Re: Notice of Nominations 23-DNR-0005; 23-DNR-0006; and 23-DNR-0007
Salt Fork State Park and Salt Fork Wildlife Area
Comments of the Ohio Department of Natural Resources

Dear Commissioners:

I am writing on behalf of the Ohio Department of Natural Resources (ODNR) regarding Nominations 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007, involving a total of 263 parcels of land and located within the boundaries of Salt Fork State Park and including portions of Salt Fork Wildlife Area. ODNR has undertaken a thorough review of these nominations and has gathered input from multiple divisions. In accordance with R.C. 155.33, ODNR offers the following comments, with recommended special terms and conditions that are necessary due to the specific conditions related to these parcels.

Introduction and Background

Salt Fork State Park

Salt Fork State Park, located in Guernsey County, is the largest of Ohio's seventy-five parks. Salt Fork State Park encompasses roughly 20,000 acres and features a stunning landscape that offers a wide variety of recreational amenities including two marinas, eight boater launch ramps, a complex trail system, an eighteen-hole golf course, picnic areas, and historical sites. Overnight accommodation options include a full-service lodge with 148 guest rooms, 53 vacation cabins, and a large campground. Within Salt Fork State Park is a 2,952-acre lake with 469 rental docks, and one of the largest inland beaches in Ohio at 2,500 square feet. During the 2022 summer season, Salt Fork recorded over 27,000 overnights at the campgrounds, with tens of thousands more overnights recorded in the state park lodge and vacation cabin accommodations. Numerous acres in the park are also available for hunting and hiking, with over 55 miles of trails for hikers and horseback exploration. The Park features many areas and points of interest, including a portion of the Buckeye Trail.

Salt Fork Wildlife Area

The Salt Fork Wildlife Area lies within Salt Fork State Park, and provides many opportunities for wildlife viewing, as well as hunting, fishing, and trapping. The area is inhabited by gray and fox squirrels, ruffed grouse, cottontail rabbit, wild turkey, and white-tailed deer. Beavers can be found in the area as well, and many species of duck and other waterfowl are abundant at Salt Fork Lake and the nearby marshy areas. The area is popular for hunting, bass and walleye fishing, and trapping of muskrat and mink.

State Lands Leasing

In 2011, the Ohio Legislature passed H.B. 133, which created a nomination process for the leasing of state-owned lands for oil and gas development. These provisions were amended in 2021 (H.B. 110) and the process today exists in Revised Code Sections 155.30 through 155.37. Revised Code 155.33(A)(2) authorizes any person or state agency to nominate a formation in a parcel of land owned or controlled by a state agency for exploration and development of oil or natural gas. This Commission then considers the nomination based on the factors set forth in R.C. 155.33(B)(1). Included in these considerations are any comments made by the state agency that owns the parcel of land (155.33(B)(1)(g)) and any special terms and conditions that the state agency includes in the comments or objections that the agency believes are appropriate for the lease of the parcel of land because of specific conditions related to the parcel (155.33(B)(1)(i)).

May 30, 2023 Salt Fork Nominations

On May 30, 2023, the Commission received three separate nominations for parcels within Salt Fork State Park. Details of each nomination are listed below. The nominations include a total of eight proposed well pads ranging in distance to park boundaries from 400 feet to 7,600 feet.

- ***Nomination 23-DNR-0005:*** Nomination #23-DNR-0005 includes a total of 176 parcels all within the boundaries of Salt Fork State Park. This nomination also includes two parcels designated as Wildlife Areas.
- ***Nomination 23-DNR-0006:*** Nomination #23-DNR-0006 includes a total of 65 parcels all within the boundaries of Salt Fork State Park. This nomination also includes one 115-acre parcel designated as Wildlife Area and encumbered by U.S. Fish and Wildlife grant funding.
- ***Nomination 23-DNR-0007:*** Nomination #23-DNR-0007 includes a total of 22 parcels all within the boundaries of Salt Fork State Park.

ODNR Comments

ODNR respectfully submits the following comments as the state agency that owns and controls all parcels within Nominations 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007. Included with these comments are proposed terms and conditions (attached as “Addendum to Standard Lease”) that ODNR believes are appropriate for the lease of the parcel because of the specific conditions at Salt Fork State Park and Salt Fork Wildlife Area.

In addition to the comments below, ODNR requests that any awarded bids be subject to the attached “Addendum to Standard Lease.”

Due to the potential effect on visitors, ODNR is requesting limitations on road usage within the Park. (See proposed “Addendum to Standard Lease”)

Access to the multitude of land and associated facilities at Salt Fork State Park is along a primary through road, referred to as Road 1. Road 1 provides Salt Fork State Park visitors immediate access to the park office, picnic areas, hunting areas, horse trails and the horse campground; and to access roads leading to hiking trails, campgrounds, marinas, the lodge, cabins, the golf course, the nature center, additional picnic areas, beaches, launch ramps and fishing areas.

Due to potential effects on water quality and quantity, ODNR is requesting additional terms and conditions to protect water resources within the Park. (See proposed “Addendum to Standard Lease”)

ODNR is committed to maintaining obligations for high-quality water resources to our local communities for fire suppression. Several of the local townships rely on a supply of water from Salt Fork Lake to maintain hydrants to aid in combating fires in the Salt Fork State Park region.

Additionally keeping water quality and water (quantity) elevation levels at a constant for our recreational users (boaters, swimmers, and fisherman) and the safety of the Salt Fork region community is principal.

To limit the light pollution at the Park, ODNR is requesting additional terms and conditions related to lighting plans. (See proposed “Addendum to Standard Lease”)

One of the many reasons that visitors flock to state parks is the beauty and solitude of the dark night sky. Natural lightscapes, including dark night skies, are a scenic resource integral to any park experience. Many visitors seek state parks to experience this increasingly rare resource. Hunting, fishing, star viewing, and other nighttime events, often in conjunction with popular events hosted at the park, rely on dark skies for optimal recreation. In addition to the importance of the night sky to humans, wildlife is impacted

by light pollution as well. Animals often depend on the darkness to hunt, conceal their location, navigate, or reproduce. For nocturnal animals, light pollution also means habitat destruction.

Due to the noise generated during the construction, drilling, and fracking process, ODNR is requesting additional terms and conditions. (See proposed “Addendum to Standard Lease”)

Ohio State Parks, including Salt Fork State Park, are mostly rural in nature and changes in the level and type of noise will be particularly noticeable, especially when visitors are accustomed to quiet or only a few familiar and intermittent sources of noise. Overnight guests, birders, horse riders and those seeking a quiet hike on a trail by foot may be affected by the extended day and night operation of well sites if not carefully controlled.

Hunters especially rely on the quiet stillness of state park forest, grassland, and wetland. Over 12,000 acres of Salt Fork State Park are managed through a memorandum of agreement with the Division of Wildlife, allowing more hunting opportunity in areas across the state park. Over 3,000 hunters were issued licenses in Guernsey County alone during 2022 and over 51,000 licenses were issued to out of state hunters. A variety of wild game including rabbit, squirrels, deer, grouse, quail, woodchuck, raccoon, mink, muskrat, beaver, wild turkey, and waterfowl are abundant at Salt Fork State Park and Wildlife areas. Increases in noise may cause temporary or permanent displacement from certain areas of the park; if nests and dens are abandoned, populations could decline.

To limit the effects of proposed well sites on the viewshed of Salt Fork State Park, ODNR is requesting additional terms and conditions. (See proposed “Addendum to Standard Lease”)

A majority of the land now encompassed within the Salt Fork State Park was once privately owned and, as a result, many historical sites documenting the lives of historical settlements exist today. Most of the well-known and visited sites are centrally located, but several historical cemeteries are found on the boundaries of the park. For this nomination, five Ohio Genealogical Cemeteries (OGS) are recorded within close proximity to the proposed well sites: Luzaddler #4367, Zane Trace #4370, Warne #4369, Wirick #4387 and one unnamed cemetery #4416.

Due to ODNR's obligations to comply with the terms of the federal grant used to purchase the Wildlife Area, ODNR is requesting the additional terms and conditions. (See proposed "Addendum to Standard Lease")

The parcel nominated in 23-DNR-0006 was acquired using a federal grant under the Wildlife and Sport Fish Restoration Program (16 U.S.C. §§ 669;777). In order to maintain compliance with federal regulations (50 C.F.R. § 80) and the terms of the grant, any change in the use and/or disposition of this parcel requires approval of the U.S. Fish and Wildlife Service. ODNR requests that the Commission require the bidder to comply with the terms of this program as a condition of entering into the lease.

To ensure that ODNR receives a fair offer for the mineral rights within the nominated parcels, ODNR is requesting additional terms and conditions. (See Proposed "Addendum to Standard Lease")

In December of 2022, ODNR received an offer to lease the parcels included in Nominations 23-DMR-0005, 23-DNR-0006, and 23-DNR-0007. The lease offered a bonus of \$5,500 per net acre, and a royalty payment at 20% gross proceeds. The recent timing of this offer in relation to the nomination of these parcels should represent the fair market value of both the bonus and royalty payments and should be considered by the Commission as the minimum acceptable offer for these terms.

To ensure that the eventual lessor is an operator in good standing, and because the identity of the nominating party and any bidders remains confidential pursuant to R.C. 155.33 until the bid is awarded, ODNR is requesting that the Commission perform the following compliance reviews:

1. Review of ODNR, Division of Oil and Gas Resources Management records for any violations of Ohio Revised Code Chapter 1509 and Ohio Adm. Code 1501:9;
2. Review of Ohio EPA records for any violations of the Ohio Revised Code and Ohio Administrative Code that Fall within the Ohio EPA's regulatory authority;
3. Review of the U.S. EPA records for any violations of the United States Code or the Code of Federal Regulations that fall within the U.S. EPA's regulatory authority;
4. Review of Ohio's consumer complaint database for any violations of Ohio's consumer protection laws.

Thank you for your consideration of ODNR's comments and proposed terms and conditions. ODNR looks forward to working with the Commission to comply with the requirements of Ohio law while staying faithful to our mission to ensure a balance between the wise use and protection of our natural resources for the benefit of all.

Mary Mertz
Director, Ohio Department of Natural Resources

ADDENDUM TO STANDARD LEASE

Due to the specific conditions related to Salt Fork State Park and the Salt Fork Wildlife Area, ODNR respectfully recommends that the Commission adopt the following Terms and Conditions as an Addendum to the Standard Lease, which was adopted by the Commission on April 17, 2023, as set forth in Ohio Adm.Code 155-1-01, with the terms of the Addendum overriding any conflicting terms in the Standard Lease:

A. General Notification Provisions

1. Any reference to “ODNR” or “Department” in the lease addendum refers to the Ohio Department of Natural Resources.
2. All required notices and contact related to operations regulated under R.C. Chapter 1509 and Ohio Adm.Code 1501:9 and referred to in this lease shall be made to the Division of Oil and Gas Management, Ohio Department of natural Resources, unless otherwise specified.

B. Compliance with Ohio’s Contracting Requirements

ODNR’s contracting authority is governed by the requirements in Revised Code Chapter 125, which includes specific limitations on state contracts. ODNR requests that the Commission include the following condition:

1. The lease shall be subject to the State of Ohio’s contracting authority as set forth in R.C. 125.

C. Compliance with Provisions of the Wildlife and Sport Fish Restoration Program

1. In the event that any parcel subject to the lease agreement is encumbered by the Wildlife and Sport Fish Restoration Program, Lessee is required to comply with the requirements of the program as set forth in 50 C.F.R. § 80, *et seq.*, and all requirements of the grant agreement or grant documents, at Lessee’s cost.
2. Lessee shall coordinate with the appropriate staff at ODNR at each step of the process, including staff at the Division of Wildlife, until all requirements have been satisfied.

D. Well Pad Location

The proposal attached to Nominations 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 includes several well pads. In order to ensure the safety of all visitors to Salt Fork State Park, ODNR requests the following conditions as they relate to the location and appearance of well pads:

1. No well site boundary may be located within 1,000 feet from any boundary line of the Salt Fork State Park and/or Salt Fork Wildlife Area.
2. Prior to commencement of well pad construction, Lessee shall submit to ODNR, Office of Real Estate and Land Management, a plan to address the aesthetic impacts of the well site on any portion of the well site that can be seen from the boundaries of Salt Fork State Park or Salt Fork Wildlife Area.

E. Protection of Water Resources

In order to protect the natural resources for the use and enjoyment of all visitors to this parcel, ODNR requests that the Commission include the following terms and conditions:

1. **Water Testing:**
 - a. Lessee will sample and test all wells and sources of water, including Salt Fork Lake, within a distance of 3,000 feet of the surface location of any well drilled on land owned by the State under the following occurrences:
 - i. Prior to the drilling of any well in the unit governed by this lease; and
 - ii. Between sixty (60) and ninety (90) days of the completion of each well or group of wells drilled under this lease.
 - b. Prior to engaging a contractor for these services, Lessee and ODNR, Office of Real Estate and Land Management, shall agree on the contractor chosen to perform water sampling and testing.
2. **Damage to Surface Water and Ground Water:** Lessee shall be solely responsible for damage, disturbance, contamination, or injury to any groundwater on the Leasehold, and shall correct any damage at its own costs.
3. **Freshwater Impoundments and Liners:** The lease shall include provisions for freshwater impoundments and liners, which provisions ensure the highest level of environmental protection. These provisions shall include, but not be limited to, the following:

- a. Lessee shall have no right to dig any pits on the Leasehold;
- b. Any impoundment created after the date of this Lease and within 1,000 feet of Salt Fork Lake shall: (i) conform to all applicable regulatory requirements (state, local, and federal); and (ii) promptly after completion of operations any backfill and the liners shall be removed and the impoundments shall be drained, prepared for burial, back filled, grated, and planted within ninety (90) days (weather permitting). Lessee shall promptly notify ODNR and all applicable regulatory authorities if any impoundment lining is torn, punctured, or otherwise breached, allowing any fluid contained in an impoundment or designated to be contained in an impoundment to seep, leak, or overflow through or around the liner.

F. Surface Operations

1. Site Access. Lessee shall provide site access to ODNR for the purpose of enforcing any terms of the lease. This access is not limited to only Division of Oil and Gas Resources Management and includes any other division of the ODNR that may have an interest in the leasehold.
2. Use of Existing Pad Sites. Use or re-use of any existing pad sites or surface locations for new drilling and completion operations for any lands pooled within this Lease shall be certified by an engineer qualified and skilled in the appropriate area to ensure safety, environmental, and operational integrity of the pad site or surface location. Lessee shall obtain the appropriate review, comments, and approvals from the ODNR. Lessee agrees to provide ODNR Division of Oil and Gas Resources Management and Office of Real Estate and Land Management with all plans and the ability to review and comment before any work commences for new drilling and completion operations on any existing sites.
3. Well Cellars. Any wells drilled shall have a completely sealed unit cellar system with the proper grates and safety features installed and in use at all times. The cellar shall be approved by the ODNR.
4. Brine, Saltwater, and Frac Fluid Disposal. Lessee shall dispose of salt water, brine, frac water, or liquid waste oil, and other waste, in accordance with the rules and regulations of ODNR and all other applicable governmental authorities.
5. Soil and Groundwater Repair. Lessee shall clean up, remove, remedy, and repair any soil or ground water contamination and damage caused by its operations and activities in Units containing any portion of the Leasehold or release of any contaminant in, on, under, or about units containing any portion of the Leasehold, whether or not caused by the negligence of Lessee.
6. Drill cuttings and Waste Disposal. Lessee shall not use this Lease, or any lands pooled therewith for the temporary or permanent disposal of any drill cuttings, or the long-term storage or disposal of residual wastes. No disposal wells or any other devices or means of disposal of wastes or drilling liquids are permitted on the Leasehold.

7. Closed Loop System. The Lessee shall perform all well drilling using closed-loop systems that employ a suite of solids control equipment to minimize drilling fluid dilution and provide for the economic handling of the drilling wastes. The closed-loop system should include a series of linear-motion shakers, mud cleaners, and a centrifuge dewatering system, or any equipment or methods with the same result or effect of resulting in a “dry” location where the use of a reserve pit is not required and used fluids are recycled and solid wastes can be stored in tanks and transported offsite to a state approved landfill or other lawfully permitted disposal site.
8. Monitoring Wells. In the event of a fluid discharge that is not contained within Lessee's containment system at a well site within a Unit containing any portion of the Leasehold, the Lessee may be required to install groundwater monitoring wells which will be used to sample groundwater at the perimeter of the well site. Proper monitoring well design and construction should include consideration of site specific hydrogeologic conditions and shall be in accordance with ODNR requirements. Lessee shall provide a record of any reportable release to ODNR as soon as practicable.
9. Use of Subsurface Water. Lessee shall not drill or operate any water well, take water, or inject any substance, except fluid for hydrofracturing, into the subsurface or otherwise use or affect water in subsurface water formations.
10. Revegetation. As part of the plugging and abandonment process for any well located on the Leasehold, surface of the land of any Unit containing any portion of the Leasehold shall be restored as nearly as practicable to its condition at the commencement of drilling operations. Restoration and reclamation revegetation shall be accomplished in accordance with seed mixes approved by ODNR. The “A” horizon soils will be separated as part of pad construction as much as practicable and stockpiled separately. The topsoil pile will be used to facilitate subsequent reclamation and revegetation work.
11. Reclamation Goals. Lessee will reasonably support, where practicable, reclamation goals designed by ODNR to eliminate cool season grasses, such as fescue, in favor of legumes, and native shrub plantings adjacent to the vertical edge of the existing hardwood will be undertaken as practicable to provide visual buffering. The ultimate final reclamation will favor an early successional habitat where practicable and as approved by ODNR on the outer edge of the well pads and road systems. ODNR, Division of Oil and Gas Resources Management and ODNR, Office of Real Estate and Land Management, shall have the right to provide the revegetation plan.
12. Hazardous Materials. Lessee shall not use, dispose of, or release on the Leasehold or permit to exist or to be used, disposed of or released on the Leasehold or any Unit containing any portion of the Leasehold as a result of its operations and activities any substances (other than those Lessee has been licensed or permitted by applicable public authorities to use on the Leasehold) that are defined as “hazardous materials,” “toxic substances,” or “solid wastes” in applicable federal,

state or local laws, statutes, or ordinances. Should any pollutant, hazardous material, toxic substances, contaminated waste, or solid waste be accidentally released on the Leasehold, Lessee shall notify ODNR as promptly as practicable after notifying the applicable governmental body of such event. Lessee shall be responsible for, and timely pay, all costs of clean-up, remediation, and other costs related to and arising from the event, including but not limited to penalties.

13. Maintenance of Production Equipment. Lessee shall maintain all production equipment and production pad features, both in physical integrity and appearance, including preventing and removing rust from any equipment and maintaining any fencing or other items constructed on the production pad.
14. Flaring. Lessee shall use its best efforts to minimize the frequency of any flaring, including but not limited to using high efficiency flares. As soon as gathering lines and other infrastructure are in place, Lessee shall use its best efforts to minimize, and eliminate, if possible, all flaring. Lessee shall use redundant separators or both a high- and low-pressure separator to reduce potential emissions.
15. Notice of Materials to be Used. Lessee, and any service provider engaged by Lessee, shall utilize nonhazardous or benign chemicals in conducting hydraulic fracturing operations. Any chemical, solution, or fluid shall not contain diesel fuel. Lessee shall provide ODNR with a list of chemicals and materials to be used during the hydraulic fracturing process prior to the commencement of completion operations for each well drilled under this Lease.
16. Casing and Cementing Casing. The Lessee shall case and cement a well to accomplish the following:
 - a. Allow effective control of the well at all times.
 - b. Prevent the migration of gas or other fluids into sources of fresh groundwater.
 - c. Prevent pollution or diminution of fresh groundwater.
 - d. Prevent the vertical migration of gas or other fluids behind the casing.
 - e. There shall be run and permanently cemented a string or strings of casing in each well drilled through the fresh water bearing strata to a depth and in a manner prescribed by regulation by ODNR. The Lessee shall equip the well with one or more strings of casing of sufficient length and strength to prevent blowouts, explosions, fires, and casing failures during installation, completion, and operation in accordance with the rules and regulations of ODNR. Casing shall be new steel casing and meet manufacturing standards, including American Petroleum Institute or equivalent specifications for pipe used in wells drilled to anticipated depths.
 - f. All casing shall have been hydrostatically pressure tested with an applied pressure at least equal to or greater than the maximum pressure to which the pipe will be subjected in the well.
 - g. The amount and type of casing to be run shall be in accordance with current prudent industry and engineering practices and in accordance with the rules and regulations of the ODNR.

- h. In making these determinations, the Lessee should consider the following: the maximum anticipated surface and down hole pressure; collapse resistance; tensile strength; chemical environment; and potential mechanical damage.
- 17. Wellhead Assemblies. Wellhead assemblies shall be used on wells to maintain surface control of the well. Each component of the wellhead shall have a pressure rating equal to or greater than the anticipated pressure to which that particular component might be exposed during the course of drilling, testing, or producing the well.
- 18. Surface Casing and Cement Casing Displacement. Where potential oil or gas zones are anticipated to be found at depths below the deepest fresh groundwater, the Lessee shall set and permanently cement surface casing prior to drilling into a stratum known to contain, or likely containing, oil or gas. The Lessee shall permanently cement by the displacement method the surface casing by placing the cement in the casing and displacing it into the annular space between the wall of the hole and the outside of the casing. Sufficient cement must be used to cement the casing back to surface.
- 19. Cement Basket. If it is anticipated that cement used to permanently cement the surface casing cannot be circulated to the surface, a cement basket may be installed immediately above the depth of the lost circulation zone. Additional cement may be added above the cement basket, if necessary, by pumping through a pour string from the surface to fill the annular space.
- 20. Cement Requirements. The Lessee shall use cement that will resist degradation by chemical and physical conditions in the well and meet tests conducted using the equipment and procedures adopted by the American Petroleum Institute. The Lessee shall permit the cement to set to a minimum compressive strength in accordance with these specifications or a minimum period of 8 hours prior to the resumption of actual drilling. Where special cement or additives are used, the Lessee must request approval from the ODNR.
- 21. Casing and Cementing Records. The Lessee shall provide ODNR with a copy of all casing and cement records for each well drilled pursuant to this Lease.
- 22. Blowout Prevention. The Lessee shall use blow-out prevention equipment when well head pressures or natural open flows are anticipated at the well site that may result in a blow-out or when the Lessee is drilling in an area where there is no prior knowledge of the pressures or natural open flows to be encountered. Blow-out prevention equipment used shall be in good working condition at all times. The blow-out preventer and all pipe fittings, valves, and unions placed on or connected to the blow-out prevention systems shall have a working pressure capability that exceeds the anticipated pressures.
 - a. All blowout prevention equipment should be tested after its installation and before its use.
 - b. A minimum of two (2) remotely controlled hydraulic ram-type blowout preventers (one equipped with blind rams and one with pipe rams), valves,

and manifolds for circulating drilling fluid shall be installed for the purpose of controlling the well at all times. The ram-type blowout preventers, valves, and manifolds shall be tested to 100% of rated working pressure, and the annular-type blowout preventer shall be tested at the time of installation.

- c. The Lessee shall conduct a complete test of the ram type blow-out preventer and related equipment for both pressure and ram operation before placing it in service on a well. The Lessee shall test the annular type of blow-out preventer in accordance with the manufacturer's published instructions, or the instructions of a professional engineer, prior to the device being placed in service.
 - d. When the equipment is in service, the Lessee shall visually inspect the blow-out prevention equipment during each tour of drilling operation and during actual drilling operations test the pipe rams for closure daily and the blind rams for closure on each round trip. Testing shall be conducted in accordance with American Petroleum Institute publication API RP53, "API Recommended Practice for Blowout Prevention Equipment Systems for Drilling Wells." The Lessee shall record the results of the inspection and closure tests in the drillers log after each occurrence.
 - e. During drilling when conditions are such that the use of a blowout preventer can be anticipated, there shall be present on the rig floor a certified individual responsible to the Lessee who has satisfactorily completed an approved well control course or equivalent and shall be in contact with the manufacturer of the specific blowout preventer to ensure that additional maintenance, preparation, parts, or technical support is not needed.
 - f. Lessee shall provide ODNR with a copy of all blow-out prevention testing records referenced in this section.
23. Completion Well Control. Upon completion of the drilling operations at a well, the Lessee shall install and utilize equipment, such as a shut-off valve of sufficient rating to contain anticipated pressure, lubricator, or similar device, as may be necessary to enable the well to be effectively shut-in while logging and servicing the well both during and after completion of the well.
24. Post Frac Operations. Equipment capable of controlling appropriate pressure shall be used to clean out the composite frac plugs and sand during post-fracturing operations. Operations shall be, at a minimum, consistent with the below requirements or any equipment or methods with the same result or effect. A minimum of two pressure barriers should be in place during all post-fracturing operations. A remote controlled, independently powered blowout preventer unit, which allows workers to control the unit at a safe distance from the well consistent with industry best practice, shall be operational during all post-frac cleanout operations. A minimum of one well site supervisor who has a current well control

- certification should be on the site during post-frac cleanout operations. Operations shall be conducted in accordance with all applicable state and federal regulations.
25. ODNR Signage. A sign with ODNR's 24-hour emergency telephone number and local emergency shall be displayed at each well pad.
26. Hydrogen Sulfide Areas.
- a. In the event Lessee proposes to drill a well in an area through the same formation where hydrogen sulfide has been found while drilling, Lessee shall install monitoring equipment during drilling at the well site to detect the presence of hydrogen sulfide in accordance with American Petroleum Institute publication RP49, "Recommended Practices for Safe Drilling of Wells Containing Hydrogen Sulfide," or most recent version of that publication. When hydrogen sulfide is detected in concentrations of 20 ppm or greater, the well shall be drilled in accordance with American Petroleum Institute publication API RP49, "Recommended Practices for Safe Drilling of Wells Containing Hydrogen Sulfide," or most recent version of that publication.
 - b. In the event Lessee drills and/or operates a well in which hydrogen sulfide is discovered in concentrations of 20 ppm or greater, Lessee shall operate the well in a way that presents no danger to human health or to the environment. The Lessee shall notify ODNR of the location of the well and the concentration of hydrogen sulfide detected.
27. Simultaneous Operations. Lessee will not conduct any simultaneous operations under this Lease, or any lands pooled with, unless such operations are consistent with the simultaneous operations rules promulgated by the ODNR. Lessee shall notify ODNR, Office of Real Estate and Land Management, within 30 days of any simultaneous operations approved by the ODNR, Division of Oil and Gas Resources Management.
28. Well Site Berms. Lessee shall construct three (3) foot berms around the well site to prevent any accidental fluid releases from being discharged onto adjacent lands and water bodies. All fluids collected from the drill site must be disposed of in a proper manner in accordance with Federal and State rules and regulations. The Lessee shall not allow wastes to be disposed, buried, dumped, or discharged on the grounds of ODNR.

G. Secondary Containment

1. For purposes of this addendum, "Secondary Containment" shall have the same meaning as defined in Ohio Adm.Code 1501:9-4(BBB).
2. Secondary Containment shall be used on each well site during all phases of operation, including drilling, well construction, hydraulic fracturing, flowback, and production. Lessee shall provide Secondary Containment for all substances, including solid wastes, fluids, and other regulated substances that could be harmful to the environment, including the transferring of these substances. Stormwater shall be removed as soon as possible and prior to reducing the

secondary containment volume by ten (10%) percent. Secondary Containment shall be constructed with manufactured products that must be sufficiently impervious, able to contain spilled materials, and be chemically compatible with the material stored within the containment to prevent contained materials from coming in contact with the ground.

3. Lessee must comply with Ohio Adm.Code 1501:9-4-06(C)(4) for volume of secondary containment.
4. The Secondary Containment shall be maintained during its lifetime to ensure functionality.
5. Lessee shall provide ODNR with the plan for Secondary Containment prior to commencement of pad construction.

H. Traffic and Road Use

The oil and gas drilling and production activities as proposed in this nomination are located in close proximity to areas that are visited by hundreds of thousands of people seasonally. In order to reduce the impact to the area surrounding the parcel, ODNR requests that the Commission include the following terms and conditions:

1. Lessee and their contractors, heirs, assigns, etc. are prohibited from using any roadways within the limits of the Salt Fork State Park as specifically designated by ODNR, Office of Real Estate and Land Management.

I. Noise and Light

ODNR requests the following conditions in order to protect visitors to the Salt Fork State Park from disruptions due to noise and light:

1. Lessee shall construct perimeter sound walls during the drilling and completion phase around the well pad or other specific pieces of equipment.
2. Lessee shall use best practices available to limit sound pollution during all phases drilling for any wells on this parcel, including but not limited to: limiting use of Jake brakes on trucks; use of low-noise exhaust mufflers on equipment utilizing disk brakes on drilling rigs instead of drum brakes where practical; and orientation of equipment on the well pad to direct exhaust noise from generators and pumps away from all recreational areas.
3. Once a well is in operation, Lessee shall limit noise-intensive activities such as flaring and blowdowns to mid-day.
4. Lessee shall use best practices available to limit light pollution during all phases of all wells drilled on this parcel, including but not limited to: defectors; low density sodium lighting, or fully shielded lighting consistent with Occupational Safety & Health Administration (OSHA) regulations.

5. ODNR, Office of Real Estate and Land Management, shall have the right to review and approve Lessee's plans for permanent lighting at the production pad.

J. Viewshed Restrictions

In order to protect the natural resources for the use and enjoyment of all visitors to this parcel, ODNR requests that the Commission include the following terms and conditions:

1. Lessee shall consult with ODNR, Office of Real Estate and Land Management, and the State Historic Preservation Office (SHPO) to mitigate impacts on cemeteries when they are within the viewshed of any proposed well site.
2. Lessee shall use all best efforts and practices to minimize the impact on the viewshed of the areas in and around Salt Fork State Park.

K. Restrictions on Construction, Drilling, and Completion Schedules

ODNR requests the following terms and conditions in order to ensure that it maintains its responsibility to all visitors to the Salt Fork State Park and Salt Fork Wildlife Area:

1. Lessee shall not conduct any construction, drilling, and completion during the following periods of time: April 20-May 1 and November 15 – December 1.
2. Lessee shall provide ODNR, Office of Real Estate and Land Management with a monthly construction and/or operation schedule during the construction, drilling, and completion phases.

L. Safety and Emergency Notifications

ODNR requests the following terms and conditions in order to provide protection for all visitors to the Salt Fork State Park:

1. Lessee shall provide a written emergency response plan for each unit on the leasehold.
2. Lessee shall provide ODNR, Office of Real Estate and Land Management with specific plans for notification in the event of an emergency during any phase of the well operations.
3. Lessee shall install safeguards to prevent unwanted blowouts and shall use flame arrestors as standard practice.
4. Lessee shall use practices that exceed industry standards to store fracking liquids and wastewater from drilling. New steel shall be used in well casings to isolate fracking zones from aquifers at shallower depths.

Subject: "Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007."
Date: Tuesday, July 11, 2023 9:35:18 AM

To Whom It May Concern, I have read with deep concern the proposed use of Salt Fork State Park for fracking. As a former, summer intern, working as a naturalist in the state park system, I know the value of having safe state parks where our native species can live in their native habitats. Fracking anywhere disturbs that balance and has been proven to pollute the water and air. I would no longer feel safe in state parks as I do not feel safe anywhere where fracking is used to extract natural gas.

Today, I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

Yours truly, Susan B. Strauss & Christopher J. Wozniak

Advantages of Single Operator within Salt Fork State Park

1. Coordinated Drilling and Completions Operations

Centrally coordinate service companies and other on-site activities for more efficient execution, including reduced truck traffic and noise and light management.

2. Centralized Facilities Reduce Surface Footprint

Fewer production facilities, less surface disturbance, less pipeline, less truck traffic, and fewer potential emissions.

3. Maximized Reservoir Development Potential

- a. Minimize unit boundaries and related unit setbacks to optimize resource recovery.
- b. Design and execute offset completions operations to avoid depletion and degradation of producing wells.
- c. Optimize existing production by efficiently planning for shut ins during offset completion operations.

Disadvantages of Multiple Operators within Salt Fork State Park

1. Increased Surface Disturbance

Duplication of tank batteries and well pads (and in some instances compressor stations and gathering pipelines).

2. Increased Unitization

Multiple development plans increase the amount of unitization required, which could delay operations and lead to suboptimal development.

3. Potential Stranded Acreage and Inefficient Development

Multiple and uncoordinated development plans could lead to stranded acreage and inefficient development.

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mr. Gabriel Lara

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Mrs. Karen Hales

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Ms. Teri Clark
swec4me@yahoo.com

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mr. Andrew Myers

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mrs. Lynda Kemp

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Mrs. Karen Stahler

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Ms. Diana DeBorde

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Kirt Adams

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Elizabeth Miller

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Mrs. Donna Close

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mr. Bry Lewand

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Mr. Patrick whitehair
patwhitehair@gmail.com
1407 stanberry ave Zanesville, OH 43701 Constituent

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Mr. Ted Thompson

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mr. Randy Reck

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Mr. Richard Elliott

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
John Herman

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

I would like to take the opportunity to comment on these nominated parcels that are part of Salt Fork State Park. For decades, Ohioans and tourists from out of the state have come to Salt Fork to make memories and enjoy the peace and tranquility this park and the surrounding area have to offer. Unfortunately, with the interest of oil and gas exploration companies intending to frack under this property and subsequently setup large quantities of wells on adjacent land, the attributes long associated with this park could come to an end. The peaceful sounds of waves hitting the beach and birds chirping in the trees will be replaced by noisy industrial noises coming from drilling rigs, flaring, compressors, and dozens of other pieces of equipment. Tourists and locals alike come to State Parks to embrace nature and spend time outdoors, not to breathe in pollutants in the air and listen to 24/7 industrial equipment. As you are familiar with, Salt Fork offers a wide array of state-of-the-art accommodations, golf, boating, and miles of trails all leading to the high volume of visitors that have been coming to this park for years. Will these same guests have an interest in visiting once surrounding parcels of land are dotted with well pads, pipelines, and other exploration equipment? Would visitors want to sit at their campsite and smell the emissions? Would stargazers come only to see light pollution from the well sites? Would fishermen come if they suspect there are potential contaminants in the water? I know I personally would definitely be making my travel arrangements elsewhere. Nature itself cannot relocate, but visitors definitely can. It would be a tragedy to see all of the time and resources invested in Ohio's largest State Park go to waste with an absence of park goers. Decisions and ramifications are irreversible, and it is for these reasons that I am asking you to deny this nomination associated with Salt Fork State Park. Salt Fork is a treasure to Ohio, let's not jeopardize this exceptional resource in the interest of financial incentives!

Concerned citizen,

Stephen Kamph

I am writing on behalf of the Ohio Chamber of Commerce. The Ohio Chamber of Commerce announced in its Blueprint For Ohio's Economic Future (published October 2022) support for the use of state-owned minerals on land controlled or owned by the state of Ohio. Therefore, the Ohio Chamber of Commerce supports the nomination of land contained in Notice of Nominations 23-DNR-0005; 23-DNR-0006; and 23-DNR-0007. These nominations will add additional economic opportunities and produce additional revenue for the state of Ohio. Impact on Ohio's economy and revenue for governmental services should be taken into consideration for all tiers of land nominated and future bidding.

Tony Long

To the Ohio Oil and Gas Land Management Commission,

I was disheartened to learn that much of Salt Fork State Park is being considered for oil and gas drilling and fracking. As an Ohioan, I am adamantly against allowing any of our state parks, forests, and wildlife areas to be polluted by the oil and gas industry, but Salt Fork holds a special place in my heart. I have been visiting Salt Fork for as long as I can remember. Camping and boating with my family, learning to fish, hiking to the Stone House, sitting on the docks, swimming in the lake—I cherish these memories, and I know I'm not the only one. Salt Fork is beloved by many in Ohio.

Not only is Salt Fork a popular destination, but the surrounding area is also home to tens of thousands of people, including some I know and love. As such, I am deeply concerned for those living in Guernsey County and nearby. Hydraulic fracturing poses serious health risks. A Yale School of Public Health study found that children in Pennsylvania who lived in proximity to unconventional oil and gas (UOG) developments were 2-3 times more likely to develop leukemia. Another review identified 55 chemicals used in hydraulic fracturing that may cause cancer, including 20 that are known to increase the risk of leukemia and lymphoma. Would you live there?

Salt Fork is home to a diverse population of plant and animal life including white-tailed deer, wild turkey, ruffed grouse, fox, gray squirrels, and barred owls. Wild geranium, large-flowered trillium, violets, asters, and goldenrod fill the meadows while songbirds like the cardinal, goldfinch, and Kentucky warbler fly overhead. Oil and gas drilling and fracking threatens to harm or even destroy parts of this thriving ecosystem. A study conducted at the Fernow Experimental Forest in West Virginia found that the forest ecosystem was affected by forest clearing, erosion, road building, and vegetation death from direct exposure to fluid spills. An EPA study found scientific evidence that hydraulic fracturing can impact drinking water sources. There is no shortage of evidence that fracking is harmful to our ecosystems.

I am writing to ask you to deny all three project nominations for Salt Fork State Park: 23-DNR-0005, 23-DNR-0006 and 23-DNR-0007.

*But ask the animals, and they will instruct you;
ask the birds of the air, and they will tell you.
Or speak to the earth, and it will teach you;
let the fish of the sea inform you.
Which of all these does not know
that the hand of the LORD has done this?
The life of every living thing is in His hand,
as well as the breath of all mankind.*

(Job 12:7-10)

Respectfully,

Taylor

To the Ohio Oil and Gas Land Management Commission:

I am writing about the three nominations / applications to drill under Salt Fork State Park, presumably to access the Utica shale for natural gas and gas liquids, and am writing largely because of the widely publicized offer of nearly \$2 billion from Encino Energy for the rights to exploit that resource. i have two points to make: first, **\$2 billion is not enough**, even at this time; secondly, because prices for natural gas and gas liquids are currently near their historic lows, and because it's reasonable to expect they'll eventually return to recent highs, **the value of that resource to the state at some point in the not too distant future should be at least quadruple what it's now valued at....**i intend to make the case that the state should wait for a better price environment, something that private companies would not do on their own volition...

as i write this, the widely quoted price of natural gas, based on the NYMEX contract for August delivery, is \$2.53 per mmBTU*; it has drifted between \$2.48 and \$2.58 per mmBTU over the past couple of days...at the same time, the Chicago Mercantile Exchange is quoting August ethane at 26 cents per gallon....hence, both have been trading at a price that is among the lowest prices in 20 years: for natural gas, lower priced exceptions would be during the lockdowns at the onset of the pandemic in 2020, during a brief price crash in April of 2012, and during a slump in energy prices in early 2016 that was exacerbated by [OPEC's attempt to put US shale out of business by flooding the world with oil](#)....on the other hand, natural gas prices topped \$10, almost four times today's price, as recently as last August, and consistently traded over \$6 from April thru December of last year, with most of the quotes during that period above \$8; or **three times today's price....**here is an interactive graph that can be reset to show the entire history of natural gas prices, based on the nearest contract price to the dates shown: <https://www.barchart.com/futures/quotes/NGQ23/interactive-chart> (ethane prices tend to move in tandem with natural gas, as per this indexed graph of producer price changes through June: <https://fred.stlouisfed.org/series/PCU21111221111214>)

*(Note: natural gas is priced per million British thermal units; that's roughly the equivalent of a thousand cubic feet)

as you see from that graph, natural gas prices have a long history of being extremely volatile; after topping \$10 per mmBTU for the first time during the winter of 2000-01, natural gas price contracts consistently traded above \$5 from the Fall of 2002 through the Spring of 2009, with price run-ups during the Fall of 2005 and the Fall of 2008 to as high as \$15.78 and \$13.88 per mmBTU respectively, in both cases on fears of insufficient gas in storage before winter...on the other hand, natural gas was largely priced below \$4 per mmBTU for the 6 years following OPEC's Thanksgiving 2014 massacre, even though [US drilling of new gas wells fell by 75% and never recovered](#),

with the exception of a month long price spike to over \$5 following a arctic air outbreak in early November 2018...

there were essentially two reasons that natural gas prices were higher last year; first, domestic supplies in underground storage were drawn down below normal during an extended period of colder than normal US temperatures in the early Spring of 2022, then fell further below their long term trend on demand for air conditioning during heat waves in July and August of last summer; secondly, the areas of central Europe historically most dependent on disrupted Russian gas pipeline supplies were experiencing their worst heat wave on record; in the face of that, benchmark [natural gas prices topped \\$100 per mmBTU in Europe](#) (the equivalent of ~\$500 a barrel oil) and \$60 in Asia...moreover, even though US LNG was being shipped to Europe, most US companies didn't benefit; [the Chinese were selling US LNG that they owned under contract to Europe right from the US Gulf Coast terminals](#), at a hefty profit...of course, US prices stayed below \$10 through most of that period because most US natural gas could not be exported to Europe **at that time..**

subsequently, the threat of a cold winter in the US did not materialize, less natural gas than normal was withdrawn from storage for heating, and US gas supplies ended this February above normal, and with our warm spring, held steady to end April 22.2% higher than the end-April average of the prior 5 years...over the same period, [Europe experienced its second warmest winter on record](#) and also ended April with their natural gas supplies well above normal...subsequently, European natural gas prices fell to a pre-war 2 year low amid talk that their storage capacity would soon be filled, and, in light of warnings that they might have to turn away LNG shipments, US prices followed suit...

European prices are now lower than those in Asia, and LNG shipments are being diverted from Europe to Asia instead...as of Tuesday, natural gas was trading around \$9 per mmBtu at the Dutch Title Transfer Facility (TTF) benchmark in Europe and \$11 at the Japan Korea Marker (JKM) in Asia.

looking at maps of the Utica shale and Point Pleasant formations and their expected characteristics in the area of Salt Fork, i find [the thickness of Utica shale](#) ranges from 60 feet in the far southwest corner of Guernsey country to 140 feet along the eastern edge; at the same time, [the thickness of the Point Pleasant formation](#) below it ranges from 70 feet in western Guernsey to 110 in eastern Guernsey, with the Point Pleasant generally around 90 feet thick under most of most of the county...from those EIA maps, i'd estimate that the combined thickness of the Utica and Point Pleasant shales under Salt Fork State Park is around 200 to 210 feet....the Utica shale in that part of the state sits between the relatively immature shale to the west, with its hydrocarbon profile including kerogens and incompletely formed oil in addition to oil and natural gas liquids, and the more heavily drilled areas to the east, closer to the Ohio River; where a greater proportion of dry natural gas is available...hence, we could expect that the shale under Salt Fork State Park will produce both natural gas and natural gas liquids, including ethane, butane and propane, in some quantity...hence, it's possible that **Salt Fork State Park represents the richest large unexploited hydrocarbon resource remaining in Ohio...**

as you know, production from a shale well is highest in the months right after it is fracked, and can fall off by as much as 80% in two years after that initial spurt...with our best shale plays already in production, and absent new technology to extract a higher percentage of hydrocarbons from shale, it appears that Utica (and Marcellus) shale output will soon begin a long decline, as exploitation shifts to less rich or thinner layers of shale...at the same time, demand from both new electric generation and exports will increase...lower supply and greater demand is a textbook case for higher future prices than what we're seeing today...**if i owned Salt Fork, and as a citizen of Ohio i do, i would not be selling that rich resource into the global marketplace at a time of historically low prices, but rather wait until such time as i could get a better return..**

the September 2022 bombing of the Nord Stream Baltic Sea pipelines from Russia to Germany and the curtailment of other Russia gas supplies to Europe has brought a flurry of announcements and expedited plans for new US LNG export facilities, which have continued into this year, and have been capped off by the announcement, just 6 days ago, of a new LNG liquefaction plant on the Rio Grande in Brownsville, Texas, which they expect will be among the largest gas export terminals in the world... these LNG plants won't come online immediately or even soon; construction time for new LNG facilities is typically around 6 years, and some of the projects announced haven't even reached the FID (final investment decision) stage, much less broke ground....but it is reasonable to expect that in light of all the new US LNG plants announced, planned and/or under construction, our LNG export capacity will double from the current 13.8 bcfd (billion cubic feet per day) of natural gas to over 27 bcfd by the end of the decade....even if we assume our production also increases, that would mean about 25% of our natural gas output could be heading overseas 8 years hence...

when the buildout of those LNG terminals on the Gulf Coast is complete, US natural gas prices will no longer be insulated from the global markets, and will move higher to meet the global prices, just as US oil prices rose after [US oil exports were first allowed in 2016](#), and now tend to trade a few dollars below the global benchmark...based on the historical differences between US prices and those in Europe and Asia, **US natural gas prices should see a fourfold to as much as a tenfold increase from what they would otherwise be if insulated from global prices**...this could easily mean \$20 natural gas in the US, just at the time that Ohio's Utica and Pennsylvania's Marcellus production will have begun their terminal decline...if we're lucky, New York might open up their resources to production; absent that, the Northeast US might even end up importing LNG from Qatar or Iran...

My broader point is that since we don't know what the future will bring, it behooves the state of Ohio to save this last prime natural gas and liquids resource for such a time as it is really needed, rather than sell it today at fire sale prices...

As word has spread of the potential for fracking to be permitted around and under Ohio State Parks, I can't help but recall a recent visit to a neighboring State Park in Pennsylvania. Ryerson Station State Park is located near Wind Ridge, PA in the state's Southwest corner. The park itself used to be so remote and removed from development, that it would fall on anyone's list for the most relaxing and quiet places. However, as the fracking boom evolved, the state permitted fracking under state property, and the environment radically changed. Presently, you can find a large compressor and transmission station on the western park border generating noise and air pollution. Additionally, well pads line the outskirts of the park, semi-trucks traverse the roads, and massive networks of pipelines have been constructed, destroying areas where trees used to stand. The difference in noise volumes and traffic is considerably noticeable. Campers now sit at the bonfire to hear the noise of industrialized machines running all hours of the night. Hikers see and smell the compressors and flaring from nearby well sites. The lake, which is now a wetland, appears to be contaminated with runoff containing pollutants from nearby well sites. In essence, Ryerson Station State Park is not the same park it used to be and never will be again. It is for these reasons that I am writing to you today. Let's use this as a case study and example for what happens when fracking is permitted near State Parks and the ramifications it has for park users, wildlife, and the environment. Please prevent such destruction from occurring at Salt Fork State Park and deny the proposed nomination to frack under and near this public land!

Darrell Kamph

To Whom it May Concern,

I am writing on behalf of Muskies, Inc, the largest fishing and conservation organization in the world, dedicated to the conservation of muskellunge, We wish to voice our opposition to the possible plans to extract oil from Ohio's state forest and parks via fracking.

Ohio's state forest and parks, which make up a very small area in the state, are enjoyed by many of our six thousand members as well as the many people who use them for recreation. With a well documented record of polluting water, fracking is in direct contrast with our mission statement to support conservation practices based on scientific merit and abate water pollution. The process of fracking oil requires the use of an enormous amount of water, requiring millions of gallons just to frack one well. History has shown all too often, leaving it up to private companies to "do the right thing", with no regulation, usually results in dire environmental consequences. In addition to the environmental threats we should be concerned about the threat of noise pollution and the interruption of use in these areas.

Our organization is not against mining or the extraction of oil. We do, however, take issue if it is done anywhere that may endanger where we fish or recreate. Oil that is fracked in Ohio's state forests and parks is simply not worth the environmental risks.

Thank you for your consideration.

Sincerely,

John Sadusky
Muskies, Inc
Senior Regional Representative
Region 1

Ohio's [state forest and parks](#) represents a small percentage (about 3%) of the land mass in Ohio. For many people both in and out of state, our state lands act as a sanctuary for visitors to escape their hectic lives and find the peace that nature offers. It also provides a space for recreating, bird watching, fishing, hiking, biking and these diverse ecosystems act as an outdoor learning lab for students as well as adults.

Fracking and all the build-out that this industry requires will dramatically affect these ecosystems. To believe that one can conduct fracking and still sustain a vibrant, healthy forest ecosystem is ludicrous.

Additionally, the [Halliburton](#) loophole legislation of 2005 exempted natural gas drilling from most federal laws protecting the environment including the Safe Drinking Water Act. It

exempts companies from disclosing the chemicals used during hydraulic fracturing. Essentially, the provision took the Environmental Protection Agency (EPA) off the job. Fracking is virtually unregulated. Who will guarantee that every stage of the process will be conducted in a way so as not to disrupt the forest ecosystem?

The water footprint of fracking is enormous. Fracking **requires millions of gallons of water** to frack just one well. It also produces millions of gallons of toxic wastewater. An **EPA study**, which used over 1200 published documents, shows that water indeed can and will become contaminated via many of the activities involved in fracking. If water is taken from local streams and surface water at times of drought, various contaminants can become concentrated in the lower water volume.

Because fracking water contains many unknown and dangerous compounds, spills are especially problematic as they can reach ground water sources. Many such **contamination events** involve the release of recovered fluid (called “produced water”), which consists of fracturing fluid and salts, heavy metals, hydrocarbons, and radioactive material accumulated from natural underground sources.

Often improper disposal, like the direct release of produced water into streams and rivers or into unlined waste ponds, will result in contamination as well as the deaths of **avian species** who mistake these waste ponds for freshwater ponds.

Fracking impoundment pond, Seneca, OH, 2017. Photo by Ted Auch / FracTracker Alliance.

Peer reviewed studies show that watersheds surrounding frack well pads test positive for radioactive substances. Of the **hundreds of chemicals** used to frack, more than 75% of them affect the respiratory and gastrointestinal systems; 40% to 50% impact the kidneys and the nervous, immune and cardiovascular systems; 37% act on the hormone system; and 25% are linked with cancer or mutations. These chemicals will also affect the health of species living around well pads as they are being exposed to water contamination.

Since the copy of the nomination form I reviewed for this project did not contain the name of the company that is making the proposal, it is impossible to review the company's compliance history and properly comment on the steps ODNR should take to successfully regulate their operation.

I would appreciate the opportunity to expand on some of my previous comments and concerns about oil/gas exploration at Salt Fork State Park. Currently, I am the secretary of Muskies Inc.'s West Virginia Chapter #9; these comments are my own. I have fished this lake for many years and have caught some of my best muskies at Salt Fork.

Salt Fork State Park is, to my understanding, the largest park in Ohio's once-award winning park system. It's many trails are used year around by hikers and horsemen, and by snowmobilers in the winter. The park boasts a beautiful lodge and lakeside cabins, a large campground, and two marinas. The lake is bountiful with bass, catfish, carp, muskie, crappie and saugeye. Fishermen come from all parts of Ohio and surrounding states like Pennsylvania and West Virginia to fish there.

Drilling (:"fracking") is certain to adversely disrupt all these activities that the park is known for. Why would visitors wish to hear the constant noise of rigs and truck traffic when they come to the park to escape such in the cities?

Nearby Piedmont Lake had significant fracking drilling nearby a few years ago. I could hear the rig throughout the entire upper part of this long lake. Fishermen at the boat ramp expressed to me frustration that they had to travel far down the lake to catch fish to escape the noise. Sound and vibration travel well through and over water. Fish feed less by sight and more by vibrations in the water that are picked up by their Lateral Line, which runs the length of the fish. When foreign, constant sounds like drilling nearby echo through the water, it is certain to disrupt their feeding ability, and it interferes with the predator fish being able to sense vibrations given off by injured fish and minnow prey.

In addition, selling the state's resources is patently unfair to local landowners, who may wish to sell access to their oil/gas but cannot compete with the bargain the state would offer. Besides, these precious resources need to be saved for future generations, not pillaged in some politically-fueled giveaway that was never voted upon by the Ohio citizens who actually own the property.

Salt Fork State Park has experienced serious structural problems with the dam that contains this large lake. For several years, the water level had to be lowered to avoid a failure, and small communities downstream were given evacuation plans. Has anyone considered and studied what effect the proposed oil/gas exploration activities will have on the dam, and whether the dam is sound enough to withstand these additional challenges?

Since the copy of the nomination form I reviewed for this project did not contain the name of the company that is making the proposal, it is impossible to review the company's compliance history and properly comment on the steps ODNR should take to successfully regulate their operation.

In summary, this proposal is a bad idea and should not be approved by the Commission.

Sincerely,

Michael Moschell

Salt Fork is a jewel of Ohio's once-award winning state park system. NEVER should oil and gas drilling be allowed within the park or within a mile of it's boundaries. STOP the sale of our precious resources to private profiteers! This is my favorite park to fish. Leave it for the next generations. mm

I wish to object to the approval of this nomination.

The reason for my objection can be summed up in one word: water. We in Ohio love to say that one of our economic assets is plentiful water. Yet few states have done more to waste and pollute our rivers, lakes, and aquifers. We all remember the burning Cuyahoga, and when Lake Erie was declared biologically dead. The Ohio River is little more than a huge chemical sewer. And now we have the example of fracking, which uses extravagant amounts of the finite water resources of the state, then returns it to the state in the form of toxic and even radioactive water once it is used for fracking. This water is then injected into the ground, where it sits like a ticking time bomb to harm future generations of Ohioans. But those who gave our public lands to the fracking industry, and those who have blessed fracking, could care less about these future generations of Ohioans. They will have long since collected their campaign contributions from the ohio and gas association, and reaped the profits from fracking. You cannot live more than a few days without potable water. You can live quite well without natural gas. Societies that live like there is no tomorrow, will have no tomorrow. Do not approve a nomination that is a small part of an insane whole. Thank you.

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
LaDonna Henson

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Cindy capan

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Ms. Judy Coons

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Mr. Richard Mahlerwein
amerconst@roadrunner.com

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Subject: OGLMC must DENY lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park
Date: Sunday, July 2, 2023 2:53:31 PM

OGLMC Commission Clerk,

Dear Oil and Gas Land Management Commission:

I am writing to demand that you DENY lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park.

Salt Fork is the largest and one of the most iconic of all our Ohio state parks. Thousands of Ohioans – who own and pay for our public lands – visit Salt Fork each year to hike, camp, boat, swim, birdwatch, even golf and ride horses. As the Ohio Department of Natural Resources says, “With thousands and thousands of acres of land and water, the park has something for every outdoor enthusiast.”

But all of that will be impacted and likely destroyed if you approve lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007, allowing the oil and gas industry to surround Salt Fork with 16 well pads to frack an incredible 281 parcels of park land.

Frack rigs will use 4 million to 6 million gallons of fresh water per frack well – and each pad will hold multiple frack wells. This water will be mixed with sand and a variety of toxic chemicals that we are not allowed to know about thanks to the “Halliburton loophole” – the fracking industry’s exemption from the Safe Drinking Water Act and other environmental safety laws.

Where will all this water come from? The likely answer is Salt Fork’s beautiful Salt Fork Lake, or the streams that feed the lake, which provides almost 3,000 acres of swimming, boating, fishing, and a refuge for both wildlife and the people of Ohio who pay for and use this park.

Truck traffic – 2,300 to 4,000 truck trips per well – will bring in construction machinery, sand, toxic chemicals, and other equipment, as well as cart away the millions of gallons of toxic frack wastewater that can never enter the water cycle again and must be injected deep underground.

How will all this truck traffic get to and from these frack well pads? The main roadway to Salt Fork is U.S. Hwy 22, a curvy rural two-lane road that these trucks will have to share with cars and campers from the thousands of Ohioans who visit the park each day.

According to Ohio Revised Code 155.33, the commission MUST consider the following in deciding whether to approve or deny a lease to frack our public land:

Economic benefits

A study by Ohio River Valley Institute shows that seven fracking counties in eastern Ohio lost jobs, people, and income, while an Ohio State University study shows that preserving our

parks and public spaces adds \$8.1 billion to our state economy each year. Clearly preserving our state parks and public lands will generate much more income for the state as a whole than fracking our state's most treasured natural resources.

Compatibility with current land uses

Fracking is diametrically opposed to the mission of the Ohio Department of Natural Resources, which was founded in 1949 to develop and wisely use the “the natural resources of the state, to the end that the health, happiness and wholesome enjoyment of life of the people of Ohio may be encouraged.” Fracking is extremely loud – chasing away the wildlife who call the park home. Fracking injects millions of gallons of toxic chemicals into the ground – including PFAS – and the wastewater that comes back up is radioactive. Frack pads are fully lit at night – destroying any ability to stargaze. Frack wells flare methane – polluting air all around including in the park.

Environmental impacts

If fracking leases are approved, immense negative environmental impacts will occur on and under Ohio state parks and public lands. Not only will timber be cut, and plant, animal and insect habitats destroyed, those populations will diminish or die off. Surface water in rivers, lakes and streams will be poisoned by unregulated toxic chemicals used in fracking fluid. Physicians for Social Responsibility has also documented that chemicals used by the oil and gas industry in Ohio since 2013 include PFAS, known as “forever chemicals.”

Adverse geological impacts

Low-level earthquakes in the Appalachian Basin, which includes eastern Ohio, are caused by fracking, according to new research by Michael Brudzinski at Miami University in Oxford, Ohio. While fracking wastewater is injected deep underground, water pressure can leak into faults in deeper, older rocks. This water can create more space between two sides of a fault, allowing the fault to slip. The more fracking water is injected, the larger the earthquakes could become, including recent 4 and 5 level earthquakes in Ohio and Oklahoma that have caused damage. Eastern Ohio in the Mahoning Valley has a history of low-level earthquakes related to fracking and its wastewater sites.

Impact on visitors

Will Ohioans and tourists want to hike, bike, camp, fish, bird and swim in areas where the thump-thump of fracking rigs inundate the landscape at 70 decibels, 24 hours a day and drown out birdsong as well as conversation? Where a fracking rig accident means oil slicks on Ohio lakes and streams and fish and animal die-offs? Where hundreds of millions of tons of methane gas is released into the air, accelerating rising temperatures and global warming? Fracking will chase away Ohio visitors, not attract them. After all, who could relax, camp, picnic or swim with family and friends in the equivalent of an environmental hellscape?

Comments and objections from residents of the state and other users:

We demand PROOF that there will be:

- NO environmental impact to the park
- NO adverse geological impact

- NO impact to visitors to the park
- NO impact to wildlife or plant species
- NO surface use, such as well pads, roads, pipelines, water lines, and compressors.
- NO use of any water from any nearby lakes or streams

The only way you can prove that these impacts will not happen is to DENY lease nominations 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park.

Ohio state parks and all Ohio public lands are paid for and owned by we, the people of Ohio – and we demand that you DENY the lease nominations in Salt Fork and all our state parks, forests, and wildlife areas.

Subject: OGLMC must DENY lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park
Date: Sunday, July 2, 2023 3:31:48 PM

OGLMC Commission Clerk,

Dear Oil and Gas Land Management Commission:

I am writing to demand that you DENY lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park.

Salt Fork is the largest and one of the most iconic of all our Ohio state parks. Thousands of Ohioans – who own and pay for our public lands – visit Salt Fork each year to hike, camp, boat, swim, birdwatch, even golf and ride horses. As the Ohio Department of Natural Resources says, “With thousands and thousands of acres of land and water, the park has something for every outdoor enthusiast.”

But all of that will be impacted and likely destroyed if you approve lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007, allowing the oil and gas industry to surround Salt Fork with 16 well pads to frack an incredible 281 parcels of park land.

Frack rigs will use 4 million to 6 million gallons of fresh water per frack well – and each pad will hold multiple frack wells. This water will be mixed with sand and a variety of toxic chemicals that we are not allowed to know about thanks to the “Halliburton loophole” – the fracking industry’s exemption from the Safe Drinking Water Act and other environmental safety laws.

Where will all this water come from? The likely answer is Salt Fork’s beautiful Salt Fork Lake, or the streams that feed the lake, which provides almost 3,000 acres of swimming, boating, fishing, and a refuge for both wildlife and the people of Ohio who pay for and use this park.

Truck traffic – 2,300 to 4,000 truck trips per well – will bring in construction machinery, sand, toxic chemicals, and other equipment, as well as cart away the millions of gallons of toxic frack wastewater that can never enter the water cycle again and must be injected deep underground.

How will all this truck traffic get to and from these frack well pads? The main roadway to Salt Fork is U.S. Hwy 22, a curvy rural two-lane road that these trucks will have to share with cars and campers from the thousands of Ohioans who visit the park each day.

According to Ohio Revised Code 155.33, the commission MUST consider the following in deciding whether to approve or deny a lease to frack our public land:

Economic benefits

A study by Ohio River Valley Institute shows that seven fracking counties in eastern Ohio lost jobs, people, and income, while an Ohio State University study shows that preserving our

parks and public spaces adds \$8.1 billion to our state economy each year. Clearly preserving our state parks and public lands will generate much more income for the state as a whole than fracking our state's most treasured natural resources.

Compatibility with current land uses

Fracking is diametrically opposed to the mission of the Ohio Department of Natural Resources, which was founded in 1949 to develop and wisely use the “the natural resources of the state, to the end that the health, happiness and wholesome enjoyment of life of the people of Ohio may be encouraged.” Fracking is extremely loud – chasing away the wildlife who call the park home. Fracking injects millions of gallons of toxic chemicals into the ground – including PFAS – and the wastewater that comes back up is radioactive. Frack pads are fully lit at night – destroying any ability to stargaze. Frack wells flare methane – polluting air all around including in the park.

Environmental impacts

If fracking leases are approved, immense negative environmental impacts will occur on and under Ohio state parks and public lands. Not only will timber be cut, and plant, animal and insect habitats destroyed, those populations will diminish or die off. Surface water in rivers, lakes and streams will be poisoned by unregulated toxic chemicals used in fracking fluid.

Physicians for Social Responsibility has also documented that chemicals used by the oil and gas industry in Ohio since 2013 include PFAS, known as “forever chemicals.”

Adverse geological impacts

Low-level earthquakes in the Appalachian Basin, which includes eastern Ohio, are caused by fracking, according to new research by Michael Brudzinski at Miami University in Oxford, Ohio. While fracking wastewater is injected deep underground, water pressure can leak into faults in deeper, older rocks. This water can create more space between two sides of a fault, allowing the fault to slip. The more fracking water is injected, the larger the earthquakes could become, including recent 4 and 5 level earthquakes in Ohio and Oklahoma that have caused damage. Eastern Ohio in the Mahoning Valley has a history of low-level earthquakes related to fracking and its wastewater sites.

Impact on visitors

Will Ohioans and tourists want to hike, bike, camp, fish, bird and swim in areas where the thump-thump of fracking rigs inundate the landscape at 70 decibels, 24 hours a day and drown out birdsong as well as conversation? Where a fracking rig accident means oil slicks on Ohio lakes and streams and fish and animal die-offs? Where hundreds of millions of tons of methane gas is released into the air, accelerating rising temperatures and global warming? Fracking will chase away Ohio visitors, not attract them. After all, who could relax, camp, picnic or swim with family and friends in the equivalent of an environmental hellscape?

Comments and objections from residents of the state and other users:

We demand PROOF that there will be:

- NO environmental impact to the park
- NO adverse geological impact

- NO impact to visitors to the park
- NO impact to wildlife or plant species
- NO surface use, such as well pads, roads, pipelines, water lines, and compressors.
- NO use of any water from any nearby lakes or streams

The only way you can prove that these impacts will not happen is to DENY lease nominations 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park.

Ohio state parks and all Ohio public lands are paid for and owned by we, the people of Ohio – and we demand that you DENY the lease nominations in Salt Fork and all our state parks, forests, and wildlife areas.

Re: Public Comments on Nomination #: 23-DNR-0005

Dear Ohio Oil and Gas Land Management Commission,

I am writing to you today to make my support for nomination number 23-DNR-0005 known. As energy costs rise, forcing families to spend more and more for basic necessities, we have a critical and easy decision to make. Ohio has an abundance of natural resources, and it's time we tap into more of them. I want to urge you to approve nomination 23-DNR-0005.

Sincerely,
Mr. Charles Greene

Re: Public Comments on Nomination #: 23-DNR-0005

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0005 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0005.

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Mr. Terry woods

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Mrs. Sharon Bigley

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Mr. Jessie Grant III

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mrs. Barbara Adams

Date: Sunday, July 2, 2023 10:07:57 AM

I am sending this email to voice my opposition to the proposed fracking at Salt Fork State Park. For more than 40 years I taught Resource Conservation and Resource Analysis at a major Ohio University. I have a fairly good idea of the problems associated with fracking and can find NO justification for permitting it to go on in and around state parks and forests. These are areas that are specifically designated as important natural areas for recreation and outdoor enjoyment. To allow fracking would violate the very purpose for which they have been set aside!

Dr. Jerry Green, 421 Edgehill Drive, Oxford, Ohio 45056.

Commission.Clerk@oglmc.ohio.gov

Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007

Dear Commissioners,

I am fortunate to have had the opportunity to visit and explore many local parks as a child growing up in Northeast Ohio. It was a special visit to Salt Fork State Park during a collegiate leadership retreat, however, that sparked my lifelong interest in Ohio's state parks.

I have visited Salt Fork State Park many times since that first visit in the late 2000s — including several trips where I've introduced others to the beauty of Salt Fork's hiking trails, waterways, and campgrounds. As a new parent, I am thrilled to plan my child's first visit to Salt Fork State Park so we can enjoy the fresh air as we explore nature together.

I am so thankful Ohio took the appropriate steps to protect this land from extractive industry and development so that all Ohioans could enjoy the park's stunning landscape and natural features. That could all change if oil and gas operations are permitted to frack our public lands.

Fracking operations create hazardous air pollution and can pollute groundwater resources. I know many visitors — including my own family — would avoid visiting Salt Fork State Park knowing these risks. Fracking operations will disturb the scenic beauty of Salt Fork State Park. No one wants to camp surrounded by noise and light pollution. And fracking operations will cause an increase in heavy truck traffic which pose safety concerns too.

Today, I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

I ride at Salt Fork on their beautiful trails with many others all the time and to have this fracking project in this park would be a crime for all who use and love it. Please do not allow this project to go on.

Re: Public Comments on Nomination #: 23-DNR-0005

Dear Ohio Oil and Gas Land Management Commission,

I am writing to you today to make my support for nomination number 23-DNR-0005 known. As energy costs rise, forcing families to spend more and more for basic necessities, we have a critical and easy decision to make. Ohio has an abundance of natural resources, and it's time we tap into more of them. I want to urge you to approve nomination 23-DNR-0005.

Sincerely,
Margaret Palmer

Re: Public Comments on Nomination #: 23-DNR-0006

Dear Ohio Oil and Gas Land Management Commission,

I am writing to you today to express my support for nomination number 23-DNR-0006. Rising energy costs are backing Ohioans into a corner financially, and we have the resources to fix that issue in our own backyard. It's time to tap into our natural resources to produce more oil and/or natural gas. Doing so will help lower costs for Ohioans, boost our local economy, and get us back on track. I urge you to approve nomination 23-DNR-0006.

Sincerely,

Mr. Michael P Donlon

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Mr. Roger Calvert

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Delbert. Fry

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mr. Donald Brush

Subject: Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007
Date: Saturday, July 1, 2023 3:42:29 PM

Dear Commissioners,

I've enjoyed exploring many parks in Ohio over the past decade.

And I have fond memories of exploring Salt Fork State Park with my husband and our dogs.

I'm thankful Ohio took the appropriate steps to protect this land from extractive industry and development so that all Ohioans could enjoy the park's beautiful landscape and natural features. That could all change if oil and gas operations are permitted to frack our public lands.

Fracking operations create hazardous air pollution and can pollute groundwater resources. I know many visitors — including my own family — would avoid visiting Salt Fork State Park knowing these risks. Fracking operations will disturb the scenic beauty of Salt Fork State Park. No one wants to camp surrounded by noise and light pollution or be around heavy truck traffic that poses safety concerns.

Today, I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

Thank you for your time and consideration.

Date: Sunday, July 2, 2023 11:04:44 AM

Dear Commissioners,

Fracking under our state parks (including the Salt Fork State Park) and other state own properties is short sighted and dangerous. It is a short term gain for those with the financial interests for a long term loss (health, environment, etc issues). I ask you to deny the applications to frack under Salt Fork State Park.

It would be a sad aerial photographic picture with all these pumping stations surrounding the Salt Fork State Park. It would seem like an enemy surrounding a desperate community.

Since I retired 8 years ago, my wife and I have made it an annual 3-4 day weekend in January to visit a different Ohio state park lodge. It broke up the winter. These are very fun trips and the parks are beautiful. Having potentially trucks running around, visible gas flares, unhealthy water, etc. will decrease our desire to continue to do this. Maybe we would instead visit Kentucky state park lodges. Does Ohio want to lose this business?

So I again ask you to deny these applications. Thank you.

Sincerely,
Keith Gehring

Hello,

As an Ohio citizen, I am appalled at the idea of fracking in any of our state parks. These lands belong to all Ohioans, and the sanctuary they offer will be disturbed irreparably by fracking. These parks are also habitat for many animals which will be disturbed. There will be noise, pollution, danger to health of animals and people, and visual disruption of the beauty in our state parks. There are long term health problems associated with fracking, and the byproducts pollute our water. Please do not go down this road of irreparable harm to some of our state's greatest treasures. Thank you.

Debra L. Brinker, M.D.

Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007

Dear Commissioners,

I am fortunate to have had the opportunity to visit and explore many local parks as a child growing up in Northeast Ohio. It was a special visit to Salt Fork State Park during a collegiate leadership retreat, however, that sparked my lifelong interest in Ohio's state parks.

I have visited Salt Fork State Park many times since that first visit in the late 2000s — including several trips where I've introduced others to the beauty of Salt Fork's hiking trails, waterways, and campgrounds. As a new parent, I am thrilled to plan my child's first visit to Salt Fork State Park so we can enjoy the fresh air as we explore nature together.

I am so thankful Ohio took the appropriate steps to protect this land from extractive industry and development so that all Ohioans could enjoy the park's stunning landscape and natural features. That could all change if oil and gas operations are permitted to frack our public lands.

Fracking operations create hazardous air pollution and can pollute groundwater resources. I know many visitors — including my own family — would avoid visiting Salt Fork State Park knowing these risks. Fracking operations will disturb the scenic beauty of Salt Fork State Park. No one wants to camp surrounded by noise and light pollution. And fracking operations will cause an increase in heavy truck traffic which pose safety concerns too.

Today, I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

I ride at Salt Fork on their beautiful trails with many others all the time and to have this fracking project in this park would be a crime for all who use and love it. Please do not allow this project to go on.

Building H-3
Columbus, OH 43229

RE: Nomination # 23-DNR-0005; 23-DNR-0006; and 23-DNR-0007

Dear Mr. Moffitt:

On behalf of Consumer Energy Alliance (CEA), I write to share our strong support for the responsible leasing of state-owned minerals, and in particular, the proposals put forth in Nomination # 23-DNR-0005; 23-DNR-0006; and 23-DNR-0007 in Salt Fork State Park.

CEA is the nation's leading consumer energy and environmental advocate – ensuring families, farmers, and local businesses have access to sustainably produced, affordable, reliable and environmentally responsible energy. Our more than 550,000 individual members represent a cross-section of the economy, all of whom have been impacted by rising inflation and higher energy prices.

Our members support a rational, all-of-the-above energy policy that utilizes all our domestic natural resources – both traditional and renewable – while ensuring commonsense environmental protections are in place. This includes the responsible leasing of state land for energy development.

In Ohio, political subdivisions like the Muskingum Watershed Conservancy District have successfully leased public land specifically for oil and natural gas development. In 2021 alone, the conservancy district received over \$11.8 million in revenue from these leases. The proceeds were then reinvested to permanently preserve more acres of forest, enhance the public trail system, and provide improved recreation areas for more than 4 million visitors. Moreover, the leases also include non-development provisions that prohibit surface development – like well pads and compressor stations – on district-owned property.

Based on the success of this leasing program, and similar programs in neighboring states, we are encouraged by the opportunities that may be realized by moving forward with the proposed nominations. For example, Pennsylvania opened over 3.6 million acres of state forests and predominantly wooded land for leasing. This brought in over \$2.1 billion in revenue – of which a significant amount has been used to increase conservation efforts throughout the state.

Not only will developing state-owned minerals like those at Salt Fork help contribute to American energy security by increasing our energy supply and improving resilience from global events, but it will also allow for a significant amount of investment in our state's parks.

We ask that you keep in mind the benefits nominations like Nomination # 23-DNR-0005; 23-DNR-0006; and 23-DNR-0007 will have for all Ohioans in the years to come.

Sincerely,

A handwritten signature in blue ink, appearing to read "Chris Ventura", with a stylized, flowing script.

Re: Public Comments on Nomination #: 23-DNR-0005

Dear Ohio Oil and Gas Land Management Commission,

I am writing to you today to express my support for nomination number 23-DNR-0005 to allow us to tap in to more of Ohio's natural resources. Like many other Ohioans, I've felt the pinch of rising energy costs. It's making it more and more difficult to do simple, necessary tasks like fill up the gas tank or keep the lights on. If we can fix this issue for the people of Ohio while also boosting our economy, then we should. I urge you to approve nomination 23-DNR-0005 and give Ohioans the support we need.

Sincerely,
Mrs. Kimberly Adams

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Mrs. Nancy Burtch

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Mr. Neal Kodish

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mr. Nicholas GUYOL

Subject: Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007
Date: Saturday, July 1, 2023 10:00:50 AM

July 1, 2023

Attn: Commission Clerk
Oil & Gas Land Management Commission
Ohio Department of Natural Resources
2045 Morse Road
Commission.Clerk@oglmc.ohio.gov

Dear Commissioners,

I am writing to respectfully request that you deny the leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007.

Salt Fork State Park and Wildlife Area holds a special place in the hearts of Ohioans and visitors alike. Its breathtaking landscapes, diverse wildlife, and recreational opportunities have made it an oasis for Ohioans. Moreover, the park serves as an important habitat for numerous species, contributing to biodiversity conservation in the region. To jeopardize this delicate balance by introducing oil and gas operations would be a disservice to future generations and undermine our collective commitment to environmental stewardship.

The decision to deny these leasing nominations must be guided by both personal and scientific considerations. On a personal level, Salt Fork State Park and Wildlife Area holds cherished memories for countless individuals and families who have explored its trails, fished in its waters, and marveled at its scenic wonders. The park provides a respite from the pressures of urban life, allowing visitors to reconnect with nature and find solace amidst its serenity. Preserving this oasis of natural beauty is vital for the well-being and mental health of current and future generations.

One of the most significant concerns regarding oil and gas development is the detrimental impact on air quality. Extractive operations emit pollutants such as volatile organic compounds (VOCs), nitrogen oxides (NOx), and particulate matter (PM), which contribute to poor air quality and pose a risk to human health. Salt Fork's clean and pristine air, currently free from industrial emissions, is a valuable asset that promotes the well-being of both wildlife and park visitors. Allowing leasing nominations to proceed would compromise this vital resource, resulting in a decline in air quality and potentially exposing visitors to respiratory health hazards. Non-traditional oil and gas development also brings a host of other issues which would degrade the habitat and recreational experience at Salt Fork, including light pollution, noise pollution from drilling and heavy trucking, and increased traffic. The potential risks associated with these operations far outweigh any short-term economic gains.

Furthermore, the impacts of climate change are becoming increasingly apparent, underscoring the urgency of transitioning to clean and sustainable energy sources. Denial of these leasing nominations would show restraint and consideration towards future generations by mitigating the worst impacts of climate change.

In conclusion, I urge you to deny Nomination Nos. 23-DNR-0005, 0006, and 0007 and protect Salt Fork State Park and Wildlife Area. By doing so, we can send a powerful message that the preservation of our natural landscapes and the well-being of our communities are of paramount importance. Thank you for your time, attention, and commitment to preserving our shared natural

heritage.

Yours sincerely,

Emily Grace Bichsel

Subject: Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007
Date: Friday, June 30, 2023 10:41:18 PM

Dear Commissioners,

I am fortunate to have had the opportunity to visit and explore many local parks in the last 10 + year living in the Columbus area.

I am so thankful Ohio took the appropriate steps to protect this land from extractive industry and development so that all Ohioans could enjoy the park's stunning landscape and natural features. That could all change if oil and gas operations are permitted to frack our public lands.

Fracking operations create hazardous air pollution and can pollute groundwater resources. I know many visitors — including my own family — would avoid visiting Salt Fork State Park knowing these risks. Fracking operations will disturb the scenic beauty of Salt Fork State Park. No one wants to camp surrounded by noise and light pollution. And fracking operations will cause an increase in heavy truck traffic which pose safety concerns too.

Today, I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

Many thanks,
Kristin

Please deny the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area. We need to protect public health and safety, respect outdoor recreation, and confront climate change. State parks are no place for oil and gas drilling or fracking. The well pads would surround the park. I don't want to visit a park near a fracking site. I go to walk amidst nature and see wildlife. We need these places to be free of pollution.

Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007:

Clearly someone is making a profit from this decision, and it is not the citizens of Ohio. Fracking creates toxic air pollution, noise, and climate pollution.

We are very much against this proposal. Anyone with a lick of sense and self-preservation would be too. Only the greedy want it to happen.

Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007

Dear Commissioners,

I am fortunate to have had the opportunity to visit and explore many local parks as a child growing up in Ohio and now as an adult. It was my engagement in one of Ohio's state preserves that cemented my passion for protecting and appreciating our states wild spaces.

I have visited numerous state parks, preserves, rivers etc.— including several trips where I've been lucky to introduced others to the beauty of our state these hiking trails, waterways, and campgrounds to friend and family. As a prospective parent, I am thrilled to plan my child's first visit to Lawrence Woods, Salt Fork, Clear Creek, Alum Creek, Burr Oak, Hocking Hills, etc. so we can enjoy the fresh air as we explore nature together.

I am so thankful Ohio took the appropriate steps to protect this land from extractive industry and development so that all Ohioans could enjoy the park's stunning landscape and natural features. That could all change if oil and gas operations are permitted to frack our public lands. We cannot go back if the wrong decision is made.

Fracking operations create hazardous air pollution and can pollute groundwater resources. I know many visitors — including my own family — would avoid visiting Salt Fork State Park knowing these risks. Fracking operations will disturb the scenic beauty of Salt Fork State Park. No one wants to camp surrounded by noise and light pollution as fracking operations cause an increase in heavy truck traffic which pose safety concerns too. I can't sit by and support destruction.

Today, I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

Thank you,

Hannah Fithen Wade

Subject: NOMINATION #23-DNR-0008
Date: Friday, June 30, 2023 3:49:05 PM

To the Ohio Oil and Gas Land Management Commission,

I am disappointed to have heard on the local radio station that you are considering allowing oil and gas corporations to frack and extract from our public lands in Ohio, namely Wolf Run State Park in Noble County Ohio. NOMINATION #23-DNR-0008

Nature and our Natural resources are the most treasured aspects of rural Ohio. The intent when these lands were designated as parks was to preserve just that. The individuals who worked to begin conservation were looking to the future, protecting the future of our state, our environment and our children. We cannot allow temptations of profit and the pressures of corporate America to tear apart what so many have worked to preserve.

My family camps, swims, hikes and fishes at Wolf Run state park multiple times every year. We celebrate the 4th of July there as well as Halloween. It is a beautiful area in a county that is in great need of things for residents to do. We cannot afford to risk losing another avenue that gets our children into the great outdoors.

There comes a point in time where we really have to use common sense, and ask ourselves: Is it really necessary? Will it really provide a benefit that we are desperately in need of? Or, rather, will it mostly provide money to someone's pocket?

Because if fracking isn't saving lives, if it isn't preserving this country we live in, preserving nature and wildlife and the chance for generations to come to experience those things; then I don't believe we should allow it to occur in our parks. Please, I ask you to keep fracking out of our parks and public lands. The oil and gas industry has plenty of other options, they don't need to have it all.

I appreciate your time in this matter, my hope is you can be one of the strong, to stand up against those who use money and profits to drive the world to give them what they desire.

--

Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007

Dear Commissioners,

I am fortunate to have had the opportunity to visit and explore many local parks as a child growing up in Northeast Ohio, including the Cleveland Metroparks.

I have visited Salt Fork State Park many times since that first visit in the 1980s— including several trips where I've introduced others to the beauty of Salt Fork's hiking trails, waterways, and campgrounds. As newlyweds, my husband and I visited often on weekends.

I am so thankful Ohio took the appropriate steps to protect this land from extractive industry and development so that all Ohioans could enjoy the park's stunning landscape and natural features. That could all change if oil and gas operations are permitted to frack our public lands.

Fracking operations create hazardous air pollution and can pollute groundwater resources. I know many visitors — including my own family — would avoid visiting Salt Fork State Park knowing these risks. Fracking operations will disturb the scenic beauty of Salt Fork State Park. No one wants to camp surrounded by noise and light pollution. And fracking operations will cause an increase in heavy truck traffic which pose safety and infrastructure concerns too.

Today, I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

Re: Public Comments on Nomination #: 23-DNR-0005

Dear Ohio Oil and Gas Land Management Commission,

I am writing to you today to express my support for nomination number 23-DNR-0005 to allow us to tap in to more of Ohio's natural resources. Like many other Ohioans, I've felt the pinch of rising energy costs. It's making it more and more difficult to do simple, necessary tasks like fill up the gas tank or keep the lights on. If we can fix this issue for the people of Ohio while also boosting our economy, then we should. I urge you to approve nomination 23-DNR-0005 and give Ohioans the support we need.

Sincerely,
Mrs. Barbara Recek

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Fred Hatcher

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mrs. Mary Range

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Date: Friday, June 30, 2023 10:59:18 AM

Dear Commissioners,

I am fortunate to have had the opportunity to visit and explore many local parks in Ohio.

I am so thankful Ohio took the appropriate steps to protect this land from extractive industry and development so that all Ohioans could enjoy our parks' stunning landscape and natural features. That could all change if oil and gas operations are permitted to frack our public lands.

Fracking operations create hazardous air pollution and can pollute groundwater resources. I know many visitors — including my own family — would avoid visiting Salt Fork State Park knowing these risks. Fracking operations will disturb the scenic beauty of Salt Fork State Park. No one wants to camp surrounded by noise and light pollution. And fracking operations will cause an increase in heavy truck traffic which pose safety concerns too.

Today, I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

Lea Thompson
Cincinnati, OH

Dear Commissioners,

I am fortunate to have had the opportunity to visit and explore many local parks as a child growing up in Northeast Ohio. It was a special visit to Salt Fork State Park during a collegiate leadership retreat, however, that sparked my lifelong interest in Ohio's state parks.

I have visited Salt Fork State Park many times since that first visit in the late 2000s — including several trips where I've introduced others to the beauty of Salt Fork's hiking trails, waterways, and campgrounds. As a new parent, I am thrilled to plan my child's first visit to Salt Fork State Park so we can enjoy the fresh air as we explore nature together.

I am so thankful Ohio took the appropriate steps to protect this land from extractive industry and development so that all Ohioans could enjoy the park's stunning landscape and natural features. That could all change if oil and gas operations are permitted to frack our public lands.

Fracking operations create hazardous air pollution and can pollute groundwater resources. Salt Fork State Park was a big part of my childhood. As it is for thousands of Ohio residents today. Protected green spaces are vital to our well being. Green therapy is a wonderful therapy for veterans, domestic abuse survivors, abused children, and for anxiety and depression. Not to mention good old fashioned family fun. Like my family did. It must be preserved for future generations. We need Salt Fork State Park. I'm asking you to DENY industry leases to the park.

Thank you,

Please reconsider the decision to let fracking take place at Salt Fork State Park. This short sighted decision will put our states greatest resource at risk for the sake of a potential finite amount of fossil fuel. Hanging on to fossil fuels is a head in the sand view. As a retired Ohioan, I have enjoyed almost every one of our great State Parks! To put them at environmental risk is folly.
Please protect our parks Not big business!

Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007

Dear Commissioners,

I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. It is fairly easy to determine the value of the oil and gas that might be extracted by private interests on these public lands. But this course of action carries costs, as well, that should be subtracted from the projected benefits. In fact, Ohio Revised Code, Section 155.33(B)(1)(b), (c), (e), and (h) requires that subtraction.

In making its decision to approve or disapprove the nomination, the commission shall consider all of the following: (b) Whether the proposed oil or gas operation is compatible with the current uses of the parcel of land that is the subject of the nomination; (c) The environmental impact that would result if the lease of a formation that is the subject of the nomination were approved; [...] (e) Any potential impact to visitors or users of a parcel of land that is the subject of the nomination; [and] (h) Any comments or objections to the nomination submitted to the commission by residents of this state or other users of the parcel of land that is the subject of the nomination;

I am a native Ohioan that enjoys our natural areas. I have enjoyed visiting many of our state parks, Salt Fork State Park included. Fossil fuel extraction is known in other parts of Ohio to be loud, messy and polluting, all things incompatible with a great park. I have become truly alarmed by the level of climate disruption already being caused by human addition of carbon to the atmosphere. It is irresponsible to add to the problem at this moment. Jobs and cheap energy now are usually given as the reason to despoil our few natural public lands; this is short-sighted thinking. These jobs and this energy quickly burn up together, and put Earth systems that sustain us at peril now, not decades down the road. Put your money and influence into energy conservation measures and renewable sources instead, which will also create jobs.

I oppose oil and gas leases for the Salt Fork State Park and Wildlife area. Please DENY these leasing nominations and save a great space for all Ohioans to use safely.

Sincerely,

Marcy Taylor, with support of Gary Heaton
7385 Drake Road

Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007

Dear Commissioners,

National Parks, Forests, Cultural Monuments, other public lands and State Parks like Salt Fork were set aside for the nation, all of us, not to be exploited for commercial gain. Please save these pristine areas for our children, grandchildren, and descendants to watch and enjoy! This is irreplaceable habitat. Our country needs to invest in and pursue sustainable energy like solar, wind, geothermal, biofuel, etc. rather than devastate our national lands by drilling, mining, and fracking. Fracking contaminates our ground water. All Americans deserve clean water, air, soil, and safe food. Let's get rid of fossil fuels. Sustainable energy is the future for this fragile spaceship we're all on.

I'm thankful Ohio took the appropriate steps to protect this land from extractive industry and development in the past so all Ohioans can enjoy the park's stunning landscape and natural features. That will change if oil and gas operations are permitted to frack our public lands.

UOG leasing and development of the nominated Salt Fork parcels threatens public health and safety, current recreational uses, and Ohio's outdoor recreation economy. By contrast, denying the Salt Fork nominations would protect the Park's air quality; its tranquility; and its unique status as an Ohio outdoor health, wellness, and recreation destination. Denying the Salt Fork nominations would also serve the interests of present and future generations by helping prevent the worst impacts of climate change.

Please DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

DENY SOUTH FORK LEASING NOMINATIONS

For reasons on behalf of Ohio-ans:

- Public health impacts
- Damage to quality outdoor recreation (include any of your personal recreational experiences (hiking, boating, camping) at Salt Fork that would be impacted!)
- Toxic air pollution, light pollution, noise pollution, and climate pollution from fracking.

Respectfully,

Jesse D Williams

Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007

Dear Commissioners,

I am so thankful Ohio took the appropriate steps to protect this land from extractive industry and development so that all Ohioans could enjoy the park's stunning landscape and natural features. That could all change if oil and gas operations are permitted to frack our public lands.

Fracking operations create hazardous air pollution and can pollute groundwater resources. I know many visitors would avoid visiting Salt Fork State Park knowing these risks. Fracking operations will disturb the scenic beauty of Salt Fork State Park. No one wants to camp surrounded by noise and light pollution. And fracking operations will cause an increase in heavy truck traffic which pose safety concerns too.

Today, I ask the Commission to DENY the oil and gas leasing nominations submitted for Salt Fork State Park and Wildlife Area – Nomination Nos. 23-DNR-0005, 0006, and 0007. Please carefully consider all the consequences, including the negative and unintended impacts of leasing our public lands, in your deliberations.

Subject: OGLMC must DENY lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park
Date: Wednesday, June 28, 2023 5:57:41 PM

OGLMC Commission Clerk,

Dear Oil and Gas Land Management Commission:

I am writing to demand that you DENY lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park.

Salt Fork is the largest and one of the most iconic of all our Ohio state parks. Thousands of Ohioans – who own and pay for our public lands – visit Salt Fork each year to hike, camp, boat, swim, birdwatch, even golf and ride horses. As the Ohio Department of Natural Resources says, “With thousands and thousands of acres of land and water, the park has something for every outdoor enthusiast.”

But all of that will be impacted and likely destroyed if you approve lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007, allowing the oil and gas industry to surround Salt Fork with 16 well pads to frack an incredible 281 parcels of park land.

Frack rigs will use 4 million to 6 million gallons of fresh water per frack well – and each pad will hold multiple frack wells. This water will be mixed with sand and a variety of toxic chemicals that we are not allowed to know about thanks to the “Halliburton loophole” – the fracking industry’s exemption from the Safe Drinking Water Act and other environmental safety laws.

Where will all this water come from? The likely answer is Salt Fork’s beautiful Salt Fork Lake, or the streams that feed the lake, which provides almost 3,000 acres of swimming, boating, fishing, and a refuge for both wildlife and the people of Ohio who pay for and use this park.

Truck traffic – 2,300 to 4,000 truck trips per well – will bring in construction machinery, sand, toxic chemicals, and other equipment, as well as cart away the millions of gallons of toxic frack wastewater that can never enter the water cycle again and must be injected deep underground.

How will all this truck traffic get to and from these frack well pads? The main roadway to Salt Fork is U.S. Hwy 22, a curvy rural two-lane road that these trucks will have to share with cars and campers from the thousands of Ohioans who visit the park each day.

According to Ohio Revised Code 155.33, the commission MUST consider the following in deciding whether to approve or deny a lease to frack our public land:

Economic benefits

A study by Ohio River Valley Institute shows that seven fracking counties in eastern Ohio lost jobs, people, and income, while an Ohio State University study shows that preserving our

parks and public spaces adds \$8.1 billion to our state economy each year. Clearly preserving our state parks and public lands will generate much more income for the state as a whole than fracking our state's most treasured natural resources.

Compatibility with current land uses

Fracking is diametrically opposed to the mission of the Ohio Department of Natural Resources, which was founded in 1949 to develop and wisely use the “the natural resources of the state, to the end that the health, happiness and wholesome enjoyment of life of the people of Ohio may be encouraged.” Fracking is extremely loud – chasing away the wildlife who call the park home. Fracking injects millions of gallons of toxic chemicals into the ground – including PFAS – and the wastewater that comes back up is radioactive. Frack pads are fully lit at night – destroying any ability to stargaze. Frack wells flare methane – polluting air all around including in the park.

Environmental impacts

If fracking leases are approved, immense negative environmental impacts will occur on and under Ohio state parks and public lands. Not only will timber be cut, and plant, animal and insect habitats destroyed, those populations will diminish or die off. Surface water in rivers, lakes and streams will be poisoned by unregulated toxic chemicals used in fracking fluid. Physicians for Social Responsibility has also documented that chemicals used by the oil and gas industry in Ohio since 2013 include PFAS, known as “forever chemicals.”

Adverse geological impacts

Low-level earthquakes in the Appalachian Basin, which includes eastern Ohio, are caused by fracking, according to new research by Michael Brudzinski at Miami University in Oxford, Ohio. While fracking wastewater is injected deep underground, water pressure can leak into faults in deeper, older rocks. This water can create more space between two sides of a fault, allowing the fault to slip. The more fracking water is injected, the larger the earthquakes could become, including recent 4 and 5 level earthquakes in Ohio and Oklahoma that have caused damage. Eastern Ohio in the Mahoning Valley has a history of low-level earthquakes related to fracking and its wastewater sites.

Impact on visitors

Will Ohioans and tourists want to hike, bike, camp, fish, bird and swim in areas where the thump-thump of fracking rigs inundate the landscape at 70 decibels, 24 hours a day and drown out birdsong as well as conversation? Where a fracking rig accident means oil slicks on Ohio lakes and streams and fish and animal die-offs? Where hundreds of millions of tons of methane gas is released into the air, accelerating rising temperatures and global warming? Fracking will chase away Ohio visitors, not attract them. After all, who could relax, camp, picnic or swim with family and friends in the equivalent of an environmental hellscape?

Comments and objections from residents of the state and other users:

We demand PROOF that there will be:

- NO environmental impact to the park
- NO adverse geological impact

- NO impact to visitors to the park
- NO impact to wildlife or plant species
- NO surface use, such as well pads, roads, pipelines, water lines, and compressors.
- NO use of any water from any nearby lakes or streams

The only way you can prove that these impacts will not happen is to DENY lease nominations 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park.

Ohio state parks and all Ohio public lands are paid for and owned by we, the people of Ohio – and we demand that you DENY the lease nominations in Salt Fork and all our state parks, forests, and wildlife areas.

Subject: OGLMC must DENY lease nomination #s 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007 to frack Salt Fork State Park
Date: Wednesday, June 28, 2023 1:14:32 PM

OGLMC Commission Clerk,

Dear Oil and Gas Land Management Commission:

In the great pantheon of bad ideas (and I've had a few myself...), any lease or legislation to allow fracking in our state parks really takes the biscuit. Really? Why would any sane or sober person think that enjoyment of the outdoors (e.g. birding, hiking, camping, fishing, hunting, dark skies/stargazing)--will not be adversely affected by the provable, toxic extraction techniques, and attendant pollution associated with fracking? Enjoyment of the natural world is why our state parks are so popular, and why the citizens of Ohio are incensed by this venal move to allow corporate industrial interests to enrich themselves at the expense of our environmental health. We know that children who are exposed to outdoor activities, and who have access to nature do better in school, and are more creative. Children and adults who are exposed to fracking face extraordinary harm from toxic chemicals, polluted water and air, as well as spiritual, visual, and auditory pollution of what had been a beautiful, serene landscape. How can you consider trashing PUBLIC land to enrich corporate interests? These parks and lands are our heritage, and the legacy we will leave to future generations. Let them be. Thoreau wrote, in Walden, that: "A man is rich in proportion to the number of things which he can afford to let alone." Our parks are treasures. Protecting them, preserving them, makes us all the richer. In truth, even economically they bring more to our state than destructive fracking ever could. Tell the corporate interests to Frack Off! No fracking in our state parks!

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,

Ms. Mona Murray

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Roderick Huffine

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Mr. Mark Phillips

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mr. William Desarro

Subject: Public Comments on Salt Fork, Nomination #: 23-DNR-0005, 0006, 0007
Date: Thursday, June 29, 2023 7:07:19 PM

To whom it may concern:

I vehemently oppose allowing fracking in Salt Fork State Park, or any other Ohio state park, for that matter.

It would be very shortsighted to ruin our natural heritage forever for the sake of short term profit. I also strongly believe that we should be developing alternatives to fossil fuel rather than trying to get every last bit of oil out of the ground.

Our decisions and actions today will determine the kind of world we will leave to our grandchildren.

Sincerely,

Julie Lonneman

Your Message to the Oil and Gas Land Management Commission:

This legislation has caused me to see the following future in--50? 25? 10 years? Dwindling oil and gas reserves without a robust alternative at the ready, dire climate change impacts on food production, water resources, and natural disasters, and several of our state lands forever sullied! Our state parks and forests provide an oasis for wildlife AND for we humans, albeit

sometimes undeservedly so. Going to great lengths to frack in these sacred areas is not only a personal violation to Ohioans, it is short-sighted--like someone with high cholesterol developed by lifelong convenience eating grabbing a cheeseburger and fries instead of taking a few minutes to make a healthy alternative meal. I will be going to Salt Fork State Park this weekend to protest this legislation...and while I'm there, I will take a hike in the beautiful woods listening to the birds, smelling the earthy sweetness of the woods, and witnessing a peaceful natural existence. But, I will also be imagining loud and smelly truck traffic, "dust" in the air, catching glimpses of monster machinery scarring the land, and leaving for home without the renewed and calm spirit on which I have come to depend. PLEASE consider the future--not so distant--of our state and our park-lovers (isn't that ALL of us?!) when making your decisions.

Your Message to the Oil and Gas Land Management Commission:

To the Ohio Oil and Gas Land Management Commission,

It is wrong to allow oil and gas corporations to frack and extract from our public lands in Ohio, especially our state parks, forests, and wildlife areas.

Our state parks are our most treasured spaces in Ohio. We, the people of Ohio, pay to protect

them so they can be used for our benefit, not the profits of a polluting and extractive industry.

We have dwindling wild spaces in Ohio; we certainly do not need those we do have to be invaded, trampled, and polluted by an endeavor that creates both short term damage to the the park spaces themselves and long term damage to our increasingly heated planet. Continuing to pursue fossil fuels exacerbates global warming.

Contrary to the claims of the oil and gas industry, fracking will irrevocably harm our state parks and other public lands. Ohioans use our state parks for hiking, camping, birdwatching, fishing, and hunting. There is no way that injecting millions of gallons of toxic chemicals into the ground and flaring methane into the sky near or in our state parks and public lands will not harm them.

Fracking requires millions of gallons of fresh water that is laced with toxic chemicals, including PFAS forever chemicals. The waste water that comes back up is radioactive and can never be used again. Where will that water come from? The water in our parks and public lands should be protected.

Fracking requires large pads of noisy and polluting machinery. It requires pipelines, which in turn requires removal of trees. This should not be allowed in or near our public lands.

Fracking rigs regularly flare methane into the sky, a greenhouse gas 86 times more potent than carbon dioxide. At a time when the world's climate scientists say we have less than a decade to cut carbon pollution in half, the last thing we should do is put more methane into the atmosphere.

I adamantly oppose fracking in Ohio state parks and public lands. Please just say NO to fracking.

Re: Public Comments on Nomination #: 23-DNR-0006

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to voice my support for nomination number 23-DNR-0006 and ask that you support it too. Nomination 23-DNR-0006 will allow for the exploration of, development, and production of oil and natural gas. It will allow us to access resources right here in Ohio that can help solve our energy crisis. Rising energy costs have been a growing issue, and approving this nomination can help lower costs and build up our economy. Please approve nomination 23-DNR-0006, for our sake.

Sincerely,
Mr. Lester Swech

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Mrs. Kay Sellati

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Ms. Dianne Hager

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Mr. Philip Ricci

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Mrs. Jennifer Priest

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mr. David Miller

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Ms. Naomi Maggiora

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Dear Nate,

Please express my gratitude to the Oil & Gas Land Management Commission for convening this panel of experts. As I have written to you previously, I am opposed to gas and oil development anywhere near our precious public lands--including under them. I am also concerned about the off-site impacts of such development. As a resident of Washington County, we receive more barrels of fracking waste brine than any other county in Ohio, more than our fair share. There have been spills and leaks, and the public has not been well informed of their cleanup, including who paid for it. Was it that taxpayers? Will the commission require a plan for brine waste disposal? Will it require a plan for cleanup--including funding--when leaks and spills occur? For the benefit of public and environmental health here in Ohio, I urge you to do both. Thank you. Dawn Hewitt, Marietta

Dear Ms. Hewitt,

Thank you for sending your comments to the Ohio Oil and Gas Land Management Commission. We truly appreciate your taking the time to share your thoughts on this important matter. Your comments will be compiled along with all of the other comments we receive for inclusion in the public record, and we will share them with all of the Commissioners. Once the time for public comments has concluded, and Commissioners have had the opportunity to consider all of the input, the Commission will reconvene for a vote on whether to allow the nomination to proceed and whether to allow interested parties to bid on the leasing opportunity. We will track all of this process on our [website](#), so please feel free to access it for further information at any time.

Again, thank you so much for your participation in this process. Your input is important.

Best,

Nate Moffitt

To: Commission Clerk <Commission.Clerk@oglmc.ohio.gov>
Subject: Nominations 23-DNR-0005, 23-DNR-0006, and 23-DNR-0007

To whom it may concern:

Please relay to the Oil & Gas Land Management Commissioners my objection to the approval of the nominations for fracking sites near Salt Fork State Park. This park is a gem, and even though Governor DeWine promised there would be no surface impacts of such oil and gas development under the park, what about air pollution? Light pollution? Water pollution? Impacts to streams? And methane pollution--a more potent greenhouse gas than carbon dioxide!! What about the road building necessary to access fracking pads near the park?

As a resident of Washington County, Ohio, I am concerned about the volume of brine waste delivered here for permanent storage. We already receive more than our share, and I am concerned about our aquifers. We have had brine leaking into production wells, presumably because of the pressure of those wells. We've had brine spills, too, that were inadequately reported, and remediation unreported. So, I worry about surface water impacts from brine transport, too. What is the plan for brine disposal from these nominations? I hope you will require that information while you are considering these nominations.

I hope you will also require a qualified environmental scientist to evaluate each nomination for big-picture, unintended side-effects of oil and gas development adjacent to these proposed fracking pads (and all other nominations for such development adjacent to and

beneath public lands): water pollution; road-building; air pollution (especially methane); water usage; and brine waste disposal and its risks.

Ohio's public lands belong to all of Ohio's citizens. Please represent me--and the majority of us who want Salt Fork and other state properties to be treated with the utmost care and respect, so that they can remain in their unspoiled conditions.

Thank you for your willingness to serve on this important committee. We are counting on you to protect our parks!

Sincerely,

Dawn Hewitt

I am writing today to voice my support for the approval of nomination number 23-DNR-0007 for leasing for the exploration of and the development and production of oil or natural gas. Ohioans, like me, have been burdened by rising energy costs. It is critical that we utilize the abundant natural resources available to us right here in Ohio, not only to bring costs down, but to support our local economy. I urge you to approve nomination number 23-DNR-0007.

Sincerely,
Ms. Darlene Schulz

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to you to express my support for nomination number 23-DNR-0007. Granting a permit on this land to produce more oil and natural gas can help our economy and help Ohioans save money on energy costs. Rising energy costs have caused electric and gas bills to skyrocket, taking up more and more of our paychecks for essentials. Nomination 23-DNR-0007 will allow us to access resources that should help lessen some of the financial burdens Ohioans are facing. Please approve nomination 23-DNR-0007 to help save us money and heal our economy.

Sincerely,
Mr. James Nemecky

Re: Public Comments on Nomination #: 23-DNR-0007

Dear Ohio Oil and Gas Land Management Commission,

I'm writing to voice my support for nomination number 23-DNR-0007. Rising energy costs have caused the price of nearly everything to go up. It's become a huge burden for Ohio families, and I know I am not the only one who would be relieved if we were able to use our natural resources to solve this problem. It's essential that we begin producing more of our own oil and natural gas. I urge you to do what's best for Ohio and approve nomination 23-DNR-0007.

Sincerely,
Mr. JEFFERY DAVIS
