TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4. Tires are tubeless & non-directional unless otherwise stated.

NOTE: Other tires are available upon request.

FLEXPORT TIRES

Cat Flexport are solid tires designed for severe applications such as scrap or waste handling where normal pneumatic tires would be quickly. damaged. They are designed with holes molded through the outer ring of the tire's sidewalls to improve tire flexibility and stability. This allows the Cat Flexport tire to handle all surfaces with a greatly improved ride and to absorb much of the shocks that another solid or foam-filled tire passes on to the operator and machine. This results in increased operator comfort, reduced operator fatigue, and reduced machine stress.

P	**434-4487**	**TIRES, 23.5X25 FLXPRT OFF ROAD** . . . . . 0 Off-the-Road (OTR) tires ideal for special applications on unimproved surfaces, such as brick, glass, and scrap yards where debris is not an issue. Machine oscillation is reduced.		**$7,020**
P	**434-4488**	**TIRES, 23.5X25 FLXPRT SMOOTH** . . . . . 0 Smooth tread tires are ideal for special applications where debris is an issue, such as scrap yards, recycling centers and waste transfer stations. Machine oscillation is reduced.		**$10,590**

TIRES/RIMS, ALLOWANCE FOR OMISSION

Dealers should contact their Application Specialist if they plan to use a tire not offered on the price list. Some tires may require axle oscillation stops or other machine modifications.

CAT PRODUCTION MEASUREMENT (CPM) PAYLOAD WEIGHING SYSTEM

Cat M-series Medium Wheel Loaders are available with the Cat Production Measurement (CPM) app that includes an integrated onboard payload weighing scale. This app measures and/or records:
-Payload weight, material ID, truck ID, cycle (bucket dumps) count and fuel consumption
-Allows on-the-go weighing of the bucket payload during the lift cycle
-Daily payload total (tonnes/tons), productivity (tonnes/hour or tons/hour) and efficiency (tonnes/liter or tons/gal) data is reported wirelessly via Product Link to the VisionLink fleet management web portal (Cat Essentials Product Link subscription required).
-Detailed payload, productivity and efficiency data can be downloaded to a laptop computer for analysis in the optional VIMSpc software (VIMSpc and VIMS data cable are required, but VIMS is NOT required).
-Payload tickets can be printed with an optional printer

Refer to the Cat Connect Payload Technologies intranet page (https://dealer.cat.com/payload) for complete technical specifications; operation, sales, marketing and technical support publications.

NOTES:
1) Demo and permanent software are available from the factory below.
2) For field installation, permanent software can be purchased through the Caterpillar Feature Protection System and enabled by a dealer technician with Cat ET and an SEA password. SEA p/n 433-2014, currently $4,148 list price, subject to change. Consult ANTARES parts distribution system for latest SEA price.
3) Both demo and permanent software require calibration prior to customer use.

CALIBRATION INSTRUCTIONS
This app requires calibration and set-up by either the dealer or customer. Refer to the Systems Operation Test & Adjust manual UENR5827 for system calibration, material and truck ID lists set-up and operation instructions.

P	**370-3813**	**CPM PAYLOAD WEIGHING READY** . . . . . 0 Includes hardware and demo software for CPM, dealer enabled for up to 250 hours. To activate demo software, it must be enabled by a dealer technician with Cat ET. No password is required. For permanent software activation in the field, purchase of software ($4,148 list price) is required. See note 2 above for details.		**$235**
P	**364-1293**	**CPM PAYLOAD WEIGHING** . . . . . 0 Includes hardware and permanent software for CPM. Software is factory enabled, but the system must be calibrated prior to customer use. See note above for calibration instructions.		**$4,665**

BUCKETS

Buckets must be ordered Installed on a Machine Order.
For questions on buckets intended for Machine Orders please contact your Marketing Subsidiary Machine Coordinator.

Loose buckets should be ordered on a MISC Order through Caterpillar Work Tools - Wamego using source code 0P-0672.
For availability of loose buckets please call (800) 255-2372.

If you are going to order a loose bucket from CWTS and a machine from Aurora and if you need them shipped at the same time then you need to cross-reference the MSO's with each other.

"GET" is NOT automatically included on bucket orders. "GET" must be entered on the order with your bucket selection, unless text for bucket states otherwise. Please make the "GET" selection from the "GET" listed immediately following the bucket listing.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation, and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs on schedule, maintain equipment condition, and reduce the costs of owning and operating your fleet. Availability varies by country. Please contact your Cat marketing representative with questions.

L	**434-0695**	**PL, CELLULAR PLE641, FTO**	0	**NC**
		Product Link Elite series PLE641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.		
L	**434-0696**	**PL, SATELLITE PLE631, FTO**	0	**NC**
		Product Link Elite series PLE631 uses a satellite network to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. For use in areas with poor or no cellular coverage.		

TIRES

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation, and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs on schedule, maintain equipment condition, and reduce the costs of owning and operating your fleet. Authorization varies by country. Please contact your Cat marketing representative with questions.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4. Tires are tubeless & non-directional unless otherwise stated.

NOTE: Other tires are available upon request.

FLEXPORT TIRES

Cat Flexport are solid tires designed for severe applications such as scrap or waste handling where normal pneumatic tires would be quickly damaged. They are designed with holes molded through the outer ring of the tire's sidewalls to improve tire flexibility and stability. This allows the Cat Flexport tire to handle all surfaces with a greatly improved ride and to absorb much of the shocks that another solid or foam-filled tire passes on to the operator and machine. This results in increased operator comfort, reduced operator fatigue, and reduced machine stress.

P	**394-3949**	**TIRES, 26.5X25 FLXPRT SMOOTH** ..... 0 Smooth tread tires are ideal for special applications where debris is an issue, such as scrap yards, recycling centers and waste transfer stations. Machine oscillation is reduced.		**$11,910**
P	**394-3950**	**TIRES, 26.5X25 FLXPRT TREADED** ..... 0 Off-the-Road (OTR) tires ideal for special applications on unimproved surfaces, such as brick, glass, and scrap yards where debris is not an issue. Machine oscillation is reduced.		**$7,090**

TIRES/RIMS, ALLOWANCE FOR OMISSION

Dealers should contact their Application Specialist if they plan to use a tire not offered on the price list. Some tires may require axle oscillation stops or other machine modifications.

CAT PRODUCTION MEASUREMENT (CPM) PAYLOAD WEIGHING SYSTEM

Cat M-series Medium Wheel Loaders are available with the Cat Production Measurement (CPM) app that includes an integrated onboard payload weighing scale. This app measures and/or records:
-Payload weight, material ID, truck ID, cycle (bucket dumps) count and fuel consumption
-Allows on-the-go weighing of the bucket payload during the lift cycle
-Daily payload total (tonnes/tons), productivity (tonnes/hour or tons/hour) and efficiency (tonnes/liter or tons/gal) data is reported wirelessly via Product Link to the VisionLink fleet management web portal (Cat Essentials Product Link subscription required).
-Detailed payload, productivity and efficiency data can be downloaded to a laptop computer for analysis in the optional VIMSpc software (VIMSpc and VIMS data cable are required, but VIMS is NOT required).
-Payload tickets can be printed with an optional printer

Refer to the Cat Connect Payload Technologies intranet page (https://dealer.cat.com/payload) for complete technical specifications; operation, sales, marketing and technical support publications.

NOTES:
1) Permanent software is available from the factory below.
2) For field installation, permanent software can be purchased through the Caterpillar Feature Protection System and enabled by a dealer technician with Cat ET and an SEA password. SEA p/n 433-2014, currently $4,148 list price, subject to change. Consult ANTARES parts distribution system for latest SEA price.
3) Both demo and permanent software require calibration prior to customer use.

CALIBRATION INSTRUCTIONS
This app requires calibration and set-up by either the dealer or customer. Refer to the Systems Operation Test & Adjust manual UENR5827 for system calibration, material and truck ID lists set-up and operation instructions.

P	**453-3251**	**CPM PAYLOAD SOFTWARE** . . . . . 0 Includes permanent software for CPM. Software is factory enabled, but the system must be calibrated prior to customer use. See note above for calibration instructions. REQUIRES: 478-1331 STANDARD PACKAGE		**$4,425**

AUTODIG

Autodig is a software enabled attachment that controls the implement system during the bucket loading portion of a cycle to automatically load aggregate material.
Operating modes include:
-Automatic Pile Detection (automatically starts loading when material is contacted)
-Operator Triggered (switch activated)
-Record (Operator records a personal loading cycle)
Dig mode selector adjusts for material density.

P	**453-3250**	**AUTODIG SOFTWARE** . . . . . 0 Includes software for Aggregate Autodig. NOT RECOMMENDED for hardbank or large rock loading. REQUIRES: 478-1331 STANDARD PACKAGE		**$1,480**

BUCKETS

"GET" is NOT automatically included on bucket orders. GET must be entered on the order with your bucket selection, unless text for states otherwise. Please make the "GET" selection from "GET" listed immediately following the bucket listing.

Recommend use of bolt-on adapter option, adapter and segment option, or bolt-on cutting edge option for general purpose buckets and material handling buckets.

Material density will determine the appropriate capacity bucket. Refer to the Specalog. Exceeding maxium payload may cause loader instability.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As consequence of possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4.
Tires are tubeless & non-directional unless otherwise stated.

For tire availability contact your Account Coordinator.
Other tires are available upon request.

NOTE: Reference the TRA Classification below when selecting tires to ensure the machine has the appropriate tire for the machines application.
L3 - Rock tread for construction, stock piling, and truck loading applications
L4 - Deep rock tread for load & carry applications with long cycles
L5 - Extra deep rock tread for face loading in mines & quarries and severe applications

TECHNOLOGY PRODUCTS

CAT CONNECT

Cat Connect makes smart use of technology allowing the operator and/or owner to monitor, control and manage equipment. Information is delivered on-board via an 18 cm (7in) color multi-function touch sceen display and wirelessly to the VisionLinkTM fleet management web portal (Cat Essentials Product Link subscription required).
The multi-function display as well as Core Performance monitoring are standard equipment.
Note: the image from the standard rear-view camera is also displayed on the multi-function monitor during reverse travel.

Optional apps are available to provide advanced capabilities delivered via software and when required, additional electronic components and sensors. The advanced app software is enabled by a Software Enabled Attachment (SEA). The SEA is either factory installed or can be purchased for dealer installation.

NOTE: Refer to Information Release Memo (IRM) EES03-01 (PELJ0138) in the Electronic Sales Library for further explanation of SEA's. For dealer installation, select the Product Support tab and search for media number PELJ0138. Refer to REHS1238 for how to obtain a Factory Level Password. Contact FPS: Internet with Corporate Web Security (CWS) (https://fps.cat.com/).

CAT PRODUCTION MEASUREMENT APP

NOTE:
- Allows on-the-go weighting of the bucket payload during the lift cycle with a nominal accuracy of + /-1%.
- Records date, time, weight, loading cycle count, up to 20 material IDs and up to 50 truck IDs for up to 1400 truck-loads.
- Daily payload, productivity (tonnes/hour or tons/hour) & efficiency (tonnes / liter or tons / gal) data is reported wirelessly via Product Link to the VisionLink fleet management web portal (Cat Essentials Product Link subscription required)
- Detailed payload, productivity and efficiency data can be downloaded to a laptop computer for analysis in the optional VIMSpc software (VIMSpc and VIMS data cable are required, but VIMS is NOT required).
- Payload tickets can be printed with an optional printer.

BUCKETS

MATERIAL HANDLING buckets incorporate flat floor design and are built for loose material re-handling, making these buckets well-suited for a variety of STOCKPILE LOADING applications.
These buckets provide maximum material retention and improved visibility to the load in bucket.
These buckets can be equipped with bolt-on adapters and segments, or bolt-on-cutting edges with corner guard for versatility and longer life. Buckets are standard equipped with a deflector to prevent possible spillage over the linkage.
Material Handling exist also in Heavy Duty structure and wear resistant configuration.
Material Handling exist also in Back Grading Edge configuration with flush mounted teeth.

GENERAL PURPOSE buckets incorporate wedge floor design and are built with a shell-tine construction to increase strength and rigidity, making these buckets excellent for EXCAVATION and BANK applications.
This structure efficiently transmits cutting edge loads back to the lift arms, shielding the bucket shell from distortion and keeping it up out of the dirt.
Designed to accept the standard Cat bolt-on edge with corner guard or tooth group with bolt-on segments. Buckets are standardly equipped with a deflector to prevent possible spillage over the linkage.

ADDITIONAL WORK TOOLS
Additional Fusion work tools are available for the 966M including forks, material handling Arms and special application buckets such as Coal, Woodchip, Light Material, High Dump and Grapple.
Please refer to the WT-WL Price List (Work Tool Wheel Loaders) for any other loose work tool that you may want to order on a MISC (CMOPS) order. Please use the MISC work tool 0G-6870 number listed in the WT-WL Price List for any loose MISC order.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation, and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs on schedule, maintain equipment condition, and reduce the costs of owning and operating your fleet. Availability varies by country. Please contact your Cat marketing representative with questions.

L	**434-0695**	**PL, CELLULAR PLE641, FTO**	0	**NC**
		Product Link Elite series PLE641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.		
L	**434-0696**	**PL, SATELLITE PLE631, FTO**	0	**NC**
		Product Link Elite series PLE631 uses a satellite network to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. For use in areas with poor or no cellular coverage.		

TIRES

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4. Tires are tubeless & non-directional unless otherwise stated.

NOTE: Other tires are available upon request.

FLEXPORT TIRES

Cat Flexport are solid tires designed for severe applications such as scrap or waste handling where normal pneumatic tires would be quickly damaged. They are designed with holes molded through the outer ring of the tire's sidewalls to improve tire flexibility and stability. This allows the Cat Flexport tire to handle all surfaces with a greatly improved ride and to absorb much of the shocks that another solid or foam-filled tire passes on to the operator and machine. This results in increased operator comfort, reduced operator fatigue, and reduced machine stress.

P **394-3949** **TIRES, 26.5X25 FLXPRT SMOOTH** 0 **$11,910**
Smooth tread tires are ideal for special applications where debris is an issue, such as scrap yards, recycling centers and waste transfer stations. Machine oscillation is reduced.

SOFTWARE ENABLED ATTACHMENTS (SEA) INSTRUCTIONS

Technology apps are activated by Software Enabled Attachments (SEA). SEAs are available factory installed or can be purchased for dealer installation.

Refer to Information Release Memo (IRM) EES03 -01 (media number PELJ0138) in the Caterpillar Media Information Center for further explanation of SEAs. Select the Product Support tab and search for number PELJ0138. Refer to REHS1238 & REHS8401 for how to obtain a Factory Level Password. CAT PRODUCTION MEASUREMENT (CPM) PAYLOAD WEIGHING SYSTEM

Cat M-series Medium Wheel Loaders are available with the Cat Production Measurement (CPM) app that includes an integrated onboard payload weighing scale. This app measures and/or records:
-Payload weight, material ID, truck ID, cycle (bucket dumps) count and fuel consumption
-Allows on-the-go weighing of the bucket payload during the lift cycle
-Daily payload total (tonnes/tons), productivity (tonnes/hour or tons/hour) and efficiency (tonnes/liter or tons/gal) data is reported wirelessly via Product Link to the VisionLink fleet management web portal (Cat Essentials Product Link subscription required).
-Detailed payload, productivity and efficiency data can be downloaded to a laptop computer for analysis in the optional VIMSpc software (VIMSpc and VIMS data cable are required, but VIMS is NOT required).
-Payload tickets can be printed with an optional printer

Refer to the Cat Connect Payload Technologies intranet page (https://dealer.cat.com/payload) for complete technical specifications; operation, sales, marketing and technical support publications.

NOTES:
1) Permanent software is available from the factory below.
2) For field installation, permanent software can be purchased through the Caterpillar Feature Protection System and enabled by a dealer technician with Cat ET and an SEA password. SEA p/n 433-2014, currently $4,148 list price, subject to change. Consult ANTARES parts distribution system for latest SEA price.
3) Both demo and permanent software require calibration prior to customer use.

CALIBRATION INSTRUCTIONS
This app requires calibration and set-up by either the dealer or customer. Refer to the Systems Operation Test & Adjust manual UENR5827 for system calibration, material and truck ID lists set-up and operation instructions.

P	**453-3251**	**CPM PAYLOAD SOFTWARE** . . . . . 0 Includes permanent software for CPM. Software is factory enabled, but the system must be calibrated prior to customer use. See note above for calibration instructions. REQUIRES: 478-1333 STANDARD PACKAGE		**$4,425**

BUCKETS

Buckets must be ordered Installed on a Machine Order.
For questions on buckets intended for Machine Orders please contact your Marketing Subsidiary Machine Coordinator.

Loose buckets should be ordered on a MISC Order through Caterpillar Work Tools - Wamego using source code 0P-0672.

For availability of loose buckets please call (800) 255-2372.
If you are going to order a loose bucket from CWTS and a machine from Aurora and if you need them shipped at the same time then you need to cross-reference the MSO's with each other.

"GET" is NOT automatically included on bucket orders. "GET" must be entered on the order with your bucket selection, unless text for bucket states otherwise. Please make the "GET" selection from the "GET" listed immediately following the bucket listing.

Recommend use of bolt-on adapter option, adapter and segment option, or bolt-on cutting edge option for general purpose buckets and material handling buckets.

Material density will determine the appropriate capacity bucket.
Refer to the Specalog. Exceeding maxium payload may cause loader instability.

POWERTRAIN

Brakes, full hydraulic enclosed wet-disc with rimpull & retarding effect adjustment.
Brake wear indicators
Engine, Cat 9.3 w/ US Tier 4 Final / EU Stage IV rating
Cat Clean Emissions Module (CEM) with Diesel Particulate Filter (DPF) and remote Diesel Exhaust Fluid (DEF) tank & pump
Fan, radiator, electronically controlled, hydraulically driven, temperature sensing, on demand
Fuel priming pump (electric)
Fuel/Water separator
Axles, Manually actuated front axle differential lock, open differential rear axle, ecology drain
Precleaner, engine air intake
Parking Brake, disk & caliper
Throtle lock
Power split continuously variable transmission

ELECTRICAL

Alarm, back-up
Alternator, 145-amp brushed
Batteries (2), maintenance free 1400CCA
Ignition key; start/stop switch
Lighting system:
-Four halogen work lights
-Two halogen roading lights (w/ signals)
-Two halogen rear vision lights (hood mounted)
Main disconnect switch
Receptacle start (cables not included)
Starter, electric, heavy duty
Starting and charging system (24-volt)

OPERATOR ENVIRONMENT

Air conditioner, heater, and defroster (auto temp & fan)
Beverage holders (2) with storage compartment for cell phone/MP3 player
Bucket/Work tool function lockout
Cab, pressurized and sound suppressed, (ROPS/FOPS), radio ready (entertainment) includes antenna, speakers and converter (12-volt 10-amp)
Coat hook (2)
EH Controls, lift and tilt function
EH Parking Brake
Ergonomic cab access ladders & handrails
Horn, electric
Light, two dome (cab)
Mirrors, rearview external with integrated spot mirrors
Post mounted membrane 16 switch keypad
2 receptacles, 12-Volt
Seat, Cat Comfort (cloth) air suspension
Seat belt, retractable, 51mm (2") Wide
Steering, EH joystick, speed sensing with force feedback & virtual gear selector.
Sun visor, front
Wet-Arm wipers/washers front & rear, Intermittent front wiper
Window, sliding (left and right sides)
Viscous mounts

COMPUTERIZED MONITORING SYSTEM
With following gauges:
-Speedometer/Tachometer
-Digital gear range indicator virtual
-DEF (Diesel exhaust fluid) level
-Temperature: engine coolant, hydraulic oil, transmission oil
-Fuel level
With following Warning Indicators:
-Temperature: axle oil, engine intake manifold
-Pressure: engine oil, fuel Pressure Hi/Low, primary steering oil, service brake oil
-Battery voltage Hi/Low
-Engine air filter restriction
-Hydraulic oil filter restriction
-Hydraulic oil Low
-Parking brake
-DEF level
-Transmission filter bypass
MULTI-FUNCTION MONITOR :
- 18cm (7 in) color LCD touch-screen display
- Rear-view camera image display (reverse travel activated)
- Machine settings & health parameters
- Max rimpull adjustment
- Max travel speed adjustment
CAT CONNECT SOLUTIONS APPS (on-board, utilizing multi-function monitor)
Core App software to monitor & display:
- Total fuel consumption
- Average fuel burn rate
- Engine fuel consumption
- Total idle time
- Total operating hours
- Travel distance (odometer)

OPERATOR ENVIRONMENT (CONT.)

Basic App software to monitor & display:
- Total idle fuel
- Total operating hours, neutral
- Total operating hours with hydraulic filter in bypass

TIRES, RIMS, AND WHEELS

A tire must be selected from the mandatory attachments section.
Base machine price includes an allowance

FLUIDS

Extended life coolant with freeze protection to -34C (-29F)

OTHER STANDARD EQUIPMENT

Auto idle shutdown
Couplings, Caterpillar O-ring face seal
Ecology drains for engine, transmission, and hydraulics
Ether aid ready
Fenders, steel front with mud-flap/rear with extension
Filters: fuel, engine air, engine oil, hydraulic oil, transmission
Fuel cooler
Grease zerks
Grill, airborne debris
Hitch, drawbar with pin
Hood, non-metallic power tilting with rear clamshell
Hoses, Caterpillar XT
Hydraulic oil cooler (swing out)
Hydraulic System, load sensing
Kickout, lift & tilt, automatic (adjustable in cab)
Linkage, Z-Bar,cast crosstube/tilt lever
Oil sampling valves
Platform, window washing
Remote diagnostic pressure taps
Ride control, 2V
Service Center (electrical & hydraulic)
Sight gauges: engine coolant, hydraulic oil, and transmission oil level
Steering, load sensing
Toolbox
Vandalism protection caplocks

BOOMS, STICKS, AND LINKAGES (CONT.)

LINKAGES (Cont.)

L **386-0911** **LINKAGE, HIGH LIFT** 0 **$7,800**
FOR USE IN LANE 3 ONLY
Provides increased dump clearance of 22" (559mm) over standard lift arms. Reduces digging depth by 25 mm. Check specalog to ensure your configuration tires / buckets allow sufficient dig depth.

COUNTERWEIGHT

L **367-2333** **COUNTERWEIGHT, 2300KG** . . . . . 0 **NC**

L **372-2141** **COUNTERWEIGHT, AGGREGATE** 0 **$4,865**
Provide 2875 Kg counterweight to use exclusively in aggregate rehandling applications.
Require to conform to the CAT Wheel Loader Payload Policy.
ONLY FOR USE WITH: LINKAGE, STANDARD LIFT & STANDARD PACKAGE

NOTE: The Aggregate counterweight requires L3 and L4 tires and buckets with Bolt on cutting edge only.
It is recommended to use Caterpillar production measure application with aggregate counterweights to ensure compliance with Medium Wheel Loader Payload policy.

POWERTRAIN

AXLE PACKAGES

Axle packages include a combination of traction aids, ecology drain, seal guards, and axle oil cooler. .

NOTE: ED - Ecology Drains
SG - Seal Guards
AOC - Axle Oil Cooler
Provides installed oil cooler system for front & rear axles
Recommended for machines operating in high energy applications, such as extended load & carry.

MANUAL

L **390-7610** **AXLES, MANUAL DIFF FRONT, ED** 0 **$590**

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As consequence of possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4.
Tires are tubeless & non-directional unless otherwise stated.

For tire availability contact your Account Coordinator.
Other tires are available upon request.

NOTE: Reference the TRA Classification below when selecting tires to ensure the machine has the appropriate tire for the machines application.
L3 - Rock tread for construction, stock piling, and truck loading applications
L4 - Deep rock tread for load & carry applications with long cycles
L5 - Extra deep rock tread for face loading in mines & quarries and severe applications

TECHNOLOGY PRODUCTS

CAT CONNECT

Cat Connect makes smart use of technology allowing the operator and/or owner to monitor, control and manage equipment. Information is delivered on-board via an 18 cm (7in) color multi-function touch sceen display and wirelessly to the VisionLinkTM fleet management web portal (Cat Essentials Product Link subscription required).
The multi-function display as well as Core Performance monitoring are standard equipment.
Note: the image from the standard rear-view camera is also displayed on the multi-function monitor during reverse travel.

Optional apps are available to provide advanced capabilities delivered via software and when required, additional electronic components and sensors. The advanced app software is enabled by a Software Enabled Attachment (SEA). The SEA is either factory installed or can be purchased for dealer installation.

NOTE: Refer to Information Release Memo (IRM) EES03-01 (PELJ0138) in the Electronic Sales Library for further explanation of SEA's. For dealer installation, select the Product Support tab and search for media number PELJ0138. Refer to REHS1238 for how to obtain a Factory Level Password. Contact FPS: Internet with Corporate Web Security (CWS) (https://fps.cat.com/).

CAT PRODUCTION MEASUREMENT APP

NOTE:
- Allows on-the-go weighting of the bucket payload during the lift cycle with a nominal accuracy of + /-1%.
- Records date, time, weight, loading cycle count, up to 20 material IDs and up to 50 truck IDs for up to 1400 truck-loads.
- Daily payload, productivity (tonnes/hour or tons/hour) & efficiency (tonnes / liter or tons / gal) data is reported wirelessly via Product Link to the VisionLink fleet management web portal (Cat Essentials Product Link subscription required)
- Detailed payload, productivity and efficiency data can be downloaded to a laptop computer for analysis in the optional VIMSpc software (VIMSpc and VIMS data cable are required, but VIMS is NOT required).
- Payload tickets can be printed with an optional printer.

NOTE: This app requires calibration and set-up by either the dealer or customer. Refer to the Systems Operation Test & Adjust manual UENR 5827 for system calibration, material and truck ID lists set-up and operation instructions.

BUCKETS

MATERIAL HANDLING buckets incorporate flat floor design and are built for loose material re-handling, making these buckets well-suited for a variety of STOCKPILE LOADING applications.
These buckets provide maximum material retention and improved visibility to the load in bucket.
These buckets can be equipped with bolt-on adapters and segments, or bolt-on-cutting edges with corner guard for versatility and longer life. Buckets are standard equipped with a deflector to prevent possible spillage over the linkage.
Material Handling exist also in Heavy Duty structure and wear resistant configuration.
Material Handling exist also in Back Grading Edge configuration with flush mounted teeth.

GENERAL PURPOSE buckets incorporate wedge floor design and are built with a shell-tine construction to increase strength and rigidity, making these buckets excellent for EXCAVATION and BANK applications.
This structure efficiently transmits cutting edge loads back to the lift arms, shielding the bucket shell from distortion and keeping it up out of the dirt.
Designed to accept the standard Cat bolt-on edge with corner guard or tooth group with bolt-on segments. Buckets are standardly equipped with a deflector to prevent possible spillage over the linkage.

ADDITIONAL WORK TOOLS
Additional Fusion work tools are available for the 972M XE including forks and special application buckets such as Coal, Woodchip, Light Material, High Dump and Grapple.
Please refer to the WT-WL Price List (Work Tool Wheel Loaders) for any other loose work tool that you may want to order on a MISC (CMOPS) order. Please use the MISC work tool 0G-6870 number listed in the WT-WL Price List for any loose MISC order.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4. Tires are tubeless & non-directional unless otherwise stated.

NOTE: Other tires are available upon request.

SOFTWARE ENABLED ATTACHMENTS (SEA) INSTRUCTIONS

Technology apps are activated by Software Enabled Attachments (SEA). SEAs are available factory installed or can be purchased for dealer installation.

Refer to Information Release Memo (IRM) EES03 -01 (media number PELJ0138) in the Caterpillar Media Information Center for further explanation of SEAs. Select the Product Support tab and search for number PELJ0138. Refer to REHS1238 & REHS8401 for how to obtain a Factory Level Password. Contact FPS: Internet with Corporate Web Security (CWS) (https:// fps.cat.com/).

CAT PRODUCTION MEASUREMENT (CPM) PAYLOAD WEIGHING SYSTEM

Cat M-series Medium Wheel Loaders are available with the Cat Production Measurement (CPM) app that includes an integrated onboard payload weighing scale. This app measures and/or records:
-Payload weight, material ID, truck ID, cycle (bucket dumps) count and fuel consumption
-Allows on-the-go weighing of the bucket payload during the lift cycle
-Daily payload total (tonnes/tons), productivity (tonnes/hour or tons/hour) and efficiency (tonnes/liter or tons/gal) data is reported wirelessly via Product Link to the VisionLink fleet management web portal (Cat Essentials Product Link subscription required).
-Detailed payload, productivity and efficiency data can be downloaded to a laptop computer for analysis in the optional VIMSpc software (VIMSpc and VIMS data cable are required, but VIMS is NOT required).
-Payload tickets can be printed with an optional printer

Refer to the Cat Connect Payload Technologies intranet page (https://dealer.cat.com/payload) for complete technical specifications; operation, sales, marketing and technical support publications.

NOTES:
1) Permanent software is available from the factory below.
2) For field installation, permanent software can be purchased through the Caterpillar Feature Protection System and enabled by a dealer technician with Cat ET and an SEA password. SEA p/n 433-2014, currently $4,148 list price, subject to change. Consult ANTARES parts distribution system for latest SEA price.
3) Both demo and permanent software require calibration prior to customer use.

CALIBRATION INSTRUCTIONS
This app requires calibration and set-up by either the dealer or customer. Refer to the Systems Operation Test & Adjust manual UENR5827 for system calibration, material and truck ID lists set-up and operation instructions.

P	**453-3251**	**CPM PAYLOAD SOFTWARE** . . . . . 0 Includes permanent software for CPM. Software is factory enabled, but the system must be calibrated prior to customer use. See note above for calibration instructions. REQUIRES: 478-1334 STANDARD PACKAGE		**$4,425**

BUCKETS

Buckets must be ordered Installed on a Machine Order.
For questions on buckets intended for Machine Orders please contact your Marketing Subsidiary Machine Coordinator.

Loose buckets should be ordered on a MISC Order through Caterpillar Work Tools - Wamego using source code 0P-0672.

For availability of loose buckets please call (800) 255-2372.
If you are going to order a loose bucket from CWTS and a machine from Aurora and if you need them shipped at the same time then you need to cross-reference the MSO's with each other.

"GET" is NOT automatically included on bucket orders. "GET" must be entered on the order with your bucket selection, unless text for bucket states otherwise. Please make the "GET" selection from the "GET" listed immediately following the bucket listing.

Recommend use of bolt-on adapter option, adapter and segment option, or bolt-on cutting edge option for general purpose buckets and material handling buckets.

Material density will determine the appropriate capacity bucket.
Refer to the Specalog. Exceeding maxium payload may cause loader instability.

CAT PRODUCTION MEASUREMENT (CPM) PAYLOAD WEIGHING SYSTEM

Cat M-series Medium Wheel Loaders are available with the Cat Production Measurement (CPM) app that includes an integrated onboard payload weighing scale. This app measures and/or records:
-Payload weight, material ID, truck ID, cycle (bucket dumps) count and fuel consumption
-Allows on-the-go weighing of the bucket payload during the lift cycle
-Daily payload total (tonnes/tons), productivity (tonnes/hour or tons/hour) and efficiency (tonnes/liter or tons/gal) data is reported wirelessly via Product Link to the VisionLink fleet management web portal (Cat Essentials Product Link subscription required).
-Detailed payload, productivity and efficiency data can be downloaded to a laptop computer for analysis in the optional VIMSpc software (VIMSpc and VIMS data cable are required, but VIMS is NOT required).
-Payload tickets can be printed with an optional printer

Refer to the Cat Connect Payload Technologies intranet page (https://dealer.cat.com/payload) for complete technical specifications; operation, sales, marketing and technical support publications.

NOTES:
1) Permanent software is available from the factory below.
2) For field installation, permanent software can be purchased through the Caterpillar Feature Protection System and enabled by a dealer technician with Cat ET and an SEA password. SEA p/n 433-2014, currently $4,148 list price, subject to change. Consult ANTARES parts distribution system for latest SEA price.
3) Both demo and permanent software require calibration prior to customer use.

CALIBRATION INSTRUCTIONS

BUCKETS

Buckets must be ordered Installed on a Machine Order.
For questions on buckets intended for Machine Orders please contact your Marketing Subsidiary Machine Coordinator.

Loose buckets should be ordered on a MISC Order through Caterpillar Work Tools - Wamego using source code 0P-0672.

For availability of loose buckets please call (800) 255-2372.
If you are going to order a loose bucket from CWTS and a machine from Aurora and if you need them shipped at the same time then you need to cross-reference the MSO's with each other.

"GET" is NOT automatically included on bucket orders. "GET" must be entered on the order with your bucket selection, unless text for bucket states otherwise. Please make the "GET" selection from the "GET" listed immediately following the bucket listing.

Recommend use of bolt-on adapter option, adapter and segment option, or bolt-on cutting edge option for general purpose buckets and material handling buckets.

Material density will determine the appropriate capacity bucket. Refer to the Specalog. Exceeding maxium payload may cause loader instability.

MACHINE CONTROL AND GUIDANCE

AccuGrade GNSS Systems for the Caterpillar Compactor product family.

AccuGrade is a high technology earthmoving tool allowing operators to measure (in real-time) and document both soil compaction and fine grade accuracy without the use of traditional stakes or grade checkers. Using advanced GNSS technology, machine mounted components, and a GNSS base station; this state of the art system provides compaction information on an in-cab display. Operators improve their productivity by achieving the required compaction in fewer passes.

AccuGrade is designed for a wide range of earthmoving applications including highway construction and site development.

The Global Navigation Satellite System (GNSS) offers the ability to create complex 3-D designs. An Off-board local GNSS base station uses GNSS and Real Time Kinematic (RTK) technology to provide high accuracy in both the horizontal and vertical planes between the GNSS base station and the machines by transferring GNSS correction information over the entire work site (up to 10 km). Design plans are easily transferred to and from the machines via a PC compact flashcard.

This technology allows components to be easily added or removed. This "Plug and Play" capability allows the machine to be easily switched between technologies and for the components to be moved among AccuGrade Attachment Ready Option (ARO) equipped machines to suit the job requirements.

Standard Equipment:

MACHINE CONTROL AND GUIDANCE

AccuGrade Laser, GNSS, and UTS Control systems for the Caterpillar hydraulic excavator product family.

The AccuGrade Excavator System is a high technology earthmoving tool that allows increased accuracy without the use of traditional stakes or grade checkers.

AccuGrade HEX is an indicate only system consisting of both machine-mounted and off-board components. Together these components form a control system. Using Laser, GNSS or UTS technology, machine mounted components, and off-board systems, this state-of-the-art machine control system provides precise elevation information on an in-cab display to achieve accurate bucket tip postioning.

The AccuGrade Laser system offers simple set-up and operation. A tripod-mounted off-board laser transmitter emits a beam of laser light that rotates 360 degrees creating a grade reference over the work area. A digital laser receiver hard mounted on the excavator stick detects the laser beam and stores this elevation reference information. Integrated sensors on the front linkage calculate the kinematics and location of the bucket tip with respect to a bench mark and the laser reference and send real-time information to the operator. This information is displayed in the cab, indicating cut or fill requirements with respect to planar (flat, sloped, etc.) surfaces.

The AccuGrade GNSS system offers the ability to utilize guidance with respect to complex 3-D designs. An Off-board local GNSS base station uses GNSS RTK positioning data to provide high accuracy in both the horizontal and vertical planes between the GNSS base station and the machines by transferring GNSS correction information over the entire work site up to 10km / 6.2 miles.

AccuGrade UTS is another 3D earth moving system used to define positioning information on the excavator and is ideal for applications where line of site to the constellation of GNSS satellites is obstructed. The 3D position of the machine mounted prism is determined by using the Trimble UTS Construction Total Station. UTS uses active target technology to reliably lock onto and track the prism. UTS is perfect for dynamic applications as it features high update rates, low latency, distance measurement and synchronized angle capabilities. The 3D position of the target is combined with machine measurements and slope/angle sensor outputs to provide accurate bucket tip positions.

3D design plans are transferred to and from the machines via a PC compact flashcard or sent remotely via radio and the below mentioned wireless communication option key.

AccuGrade's immediate feedback eliminates overcutting or undercutting helping achieve complex design and precise slope and depth control in fewer cycles. The 3D system cut and fill values are computed by comparing the position of the bucket tip or cutting edge with the preloaded project design.

MACHINE CONTROL AND GUIDANCE

LASER TRANSMITTER and TRIPOD

To use and calibrate the AccuGrade laser grade control systems, an off-board laser transmitter and tripod are required. The tripod should be adjustable and capable of elevating the laser transmitter above the cab(s) of the AccuGrade equipped machines. The laser transmitter that must operate at a minimum of 600 RPM, is capable of working with multiple AccuGrade equipped machines at the same site.

Caterpillar recommends using one each of the following items that are available through your local SITECH/Trimble dealer.

GL722 Transmitter, case, and accessories
Tripod Leg Set
Elevating Base
Base Adapter

GNSS BASE STATION and OFF-BOARD RADIO

A Caterpillar AccuGrade GNSS system requires and is designed to work specifically with a Trimble "off-board" radio network and base station matching the frequency of the Caterpillar on-board radio(s). Use of the Trimble SPS850/851 Extreme GNSS Base Station is recommended.

UTS TOTAL STATION for MT900 TARGET ASSEMBLY

The MT900C requires a Trimble Universal Total Station. Caterpillar recommends using the following items that are available through your local SITECH/Trimble dealer.

Trimble SPS930 Universal Total Station
ACU with SCS900
Power Supply (Battery/AC)

NOTE: The MT900 cannot use 450 or 900 MHZ radios

Standard Equipment:

MACHINE CONTROL AND GUIDANCE

AccuGrade Cross slope, Sonic, Laser, GNSS, and UTS Control Systems for Caterpillar Motor Grader product family.

AccuGrade is a high technology tool that allows operators to fine grade with increased accuracy without the use of stakes or grade checkers. Using advanced Laser, GNSS, UTS, or ATS technology, AccuGrade provides precise elevation information on an in-cab display to archieve accurage blade postioning. By automatically controlling the lift and tilt of the blade, operators improve efficiency and get to grade faster and in fewer passes.

AccuGrade is designed for a wide range of applications requiring tight tolerances and high production rates. The Laser system is ideal for fine grading of roads requiring a precise crown as well as sites with flat, single, or dual slope surfaces, such as industrial, commercial, and residential applications while the GNSS, UTS, and systems are ideal for complex 3-D designs such as superelevated roadways.

The Cross Slope system allows the operator to manually control one end of the blade to match the curb or crown while automaticallyally maintaining the desired slope of the blade. This system is used to maintain the crown of a gravel road or the shoulder of a road.

The Sonic system uses a blade mounted ultrasonic sensor to follow an exiting surface, typically either a stringline or an existing curb. The blade elevation is controlled by the sonic sensor, while the cross slope maintains the desired crown of the road. This system is useful useful for new road constuction or road rehabilitation.

The Laser system offers simple set-up and operation. A tripod-mounted off-board laser transmitter emits a beam of laser light that rotates 360 degrees creating a grade reference over the work area. A digital laser receiver mounted on a telescopic mast above the machine's cutting edge detects the laser beam. With the cutting edge placed at the finish elevation, the electric mast automatically positions the laser receiver within 1.5 mm of the center of the laser beam. As the blade moves above or below finish grade elevation, correction information is sent to the in-cab display that shows the blade's position relative to grade and indicates cut or fill requirements.

The Global Navigation Satellite System (GNSS) offers the ability to create complex 3-D designs. An Off-board local GNSS base station uses GNSS and Real Time Kinematic (RTK) technology to provide high accuracy in both the horizontal and vertical planes between the GNSS base station and the machines by transferring GNSS correction information over the entire work site (up to 10 km). Design plans are easily transferred to and from the machines via a PC compact flashcard.

UTS is a precise 3D earth moving system ideal for producing fine or finished grade surfaces. The 3D position of the machine mounted prism is determined by using the Trimble UTS Construction Total Station. UTS uses active target technology to reliably lock onto and track the prism. UTS is perfect for dynamic applications as it features high update rates, low latency, distance measurement and synchronized angle capabilities. The 3D position of the target is combined with machine measurements and cross slope component outputs to provide accurate blade tip positions. The cut and fill values are computed by comparing the position of the blade against the preloaded design.

LASER TRANSMITTER and TRIPOD

To use and calibrate the AccuGrade laser grade control systems, an off-board laser transmitter and tripod are required. The tripod should be adjustable and capable of elevating the laser transmitter above the cab(s) of the AccuGrade equipped machines. The laser transmitter that must operate at a minimum of 600 RPM, is capable of working with multiple AccuGrade equipped machines at the same site.

Caterpillar recommends using one each of the following items that are available through your local SITECH/Trimble dealer.

GNSS BASE STATION and OFF-BOARD RADIO

A Caterpillar AccuGrade GNSS system requires and is designed to work specifically with a Trimble "off-board" radio network and base station matching the frequency of the Caterpillar on-board radio(s). Use of the Trimble SPS850/851 Extreme GNSS Base Station is recommended.

UTS TOTAL STATION for MT900 TARGET ASSEMBLY

The MT900C requires a Trimble Universal Total Station. Caterpillar recommends using the following items that are available through your local SITECH/Trimble dealer.

Trimble SPS930 Universal Total Station
ACU with SCS900
Power Supply (Battery/AC)

NOTE: The MT900 cannot use 450 or 900 MHZ radios

AccuGrade SOFTWARE ENABLED ATTACHMENT (SEA)

Consult machine sales model price pages to determine if the AccuGrade SEA is required. The AccuGrade SEA provides access to the Machine's Automatic Electro Hydraulic (EH) Control System. The SEA is Dealer installed only. Connection to the machine through the Caterpillar Electronic Technician (Dealer Version) is required.

NOTE: H and K series Motor Graders do not require an SEA.

NOTE: Refer to Information Release Memo (IRM) EES03-01 (PELJ0138) in the Electronic Sales Library for further explanation of SEAs. Select the Product Support tab and search for media number PELJ0138. Refer to REHS1238 for how to obtain a Factory Level Password. Contact FPS: Internet with Corporate Web Security (CWS) (https://fps.cat.com/).

SEAs cannot be ordered in either CMOPS or ANTARES. They can only be ordered using the Factory Password System (see instructions above).

AccuGrade Office imports 3D design data, converts data for use on AccuGrade GNSS/UTS equipped machines, validates the data and exports data to AccuGrade equipped machines either directly or via email using PC compact flashcards that are inserted into the AccuGrade display.

Creates new level and sloping surface designs as well as simple road designs.

Organizes design surfaces, linework, site maps, avoidance zones, display and machine configuration data files.

Includes a 3D terrain simulator and a display emulator to review designs prior to exporting the data to the machines.

The Wireless option allows:
- wireless data transfer to and from machines
- retrieval of display screen snapshots and diagnostic reports
- sending of text messages to AccuGrade GNSS/UTS equipped machines using Easy IP wireless site infrastructure

The Production software module provides productivity information for machines equipped with Caterpillar's CD700 Version 11.0 Display. Features include:
-Calculate and summarize earthwork volumes
-Displays an "as-built" cut and fill site map
-Ability to export earthwork data to spreadsheets and other formats for further analysis (.xls, .csv, .html, and .txt files
-Wide specific country coordinate system support

The Compaction option permits viewing of machine compaction data including:
- compaction value measurements
- number of compactor passes
- compaction data detail for each cell
- filter compaction detail by compactor and date

WIRELESS EASY IP SITE INFRASTRUCTURE (order from Trimble Dealer)

AccuGrade Office Wireless Option requires a Wireless Easy IP Site Infrastructure. This equipment must be ordered from the Trimble dealer. The off-board radios should match the frequencies of the Caterpillar on-board radio kit. Wireless Option CANNOT USE 450 MHZ On-Board radios. A Caterpillar supplied On-board radio kit is also required. A selection of on-board radio kits is listed in the radio section of the ACCUTTT1, ACCUMG1, ACCUCOM, ACCUWTS, and ACCUHEX price lists.

Caterpillar recommends consulting your local Trimble dealer to determine the site infrastructure requirements for the wireless option. The site infrastructure requirements may vary based on desired configuration.

Standard Equipment:

MACHINE CONTROL AND GUIDANCE

AccuGrade Laser Grade Control System for the Caterpillar C-Series family of Skid-Steer, Multi-Terrain, and Compact Track Loaders.

The AccuGrade SSL System is a grade control system that regulates the Auxiliary Hydraulic of the machine. Designed to be used with the Level Best Para-Level laser grading box blade, AccuGrade SSL allows increased accuracy and productivity without the use of stakes or grade checkers.

AccuGrade SSL is a fully automated, single-laser control system consisting of a state-of-the-art laser-guided elevation sensor that provides precise elevation information to the machine's ECM to achieve accurate real-time blade positioning. The in-cab AMICS display shows vital system information to the operator and allows the operator to configure the system.

The AccuGrade SSL system offers simple set-up and operation. An off-board, tripod-mounted laser transmitter emits a beam of laser light that rotates 360 degrees creating a grade reference over the work area. The laser receiver mounted on the mast of the box blade detects the laser beam and stores this elevation reference information. This information is displayed in the cab, indicating cut or fill requirements with respect to planar (flat, sloped, etc.) surfaces. In automatic control mode, the system automatically positions the box blade to achieve the desired grade.

AccuGrade's immediate feedback eliminates overcutting or undercutting helping achieve complex design and precise slope and depth control in fewer cycles.

Standard Equipment:

MACHINE CONTROL AND GUIDANCE

AccuGrade Laser, GNSS, and UTS for the Track Type Tractor product family.

AccuGrade is a high technology tool that allows operators to fine grade with increased accuracy without using stakes or grade checkers. Using advanced Laser, GNSS, or UTS technology, AccuGrade provides precise elevation information on an in-cab display to achieve accurate blade postioning. By automatically controlling the lift and tilt of the blade, operators improve efficiency and get to grade faster and in fewer passes.

AccuGrade is designed for a wide range of applications requiring tight tolerances and high production rates. The Laser system is ideal for fine grading sites with flat, single, or dual slope surfaces such as industrial, commercial, and residential applications while the GNSS and UTS systems are ideal for complex 3-D designs such as superelevated roadways.

The Laser system offers simple set-up and operation. A tripod-mounted off-board laser transmitter emits a beam of laser light that rotates 360 degrees creating a grade reference over the work area. A digital laser receiver mounted on a telescopic mast above the machine's cutting edge detects the laser beam. With the cutting edge placed at the finish elevation, the electric mast automatically positions the laser receiver within 1.5 mm of the center of the laser beam. As the blade moves above or below finish grade elevation, correction information is sent to the in-cab display that shows the blade's position relative to grade and indicates cut or fill requirements.

The Global Navigation Satellite System (GNSS) offers the ability to create complex 3-D designs. An Off-board local GNSS base station uses GNSS and Real Time kinematic (RTK) technology to provide high accuracy in both the horizontal and vertical planes between the GNSS base station and the machines by transferring GNSS correction information over the entire work site (up to 10 km). Design plans are transferred to and from the machines via a PC compact flashcard.

UTS is a precise 3D earth moving system ideal for producing fine or finished grade surfaces. The 3D position of the machine mounted prism is determined by using the Trimble UTS Construction Total Station. UTS uses active target technology to reliably lock onto and track the prism. UTS is perfect for dynamic applications as it features high update rates, low latency, distance measurement and synchronized angle capabilities. The 3D position of the target is combined with machine measurements and cross slope component outputs to provide accurate blade tip positions. The cut and fill values are computed by comparing the position of the blade against the preloaded design.

AccuGrade's automatic blade control feature can precisely control the lift and/or tilt of the cutting edge. Based on correction signals, a dual hydraulic control valve automatically raises or lowers the blade to maintain its elevation for precise grade control and optimum productivity.

A machine mounted Controller Area Network (CAN) provides the communication network for all components which allows them to be easily added or removed depending on the application. This "Plug and Play" capability allows the machine to be easily switched between technologies and/or for the components to be switched between AccuGrade Ready Option (ARO) equipped machines to suit the job requirements.

POWER MODULE

The power control group is required for machines that will utilize LASER or UTS systems. For scalability, Caterpillar recommends the addition of the power control group on tractors where the power module is not included in the AccuGrade ARO. Dealers should order the following items as needed. Order the PM400 power module and wiring harnesses as indicated below for your particular machine model.

The power module and harnesses are already included in the factory ARO and dealer installed ARO kits on the following models: D3K/K2, D4K/K2, D5K/K2, D6K, D6N (Tier 3), and D7E (Tier 4).

AccuGrade SOFTWARE ENABLED ATTACHMENT (SEA)

Consult machine sales model price pages to determine if the AccuGrade SEA is required. The AccuGrade SEA provides access to the machine's automatic Electro Hydraulic (EH) Control System. The SEA is dealer installed only. Connection to the machine through the Caterpillar Electronic Technician (Dealer Version) is required. Once connected, select the configuration screen and AccuGrade SEA parameter. Set the parameter to "Enabled" and record the screen information. The dealer will log onto the Caterpillar Factory Password (FPS) or call phone support to obtain the Factory Level Password. Enter the ET configuration information into FPS and record the password. Reconnect to ET and enter the password into the configuration screen.

NOTE: Refer to Information Release Memo (IRM) EES03-01 (PELJ0138) in the Electronic Sales Library for further explanation of SEA's. Select the Product Support tab and search for media number PELJ0138. Refer to REHS1238 for how to obtain a Factory Level Password. Contact FPS: Internet with Corporate Web Security (CWS) (https://fps.cat.com/).

SEA's cannot be ordered in either CMOPS or ANTARES. They can only be ordered using the Factory Password System (see instructions above).

MACHINE CONTROL AND GUIDANCE

AccuGrade GNSS Control System for the Caterpillar Wheel Tractor Scraper product family.

AccuGrade is a high technology tool that allows operators to increase accuracy without the use of stakes or grade checkers. Using advanced GNSS technology, AccuGrade provides precise elevation information on an in-cab display.

The Global Navigation Satellite System (GNSS) offers the ability to create complex 3-D designs. An Off-board local GNSS base station uses GNSS and Real Time Kinematic (RTK) technology to provide high accuracy in both the horizontal and vertical planes between the GNSS base station and the machines by transferring GNSS correction information over the entire work site (up to 10 km). Design plans are transferred to and from the machines via a PC compact flashcard.

Glossary of Acronyms

```
ARO  = Attachment Ready Option
GNSS = Global Navigation Satellite System (GPS + GLONASS)
GPS  = Global Positioning System
WTS  = Wheel Tractor Scraper
```

EAME ORDERS MUST BE MADE THROUGH ANTARES and NOT CMOPS

EAME ORDERS ENTERED THROUGH CMOPS WILL NOT BE PROCESSED.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

If no reference number is listed, a Lane 1 Distribution Center Arrangement is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory: they are only valid to order machines from a Product Distribution Center (PDC).

LANE 2/LANE 3 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2/Lane 3 Configuration is not available.

For paving 10' to 14' wide. Includes a LH & RH 6" auger extension.
For paving up to 3.66 m wide. Includes a pair of 152 mm auger extensions.
FOR USE WITH: ALL SCREEDS AND ALSO FOR TRACTORS ORDERED WITHOUT A SCREED TO MEET MINIMUM PAVING REQUIREMENT FOR MOST APPLICATIONS.

P **243-0329** **AUGER 18" EXTENSION PER SIDE** . . . . . 474 **$2,215 NI**
FOR USE WITH LANE 3 ONLY
Recommended if paving 14' TO 19'6" wide.
Includes a pair of 6" and a pair of 1' auger extensions.
Recommended if paving 3.66 to 4.27 m wide. Includes a pair 152 mm and a pair of 305 mm auger extensions.
RECOMMENDED FOR USE WITH: REAR MOUNT SCREEDS w/o Wide Width Paving packages.

P **241-9103** **KIT, AUGER AND MAINFRAME EXT** . . . . . 1,025 **$4,835 NI**
FOR USE WITH LANE 3 ONLY
Recommended if paving 14' to 18' wide. Includes a pair of 6" auger extensions, two pairs (4) of 1' auger extensions and a pair of foldable, hinged 2' mainframe extensions to facilitate frequent screed width changes.
Recommended if paving 4.27 to 5.0 m wide. Includes a pair of 152 mm auger extensions, two pair (4) of 305 mm auger extensions and a pair of foldable, hinged 610 mm mainframe extensions to facilitate frequent screed width changes.
RECOMMENDED FOR USE WITH: WEILER S2302 w/o Wide Width Paving packages.

LEVELING DEVICES - LANE 3 ONLY

Reference 'Optional Equipment for Asphalt Paving' QEDQ1244 for images and more details.

Each of the eight mobile grade reference divices listed below must be used in conjunction with a Grade & Slope control system.

P **332-9203** **BEAM, SONIC AVERAGING, CAT G&S** ..... 400 **$16,350 NI**

FOR USE WITH LANE 3 ONLY
Non-contacting beam utilizing three sonic tracers for enhanced averaging capability. System smoothes out any unevenness of the reference surface by calculating an average value over the entire length of the beam. 8.5 m (30 ft) total beam length of four sections with both ends that fold for adjustability and ease of transport. Includes: two sonic tracers (assumes customer already has one or if not an additional sonic tracer must be selected), wiring harness, two support arms, two tow arm support brackets, mounting hardware.
REQUIRES: CONTROL, BASE CAT G&S SYSTEM
(1) SENSOR, GRADE, SONIC

P **257-6255** **BEAM, SONIC AVERAGING** ..... 2,502 **$21,820 NI**

FOR USE WITH LANE 3 ONLY
Includes one 24' long sonic averaging beam, three TOPCON sonic grade sensors with temperature bails, one storage case, wire harness kit and mounting hardware. The beam consists of 4 individual beams linked together which mounts to paver tow arm. Sonic trackers get attached to each sub-beam. This non-contacting device can be used inboard or outboard. Easy to transport with paver. Ideal for large parking lots and city streets.
NOTE: Must have the following items for this to function properly. CONTROL, TOPCON and one CONTROL, TSD SONIC TYPE

P **109-5623** **LEVELER, 30' OUTBOARD** ..... 2,190 **$7,680 NI**

FOR USE WITH LANE 3 ONLY
30' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that runs along the outside of the tractor and the screed. Utilizes a combination of beams and shoes that pivot on pins to provide the optimum reference for grade controls. Two sub-beams with two shoes each attach to both the front and rear of the main beam. A string line runs along the top of the beam from front to rear. The whole unit is to be positioned mid way along the paver and the grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. The leveler gets pulled by the paver and increases the sensing length. It averages the high and low points in the reference surface to maximize the self-leveling characteristics of the paver. Includes mounting hardware. Best for smoothness and rideability. Good for joint matching.
Primarily for highways and paving jobs with long pulls due to difficulty in maneuvering.

LEVELING DEVICES - LANE 3 ONLY (Cont.)

P **109-5622** **LEVELER, 40' OUTBOARD** ..... 2,280 **$7,890 NI**

FOR USE WITH LANE 3 ONLY
SAME AS LEVELER, 30' OUTBOARD above except for 40' long multi-pad aluminum beam. Capable of producing an even flatter and more level surface than the 30' leveler but is not as transportable.

P **109-5624** **LEVELER, INBOARD** ..... 1,700 **$6,060 NI**

FOR USE WITH LANE 3 ONLY
12' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that mounts ahead and inboard of the screed. Two sub-beams with two shoes each that pivot on pins attach to the main beam. This leveler gets pulled by the paver. A traveling string line is attached to the screed and the main beam of the inboard leveler. A grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. During paving the front leveler will average out the reference surface undulations and the string line, attached to the screed, will react if the pre-set mat thickness drifts up or down. Includes mounting hardware.
Good for highway, city and state road applications. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

P **109-5625** **LEVELER, FORE'N AFT** ..... 420 **$7,540 NI**

FOR USE WITH LANE 3 ONLY
SAME AS LEVELER, INBOARD above except that a towed shoe attaches to the screed and rides on the mat. This shoe pivots and is allowed to float on top of the finished mat. A string line gets stretched between the front inboard and aft leveler. A grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. During paving the front leveler will average out the high and low points of the reference surface while the aft leveler responds to height changes in the mat behind the screed. Includes mounting hardware.
Best for highways and paving jobs with long pulls. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

P **109-5626** **REFERENCE, MOBILE STRINGLINE** ..... 500 **$6,150 NI**

FOR USE WITH LANE 3 ONLY
A two section arrangement of beams and shoes that mount outboard of the tractor and screed. An 8' front section with two shoes that pivot on pins gets attached to the front push beam and is towed by the paver. A 4' rear section with two shoes that pivot on pins attaches to the screed end gate. The arrangement is semi-independent from the paver. A string line is stretched between the beams and the grade sensor (not provided) mounts to the tow arm and senses off the midpoint of the string which provides an average of the reference surface and the mat thickness. Includes mounting hardware.
Good for highway applications and ideal for areas w/o shoulders such as county roads. Provides good accuracy and rideability. Not as effective as an outboard leveler.

LEVELING DEVICES - LANE 3 ONLY (Cont.)

P **109-5628** **SKI, RIGID REFERENCE 30'** . . . . . 661 **$3,675 NI**

FOR USE WITH LANE 3 ONLY

A 30' triangular truss rigid ski that runs directly outside of the tractor and the screed riding on the reference surface. It is towed by the paver and gets positioned midway on the paver by attaching to the front of the tractor at the push beam area and has a guide attachment on the screed that allows the ski to move vertically independent of the paver. The purpose of the rigid ski is to measure only the high spots in the reference surface and bridges the low spots that fall within the length of the ski. The resulting mat thickness is the thickness on top of the high spots. A grade sensor (not provided) can reference directly off ski or a string line mounted to the ski. Includes mounting hardware.

Provides least amount of averaging compared to other grade references. Good for joint matching in highway applications. Not intended for use where optimal mat smoothness is desired or where rideability is specified.

P **109-5627** **SKI, RIGID REFERENCE 40'** . . . . . 882 **$4,160 NI**

FOR USE WITH LANE 3 ONLY

SAME AS SKI, RIGID REFERENCE 30' above except for 40' triangular truss rigid ski. Capable of producing an even flatter and more level surface than the 30' rigid ski but is not as transportable.

LEVELING DEVICES

P **109-5623** **LEVELER, 30' OUTBOARD** ..... 2,190 **$7,680 NI**

FOR USE WITH LANE 3 ONLY
30' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that runs along the outside of the tractor and the screed. Utilizes a combination of beams and shoes that pivot on pins to provide the optimum reference for grade controls. Two sub-beams with two shoes each attach to both the front and rear of the main beam. A string line runs along the top of the beam from front to rear. The whole unit is to be positioned mid way along the paver and the grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. The leveler gets pulled by the paver and increases the sensing length. It averages the high and low points in the reference surface to maximize the self-leveling characteristics of the paver. Includes mounting hardware. Best for smoothness and rideability. Good for joint matching.
Primarily for highways and paving jobs with long pulls due to difficulty in maneuvering.

P **109-5625** **LEVELER, FORE'N AFT** ..... 420 **$7,540 NI**

FOR USE WITH LANE 3 ONLY
12' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that mounts ahead and inboard of the screed. Two sub-beams with two shoes each that pivot on pins attach to the main beam. This leveler gets pulled by the paver. An additional towed shoe attaches to the screed and rides on the mat. A string line gets stretched between the front inboard and aft leveler. A grade sensor (not provided) mounts on the tow arm and senses the string midpoint. During paving the front leveler will average out the high and low points of the reference surface while the aft leveler responds to height changes in the mat behind the screed. Includes mounting hardware. Best for highways and paving jobs with long pulls. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

LEVELING DEVICES

P **109-5623** **LEVELER, 30' OUTBOARD** ..... 2,190 **$7,680 NI**

FOR USE WITH LANE 3 ONLY
30' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that runs along the outside of the tractor and the screed. Utilizes a combination of beams and shoes that pivot on pins to provide the optimum reference for grade controls. Two sub-beams with two shoes each attach to both the front and rear of the main beam. A string line runs along the top of the beam from front to rear. The whole unit is to be positioned mid way along the paver and the grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. The leveler gets pulled by the paver and increases the sensing length. It averages the high and low points in the reference surface to maximize the self-leveling characteristics of the paver. Includes mounting hardware. Best for smoothness and rideability. Good for joint matching.
Primarily for highways and paving jobs with long pulls due to difficulty in maneuvering.

LEVELING DEVICES (Cont.)

P **109-5625** **LEVELER, FORE'N AFT** .....420 **$7,540 NI**

FOR USE WITH LANE 3 ONLY
12' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that mounts ahead and inboard of the screed. Two sub-beams with two shoes each that pivot on pins attach to the main beam. This leveler gets pulled by the paver. An additional towed shoe attaches to the screed and rides on the mat. A string line gets stretched between the front inboard and aft leveler. A grade sensor (not provided) mounts on the tow arm and senses the string midpoint. During paving the front leveler will average out the high and low points of the reference surface while the aft leveler responds to height changes in the mat behind the screed. Includes mounting hardware. Best for highways and paving jobs with long pulls. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

HOPPER APRON CONTROL & FLASHING PACKAGES

L **354-8220** **APRON, MANUAL FOLD** . . . . . 0 **NC**
FOR USE WITH LANE 3 ONLY
INCLUDES:
- MANUAL FOLDING HOPPER APRON
Manual raise hopper apron for easy material clean-out.
- HOPPER FLASHING
Heavy-duty black Tivar flashing to reduce material spillage from front of hopper.

L **354-8206** **APRON, HYDRAULIC FOLD** 430 **$6,090**
FOR USE WITH LANE 3 ONLY
INCLUDES:
- HYDRAULIC FOLDING HOPPER APRON
Hydraulically actuated hopper apron with bolt-in 'wings' helps contain material after truck dump and while raising hoppers.
- HOPPER FLASHING
Heavy-duty black Tivar flashing to reduce material spillage from front of hopper.

WASH DOWN SYSTEM PACKAGES

L **354-8229** **DIESEL PUMP + SPRAYWAND** 60 **$1,145**
FOR USE WITH LANE 3 ONLY
INCLUDES:
- DIESEL PUMP
Provides diesel fuel supply for pressurized washdown system, taken directly from paver fuel tank.
- SPRAY WAND
Includes 9 m (30 ft) hose, spray wand and quick-connect coupling.

L **354-8230** **DIESEL PUMP + HOSE REEL** 73 **$2,440**
FOR USE WITH LANE 3 ONLY
INCLUDES:
- DIESEL PUMP
Provides diesel fuel supply for pressurized washdown systems, taken directly from paver fuel tank.
- HOSE REEL WITH WAND
Includes 9 m (30 ft) hose on self-storing reel with spray wand mounted to handrail at rear of tractor.

L **354-8208** **ECO TANK + SPRAY WAND** 224 **$2,745**
FOR USE WITH LANE 3 ONLY
INCLUDES:
- ECOLOGICAL WASHDOWN TANK
30 L (8 gal) tank with integral pump mounted below deck on RH side. Intended for use with ecological cleaning fluids.
- SPRAY WAND
Includes 9 m (30 ft) hose, spray wand and quick-connect coupling.

L **354-8209** **ECO TANK + HOSE REEL** 237 **$4,045**
FOR USE WITH LANE 3 ONLY
INCLUDES:
- ECOLOGICAL WASHDOWN TANK
30 L (8 gal) tank with integral pump mounted below deck on RH side. Intended for use with ecological cleaning fluids.
- HOSE REEL WITH WAND
Includes 9 m (30 ft) hose on self-storing reel with spray wand mounted to handrail at rear of tractor.

SCREED INTERFACE PACKAGES

L **354-8231** **VIBE ADAPTER + WIRING-V** 32 **$1,950**
FOR USE WITH LANE 3 ONLY
INCLUDES:
- VIBRATORY SCREED HYD ADAPTER
Provides hydraulics for vibe-only screeds. No provision for tamper system.
- ELECTRIC SCREED HEAT WIRING
Provides 240V wiring from generator to rear of tractor.
REQUIRES: AS3251C SCREED, also works with Weiler S2252

L **354-8232** **TAMP/VIBE ADAPTER + WIRING-V** 97 **$3,905**
FOR USE WITH LANE 3 ONLY
INCLUDES:
- TAMPING/VIBRATORY SCREED HYD ADAPTER
Provides hydraulics for vibe system plus pump, valve and hoses for tamper system.
- ELECTRIC SCREED HEAT WIRING
Provides 240V wiring from generator to rear of tractor.
REQUIRES: AS3251C SCREED, also works with Weiler S2252
NOTE: Serves as a hyd prep group for future AS4252C installation.

L **354-8233** **TAMP/VIBE ADAPTER + WIRING-TV** 97 **$3,955**
FOR USE WITH LANE 3 ONLY
INCLUDES:
- TAMPING/VIBRATORY SCREED HYD ADAPTER
Provides hydraulics for vibe system plus pump, valve and hoses for tamper system.
-ELECTRIC SCREED HEAT WIRING
Provides 240V wiring from generator to rear of tractor.
REQUIRES: AS4252C SCREED

TRUCK INTERFACE

L **275-2449** **PUSH ROLLER, OSCILLATING** ..... 1,400 — **$4,445**
0 — **$4,445 NI**
FOR USE WITH LANE 3 ONLY
Oscillating, ballasted push roller on a fore-aft adjustable pivot for centering truck and to assist steering during unloading.
Includes scrapers to minimize material accumulation.
CANNOT BE USED WITH: HITCH, HYDRAULIC TRUCK

L **343-3001** **HITCH, HYD PREP, TRACTOR** ..... 30 — **$2,640**
0 — **$2,640 NI**
FOR USE WITH LANE 3 ONLY
Includes hydraulic valve and hoses to accept truck hitch.
Recommended if future field installed truck hitch is likely.
FOR USE WITH: PUSH ROLLER, OSCILLATING
HITCH, HYDRAULIC TRUCK

L **301-1468** **HITCH, HYDRAULIC TRUCK** ..... 1,630 — **$15,780**
0 — **$15,780 NI**
FOR USE WITH LANE 3 ONLY
Truck hitch (clamp arms with rollers) to hold truck to paver when unloading. Actuated from operator's console.
Includes scrapers to minimize material accumulation.
REQUIRES: HITCH, HYD PREP, TRACTOR

FEEDER CONTROL SENSORS

P **198-8279** **CONTROL, FEEDER, PADDLE** ..... 44 — **$2,170 NI**
FOR USE WITH LANE 3 ONLY
Two, proportional, contacting paddle sensors that automatically actuate the feeders to maintain a preset amount of material ahead of the screed. Located at end of augers.

P **294-0112** **SENSOR, FEEDER, SONIC** ..... 20 — **$3,725 NI**
FOR USE WITH LANE 3 ONLY
Two, proportional, non-contacting sonic sensors that automatically actuate the feeders to maintain a preset amount of material ahead of the screed. Located at end of augers.
REQUIRES: AS3251C SCREED, also compatible with Weiler S2252

P **301-0071** **SENSOR, FEEDER, SONIC** ..... 0 — **$3,655 NI**

REQUIRES: AS4252C SCREED

AUGER EXTENSIONS

P **231-3532** **EXTENSION, 6" AUGER, PAIR** . . . . . 0 **$915 NI**
FOR USE WITH LANE 3 ONLY
For paving up to 3.66 m (12 ft) wide.
Includes a LH & RH 152 mm (6 in) auger.
FOR USE WITH: ALL SCREEDS AND ALSO FOR TRACTORS ORDERED WITHOUT A SCREED TO MEET MINIMUM PAVING REQUIREMENT FOR MOST APPLICATIONS.

P **243-0329** **AUGER 18" EXTENSION PER SIDE** . . . . . 474 **$2,215 NI**
FOR USE WITH LANE 3 ONLY
Recommended if paving 3.66 m (12 ft) to 5.0 m (16 ft) wide.
Includes a pair of 152 mm (6 in) augers and a pair of 305 mm (1') augers.
RECOMMENDED FOR USE WITH: ALL SCREEDS w/o Wide Width Paving packages.

COMMISSIONING SUPPORT

NOTE: It is recommended that startup and commissioning of machines be included as part of the machines sale. The net charge covers a four day commissioning event. Trained personnel cover proper machine setup, basic maintenance, operation and application on a customer's jobsite. To request and schedule a machine commissioning event, dealers will need to contact the Caterpillar Paving Technical Training group by filling out the online request form.

LEVELING DEVICES

NOTE: Reference 'Optional Equipment for Asphalt Paving' QEDQ1244 for images and more details.

Each of the following mobile grade reference devices listed below must be used in conjuction with a Grade & Slope control system.

P **332-9203** **BEAM, SONIC AVERAGING, CAT G&S** ..... 400 **$16,350 NI**
FOR USE WITH LANE 3 ONLY
Non-contacting beam utilizing three sonic tracers for enhanced averaging capability. System smoothes out any unevenness of the reference surface by calculating an average value over the entire length of the beam. 9.1 m (30 ft) total beam length of four sections with both ends that fold for adjustability and ease of transport. Includes: two sonic tracers (assumes customer already has one or if not an additional sonic tracer must be selected), wiring harness, two support arms, two tow arm support brackets, mounting hardware.
REQUIRES: CONTROL, BASE CAT G&S SYSTEM

LEVELING DEVICES (Cont.)

P **257-6255** **BEAM, SONIC AVERAGING** ..... 2,502 **$21,820 NI**

FOR USE WITH LANE 3 ONLY
Includes one 24' long sonic averaging beam, three TOPCON sonic grade sensors with temperature bails, one storage case, wire harness kit and mounting hardware. The beam consists of 4 individual beams linked together which mounts to paver tow arm. Sonic trackers get attached to each sub-beam. This non-contacting device can be used inboard or outboard. Easy to transport with paver. Ideal for large parking lots and city streets.
NOTE: Must have the following items for this to function properly. CONTROL, TOPCON and one CONTROL, TSD SONIC TYPE

P **109-5623** **LEVELER, 30' OUTBOARD** ..... 2,190 **$7,680 NI**

FOR USE WITH LANE 3 ONLY
30' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that runs along the outside of the tractor and the screed. Utilizes a combination of beams and shoes that pivot on pins to provide the optimum reference for grade controls. Two sub-beams with two shoes each attach to both the front and rear of the main beam. A string line runs along the top of the beam from front to rear. The whole unit is to be positioned mid way along the paver and the grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. The leveler gets pulled by the paver and increases the sensing length. It averages the high and low points in the reference surface to maximize the self-leveling characteristics of the paver. Includes mounting hardware. Best for smoothness and rideability. Good for joint matching.
Primarily for highways and paving jobs with long pulls due to difficulty in maneuvering.

P **109-5622** **LEVELER, 40' OUTBOARD** ..... 2,280 **$7,890 NI**

FOR USE WITH LANE 3 ONLY
SAME AS LEVELER, 30' OUTBOARD above except for 40' long multi-pad aluminum beam. Capable of producing an even flatter and more level surface than the 30' leveler but is not as transportable.

P **109-5624** **LEVELER, INBOARD** ..... 1,700 **$6,060 NI**

FOR USE WITH LANE 3 ONLY
12' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that mounts ahead and inboard of the screed. Two sub-beams with two shoes each that pivot on pins attach to the main beam. This leveler gets pulled by the paver. A traveling string line is attached to the screed and the main beam of the inboard leveler. A grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. During paving the front leveler will average out the reference surface undulations and the string line, attached to the screed, will react if the pre-set mat thickness drifts up or down. Includes mounting hardware.
Good for highway, city and state road applications. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

LEVELING DEVICES (Cont.)

P **109-5625** **LEVELER, FORE'N AFT** . . . . . 420 **$7,540 NI**

FOR USE WITH LANE 3 ONLY
SAME AS LEVELER, INBOARD above except that a towed shoe attaches to the screed and rides on the mat. This shoe pivots and is allowed to float on top of the finished mat. A string line gets stretched between the front inboard and aft leveler. A grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. During paving the front leveler will average out the high and low points of the reference surface while the aft leveler responds to height changes in the mat behind the screed. Includes mounting hardware.
Best for highways and paving jobs with long pulls. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

P **109-5626** **REFERENCE, MOBILE STRINGLINE** . . . . . 500 **$6,150 NI**

FOR USE WITH LANE 3 ONLY
A two section arrangement of beams and shoes that mount outboard of the tractor and screed. An 8' front section with two shoes that pivot on pins gets attached to the front push beam and is towed by the paver. A 4' rear section with two shoes that pivot on pins attaches to the screed end gate. The arrangement is semi-independent from the paver. A string line is stretched between the beams and the grade sensor (not provided) mounts to the tow arm and senses off the midpoint of the string which provides an average of the reference surface and the mat thickness. Includes mounting hardware.
Good for highway applications and ideal for areas w/o shoulders such as county roads. Provides good accuracy and rideability.
Not as effective as an outboard leveler.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

If no reference number is listed, a Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory; they are only valid to order machines from a Product Distribution Center (PDC).

LANE 2 / LANE 3 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2 / Lane 3 Configuration is not available.

LANE 3 ONLY FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 3 Configuration is not available.

GRADE AND SLOPE CONTROLS

P **416-2003** **CONTROL, BASE CAT G&S SYSTEM** 0 **$7,920**
0 **$7,920 NI**

FOR USE WITH LANE 3 ONLY
Cat Grade and slope controller, power supply, harness, and mounting provisions for grade sensors.
User interface integrated in existing screed displays.
Only LANE 3 machine orders with a screed are calibrated from the factory.
FOR GRADE/GRADE OPERATION MUST HAVE TWO GRADE SENSORS
FOR GRADE/SLOPE OPERATION MUST HAVE ONE GRADE SENSOR AND SLOPE SENSOR.
MUST BE ORDERED WITH A TRACTOR OR SCREED. NI IS FOR SCREED ORDERS ONLY. FOR NI ORDERS MUST PROVIDE TRACTOR S/N.

P **362-8687** **SENSOR, SLOPE** . . . . . 20 **$2,695 NI**

FOR USE WITH LANE 3 ONLY
Includes one slope sensor located on transverse beam at front of screed with mounting hardware. Connects to main CAT G&S wiring harness.
FOR GRADE/SLOPE OPERATION MUST HAVE ONE SLOPE SENSOR AND ONE GRADE SENSOR
ONLY ONE SLOPE SENSOR PER MACHINE ORDER ALLOWED
REQUIRES: CONTROL, BASE CAT G&S SYSTEM

P **416-2006** **SENSOR, GRADE, SONIC** . . . . . 50 **$4,400 NI**

FOR USE WITH LANE 3 ONLY
Contact-free tracing of ground or stringline with self-averaging to minimize effect of short surface irregularities and objects.
Includes one sonic tracer consisting of five maintenance-free ceramic sensors with automatic temperature compensation, coily cable, sensor pole, two support arms and mounting hardware.
Unit is 28 cm (11") long.
FOR GRADE/GRADE OPERATION ORDER QTY 2
REQUIRES: CONTROL, BASE CAT G&S SYSTEM

P **459-6770** **SENSOR, GRADE, SONIC, EXTEND** . . . . . 50 **$4,400 NI**

FOR USE WITH LANE 3 ONLY
Contact-free tracing of ground or stringline with self-averaging to minimize effect of short surface irregularities and objects.
Includes one sonic tracer consisting of five maintenance-free ceramic sensors with automatic temperature compensation, coily cable, sensor pole, and a telescoping sensor mount. The square tubing telescoping mount has a range of approximately 26" to 46" and mounts on the endgate.
The sonic sensing unit is 28 cm (11") long.
FOR GRADE/GRADE OPERATION ORDER QTY 2
REQUIRES: CONTROL, BASE CAT G&S SYSTEM

P **416-2007** **SENSOR, GRADE, MECHANICAL** . . . . . 70 **$3,075 NI**

FOR USE WITH LANE 3 ONLY
Mechanically traces the ground or stringline.
Includes one proportional contacting mechanical sensor with one wand and one riding shoe attachment, coily cable, sensor pole, two support arms and mounting hardware.

LEVELING DEVICES

P **109-5623** **LEVELER, 30' OUTBOARD** ..... 2,190 **$7,680 NI**

FOR USE WITH LANE 3 ONLY
30' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that runs along the outside of the tractor and the screed. Utilizes a combination of beams and shoes that pivot on pins to provide the optimum reference for grade controls. Two sub-beams with two shoes each attach to both the front and rear of the main beam. A string line runs along the top of the beam from front to rear. The whole unit is to be positioned mid way along the paver and the grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. The leveler gets pulled by the paver and increases the sensing length. It averages the high and low points in the reference surface to maximize the self-leveling characteristics of the paver. Includes mounting hardware. Best for smoothness and rideability. Good for joint matching.
Primarily for highways and paving jobs with long pulls due to difficulty in maneuvering.

LEVELING DEVICES (Cont.)

P **109-5625** **LEVELER, FORE'N AFT** .....420 **$7,540 NI**

FOR USE WITH LANE 3 ONLY
12' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that mounts ahead and inboard of the screed. Two sub-beams with two shoes each that pivot on pins attach to the main beam. This leveler gets pulled by the paver. An additional towed shoe attaches to the screed and rides on the mat. A string line gets stretched between the front inboard and aft leveler. A grade sensor (not provided) mounts on the tow arm and senses the string midpoint. During paving the front leveler will average out the high and low points of the reference surface while the aft leveler responds to height changes in the mat behind the screed. Includes mounting hardware. Best for highways and paving jobs with long pulls. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

GRADE AND SLOPE CONTROLS (Cont.)

P **330-6083** **CONTROL, BASE CAT G&S SYSTEM** ..... 160 **$7,580 NI**
FOR USE WITH LANE 2 AND 3 ONLY
CAT automatic screed control system with a single easy-to-use split-screen display allowing one screed operator to monitor both sides of the screed. The system can be used with a combination of sonic and contact sensors, slope sensor and averaging beam. Includes: one CD620 control/display unit with integral lockable enclosure located on LH side of screed, wiring harness, storage case that holds two displays, padlock, two screed support brackets and two tow arm support brackets for LH and RH mounting of grade sensors. Bracket for mounting display to RH side is also included to accommodate customer preference.
FOR GRADE/GRADE OPERATION MUST HAVE TWO GRADE SENSORS
FOR GRADE/SLOPE OPERATION MUST HAVE ONE GRADE SENSOR AND SLOPE SENSOR
USED WITH: SCREED, AS3251C EXTEND-A-MAT

P **337-9988** **CONTROL, BASE CAT G&S SYSTEM** ..... 175 **$7,430 NI**
FOR USE WITH LANE 2 AND 3 ONLY
CAT automatic screed control system with a single easy-to-use split-screen display allowing one screed operator to monitor both sides of the screed. The system can be used with a combination of sonic and contact sensors, slope sensor and averaging beam. Includes: one CD620 control/display unit with integral lockable enclosure located on LH side of screed. wiring harness, storage case that holds two displays, padlock, two screed support brackets and two tow arm support brackets for LH and RH mounting of grade sensors. Bracket for mounting display to RH side is also included to accommodate customer preference.
FOR GRADE/GRADE OPERATION MUST HAVE TWO GRADE SENSORS
FOR GRADE/SLOPE OPERATION MUST HAVE ONE GRADE SENSOR AND SLOPE SENSOR
USED WITH: Weiler S2252
CANNOT BE USED WITH: AS3251C SCREED, AS4251C SCREED or AS4252C SCREED

P **362-8413** **CONTROL, BASE CAT G&S SYSTEM** ..... 0 **$11,310 NI**
FOR USE WITH LANE 2 AND 3 ONLY
Provides a dual unit CAT automatic screed control system. Allows two screed operators to monitor their side of the screed. Includes: Two CD620 control/display units with integral lockable enclosure located on other side of screed, wiring harness, and padlock. Displays can be configured for single or split-screen modes.
FOR GRADE/GRADE OPERATION MUST HAVE TWO GRADE SENSORS
FOR GRADE/SLOPE OPERATION MUST HAVE ONE GRADE SENSOR AND SLOPE SENSOR
USED WITH: AS4252C TAMPER BAR SCREED

GRADE AND SLOPE CONTROLS (Cont.)

P **348-3782** **CONTROL, ADD-ON CAT G&S SYSTEM** . . . . . 30 **$4,065 NI**
FOR USE WITH LANE 2 AND 3 ONLY
Provides a dual unit CAT automatic screed control system when Base CAT G&S System Control is selected first.
Allows two screed operators to monitor their side of the screed.
Includes one CD620 control/display unit with integral lockable enclosure located on other side of screed, wiring harness, and padlock. Displays can be configured for single or split-screen modes.
FOR GRADE/GRADE OPERATION MUST HAVE TWO GRADE SENSORS
FOR GRADE/SLOPE OPERATION MUST HAVE ONE GRADE SENSOR AND SLOPE SENSOR
REQUIRES: CONTROL, BASE CAT G&S SYSTEM
USED WITH: SCREED, AS3251C EXTEND-A-MAT AND Weiler S2252

P **357-8491** **SENSOR, SLOPE** . . . . . 20 **$2,470 NI**
FOR USE WITH LANE 2 AND 3 ONLY
Includes one slope sensor located on transverse beam at rear of tractor with mounting hardware. Connects to main CAT G&S wiring harness.
REQUIRES: CONTROL, BASE CAT G&S SYSTEM
USED WITH: SCREED, AS3251C EXTEND-A-MAT AND Weiler S2252

P **362-8687** **SENSOR, SLOPE** . . . . . 20 **$2,695 NI**
FOR USE WITH LANE 2 AND 3 ONLY
Includes one slope sensor located on transverse beam at rear of tractor with mounting hardware and Slope Sensor harness. Connects to main CAT G&S wiring harness.
REQUIRES: CONTROL, BASE CAT G&S SYSTEM
USED WITH: AS4252C TAMPER BAR SCREED

P **330-6084** **SENSOR, GRADE, SONIC, CAT** . . . . . 50 **$4,400 NI**
FOR USE WITH LANE 2 AND 3 ONLY
Contact-free tracing of ground or stringline with self-averaging to minimize effect of short surface irregularities and objects.
Includes one sonic tracer consisting of five maintenance-free ceramic sensors with automatic temperature compensation, coily cable, sensor pole, two support arms and mounting hardware. Unit is 28 cm (11 in) long.
FOR GRADE/GRADE OPERATION ORDER QTY 2
REQUIRES: CONTROL, BASE CAT G&S SYSTEM

P **330-6085** **SENSOR, GRADE, MECHANICAL, CAT** . . . . . 50 **$3,075 NI**
FOR USE WITH LANE 3 ONLY
Mechanically traces the ground or stringline.
Includes one proportional contacting mechanical sensor with one wand and one riding shoe attachment, coily cable, sensor pole, two support arms and mounting hardware.
FOR GRADE/GRADE OPERATION ORDER QTY 2
REQUIRES: CONTROL, BASE CAT G&S SYSTEM

TSD SYSTEM 5 automatic grade and slope control system including two screed mounted control units, slope sensor, cables, mounting hardware and storage case.
MUST SELECT TYPE AND QUANTITY OF GRADE SENSORS ('TRACKERS')
FOR GRADE/SLOPE OPERATION MUST HAVE ONE GRADE SENSOR
FOR GRADE/GRADE OPERATION MUST HAVE TWO GRADE SENSORS
FOR USE WITH: SCREED, AS3251CEXTEND-A-MAT or AS4252C TAMPER BAR SCREED, also works with Weiler S2252

P **282-8520** **CONTROL, TSD SONIC TYPE** . . . . . 66 **$4,300 NI**
FOR USE WITH LANE 3 ONLY
Includes one proportional non-contacting sonic type tracker, electrical control cable and mounting hardware.
FOR DUAL GRADE CONTROL OPERATION ORDER QTY 2
NOTE: Must have TOPCON CONTROL

P **298-0642** **CONTROL, WAND TYPE, TSD** . . . . . 77 **$3,155 NI**
FOR USE WITH LANE 3 ONLY
Includes one proportional contacting type tracker with one wand and one riding shoe attachment, electrical control cable and mounting hardware.
FOR DUAL GRADE CONTROL OPERATION ORDER QTY 2
NOTE: Must have TOPCON CONTROL

LEVELING DEVICES

NOTE: Reference 'Optional Equipment for Asphalt Paving' QEDQ1244 for images and more details.

Each of the following mobile grade reference devices listed below must be used in conjuction with a Grade & Slope control system.

P **332-9203** **BEAM, SONIC AVERAGING, CAT G&S** . . . . . 400 **$16,350 NI**
FOR USE WITH LANE 3 ONLY
Non-contacting beam utilizing three sonic tracers for enhanced averaging capability. System smoothes out any unevenness of the reference surface by calculating an average value over the entire length of the beam. 9.1 m (30 ft) total beam length of four sections with both ends that fold for adjustability and ease of transport. Includes: two sonic tracers (assumes customer already has one or if not an additional sonic tracer must be selected), wiring harness, two support arms, two tow arm support brackets, mounting hardware.
REQUIRES: CONTROL, BASE CAT G&S SYSTEM
(1) SENSOR, GRADE, SONIC

LEVELING DEVICES (Cont.)

P **257-6255** **BEAM, SONIC AVERAGING** ..... 2,502 **$21,820 NI**
FOR USE WITH LANE 3 ONLY
Includes one 24' long sonic averaging beam, three TOPCON sonic grade sensors with temperature bails, one storage case, wire harness kit and mounting hardware. The beam consists of 4 individual beams linked together which mounts to paver tow arm. Sonic trackers get attached to each sub-beam. This non-contacting device can be used inboard or outboard. Easy to transport with paver. Ideal for large parking lots and city streets.
NOTE: Must have the following items for this to function properly. CONTROL, TOPCON and one CONTROL, TSD SONIC TYPE

P **109-5623** **LEVELER, 30' OUTBOARD** ..... 2,190 **$7,680 NI**
FOR USE WITH LANE 3 ONLY
30' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that runs along the outside of the tractor and the screed. Utilizes a combination of beams and shoes that pivot on pins to provide the optimum reference for grade controls. Two sub-beams with two shoes each attach to both the front and rear of the main beam. A string line runs along the top of the beam from front to rear. The whole unit is to be positioned mid way along the paver and the grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. The leveler gets pulled by the paver and increases the sensing length. It averages the high and low points in the reference surface to maximize the self-leveling characteristics of the paver. Includes mounting hardware. Best for smoothness and rideability. Good for joint matching.
Primarily for highways and paving jobs with long pulls due to difficulty in maneuvering.

P **109-5622** **LEVELER, 40' OUTBOARD** ..... 2,280 **$7,890 NI**
FOR USE WITH LANE 3 ONLY
SAME AS LEVELER, 30' OUTBOARD above except for 40' long multi-pad aluminum beam. Capable of producing an even flatter and more level surface than the 30' leveler but is not as transportable.

P **109-5624** **LEVELER, INBOARD** ..... 1,700 **$6,060 NI**
FOR USE WITH LANE 3 ONLY
12' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that mounts ahead and inboard of the screed. Two sub-beams with two shoes each that pivot on pins attach to the main beam. This leveler gets pulled by the paver. A traveling string line is attached to the screed and the main beam of the inboard leveler. A grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. During paving the front leveler will average out the reference surface undulations and the string line, attached to the screed, will react if the pre-set mat thickness drifts up or down. Includes mounting hardware.
Good for highway, city and state road applications. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

USE	REF NO.	OPTIONAL ATTACHMENTS	Ship Weight lbs	LIST PRICE AT DEALER

OTHER ATTACHMENTS (CONT.)

LEVELING DEVICES (Cont.)

P **109-5625** **LEVELER, FORE'N AFT** .....420 **$7,540 NI**

FOR USE WITH LANE 3 ONLY
SAME AS LEVELER, INBOARD above except that a towed shoe attaches to the screed and rides on the mat. This shoe pivots and is allowed to float on top of the finished mat. A string line gets stretched between the front inboard and aft leveler. A grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. During paving the front leveler will average out the high and low points of the reference surface while the aft leveler responds to height changes in the mat behind the screed. Includes mounting hardware.
Best for highways and paving jobs with long pulls. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

P **109-5626** **REFERENCE, MOBILE STRINGLINE** .....500 **$6,150 NI**

FOR USE WITH LANE 3 ONLY
A two section arrangement of beams and shoes that mount outboard of the tractor and screed. An 8' front section with two shoes that pivot on pins gets attached to the front push beam and is towed by the paver. A 4' rear section with two shoes that pivot on pins attaches to the screed end gate. The arrangement is semi-independent from the paver. A string line is stretched between the beams and the grade sensor (not provided) mounts to the tow arm and senses off the midpoint of the string which provides an average of the reference surface and the mat thickness. Includes mounting hardware.
Good for highway applications and ideal for areas w/o shoulders such as county roads. Provides good accuracy and rideability.
Not as effective as an outboard leveler.

MUST SELECT ONE ITEM FROM THE FOLLOWING CATEGORY

AS3251C THICKNESS CONTROL SCREWS

L	**277-9934**	**THICKNESS SCREW, CW**	0	**NC**

FOR USE WITH LANE 2 AND 3 ONLY
Two ACME LH threaded screws (8 tpi). Clockwise turn increases paving depth. Provides lower turning effort and finer control than coarse screw but will have slower response.

L	**287-0326**	**THICKNESS SCREW, COARSE CW**	0	**$505**

FOR USE WITH LANE 3 ONLY
Two ACME LH threaded screws (4 tpi). Clockwise turn increases paving depth. Provides faster response because it takes half the number of turns compared to fine screw but has higher turning effort.

L	**277-9935**	**THICKNESS SCREW, CCW**	0	**NC**

FOR USE WITH LANE 3 ONLY
Same as THICKNESS SCREW, FINE CW but provides RH, counter clockwise operation instead.

L	**287-0327**	**THICKNESS SCREW, COARSE CCW**	0	**$505**

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

If no reference number is listed, a Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory; they are only valid to order machines from a Product Distribution Center (PDC).

LANE 2 / LANE 3 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2 / Lane 3 Configuration is not available.

LANE 3 ONLY FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 3 Configuration is not available.

451-9232 **AP555F MTS ASPHALT PAVER, HRC** 28,073 **$286,900**

MUST select rubber belt from Mandatory Attachment section.
For use with Tier 4F EPA/STG IV EU, aftertreatment and DEF systems.

0P-3695 **AP555F MISC MATERIAL** ..... 0 **NC**
Use this as the top level reference number when ordering miscellaneous material without ordering a machine.

To be complete, your LANE 3 order must at least contain:
- Base Machine
- 0P-9003 Lane 3 Order
- One item from each category in the Mandatory Attachment section
- Associated 0P Packing numbers

LEVELING DEVICES

P **417-1907** **BEAM, SONIC AVERAGING, CAT G&S** ..... 190 **$16,350 NI**
FOR USE WITH LANE 3 ONLY
Non-contacting beam utilizing three sonic tracers for enhanced averaging capability. System smoothes out any unevenness of the reference surface by calculating an average value over the entire length of the beam. 9.1 m (30') total beam length of four sections with both ends that fold for adjustability and ease of transport. Includes: two sonic tracers (assumes customer already has one or if not an additional sonic tracer must be selected), wiring harness, two support arms, two tow arm support brackets and mounting hardware.
REQUIRES: ONE SENSOR, GRADE, SONIC TO MAKE A COMPLETE AVERAGING BEAM ON ONE SIDE OF THE MACHINE
REQUIRES: CONTROL, BASE CAT G&S SYSTEM

LEVELING DEVICES

P **109-5623** **LEVELER, 30' OUTBOARD** ..... 2,190 **$7,680 NI**

FOR USE WITH LANE 3 ONLY
30' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that runs along the outside of the tractor and the screed. Utilizes a combination of beams and shoes that pivot on pins to provide the optimum reference for grade controls. Two sub-beams with two shoes each attach to both the front and rear of the main beam. A string line runs along the top of the beam from front to rear. The whole unit is to be positioned mid way along the paver and the grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. The leveler gets pulled by the paver and increases the sensing length. It averages the high and low points in the reference surface to maximize the self-leveling characteristics of the paver. Includes mounting hardware. Best for smoothness and rideability. Good for joint matching.
Primarily for highways and paving jobs with long pulls due to difficulty in maneuvering.

LEVELING DEVICES (Cont.)

P **109-5625** **LEVELER, FORE'N AFT** .....420 **$7,540 NI**

FOR USE WITH LANE 3 ONLY
12' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that mounts ahead and inboard of the screed. Two sub-beams with two shoes each that pivot on pins attach to the main beam. This leveler gets pulled by the paver. An additional towed shoe attaches to the screed and rides on the mat. A string line gets stretched between the front inboard and aft leveler. A grade sensor (not provided) mounts on the tow arm and senses the string midpoint. During paving the front leveler will average out the high and low points of the reference surface while the aft leveler responds to height changes in the mat behind the screed. Includes mounting hardware. Best for highways and paving jobs with long pulls. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

CAT ET diagnostic connector
Integrated 70 KW generator
Horn, forward warning
Machine security system wire-ready
Product Link Ready
Remote jump start receptacle
Starting and charging system, 24-volt
Plug and play aftermarket grade and slope ready machine wiring

OPERATOR ENVIRONMENT

Electronic monitoring and warning system with advanced element diagnostics
Automatic engine speed control
Dual, swing-out operator stations
-Control console, tilting
-Propel console, tilting
-Cup holder
-Ground speed indicator
-Propel lever with speed control dial
-Steering wheel, spring return
12 V aux power port
Hopper wing control, independent
Hour meter
Instrumentation, dual LCD touchscreens
Lockable vandalism guards
Platform handrails / guardrails
Power assist steering
Thottle control, high/low idle, ECO-mode and variable, electronic

APPLICATION SPECIFIC COMPONENTS

Adjustable height augers, hydraulic
Cast Ni-Hard steel, split segment, 406 mm (16 in) diameter
Electronic auger/feeder control system
-Gateless feeder system
-Manual override
-Reversible
-Variable speed
Heavy-duty feeder flight bars, forged steel, bushed roller chain
High-hardness, abrasion resistant drag pans, replaceable
Hopper, 250 cu ft (7.1 cu m) capacity with black Tivar flashing
Outboard feeder drives
Remote mounted bearing lube points

FLUIDS

Extended Life Coolant with protection to -29F (-34C)

OTHER STANDARD EQUIPMENT

Doors, service access, hinged, locking
Filters, hydraulic, grouped
Fuel tank with sediment drain, 278 L (73 gal)
Grouped lube points
Pressure test ports, hydraulic quick-connect
Screed counter balance
Screed lock pins
Sight gauges:
-engine coolant
-pump drive
-material feed planetaries
Slow moving vehicle sign (for ADSD-N)
S.O.S. sampling ports
Sound-suppression insulation kit
Steering guide (1)
Tow point indicator scales, lower
Vandalism protection caplocks

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

If no reference number is listed, a Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory; they are only valid to order machines from a Product Distribution Center (PDC).

LANE 2 / LANE 3 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2 / Lane 3 Configuration is not available.

LANE 3 ONLY FACTORY ARRANGEMENTS

424-9178 **AP600F WHL ASPHALT PAVER, HRC** 26,999 **$293,740**
Wheeled Asphalt Paver
MUST select front suspension from Mandatory Attachment section.
For use with Tier 4F EPA/STG IV EU, aftertreatment and DEF systems

0P-3696 **AP600F MISC MATERIAL** ..... 0 **NC**
Use this as the top level reference number when ordering miscellaneous material without ordering a machine.

To be complete, your LANE 3 order must at least contain:
- Base Machine
- 0P-9003 Lane 3 Order
- One item from each category in the Mandatory Attachment section
- Associated 0P Packing numbers
- Year of Manufacture Plate (Brazil Only)

NOTE: We recommend and strongly encourage any Misc. Matl. order ship loose item, less than $500 list price, be ordered through local Parts Distribution Center.

MAINFRAME EXTENSIONS

L **433-7577** **EXTENSION, MAINFRAME, POWER** 275 **$6,130**
0 **$6,130 NI**

FOR USE WITH LANE 3 ONLY
Pair of hydraulically powered mainframe extensions to direct material delivery to endgate and facilitate frequent screed width changes. Extends 0.46 m (18") past mainframe.
CANNOT BE USED WITH: CONTROL, FEEDER, PADDLE
CANNOT BE USED WITH: NON-COMMERCIAL WIDE WIDTH PAVING PACKAGES
CANNOT BE USED WITH: EXTENSION, 2'6" MAINFRAME

L **423-7851** **MAINFRAME, NO POWER EXTENSION** . . . . . 15 **NC**

FOR USE WITH LANE 3 ONLY
Cover plates required when no power extensions are selected.

AUGER EXTENSIONS

P **416-4109** **EXTENSION, 6" AUGER, PAIR** . . . . . 55 **$960 NI**

FOR USE WITH LANE 3 ONLY
For paving base tractor width to base tractor width plus 4' (1.2 m). Includes a LH and RH 6" (152 mm) auger extension.
FOR USE WITH: ALL SCREEDS AND ALSO FOR TRACTORS ORDERED WITHOUT A SCREED TO MEET MINIMUM PAVING REQUIREMENT FOR MOST APPLICATIONS.

P **438-6252** **AUGER 18" EXTENSION PER SIDE** . . . . . 195 **$2,320 NI**

FOR USE WITH LANE 3 ONLY
Recommended if paving base tractor width plus 4' (1.2 m) to base tractor width plus 6' (1.8 m).
Includes a pair (left and right) of 6" (152 mm) and a pair (left and right) of 1' (305 mm) auger extensions.
RECOMMENDED FOR USE WITH: REAR MOUNT SCREEDS w/o Wide Width Paving packages.

P **416-4110** **KIT, AUGER AND MAINFRAME EXT** . . . . . 270 **$5,060 NI**

FOR USE WITH LANE 3 ONLY
Recommended if paving base tractor width plus 6' (1.8 m) to base tractor width plus 8' (2.4 m) wide. Includes a pair (left and right) of 6" (152 mm) auger extensions, two pairs (left and right) of 1' (305 mm) auger extensions and a pair of foldable, hinged 2' (610 mm) mainframe extensions to facilitate frequent screed width changes.
RECOMMENDED FOR USE WITH: ALL SCREEDS w/o Wide Width Paving packages.

LEVELING DEVICES

P **109-5623** **LEVELER, 30' OUTBOARD** ..... 2,190 **$7,680 NI**

FOR USE WITH LANE 3 ONLY
30' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that runs along the outside of the tractor and the screed. Utilizes a combination of beams and shoes that pivot on pins to provide the optimum reference for grade controls. Two sub-beams with two shoes each attach to both the front and rear of the main beam. A string line runs along the top of the beam from front to rear. The whole unit is to be positioned mid way along the paver and the grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. The leveler gets pulled by the paver and increases the sensing length. It averages the high and low points in the reference surface to maximize the self-leveling characteristics of the paver. Includes mounting hardware. Best for smoothness and rideability. Good for joint matching.
Primarily for highways and paving jobs with long pulls due to difficulty in maneuvering.

P **109-5625** **LEVELER, FORE'N AFT** ..... 420 **$7,540 NI**

FOR USE WITH LANE 3 ONLY
12' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that mounts ahead and inboard of the screed. Two sub-beams with two shoes each that pivot on pins attach to the main beam. This leveler gets pulled by the paver. An additional towed shoe attaches to the screed and rides on the mat. A string line gets stretched between the front inboard and aft leveler. A grade sensor (not provided) mounts on the tow arm and senses the string midpoint. During paving the front leveler will average out the high and low points of the reference surface while the aft leveler responds to height changes in the mat behind the screed. Includes mounting hardware. Best for highways and paving jobs with long pulls. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

If no reference number is listed, a Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory; they are only valid to order machines from a Product Distribution Center (PDC).

LANE 2 / LANE 3 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2 / Lane 3 Configuration is not available.

LANE 3 ONLY FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 3 Configuration is not available.

LEVELING DEVICES

P **109-5623** **LEVELER, 30' OUTBOARD** ..... 2,190 **$7,680 NI**

FOR USE WITH LANE 3 ONLY

30' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that runs along the outside of the tractor and the screed. Utilizes a combination of beams and shoes that pivot on pins to provide the optimum reference for grade controls. Two sub-beams with two shoes each attach to both the front and rear of the main beam. A string line runs along the top of the beam from front to rear. The whole unit is to be positioned mid way along the paver and the grade sensor (not provided) mounts on the tow arm and senses the midpoint of the string. The leveler gets pulled by the paver and increases the sensing length. It averages the high and low points in the reference surface to maximize the self-leveling characteristics of the paver. Includes mounting hardware. Best for smoothness and rideability. Good for joint matching.

Primarily for highways and paving jobs with long pulls due to difficulty in maneuvering.

P **109-5625** **LEVELER, FORE'N AFT** ..... 420 **$7,540 NI**

FOR USE WITH LANE 3 ONLY

12' long multi-pad aluminum beam (measured from front to rear-most pivot pin) that mounts ahead and inboard of the screed. Two sub-beams with two shoes each that pivot on pins attach to the main beam. This leveler gets pulled by the paver. An additional towed shoe attaches to the screed and rides on the mat. A string line gets stretched between the front inboard and aft leveler. A grade sensor (not provided) mounts on the tow arm and senses the string midpoint. During paving the front leveler will average out the high and low points of the reference surface while the aft leveler responds to height changes in the mat behind the screed. Includes mounting hardware. Best for highways and paving jobs with long pulls. Not as effective as an outboard leveler. Used when outboard referencing is not practical due to width restrictions.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the price list.

You must order your machine Lane 1, Lane 2 or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

If no reference number is listed, a Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order a machine from the factory, they are only valid to order machines from a Product Distribution Center (PDC).

LANE 2/ LANE 3 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2/ Lane 3 configuration is not available.

LANE 3 ONLY FACTORY ARRANGEMENT

If no reference number is listed, a Lane 2/ Lane 3 configuration is not available.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

If no reference number is listed, a Lane1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory, they are only valid to order machines from a Product Distribution Center (PDC).

LANE 2/ LANE 3 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2/ Lane 3 configuration is not available.

LANE 3 ONLY FACTORY ARRANGEMENTS

If no reference number is listed, Lane 3 configuration is not available.

374-9712	**CP54B VIBRATORY COMPACTOR** ..... 18,000 Top level arrangement. Must order attachments from mandatory section. May order attachments from optional section		**$175,800**

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA'S)

If no reference number is listed, Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory; they are only valid to order machines from a Product Distribution Center (PDC).

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA'S)

If no reference number is listed, Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory; they are only valid to order machines from a Product Distribution Center (PDC).

Dual element air cleaner
Fuel filter/water separator/electronic priming pump and water indicator
Three-speed throttle switch including ECOMODE
Dual propel pumps - 1 for drum and 1 for tires
Dual braking systems (service & parking, drum only)
Two-speed hydrostatic transmission
Limited slip differential

ELECTRICAL

24-volt starting and charging system alternator
(2) Maintenance free batteries - 750 CCA
Halogen working lights - canopy mounted (2 front-facing and 2 rear-facing)
Backup alarm and forward warning horn
Product Link Ready
Beacon Ready

OPERATOR ENVIRONMENT

ROPS/FOPS platform
Four heavy-duty isolation mounts
Platform handrails/guardrails
Power steering
Adjustable tilt-steering column
Adjustable, rotating suspension seat
Retractable seat belt
Adjustable, padded arm rest for propel lever operation
On-board display with audible warning alarm and interface for:
-hydraulic oil temperature gauge,
-engine oil pressure gauge,
-engine coolant temperature gauge
-alternator charge,
-fuel level gauge,
-service hour meter,
-engine RPM
-ground speed, vibe speed
-fuel rate gauge
-engine load gauge
-basic compaction measurement
Lockable, vandalism guard for on-board display
12-volt power point

COOLING

Premixed 50% concentration of Extended Life Coolant with freeze protection to -37C (-35F)

DRUMS

Padfoot drum
84" (2134 mm) wide x 60.4" (1534 mm) diameter
Dual amplitude with single frequency
Dual, pod-style eccentric weight housings
Adjustable frt and rear steel scraper

OTHER STANDARD EQUIPMENT

Locking composite engine enclosure
Sealed-for-life hitch bearings
Sight gauges:
-coolant level
-hydraulic oil level
Hydraulic tank locking cap
Articulated frame with safety lock
Transport tie-down and lift points
Fuel tank with lockable cap
Quick connect hydraulic pressure test ports
SOS ports:

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA'S)

If no reference number is listed, Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory; they are only valid to order machines from a Product Distribution Center (PDC).

LANE 2/3 FACTORY ARRANGEMENTS

If no reference number is listed, Lane 2/Lane 3 configuration is not available.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA'S)

If no reference number is listed, Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory, they are only valid to order machines from a Product Distribution Center (PDC).

LANE 2/3 FACTORY ARRANGEMENTS

If no reference number is listed, Lane 2/Lane 3 configuration is not available.

CAT COMPACTION CONTROL

This is a factory designed and integrated pass and count mapping system which requires additional components for the system to be functional. This is a higher accuracy solution, order the slope sensor below (for accelerometer sensor system) and consult your Dealer Technology Representative to order the necessary base station, data radio and higher accuracy option key for an RTK solution.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA'S)

If no reference number is listed, Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory; they are only valid to order machines from a Product Distribution Center (PDC).

Power steering
Adjustable tilt-steering column
Adjustable, rotating suspension seat
Retractable seat belt
Adjustable, padded arm rest for propel lever operation
On-board display with audible warning alarm and interface for:
-hydraulic oil temperature gauge,
-engine oil pressure gauge,
-engine coolant temperature gauge,
-alternator charge,
-fuel level gauge,
-service hour meter,
-engine RPM
-ground speed, vibe speed
-fuel rate gauge
-engine load gauge
-basic compaction measurement
Lockable, vandalism guard for on-board display
12-volt power point

COOLING

Premixed 50% concentration of Extended Life Coolant with freeze protection to -37C (-35F)

DRUMS

Smooth drum
84" (2134 mm) wide x 60.4" (1534 mm) diameter
Dual amplitude with single frequency
Dual, pod-style eccentric weight housings
Front adjustable steel scraper

OTHER STANDARD EQUIPMENT

Locking composite engine enclosure
Sealed-for-life hitch bearings
Sight gauges:
-coolant level
-hydraulic oil level
Hydraulic tank locking cap
Articulated frame with safety lock
Transport tie-down and lift points
Fuel tank with lockable cap
Quick connect hydraulic pressure test ports

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA'S)

If no reference number is listed, Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory; they are only valid to order machines from Product Distribution Center (PDC).

LANE 2/3 FACTORY ARRANGEMENTS

If no reference number is listed, Lane 2 configuration is not available.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA'S)

If no reference number is listed, Lane 1 configuration is not available.

Distribution Center Arrangement (DCA) reference numbers for this model may not be used to order machines from the factory, they are only valid to order machines from a Product Distibution Center (PDC).

LANE 2/3 FACTORY ARRANGEMENTS

If no reference number is listed, Lane 2 configuration is not available.

TECHNOLOGY PRODUCTS

MACHINE CONTROL ORDERING

(1) Cat Grade Control Slope Assist - Machine Integrated System that provides slope/angular guidance to the cutting edge for both blade slope and mainfall applications. This feature does not require a base station, laser transmitter, design file, or additional hardware. A sensor and valve calibration is required to be functional. This system includes an upgraded machine display and an angle sensor on the blade.

2) Ordering Control, Slope Assist, ARO, (PP) allows the machine to be equipped with an AccuGrade GNSS, Laser, or UTS Grade Control System Electronics Kit. Site infrastructure is also necessary to operate the AccuGrade System.
For example, GNSS systems require a GNSS base station.

Laser systems require a laser transmitter.
UTS requires a Universal Total Station.
AccuGrade electronics kits and site infrastructure must be ordered separately from Cat and/or SITECH dealer.

TECHNOLOGY PRODUCTS

MACHINE CONTROL ORDERING

(1) Cat Grade Control Slope Assist - Machine Integrated System that provides slope/angular guidance to the cutting edge for both blade slope and mainfall applications. This feature does not require a base station, laser transmitter, design file, or additional hardware. A sensor and valve calibration is required to be functional. This system includes an upgraded machine display and an angle sensor on the blade.

2) Ordering Control, Slope Assist, ARO, (PP) allows the machine to be equipped with an AccuGrade GNSS, Laser, or UTS Grade Control System Electronics Kit. Site infrastructure is also necessary to operate the AccuGrade System.
For example, GNSS systems require a GNSS base station.
Laser systems require a laser transmitter.
UTS requires a Universal Total Station.
AccuGrade electronics kits and site infrastructure must be ordered separately from Cat and/or SITECH dealer.

TECHNOLOGY PRODUCTS

MACHINE CONTROL ORDERING

(1) Cat Grade Control Slope Assist - Machine Integrated System that provides slope/angular guidance to the cutting edge for both blade slope and mainfall applications. This feature does not require a base station, laser transmitter, design file, or additional hardware. A sensor and valve calibration is required to be functional. This system includes an upgraded machine display and an angle sensor on the blade.

2) Ordering Control, Slope Assist, ARO, (PP) allows the machine to be equipped with an AccuGrade GNSS, Laser, or UTS Grade Control System Electronics Kit. Site infrastructure is also necessary to operate the AccuGrade System.

For example, GNSS systems require a GNSS base station.
Laser systems require a laser transmitter.
UTS requires a Universal Total Station.
AccuGrade electronics kits and site infrastructure must be ordered separately from Cat and/or SITECH dealer.

ORDERING INSTRUCTIONS

You must order your machine from Lane 1, Lane 2 or Lane 3.
The Lane you order from will determine capability to order additional attachments and service level you will receive.

Lane 2 or Lane 3 orders must include selections from the MANDATORY sections, and may be completed with OPTIONAL features.

For further explanations of Lane Strategy and ordering instructions please refer to the sales model "General" posted in the web price list.

C = Custom attachments.
Availability may be longer than PSL LANE 3 for products marked "C", please contact Order Entry for current availability.

UNDERCARRIAGE

SystemOne can be used in most of the HD sealed and lubricated applications.
Center tread idlers now run on the bushings instead of the links, eliminating link scalloping, substantially increasing links life, O&O costs are significantly reduced by elimination of bushing turns and increased components wear life.

Due to the potential increase in undercarriage life resulting from SystemOne, Extreme Service (ES) shoes should be considered for applications that are anticipated to be shoe-life limited in order to match shoe life with link life.

Customers should carefully select between SystemOne and Heavy Duty undercarriage based on expected application.
For attachment guiding / guarding (for SystemOne and Heavy Duty configurations), see the Track Guiding Guard Arrangements section.

It is recommended the machines use Heavy Duty undercarriage in high debris packing applications.

ACCUGRADE CONTROL

ACCUGRADE CONTROL SYSTEM ORDERING

(1) Ordering INSTALLATION, ACCUGRADE READY (ARO) allows the machine to be equipped with an AccuGrade GNSS (GPS and GLONASS satellite constellations), Laser or UTS Grade Control System Electronics Kit.

(2) An AccuGrade Electronics Kit (GNSS, Laser, or UTS) must be ordered separately and additional to the machine.

(3) The purchase of a AccuGrade Software Enabled Attachment (SEA) premium configuration is required for those configurations requiring automatic blade control and must be ordered separately and additional to the machine and the AccuGrade Electronics Kit.

(4) Site infrastructure is also necessary to operate the AccuGrade system. For example, GNSS systems require a GNSS base station. Laser systems require a laser transmitter. UTS requires a Universal Total Station.

Please consult the ACCUTTT1 price list for ordering instructions for electronics kits, AccuGrade SEA and site infrastructure.

AccuGrade control

ACCUGRADE CONTROL SYSTEM ORDERING
(1) Ordering INSTALLATION, ACCUGRADE READY (ARO) allows the machine to be equipped with an AccuGrade GNSS (GPS and GLONASS satellite constellations), Laser or UTS Grade Control System Electronics Kit.

(2) An AccuGrade Electronics Kit (GNSS, Laser, or UTS) must be ordered separately and additional to the machine.

(3) The purchase of a AccuGrade Software Enabled Attachment (SEA) premium configuration is required for those configurations requiring automatic blade control and must be ordered separately and additional to the machine and the AccuGrade Electronics Kit.

(4) Site infrastructure is also necessary to operate the AccuGrade system. For example, GNSS systems require a GNSS base station. Laser systems require a laser transmitter. UTS requires a Universal Total Station.

Please consult the ACCUTTT1 price list for ordering instructions for electronics kits, AccuGrade SEA and site infrastructure.

UNDERCARRIAGE

SystemOne can be used in most of the HD sealed and lubricated applications.
Center tread idlers now run on the bushings instead of the links, eliminating link scalloping, substantially increasing links life, O&O costs are significantly reduced by elimination of bushing turns and increased components wear life.

Due to the potential increase in undercarriage life resulting from SystemOne, Extreme Service (ES) shoes should be considered for applications that are anticipated to be shoe-life limited in order to match shoe life with link life.

Customers should carefully select between SystemOne and Heavy Duty undercarriage based on expected application.
For attachment guiding / guarding (for SystemOne and Heavy Duty configurations), see the Track Guiding Guard Arrangements section.

It is recommended the machines use Heavy Duty undercarriage in high debris packing applications.

ACCUGRADE CONTROL

ACCUGRADE CONTROL SYSTEM ORDERING
(1) Ordering INSTALLATION, ARO allows the machine to be equipped with an AccuGrade GNSS (GPS and GLONASS satellite constellations), Laser or UTS Grade Control System Electronics Kit.

(2) An AccuGrade Electronics Kit (GNSS, Laser, or UTS) must be ordered separately and additional to the machine.

(3) The purchase of a AccuGrade Software Enabled Attachment (SEA) premium configuration is required for those configurations requiring automatic blade control and must be ordered separately and additional to the machine and the AccuGrade Electronics Kit.

(4) Site infrastructure is also necessary to operate the AccuGrade System. For example, GNSS systems require a GNSS base station. Laser systems require a laser transmitter. UTS requires a Universal Total Station.

Please consult the ACCUTTT1 price list for ordering instructions for electronics kits, AccuGrade SEA and site infrastructure.

UNDERCARRIAGE

SystemOne can be used in most of the HD sealed and lubricated applications.
Center tread idlers now run on the bushings instead of the links, eliminating link scalloping, substantially increasing links life, O&O costs are significantly reduced by elimination of bushing turns and increased components wear life.

Due to the potential increase in undercarriage life resulting from SystemOne, Extreme Service (ES) shoes should be considered for applications that are anticipated to be shoe-life limited in order to match shoe life with link life.

Customers should carefully select between SystemOne and Heavy Duty undercarriage based on expected application.
For attachment guiding / guarding (for SystemOne and Heavy Duty configurations), see the Track Guiding Guard Arrangements section.

It is recommended the machines use Heavy Duty undercarriage in high debris packing applications.

ACCUGRADE CONTROL SYSTEM ORDERING
(1) Ordering INSTALLATION, ARO allows the machine to be equipped with an AccuGrade GNSS (GPS and GLONASS satellite constellations), Laser or UTS Grade Control System Electronics Kit.

(2) An AccuGrade Electronics Kit (GNSS, Laser, or UTS) must be ordered separately and additional to the machine.

(3) The purchase of a AccuGrade Software Enabled Attachment (SEA) premium configuration is required for those configurations requiring automatic blade control and must be ordered separately and additional to the machine and the AccuGrade Electronics Kit.

(4) Site infrastructure is also necessary to operate the AccuGrade System. For example, GNSS systems require a GNSS base station. Laser systems require a laser transmitter. UTS requires a Universal Total Station.

Please consult the ACCUTTT1 price list for ordering instructions for electronics kits, AccuGrade SEA and site infrastructure.
