUCTION

The state of Ohio has been mapped completely on 7.5-minute topographic quadrangle maps; coverage for the entire state consists of 789 maps, which are published by the U.S. Geological Survey. This guide is intended to be used with these maps, which are at a scale of 1:24,000, or 1 inch equals 2,000 feet (1 centimeter equals 240 meters). Each quadrangle map covers approximately 62 square miles (161 square kilometers).

The guide is organized by county, and the counties are grouped according to the districts used by the Ohio Department of Transportation. Included in this guide are 17 counties in eastern-southeastern Ohio (fig. 1): Athens, Belmont, Carroll, Coshocton, Guernsey, Harrison, Hocking, Holmes, Jefferson, Meigs, Monroe, Morgan, Muskingum, Noble, Perry, Tuscarawas, and Washington. Guides to place names in other areas of Ohio will be published as the inventories are completed.

All place names which appear on the topographic maps are listed by county and in alphabetical order, and the name of the map (or maps) on which that place name can be found is indicated. Included in this listing are townships, cities, villages, communities, streams, lakes, schools, churches, cemeteries, and other named natural and cultural features. The stream or body of water into which a stream flows is indicated in parentheses. The classifications of the 1970 Ohio Population Report (Brown, 1970) are followed in this guide and are included in parentheses to indicate the status of a community. In the 1970 Ohio Population Report a city is defined as any municipal corporation with a
