**Ordering Instructions:** Professional Services work is broken down into 4 categories: **Integration, Data Conversion/Export, Custom Reports and Sales Consulting.** To facilitate faster quoting of Professional Services work, we have established basic packages in each of these categories that sales representatives can order without having to go through the quoting process with the Professional Services team. However, if you are unsure of the scope of the project or if it doesn't fall within the description provided below please contact Professional Services. For those opportunities that don't fall into one of the predefined "Packages" then a custom quote will be provided by Professional Services which will determine the number of units you need to quote at the rate for that service.

**Note Software Support:** Software Support is required for the 3 Integration Packages. This ensures that when new releases are issued, the professional services work will be supported. If the system is being purchased on a lease, then the number of years on the lease minus 1 needs to also be quoted. If the system is a purchase then the customer will be invoiced annually to keep their integration work current.

**Contact Information for Professional Services Support:** Keith Robertson (512) 697-2521 or K.Robertson@neopost.com
