Subject:	Re: ODOT Nomination No. 23-DOT-0006
Date:	Friday, November 3, 2023 4:52:40 PM
Attachments:	image002.png FHWA S&O 2017.pdf

Mr. Moffitt,

Please see below for ODOT's comments regarding Nomination #: 23-DOT-0006, which potentially impacts ODOT property or R/W in Pultney Township, Belmont Ohio, which nomination comprises 69.866 gross mineral acres, more or less, situated in Sections 2 and 32, Townships 3 and 6, Range 3.

ODOT COMMENTS

The parcels in question are part of the Interstate Highway System, as Interstate Highway is defined under 23 USC 103(c)(1)(A). Pursuant to 23 CFR 1.23(c), and as set forth in ODOT's Stewardship and Oversight Agreement (see pg. 25 of the attached .PDF file) executed with the Federal Highway Administration ("FHWA"), ODOT may not execute an oil and gas lease on behalf of the State of Ohio without the express, prior written consent of the FHWA. Specifically, 23 CFR 1.23(c) states, in relevant part, that the "temporary or permanent occupancy or use of right-of-way, including air space, for nonhighway purposes ***and the reservation of subsurface mineral rights within the boundaries of the rights-of-way of Federal-aid highways***, may be approved by the Administrator, if he determines that such occupancy, use or reservation is in the public interest and will not impair the highway or interfere with the free and safe flow of traffic thereon (emphasis added)."

It is the opinion of the Department that ODOT may not execute any oil and gas lease with respect to the mineral rights underlying the above-mentioned nominated parcels without the express prior, written consent of FHWA, as those parcels comprise a portion of the Interstate Highway system, as set forth under 23 USC 103(c)(1)(A).

In the event that FHWA would provide its prior, written consent for the leasing of the above-mentioned nominated acreage, this acreage is comprised entirely of ODOT-owned state route right of way. The proposed leasehold language holds the lessee/operator to a standard or care as "a reasonable and prudent operator" and requires the lessee/operator to exercise "due diligence in drilling" its wells. Additionally, Paragraph "23) Hold Harmless" of the proposed lease states that the lessee/operator will indemnify and hold harmless the lessor (ODOT) for claims and judgments. While the possibility that an oil and gas operator would cause a subsidence issue is remote, the damage caused to ODOT would be severe. In that event, reliance upon common law principles of lateral and subjacent support doctrines would not be sufficient to make ODOT whole. To this end, ODOT respectfully requests that the following language be expressly included in the oil and gas lease to be executed by the parties with respect to the above nominated parcels (additional language indicated in ***bold italics***):

"**HOLD HARMLESS**

23) Lessee and its successors and permitted assigns, shall defend, indemnify, release and

hold harmless Lessor and Lessor's successors, representatives, agents, officers, directors, employees, board members and assigns ("Indemnitees"), from and against any and all claims, lawsuits, liabilities, damages, losses, costs, expenses, judgments, fines, penalties, interests, demands and causes of action of any nature whatsoever, ***including any claim by Lessor for damages resulting from cave-ins, subsidence, or other dissolution of the surface of Lessor's property, whether such claim for damages arises from a theory of ordinary negligence or the common law doctrines of lateral and subjacent support, and*** including reasonable attorneys' fees and court costs (collectively, "Claims"): arising out of, incidental to or resulting from: (i) the death or injury to persons, and/or damage to property (real or personal) as a result of the acts or omissions of Lessee and/or Lessee's servants, agents, employees, guests, licensees, invitees or contractors; (ii) the imposition or recording of a lien against the Lessee's interest in the Leased Premises; (iii) the violation of any laws or ordinances, including Environmental Laws and regulations promulgated thereunder by Lessee or Lessee's agents, employees, guests, licensees, invitees, or contractors; and (iv) impacts Lessee's Operations have created to the water quality or quantity on the Leased Premises in violation of this Lease. Each assignee of the Lessee agrees to the terms of this indemnity as if said assignee were party to this Lease when executed. Furthermore, Lessee shall not be obligated to indemnify Lessor to the extent any Claims are the result of any willful or wanton misconduct of Lessor or its successors, assigns, employees, or contractors. Lessor, if it so elects, shall have the right to participate, at its sole expense, in its defense in any suit or suits in which it may be a party, without relieving Lessee of the obligation to defend Lessor. The provisions of this paragraph shall survive the termination of this Lease."

Please let me know if you have any additional questions or concerns, or if you need anything else from our offices.

Respectfully Submitted,

Subject:	Deny nomination #23-DOT-0006
Date:	Monday, October 23, 2023 1:04:22 PM

Greetings,
I attended the last commission meeting in. I was surprised to hear that the commission believes it does not have the authority to deny leases. This section of Ohio Revised Code—ORC 155.33 makes it clear that the commission not only does have the authority to deny these leases but that there are very specific criteria that you need to consider to make the decision.

"(B)(1) Not less than thirty days, but not more than one hundred twenty days following the receipt of a nomination, the commission shall conduct a meeting for the purpose of determining whether to approve or disapprove the nomination for the purpose of leasing a formation within the parcel of land that is identified in the nomination.

In making its decision to approve or disapprove the nomination, the commission shall consider all of the following:

(a) The economic benefits, including the potential income from an oil or natural gas operation, that would result if the lease of a formation that is the subject of the nomination were approved;

(b) Whether the proposed oil or gas operation is compatible with the current uses of the parcel of land that is the subject of the nomination;

(c) The environmental impact that would result if the lease of a formation that is the subject of the nomination were approved;

(d) Any potential adverse geological impact that would result if the lease of a formation that is the subject of the nomination were approved;

(e) Any potential impact to visitors or users of a parcel of land that is the subject of the nomination;

(f) Any potential impact to the operations or equipment of a state agency that is a state university or college if the lease of a formation within a parcel of land owned or controlled by the university or college that is the subject of the nomination were executed;

(g) Any comments or objections to the nomination submitted to the commission by the state agency that owns or controls the parcel of land on which the proposed oil or natural gas operation would take place;

(h) Any comments or objections to the nomination submitted to the commission by residents of this state or other users of the parcel of land that is the subject of the nomination;

(i) Any special terms and conditions the state agency included in its comments or objections that the state agency believes are appropriate for the lease of the parcel of land because of specific conditions related to that parcel of land."

What are the metrics you will use to evaluate these criteria? What experts or sources are you consulting to make these extremely important decisions? Please tell us what you reviewed and how you plan to consider each of these mandated criteria. Please explain what influenced your decisions.

Sincerely,

Morgan Hager

Your Message to the Oil and Gas Land Management Commission:

To the Ohio Oil and Gas Land Management Commission,

What can I say? Ohio's public lands COULD have enormous value as beautiful landscapes and invaluable amenities for hikers, fishers and campers. So I am very concerned to learn that you are allowing oil and gas corporations to frack and extract from our public lands in Ohio,

especially our state parks, forests, and wildlife areas!

Our state parks are our most treasured spaces in Ohio! We, the people of Ohio, PAY to protect them so they can be used for our benefit, not the profits of a polluting and extractive industry. Wake up!

Contrary to the claims of the oil and gas industry, fracking will irrevocably harm our state parks and other public lands. Ohioans use our state parks for hiking, camping, birdwatching, fishing, and hunting. There is no way that injecting millions of gallons of toxic chemicals into the ground and flaring methane into the sky near or in our state parks and public lands will not harm them.

Fracking requires millions of gallons of fresh water that is laced with toxic chemicals, including PFAS forever chemicals. The waste water that comes back up is radioactive and can never be used again. Where will that water come from? The water in our parks and public lands should be protected.

Fracking requires large pads of noisy and polluting machinery. It requires pipelines, which in turn requires removal of trees. This should not be allowed in or near our public lands.

Fracking rigs regularly flare methane into the sky, a greenhouse gas 86 times more potent than carbon dioxide. At a time when the world's climate scientists say we have less than a decade to cut carbon pollution in half, the last thing we should do is put more methane into the atmosphere.

I absolutely oppose fracking in Ohio state parks and public lands, and I know many others who also do. Please just say NO to fracking.

Your Message to the Oil and Gas Land Management Commission:

I strongly opposed fracking in Ohio's state parks. The influence of oil and gas interests over the public interest is extremely concerning. I treasure our public parklands and the surrounding farms and communities which will be so adversely affected. And Ohio needs to be moving away from fossil fuels, not enabling their use.

Your Message to the Oil and Gas Land Management Commission:

Our state parks are the treasure of our state: wonderful, wild, green areas that replenish our environment and sustain us all. My husband and I celebrated our 40th wedding anniversary with our whole family at Punderson State Park, with grandchildren pushing me in a wheelchair on the beautiful boardwalk because I'd just broken my knee (I'm fine now). It was a wonderful, quiet, green place to heal and to make memories with our family. So many of our favorite places are in Ohio state parks.

That's why it would be a tragedy to allow fracking in these gems of our state. We, the people of Ohio, pay to maintain them as wild, green spaces for our enjoyment and environmental benefit, not to make money for the fossil fuel industry. I am the daughter of a petroleum geologist and great granddaughter of an early president of the Ohio Oil Company (now Marathon), William Fleming; they thought they were doing good, but if they were alive today, I know that they would be looking to clean energy sources, not destroying the environment and our beautiful parks by brutally extracting more fossil fuels.

I am totally opposed to fracking on state lands. Please do not allow it to happen in our Ohio.

Your Message to the Oil and Gas Land Management Commission:

Dear Commission Members,

I strongly urge you to prevent any fracking in State of Ohio land.

For one reason, the parks were set aside by and for Ohioans and Nature, and we have no right to tear them up for fracking.

Secondly, fracking is not only destructive by road creation and land use, but causes by-product pollution including fugitive methane emissions.

Fracking creates more fracking due to the short life of production of a given well, leading to ever-increasing land use. Don't make aerial views of our parks look like fracked areas of Pennsylvania.

I would consider allowing our parks for any type of extraction to be malfeasance of the rankest sort, and a grave disservice to Nature and future Ohioans.

Respectfully,

Your Message to the Oil and Gas Land Management Commission:

To the Ohio Oil and Gas Land Management Commission,

I am writing to express my strong opposition to allowing oil and gas companies to frack and extract from our public lands.

Our state parts are meant to be spaces protected for public enjoyment, not for corporate profit. These are treasured spaces that make Ohio special. Not only are they widely used by citizens

of Ohio, but they are also one of our best tourist attractions. The parks benefit so many in this state, please do not let them be ruined for the for short-term gain of a few corporations.

And, we should be clear, that fracking WILL harm our parks! Contrary to the claims of the oil and gas industry, there is no way that injecting millions of gallons of toxic chemicals into the ground and flaring methane into the sky near or in our state parks and public lands will not harm them.

I am adamantly opposed to allowing fracking and oil extraction on our public lands. Please do not do this.

Your Message to the Oil and Gas Land Management Commission:

To the Ohio Oil and Gas Land Management Commission,

I am very concerned to learn that you are allowing oil and gas corporations to frack and extract from our public lands in Ohio, especially our state parks, forests, and wildlife areas.

Ohioans do not want their public lands used for fracking, a horrible treatment of land that destroys life forms and spews toxic waste on the surface of the land. Fracking is not a "wise

use" of our limited public resources. All leases should be denied! AND, there is not a demand for more natural gas as more and more people realize that natural gas contributes to climate change - a fact that is getting harder and harder to deny, Why would you allow permanent damage to resources? In Ohio we have a long history of the gas and oil industry buying the best legislation that can be written - show them that Ohio and Ohioans do not approve of this utter waste of public resources so that they can enrich themselves at the cost of our children's future.

Besides the environmental damage, lack of need for more gas production, and squandering of enormous water resources needed for the fracking process there is also a cost to the people of small towns near fracking sites. No one thinks about what happens to a town of 1,000 people when 10,000 men move into the area for 2 or 3 years to build the fracking infrastructure. A town with 1 bar will all of sudden have 10, there will be an increase in drug use, there will be a lack of women so prostitution will flourish, rents for existing housing will increase as the workers brought in will snap up housing - leaving locals without the ability to live in their hometown, and then when things get built up to accommodate all these people the project will be over and the crews will leave. Towns that have had fracking crews come will never recover to what they were before the work was done. Ruining small towns is not a benefit to Ohio, even though it will look like a short-term boom for some people.
For these and many more reasons I adamantly oppose fracking in Ohio state parks and public lands. Please just say NO to fracking.

Your Message to the Oil and Gas Land Management Commission:

To the Ohio Oil and Gas Land Management Commission,

I am very concerned to learn that you are allowing oil and gas corporations to frack and extract from our public lands in Ohio, especially our state parks, forests, and wildlife areas.

Our state parks are our most treasured spaces in Ohio. We, the people of Ohio, pay to protect them so they can be used for our benefit, not the profits of a polluting and extractive industry.

Contrary to the claims of the oil and gas industry, fracking will irrevocably harm our state parks and other public lands. Ohioans use our state parks for hiking, camping, birdwatching, fishing, and hunting. There is no way that injecting millions of gallons of toxic chemicals into the ground and flaring methane into the sky near or in our state parks and public lands will not harm them.

Fracking requires millions of gallons of fresh water that is laced with toxic chemicals, including PFAS forever chemicals. The waste water that comes back up is radioactive and can never be used again. Where will that water come from? The water in our parks and public lands should be protected.

Fracking requires large pads of noisy and polluting machinery. It requires pipelines, which in turn requires removal of trees. This should not be allowed in or near our public lands.

Fracking rigs regularly flare methane into the sky, a greenhouse gas 86 times more potent than carbon dioxide. At a time when the world's climate scientists say we have less than a decade to cut carbon pollution in half, the last thing we should do is put more methane into the atmosphere.

I adamantly oppose fracking in Ohio state parks and public lands. Please just say NO to fracking.

Your Message to the Oil and Gas Land Management Commission:

To the Ohio Oil and Gas Land Management Commission,

I am very concerned to learn that you are allowing oil and gas corporations to frack and extract from our public lands in Ohio, especially our state parks, forests, and wildlife areas.

Our state parks are our most treasured spaces in Ohio. We, the people of Ohio, pay to protect them so they can be used for our benefit, not the profits of a polluting and extractive industry.

As a former pastor in Nelsonville, Ohio, I have had the privilege of stewarding the Nelsonville Presbyterian Farm, a 350-acre camp property located in the beautiful Hocking Hills. I can testify to the dramatic importance of Ohio's nature for our health and well-being, and protecting our resources (including our air quality and water supplies), particularly in our public lands, is of critical importance for how we can thrive socially AND economically.

Contrary to the claims of the oil and gas industry, fracking will irrevocably harm our state parks and other public lands. Ohioans use our state parks for hiking, camping, birdwatching, fishing, and hunting. There is no way that injecting millions of gallons of toxic chemicals into the ground and flaring methane into the sky near or in our state parks and public lands will not harm them.

Fracking requires millions of gallons of fresh water that is laced with toxic chemicals, including PFAS forever chemicals. The waste water that comes back up is radioactive and can never be used again. Where will that water come from? The water in our parks and public lands should be protected.

Your Message to the Oil and Gas Land Management Commission:

To the Ohio Oil and Gas Land Management Commission,

Please reconsider your decision to allow oil and gas corporations to use our beautiful tax payer supported public lands for fracking and extraction of natural resources. We have spent many years enjoying many of Ohio's fine state parks, watershed areas and state forests. It would be a shame to take their beauty and serenity away from our future citizens. The

negative effects of fracking and extraction has been felt in so many areas and spoiled the way they look and damages the ecosystem. The water sources we have in this state are already under stress from agricultural runoff and various corporation dumping. Areas in and around the public lands are just important to protect. Please do the right thing and say No to fracking on our public lands in Ohio.

Your Message to the Oil and Gas Land Management Commission:

To the Ohio Oil and Gas Land Management Commision,

You are selfish.

I have lived in Ohio for 16 of my 20 years of life and this place is my home. I currently attend Ohio University, which I am proud to say is a beautiful campus. Part of what makes it that way is the natural environment. Hocking Hills and Wayne National Forest are famous

attractions for one simple reason. They have been preserved.

Ohio has maintained something that is so rare to find these days, and that is the purity of nature and of character. We are known for our caring demeanor and the environment that grows around that feature. Destroying the precious land many Ohioans escape to on camping trips or weekends in a small cabin WILL destroy the positive aspects of our state. This will no longer be a place where people want to move to and raise their kids in if natural parks begin the process of fracking. People do not want to raise kids in a wasteland and that is exactly what you will turn Ohio into.

I am well aware of the atmosphere surrounding young people's opinion on our state. Those that live here often do not want to stay. Give them a reason to.

I adamantly oppose fracking in Ohio state parks and public lands. Please just say NO to fracking.

Your Message to the Oil and Gas Land Management Commission (you can use our sample text below but please personalize it to have more impact):
To the Ohio Oil and Gas Land Management Commission,

I am strongly opposed to fracking on Ohio's public lands. Please do not destroy the water table in Ohio by altering the subterranean landscape. Please protect the land and the water by STOPPING THE FRACKING ON PUBLIC LAND. A better use of project funds would be to develop a transition plan to help Ohio reduce dependence on fossil fuels. Whatever net oil and gas gains come through fracking just delays the inevitable bottoming out of oil sources. Please

LEAVE IT IN THE GROUND and help future Ohio manage the transition to less dependence on fossil fuel. Please value the longevity and health of Ohio's land and people OVER the desire to make $$. You will NOT be remembered kindly if you allow fracking on Ohio's public lands--you will be remembered as the people who sold the land for profit. Do the right thing.

Your Message to the Oil and Gas Land Management Commission:

To the Ohio Oil and Gas Land Management Commission,

I am very concerned to learn that you are allowing oil and gas corporations to frack and extract from our public lands in Ohio, especially our state parks, forests, and wildlife areas.

Our state parks are our most treasured spaces in Ohio. We, the people of Ohio, pay to protect

them so they can be used for our benefit, not the profits of a polluting and extractive industry.

My family love and enjoy the outdoors as frequently as we're able to. We camp, bike ride, hike, and gather in Ohio's beautiful state parks as frequently as we are able to. We go for peace, for fresh air, to be with family and nature, and the joy of outdoor recreation. The very thought that anyone could look at Ohio's state parks and think to destroy them with fracking both infuriates and dumbfounds me.

Contrary to the claims of the oil and gas industry, fracking will irrevocably harm our state parks and other public lands. Ohioans use our state parks for hiking, camping, birdwatching, fishing, and hunting. There is no way that injecting millions of gallons of toxic chemicals into the ground and flaring methane into the sky near or in our state parks and public lands will not harm them.

Fracking requires millions of gallons of fresh water that is laced with toxic chemicals, including PFAS forever chemicals. The waste water that comes back up is radioactive and can never be used again. Where will that water come from? The water in our parks and public lands should be protected.

Fracking requires large pads of noisy and polluting machinery. It requires pipelines, which in turn requires removal of trees. This should not be allowed in or near our public lands.

Fracking rigs regularly flare methane into the sky, a greenhouse gas 86 times more potent than carbon dioxide. At a time when the world's climate scientists say we have less than a decade to cut carbon pollution in half, the last thing we should do is put more methane into the atmosphere.

During a time when healing our climate matters most, barely a year and a half after East Palestine - one of the worst chemical spills in Ohio's history - the oil and gas industry needs to refocus its efforts on innovating energy forward, not continuing to use destructive, unsustainable ways like fracking to find fuel.

I adamantly oppose fracking in Ohio state parks and public lands. Please just say NO to fracking.

Dear commissioners,

Attached are my comments for submitted nominations.

Sincerely,

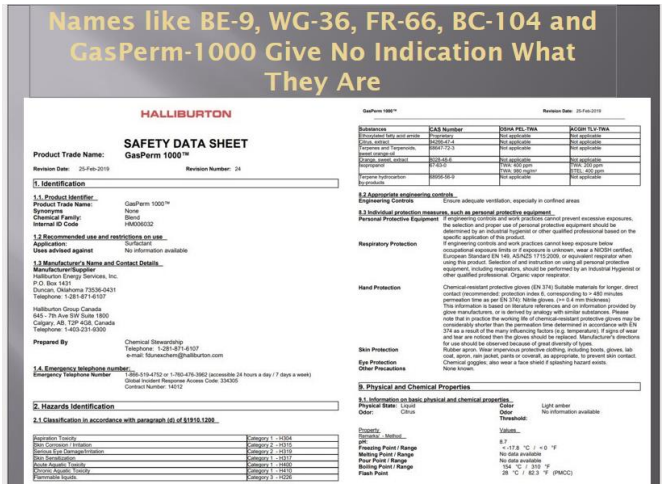
Roxanne Groff
Amesville Ohio 45711

CAUTION: This is an external email and may not be safe. If the email looks suspicious, please do not click links or open attachments and forward the email to csc@ohio.gov or click the Phish Alert Button if available.

Dear commissioners,

I am submitting this document as a public comment for 23-DOT-0006 as well as for all the nominations before you for consideration, DOT-0001-0004, DNR-0001-DNR 0010. There is more to consider in approving ODOT lands than thinking the few acres needed by the oil and gas company seeking a lease, has a small consequence. These rights of ways are needed to secure other parcels on private lands possibly forcing unitization of landowners who do not want drilling on or near their properties.

It is clear that the most important issues to those of us providing reams of testimony and studies for your review have not left much of an imprint on the ocmmission. I remember the commissions' only interest in the three expert presentations at your June meeting was the attention you gave to Chief Silverio Caggiano, retired fire chief and hazmat expert from Youngstown. He clearly laid out the hazards of fracking accidents and the fact that MSDS sheets do not accompany brine trucks carrying toxic radioactive waste nor are they kept on site at drilling operations. Nor are the proprietary chemicals revealed.



Documented accidents have been happening for many years with conventional wells and now horizontal hydraulic fracturing. ODNR has documented *just* since 2018 over 800 accidents (1539 counting incidents with PUCO) that they consider serious enough to have inspectors, OEPA and hazmat intervention and other first responders be present to clean up or supervise the cleanup of anything from a brine spill from a well head to the explosions that caused evacuations. The immediate and long-term effects are NOT documented and understated by the division giving most media little or no knowledge of toxic and radioactive components of the extraction process. This results in facts of the extraction process, and its buildouts purposefully hidden from the public. You have the story from Energy Network that further talks about the most recent accidents. https://energynews.us/2023/10/19/ohio-oil-and-gas-industry-accident-data-boost-worries-about-drilling-under-state-parks/

This article and the following records only cover the past 4 ½ years of reported accidents.

These are the incident reports obtained in a public records request form ODNR

2019 Tracking (2).xlsm

2018 ER Tracking 5.30.18.xlsm

2018 ER Tracking 5.30.18 - Copy.xlsm

Copy of 2023 Tracking - READ ONL`

2022 Tracking - READ ONLY.xlsm

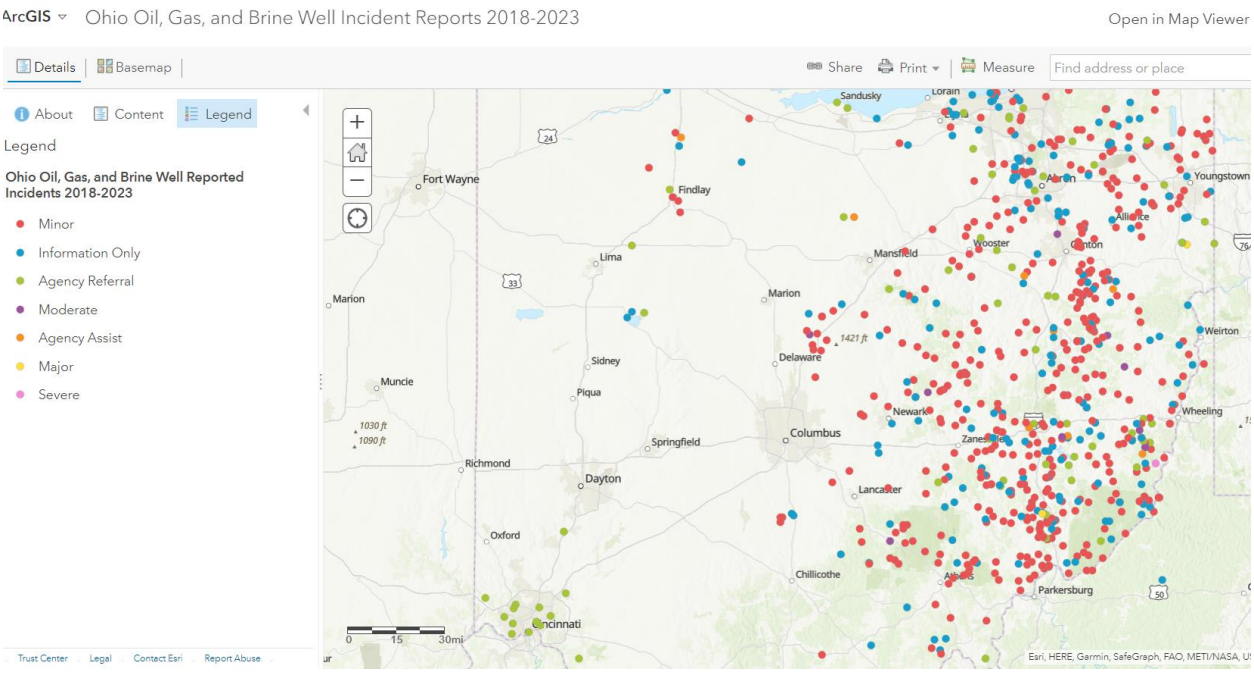
2021 Tracking - READ ONLY.xlsm

2020 Tracking (1).xlsm

My comment letter emphasizes the numbers of accidents are **NOT** far and few between!

This map was prepared by Dr. Ted Auch, Frack Tracker Alliance, produced from the public record from ODNR showing the reported accidents for only the past 4 ½ years. This is the assault on the Appalachian region, which is a monumental environmental justice issue.

These accidents are and will be happening near our public lands!



Documented accidents in Ohio

1.https://blog.cleveland.com/metro/2007/12/bainbridge_officials_to_meet_t.html

The freak explosion - which officials say was caused by natural gas bubbling into Richard and Thelma Payne's well water - literally lifted the English Drive house off its foundation before dropping it down, Fire Chief Brian Phan said. But Ohio Valley Energy has acted on the

hypothesis that its new well, drilled at the end of English Drive on 20 acres owned by Jacob English, created the situation.

2. https://www.athensmessenger.com/news/gas-company-settles-with-glouster-couple-after-november-pipeline-explosion/article_a76dc2b6-d374-11e1-b9d4-001a4bcf887a.html

the root-cause analysis of the explosion, the results of which were reported in The Messenger on Tuesday. He said he knew small landslides occurred from time to time and was already informed that a girth weld had been cracked. Sayers attributes the actual explosion, however, to landslides that occurred due to heavy rains in the area, coupled with an earthquake that was felt in Ohio and the already-cracked weld.

3.https://www.beaconjournal.com/story/news/2013/03/15/well-explodes-in-eastern-wayne/10308674007/

CHIPPEWA TOWNSHIP: Fire crews from several Wayne and Summit County departments spent several hours Friday evening extinguishing flames from a tank after an explosion at a well in Chippewa Township. The billowing clouds of black smoke followed a loud explosion that could be felt three miles away and sent flames shooting past 30-foot-tall trees on Taylor Road

4. https://www.farmanddairy.com/news/stark-county-landowner-files-shale-lawsuit-to-challenge-chesapeake-exploration/36656.html?icn=related-stories&ici=int-articles__related-thumb__187x125__single-footer

The lawsuit specifically alleges that the Anschutz landman induced the Greens into signing the lease by threatening that if they didn't sign, the company (Anschutz) would drill under their property and remove the oil and gas without paying them. Wish we knew how many of these cheating varmints hoodwinked others into signing leases.

5. https://www.justice.gov/usao-sdoh/pr/monroe- -oil-company-owner-sentenced-illegally-dumping-50-gallons-brine-water-week

Hercher was dumping about 50 gallons of oily brine water weekly into a roadside ditch near Rias Run, which eventually reaches the Ohio River.

6. https://www.youtube.com/watch?v=1ic_Jy4eqB8&list=PLBF5FEF8FD912A51A

OMG!! Watch this. How many people has this happened to! HOW MANY!

7. https://www.naturalgasintel.com/one-dead-after-explosion-at-blue-racer-midstream-site-in-ohio/

https://www.youtube.com/watch?v=9yzuDrhz688

Both accidents in Noble County where Wolf Run State Park is located!

8. And a few days later! https://www.daily-jeff.com/story/news/accident/2018/12/17/leak-reported-at-blue-racer/6625068007/

Authorities are trying to determine the amount of condensate released at the Blue Racer Midstream facility on Pump Station Road Thursday and the full impact to the wildlife, stream, and soil in that area near Carlisle.

9. https://businessjournaldaily.com/odnr-orders-kleese-to-shut-down-5-injection-wells/

2,000 gallons of waste oil went into a pond killing the fish. The division found that Kleese violated Ohio law by failing to conduct saltwater disposal operations in a "manner that which will not contaminate or pollute the surface of the land, or water on the surface or subsurface

Kleese well spill Trumbull County

Kleese well spill

10. https://ernstversusencana.ca/ohio-genesis-resources-llc-gas-well-unused-for-years-sprays-suspected-injected-frac-waste-radioactive-over-two-miles-fish-kill-chemicals-likely-never-to-be-disclosedal-contents-will-most/ *Ohio regulators are working at a gas well that* ***started spewing what's believed to be brine water from fracking into the environment more than a week ago.***

Noble County gas well took 10 days to cap and cost $385,245 paid for by the state! This well was breached by 2 nearby injection wells that are now suspended.

11. https://www.pbs.org/newshour/nation/two-weeks-rover-pipeline-leaked-drilling-fluid-ohio-wetlands

Energy Transfer Partners, the Texas-based pipeline operator that owns the controversial Dakota Access Pipeline, is coming under renewed scrutiny for two spills that released more than 2 million gallons of drilling fluid into Ohio wetlands earlier this month.

What would this do to our parks?!

12. https://www.fractracker.org/2014/08/statoil-eisenbarth-fire-intro/
https://www.youtube.com/watch?v=CwVL0L64Pcw

Fire and explosion in Monroe County

Although the spill following a fire on June 28 at the Statoil North America well pad in Monroe County stretched 5 miles along the creek and killed more than 70,000 fish and wildlife

HOW WOULD OUR PARKS BE EVACUATED?

13. Following the Eisenbarth Statoil explosion is this https://www.daily-jeff.com/story/news/2014/12/17/monroe-county-gas-well-repair/18944293007/

leak at the top of the giant Utica Shale natural gas well.

14. https://www.publicnewsservice.org/2014-03-21/environment/ohio-oil-spill-raises-concerns-about-impact-of-oil-and-gas-development/a38295-1

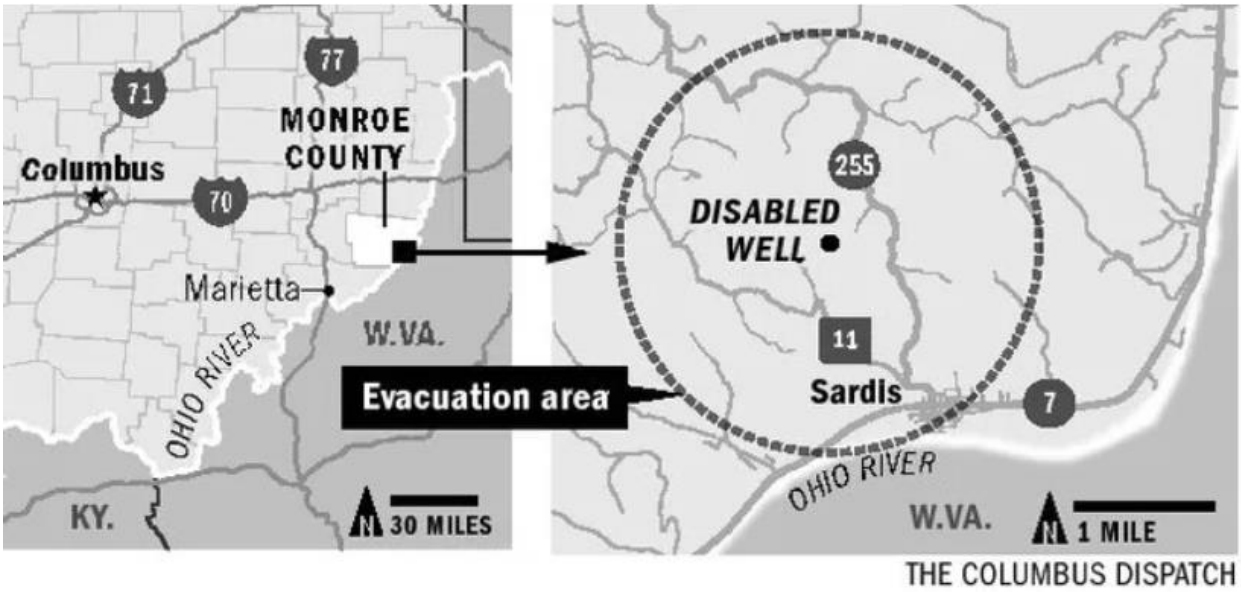
Often the location of pipelines can fly under the radar.
"It looks as if this particular operator has sort of skipped a lot of those important steps, that they were missing some of those important public education outreach pieces to let residents in the surrounding area know the existence of these pipelines.

15. https://news.wosu.org/news/2019-12-19/a-fracking-explosion-in-ohio-created-one-of-worst-methane-leaks-in-history

Belmont County. Proceedings of the National Academy of Sciences revealed that the accident resulted in one of the largest methane leaks ever recorded in the U.S. (Again, how would you evacuate the parks!)

Evacuations!

16.https://www.dispatch.com/story/news/environment/2014/12/22/evacuated-families-in-monroe-county/23666878007/



17. https://www.dispatch.com/story/news/crime/2014/10/29/most-allowed-back-home-after/24106116007/ **Near Fernwood State forest! Jefferson County.** *incident was the third in three days tied to fracking operations in eastern Ohio.*

The Columbus Dispatch

18.https://www.dispatch.com/story/news/environment/2014/05/07/shale-well-leaks-during-drilling/23442653007/

Seven residents from three houses were evacuated because of the danger that escaping natural gas might lead to an explosion.

….and MORE evacuations!!

19. https://marcellusdrilling.com/2023/07/columbiana-county-oh-evacuates-450-after-hilcorp-gas-well-accident/

https://www.wtrf.com/ohio-valley/gas-released-from-well-in-ohio-valley-450-people-evacuated/

one-mile evacuation zone shortly after the incident occurred and more than 450 people have been evacuated. (Dear members of the commission, how the heck would the parks be evacuated?!!)

This just happened near our Salt Fork State Park.

20. https://www.daily-jeff.com/story/news/local/2023/10/17/gas-leak-at-well-pad-leads-to-evacuations-west-of-byesville-on-monday/71213526007/*Residents living near a drilling site west of Byesville were evacuated Monday evening for several hours after a strong smell of gas was detected in the area.*

Brine Truck Accidents

21. https://www.cantonrep.com/story/news/2016/05/06/toxic-brine-from-oil-well/30739492007/

Conventional and Horizontal drilled wells ALL contain toxic radioactive waste!

22. https://www.theintelligencer.net/news/top-headlines/2016/03/natural-gas-water-truck-in-accident-spills-brine-near-barnesville-reservoir/

BARNESVILLE – Gulfport Energy contractors may not be drawing any water from the village reservoir, but an Ohio Environmental Protection Agency spokesman said the company is responsible for 5,000 gallons of brine that leaked into a stream leading to the reservoir Wednesday.

23. https://www.wtap.com/content/news/Brine-truck-accident-shuts-down-traffic-on-US-50-458637853.html

State Route 50 Washington County

-

Had enough? Any responsible person making decisions on behalf of the millions of people in our state would take the hard look at the facts that have been submitted to you in the form of testimony, public comments, scientific and health studies, phone calls, display of dismay of your treatment of the public pleas for more interaction. You have no political consequences to face and therefore are free of election politics. But you do have the public trust to think about. You have hundreds of thousands of stakeholders counting on you to keep their public lands free of harmful impacts that *will* occur resulting from the leasing leading to fracking of our lands.

Two of the biggest oil company executives against fracking….

Former executive Louis Allstadt of Mobile Corp., before merging with Exxon, retired from the company, and moved to New York where he worked to make sure the state banned fracking. Allstadt wrote to Exxon CEO Rex Tillerson when Tillerson tried to fight a fracking operation near his home in Texas, *No one should have to live near well pads, compression stations, incessant heavy truck traffic, or fracking water towers, nor should they have their water or air contaminated. You and I love the places where we live, but in the end, if they are ruined by fracking or frack water tanks, we can afford to pack up and go someplace else. However, many people can't afford to move away when they can no longer drink the water or breathe the air because they are too close to one of your well pads or compressor stations*. https://www.salon.com/2014/02/27/former_oil_exec_calls_exxon_ceo_out_on_his_hypocritical_anti_fracking_lawsuit/

Obviously, you do not believe in climate issues, or health impacts or the opinions of thousands of Ohioans telling you to disapprove ALL the nominations. The many accidents in this comment letter and the thousands of incidents in ODNR's records are documented here in *our* state.

You, a commission of FIVE, not the governor, not the director of ODNR but ***you*** will make the decision to expose unwitting citizens to the potential harms of oil and gas extraction by fracking, turning our public lands into industrial complexes. The consequences of your decision will be on your conscience.

https://www.nytimes.com/2016/12/08/business/much-ado-in-cooperstown-ny-over-vote-to-dump-fossil-fuel-stocks.html Louis Alstadt

Subject:	Public Comment on 23-DOT-0006
Date:	Monday, October 23, 2023 7:49:42 PM

Dear commissioners,

This comment is on video from Dr. Sandra Steingraber. Her testimony starts about 10 seconds into the video. Dr. Sandra Steingraber is an American activist, biologist, author, senior scientist, and cancer survivor. She devoted her life's work to understanding which chemical pollutants in our environment endanger our health and well-being. Sandra is a biologist who fights for the environmental protection of all living beings and sees this as our basic human right.

Dr. Steingraber is a Senior Scientist with the Science & Environmental Health Network, holds a Ph.D. in ecology from the University of Michigan, is the author of a trilogy of award-winning books on environmental health and from 2003-2021 served as the Distinguished Scholar in Residence at Ithaca College in Ithaca, New York. She has been recognized for her work as a researcher and science writer with the Rachel Carson Leadership Award, the American Ethical Union's Elliot-Black Award, and the 2011 Heinz Award.

Please listen closely to her experience with the effects of fracking and why our public lands should not be leased for oil and gas exploration.
