2006 OHIO MINING ACTIVITIES IN BRIEF

Reports were filed in 2006 for 147 coal-mining operations, including 5 mines that each have their own coal-washing facility. Coal production was reported from 85 of these 147 operations. Reports also were filed for 16 separate coal-washing plants and associated facilities. Of 640 industrial-mineral-mining operations known to be operating in 2006, 453 operations were active. A total of 31 mines reported production of multiple mineral commodities. Of this total, 30 mines reported production of multiple industrial minerals, including 8 mines reporting production of multiple industrial minerals and coal; 3 mines reported production of coal and one industrial mineral. There were 765 new wells completed for oil and gas in 2006, of which 722 were productive and 43 were dry.

The total value¹ of coal was \$618,263,136 in 2006; the value of oil and gas was \$1,007,449,596 and the total value¹ of all nonfuel industrial minerals was \$940,868,107 in 2006.

¹Includes reported and estimated values. Some operations reporting sales did not report a value for those sales. A countywide- or statewide-average price per ton was calculated for each industrial mineral commodity based on sales for which the value was reported. A countywide average price per ton was calculated for coal based on sales for which the value was reported and method of production. These calculated averages were used to estimate the value of the sales for which the actual values were not reported.

¹Includes material for captive use.

²The production figures for the industrial minerals are estimates. Many operators do not know actual production. Some operators report estimates, other operators do not report any production. For those operators who do not report production, production is assumed to equal sales.

³The FOB value of industrial minerals sold was estimated for mines that failed to report this information and for those producing material for captive use. These estimates were calculated using a countywide- or statewide-average price per ton calculated on reported FOB values.

COAL

Coal was produced by 32 companies at 85 mines in 16 Ohio counties during 2006. Production decreased 9.7 percent from 2005, totaling 22,718,942 tons in 2006; 7,591,211 tons (33.4 percent of total production) were produced at 74 surface mines, and 15,127,731 tons (66.6 percent of total production) were produced at 11 underground mines. In 2006, tonnage from underground production exceeded tonnage from surface production, continuing a trend that began in 1995. Of 26 coal-producing states, Ohio ranked 14th in 2006. The top five states, in descending order of production, are Wyoming (446.7 million tons), West Virginia (151.7 million tons), Kentucky (120.1 million tons), Pennsylvania (66.0 million tons), and Texas (45.5 million tons). These five states produced 71.5 percent of the nation's coal in 2006. Ohio produced 2.0 percent of the nation's coal in 2006. The top five coal-consuming states, in descending order of consumption, are Texas, Indiana, Ohio, Illinois, and Pennsylvania. These five states used 31.6 percent of the total coal consumed by all 50 states in 2006.²

In comparison to 2005, there were 2 less mines that produced more than 1,000,000 tons, 1 more mine produced between 500,000 and 999,999 tons, 3 more mines produced between 250,000 and 499,999 tons, and 7 fewer mines produced less than 50,000 tons. There was a net decrease of 5 mines in 2006.

The five leading counties for 2006 production were Belmont, Monroe, Harrison, Tuscarawas, and Jefferson Counties; these counties produced 79.1 percent of the 2006 total production. A total of 22,630,167 tons of coal were sold in 2006; total value³ was \$618,263,136. The average price per ton of all coal sold was \$27.32; surface-mined coal averaged \$27.97 per ton and underground-mined coal averaged \$26.98.

In underground mining, 61.5 percent of the coal was produced by longwall mining and 38.5 percent was mined by continuous miner machinery; no coal was produced by conventional mining in 2006. In surface operations, 92.4 percent of the coal was mined by conventional surface methods and 7.6 percent was auger mined.

The Pittsburgh (No. 8) coal was the most heavily mined seam, followed in descending order by the Middle Kittanning (No. 6), Lower Freeport (No. 6A), Meigs Creek (No. 9), and Upper Freeport (No. 7) seams. Coal produced from these five seams constituted 87.2 percent of the total 2006 production.

A total of 15,231,773 tons of washed coal was reported in 2006. Reports from 18 coal-washing plants indicate an average loss in tonnage of 28.4 percent after washing.

Rail was the primary means of coal disposition, carrying 53.1 percent of the total sales. Trucking transported 43.4 percent and water carried 2.1 percent of the coal sold in 2006. A total of 953,390 tons (4.2 percent) of the coal produced was reported as stored.

The total average annual employment reported in 2006 was 2,423 employees; 1,572 of these were production employees. Production employees worked an average of 171 days producing coal in 2006. The average annual wage earned by all production employees was \$56,762 based on those employees for whom wages were reported. The average annual wage for surface-mine production employees was \$47,361, and the average annual wage for underground-mine production employees was \$59,176. Wages earned by all employees totaled \$137,535,724 in 2006.

²Information from U.S. Department of Energy, Energy Information Administration (2006).

³Includes reported and estimated values. See footnote 1, p. 1.

¹For those operations reporting activity in more than one county, wage and salary payments were evenly split between the counties involved unless county-specific information was provided by the operator.

²For those operations reporting only a total wage and salary payment for all workers, an equal pay rate was assumed for all employees. In cases where quarterly employment was reported but wage and salary payments were not, wage and salary payments for that quarter were estimated from reported payments in the other quarters to arrive at the annual figure. For mines reporting employment and no wage and salary payments, wage and salary payments were estimated using a countywide or statewide average.

INDUSTRIAL MINERALS

Industrial minerals, other than mineral fuels, were produced in a total of 86 Ohio counties in 2006. The combined value of all nonfuel industrial minerals sold in 2006 was \$940,868,107.

In 2006, 368 companies operated 640 industrial-mineral mining operations. Industrial minerals were produced or sold by 292 companies from 453 active operations. Twenty-eight of the 292 companies produced more than one industrial mineral from 30 operations. Nine companies produced coal and one or more industrial minerals from 11 operations. Twenty-five companies produced multiple industrial-mineral commodities (no coal) from 30 operations. The remaining 264 companies produced one industrial-mineral commodity.

Of the 30 multiple industrial-mineral operations (including those operations producing coal and more than one industrial-mineral commodity), 8 operations produced sand and gravel, and clay; 5 operations produced clay and shale; 4 operations produced limestone and clay; 3 operations produced sandstone, and sand and gravel; 3 operations produced limestone and sandstone; 2 operations produced sand and gravel, and shale; 1 operation produced limestone, clay, and shale; 1 operation produced limestone, and sand and gravel; 1 operation produced sandstone and clay; 1 operation produced sand and gravel, sandstone, and shale, and 1 operation produced limestone, sandstone, clay, and shale.

The 226 multiple industrial-mineral commodity production employees worked an average of 168 days in 2006. Total wages of \$11,295,036 were paid to a total of 349 employees (226 production employees and 123 nonproduction employees). The average annual wage, based on those employees for whom wages were reported, was \$32,364.

The total average annual employment reported in 2006 for industrial mineral operations was 4,910 people (3,460 production employees and 1,450 nonproduction employees). Total wages for all employees at industrial mineral operations in 2006 were \$216,394,830. The average annual wage, based on those employees for whom wages were reported, was \$44,113.

¹For those operations reporting activity in more than one county, the number of employees was rounded and evenly split between the counties unless county-specific information was provided by the operator.

²Any tally inconsistencies are due to computer rounding of fractions produced by partial-year employment.

³Employment is not included for mines that were owner operated.

LIMESTONE AND DOLOMITE

Limestone and dolomite were sold or produced by 55 companies at 106 operations in 48 Ohio counties during 2006. Sales of limestone and dolomite totaled 75,851,002 tons (-4.5 percent from 2005). Erie, Franklin, Ottawa, Wyandot, and Delaware Counties accounted for 39.4 percent of those sales. Reported known production totaled 75,387,852 tons.

Industrial lime produced from Ohio limestone and dolomite totaled 1,340,924 tons in 2006 and came from five operations in Ottawa, Sandusky, Seneca, and Wyandot Counties. Ohio ranks 4th nationally in the production of lime out of 35 producing states and Puerto Rico. The top five states, in descending order of lime production, are Missouri, Alabama, Kentucky, Ohio and Texas.

Ohio ranks 8th in the production of crushed stone (which includes crushed sandstone) out of 49 producing states. The top states leading Ohio in the production of crushed stone, in descending order, are Texas, Florida, Pennsylvania, Missouri, Virginia, Georgia, and Illinois.⁴

The total value⁵ of limestone and dolomite sold in 2006 was \$520,253,188. Average price per ton was \$6.85.

An annual average of 1,696 employees worked an average of 211 days to produce limestone and dolomite. Total wages of \$104,569,867 were paid to a total of 2,207 employees (1,696 production employees and 511 nonproduction employees). The average annual wage, based on those employees for whom wages were reported, was \$47,381. An additional 87 people (68 production employees and 19 nonproduction employees) were employed by operations mining limestone and dolomite along with one or more other mineral commodities.

The primary use of crushed and broken limestone and dolomite was for road construction/resurfacing. Other major uses of various forms of limestone and dolomite included producing stone for asphaltic concrete and portland cement concrete, commercial building materials, and lime.

⁴Information from the U.S. Geological Survey.

⁵Includes reported and estimated values. See footnote 1, p. 1.

SAND AND GRAVEL

Sand and gravel were sold or produced by 192 companies at 278 operations in 60 Ohio counties during 2006. Sales⁶ of sand and gravel totaled 47,023,674 tons (–9.9 percent from 2005). Sand accounted for 27,266,797 tons of the total sand and gravel sold, and gravel accounted for 19,759,877 tons. Butler, Stark, Hamilton, Portage, and Franklin Counties led in sales, accounting for 46.0 percent of the total. Reported known production of sand and gravel totaled 47,753,217 tons in 2006. Ohio ranks 5th nationally in the production of construction sand and gravel out of 50 producing states and Puerto Rico. The top five states, in descending order of production, are California, Texas, Arizona, Michigan, and Ohio. Ohio ranks 9th nationally in the production of industrial sand and gravel out of 34 producing states. The states leading Ohio in the production of industrial sand and gravel, in descending order, are Illinois, Texas, Wisconsin, California, New Jersey, Michigan, Oklahoma and Minnesota. Ohio ranks 7th nationally in the production of aggregates, including crushed stone. The states leading Ohio in the production of aggregates are California, Texas, Florida, Illinois, Missouri, and Pennsylvania.⁶

No sand was reported dredged from Lake Erie in 2006. The Maumee Bay and Maumee River areas are no longer producing sand or gravel.

The total value⁷ of sand and gravel sold in 2006 was \$257,962,575. Average price per ton was \$5.49.

An annual average of 1,094 employees worked an average of 152 days in 2006 to produce sand and gravel. Total wages of \$69,486,802 were paid to a total of 1,605 employees (1,094 production employees and 511 nonproduction employees). The average annual wage, based on those employees for whom wages were reported, was \$43,267. An additional 71 people (46 production employees and 25 nonproduction employees) were employed by operations mining sand and gravel along with one or more other mineral commodities.

Ohio sand and gravel were mainly used for building materials, portland cement concrete, asphaltic concrete, and road construction/resurfacing in 2006.

SANDSTONE AND CONGLOMERATE

Sandstone and conglomerate were sold or produced by 21 companies at 29 operations in 17 Ohio counties during 2006. Sales totaled 1,749,436 tons (−8.0 percent from 2005). Geauga, Perry, Knox, Lake, and Pike Counties accounted for 83.5 percent of the total sales. Crushed sandstone and conglomerate accounted for 1,681,308 tons of the total sales, and dimension stone accounted for 68,128 tons. Reported known production of sandstone and conglomerate was 1,899,588 tons in 2006. Ohio ranks 12th nationally in production of all dimension stone out of 35 producing states. Ohio ranks 3rd in the production of sandstone dimension stone. The top five states, in descending order of total dimension-stone production, are Wisconsin, Georgia, Indiana, Vermont, and Massachusetts.⁸ National standings for crushed stone are included in the Limestone and Dolomite section of this report.

The total value⁹ of sandstone and conglomerate sold in 2006 was \$43,580,390. Average price per ton was \$23.18 for crushed stone and \$48.37 for dimension stone.

An annual average of 133 employees worked an average of 171 days in 2006 to produce sandstone and conglomerate. Total wages of \$8,237,725 were paid to a total of 215 employees (133 production employees and 82 nonproduction employees). The average annual wage, based on those employees for whom wages were reported, was \$38,315. An additional 36 people (25 production employees and 11 nonproduction employees) were employed by operations mining sandstone and conglomerate along with one or more other mineral commodities.

Crushed sandstone was used primarily for glass sand, construction, aggregate, industrial sand and foundry sand. Dimension stone was used primarily for rough construction purposes.

CLAY

Clay was sold or produced by 26 companies at 33 operations in 18 Ohio counties during 2006. Clay sales (including material for captive use) totaled 1,032,183 tons (+19.3 percent from 2005); Stark, Tuscarawas, Ashtabula, Lucas, and Jackson Counties accounted for 84.4 percent of the total sales. National rankings for clay are included in the Shale section of this report. Reported known production of clay was 967,282 tons. The total value¹⁰ of clay sold (including material for captive use) in 2006 was \$7,602,709. Average price per ton was \$7.37.

An annual average of 20 employees worked an average of 129 days in 2006 mining clay. Total wages of \$785,168 were paid to a total of 31 employees (20 production employees and 11 nonproduction employees). The average annual wage, based on those employees for whom wages were reported, was \$25,328. An additional 60 people (45 production employees and 15 nonproduction employees) were employed by operations, that mined clay with one or more other mineral commodities.

Clay mined in Ohio in 2006 was used largely for captive use in the production of common clay products such as building bricks, and was used in the landfill industry and for construction.

SHALE

Shale was sold or produced by 18 companies at 22 operations in 14 Ohio counties during 2006. Shale sales (including material for captive use) totaled 1,232,984 tons (+3.4 percent from 2005); Marion, Tuscarawas, Cuyahoga, Paulding and Brown Counties accounted for 84.7 percent of the total sales. Reported production of shale in 2006 was 1,232,984 tons. Ohio ranks 7th nationally in the production of common clay and shale out of 42 producing states. The states leading Ohio are Georgia, Wyoming, Texas, North Carolina, Alabama, and Missouri.¹¹ The total value¹² of shale sold (including material for captive use) in 2006 was \$7,315,146. Average price per ton was \$5.93.

An annual average of 48 employees worked an average of 173 days in 2006 mining shale. Total wages of \$2,990,880 were paid to a total of 80 employees (48 production employees and 32 nonproduction employees). The average annual wage, based on those employees for whom wages were reported, was \$37,386. An additional 20 people (13 production employees and 7 nonproduction employees) were employed by operations that mined shale with one or more other mineral commodities.

Shale mined in Ohio in 2006 was largely for captive use in the production of common clay products such as building bricks, for lightweight aggregate, and was used in the landfill industry and for cement manufacture.

SALT

Salt was produced by 3 companies at 5 operations in 5 Ohio counties during 2006. Total tonnage of salt sold in 2006 amounted to 4,344,473 tons (–15.9 percent from 2005). Rock salt sales totaled 3,567,814 tons from 2 underground mines, one in Cuyahoga County and one in Lake County. Three brining operations, one each in Licking, Summit, and Wayne Counties, sold a total of 6,728 tons of salt in brine and 769,931 tons of evaporated salt. Reported known production of salt was 4,748,392 tons in 2006. The top five salt-producing states nationally are Louisiana, Texas, New York, Ohio, and Kansas.¹³

The total value¹⁴ of the salt sold in 2006 was \$104,154,099. Average price per ton of rock salt was \$14.50 and of salt in brine and evaporated salt was \$68.02. The average price per ton of all salt sold was \$23.97.

An annual average of 242 employees worked an average of 241 days in 2006 to produce salt. Total wages of \$18,724,688 were paid to a total of 421 employees (242 production employees and 179 nonproduction employees). The average annual wage, based on those employees for whom wages were reported, was \$44,477. The primary use for Ohio salt was ice control. Salt was also used as an additive in animal feed, and as a commercial and residential water-softening agent; it was also used for cattle blocks.

2006 OHIO ALPHABETICAL DIRECTORY OF PRODUCING COAL-MINE OPERATORS

For those mines that have not been assigned a state mine number, a letter designation is used (example: Bt-C).

The designation (u) indicates an underground mine.

To convert short tons to metric tons, multiply the given tonnage by 0.907185.

2006 OHIO DIRECTORY OF PRODUCING COAL-MINE OPERATORS, BY COUNTY

NOTE: This directory lists only the coal-producing operations. It does not list tipples, loading docks, preparation plants, or other active, nonproducing operations that would contribute to employment and wage statistics presented in tables 9–10. For those mines that have not been assigned a state mine number, a letter designation is used (example: Bt-C). There is no correlation between the “Seam Number” column and the “Production Tonnage” column. The Seam Number column represents the seam(s) mined at the operation. No production tonnage is listed by seam. Days in production were estimated for those companies not providing this information. To convert short tons to metric tons, multiply the given tonnage by 0.907185.

2006 OHIO ALPHABETICAL DIRECTORY OF INDUSTRIAL-MINERAL MINE OPERATORS

For those mines for which a state mine number has not been assigned, a letter designation is used (example: Ts-A).

If there are no sales or production figures given for an operation, that operation reported no sales or production in 2006.

To convert short tons to metric tons, multiply the given tonnage by 0.907185.

This map is based on operators listed in the 2006 Report on Ohio Mineral Industries and is intended for general reference. Locations are approximate and are based on permitting information at the Ohio Department of Natural Resources, Division of Mineral Resources Management. The letters and numbers opposite the symbols are the State mine numbers assigned to operators listed in the alphabetical directories of the Division of Geological Survey's Report on Ohio Mineral Industries. The operator and other information can be accessed by using the state mine number and commodity to refer to the directories of operators reporting sales or production, by county, in the Report on Ohio Mineral Industries. Operator and production information on industrial mineral operations that reported no production during the year can be accessed by searching the alphabetical directories for the State Mine number.

The interactive map is an improved tool for accessing company and production information and should be used if available.
