CATERPILLAR®

Company Name:	Caterpillar Inc.
Subject:	Pricelist
Effective Date:	January 01, 2016

Please Note: **Unless expressly stated within the body of the contract, all contract terms and conditions shall prevail over any terms stated in the contractor catalogs and pricelists.**

1. All Ohio CAT standard terms and conditions will apply to all transactions. These can be found on the rear of the rental agreement.

2. Machines will be shipped full of fuel. If a machine is returned less than full, a charge of $5.00 per gallon will apply.

3. The customer is responsible for returning the machine in the same condition as existed at the beginning fo the rental period, less normal wear and tear.

4. The customer will be responsible for all damages to rental machines, except those that are noted as previous damage on the shipping document which the customer should sign upon receciving the machine. The customer will be billed for labor, parts, etc., at the regular service rates.

5. Damages include but are not limited to, fire, theft, vandalism, broken glass, body damage, damage to cylinders and hoses and tires.

6. The customer is responsible for the tires on machines which have tires. Any repairs or replacements will be billed to the customer.

7. It is the customer's responsibilty to ensure that only those who are qualified to do so are operating rental machines.

8. Many diesel machines will have tier 4 engines. The customer is responsible for ensuring that engines are regenerated when the system calls for it. Any damage resulting from failure to perform a regen will be the customer's responsibility.

9. Many diesel machines will require the use of Diesel Exhaust Fluid (DEF). The machines will be shipped with a full tank of DEF, and it is the customer's responsibility to return it at the same level, the customer will be charged the current market price, which is $6.81/gallon for 2015.

10. Rent will not apply to purchase unless a rental purchase option contract is executed between the customer and Ohio CAT prior to delivery.

11. The customer is responsible for the 1% environmental disposal fee.

12. If a valid certificate of insurance is not provided, the customer is responsible for the 14% Loss Damage Waiver fee.

Please note that rates do not include freight.

13. Freight and Transportation Charges: Shipment is to be made by private or commercial freight service provider, air, rail, water, parcel post, express or commercial package delivery, whichever is the most economical and expeditious method for proper delivery of the item. Failure of the Contractor to utilize the most economical mode of transportation shall result in the Contractor reimbursing the ordering agency the difference between the most economical mode of transportation and the mode of transportation used by the Contractor. Failure to reimburse the ordering agency shall be considered as a default. Please call for an accurate freight quote.

PRICING INFORMATION

These prices are manufacturer suggested resale prices and are subject to change without notice. Shipment will usually be made from source of manufacture, or at factory discretion. Attachment prices are for attachments installed as original equipment unless otherwise specified.

Net price items are subject to no further discounts.
All prices are installed list prices unless otherwise specified.
SHIPMENT DATE SPECIFIC PRICING IS BEST FOUND THROUGH THE PSQ AND ISA QUOTING TOOLS.

AVAILABILITY

For product availability go to Power Net at https://engines.cat.com Under the quick links, select Engine Availability Letters.

GLOSSARY OF TERMS

For product abbreviations go to Power Net at https://engines.cat.com Under the quick links, select TMI Web. Once in TMI select Abbreviations, listed under TMI Definitions.

DESIGN TO ORDER (DTO)

Orders requiring special engineering (referred to as DTO) will require additional process time. This time is over and above normal order processing or product availability.

Attachments listed in the price list are NOT interchangeable between sales models or applications. If attachments are required for a particular model or configuration but are not listed as compatible for this model in a specific price list, the order will require a DTO. This is true even when the same attachment or configuration has been ordered in the past.

A DTO will require an application and installation (A & I) marketing quote. For further information contact the Application Support Center.

Requests for special ratings not listed in the Price List should also be sent to the Application Support Center. If the special rating is possible, it may also require a DTO and could require additional processing time if the appropriate details have not yet been established.

Please keep this information in mind when discussing or quoting approximate availability to your customers.

DTO quotes are typically valid for six (6) months. If the quote expires, regardless if it has been ordered or not, a new DTO quote will be required before an order can be placed.

Technical performance data and Engine rating information is available in Power Net at https://engines.cat.com. Under the quick links, select TMI Web. Once in TMI select TMI Performance Definitions.

To request dealer specific authorization, please follow links to Engine Order Management Process (EOMP) at Caterpillar Power Net (https://engines.cat.com). CWS logon id is needed to access Power Net.

RATINGS GUIDE

The EPG Ratings Guide may be ordered through Media Logistics by calling +1 (800) 566-7782 or +1 (309) 266-0942. The current EPG Ratings Guide media number for Cat Generator Sets is LEXE7582.

Current EPG ratings are also available by accessing the Electronic Media Center at https://emc.cat.com and on Power Net at https://engines.cat.com, select Electric Power then select References/Sales Tools.

EXHAUST SYSTEM

- Exhaust manifold; dry.

AIR INLET SYSTEM

- Aftercooler core.
- Turbocharger.

FUEL SYSTEM

- Primary fuel filter w/integral water separator & secondary filter.
- Fuel cooler.
- Fuel priming pump.
- Flexible fuel lines.
- Engine fuel transfer pump.

GENERATORS AND GENERATOR ATTACHMENTS

- Brushless, self-excited 2/3 pitch, random wound.
- IP23 Protection.
- Insulation Class H and temperature rise
- Power center, IP22 bottom cable entry
- Segregated low voltage wiring panel

GOVERNING SYSTEM

Cat Electronic Governor (ADEM A4).

LUBE SYSTEM

- Oil cooler.
- Lubricating oil.
- Oil filter and dipstick.
- Oil drain lines with valve; piped to edge of base.
- Fumes disposal; piped to front of radiator.

PROTECTION SYSTEM

Safety shutoffs for:
- High water temperature.
- Overspeed.
- Low oil pressure.

COOLING SYSTEM

- Coolant drain line with valve; terminated on edge of base.
- Fan and belt guards.
- Coolant Level Sensor
- Thermostats and housing, full open temperature 92 deg C (198 deg F).
- Coolant level sight gauge.
- Jacket water pump, gear driven, centrifugal.
- Caterpillar Extended Life Coolant.

STARTING/CHARGING SYSTEM

- 24-volt electric starting motor.
- 24V, 45 amp charging alternator.

GENERAL

- Paint, Caterpillar Yellow.
- Vibration damper.
- Parts book.
- Operation and maintenance manual pack and OMM Storage Compartment

MARKET SEGMENTATION

Y **MSEPGGN** **END USE: GENERAL EPG** . . . . . 0 **NC**
All engines and generator sets utilized in the generation of electrical power for general residential, commercial, utility, construction and communications, commercial and residential building, agricultural, construction, mining, manufacturing, public and civil services. This category should not be used for EP Rental, Petroleum, Locomotive or Marine electric power applications.

Y **MSPMDXQ** **End Use: EP Dealer Rental** . . . . . 0 **NC**
All generator sets utilized ONLY in Rental Applications. This category should not be used for General EP, Petroleum, Locomotive or Marine electric power applications.

Y **MSEPASP** **EP-ADDED SCOPE PRODUCT** . . . . . 0 **NC**
This EP market segment code applies to customized solutions (DTO) type gensets not contained in the price list and not already covered by other EP market segment codes. Intended for applications that contain additional systems scope such as enclosures, electrical controls, co-generation systems etc. The added scope is invoiced to dealers through supplemental invoices tied to the original ESO.

Y **MSLOCEP** **END USE: LOCOMOTIVE EPG** . . . . . 0 **NC**
All engines and generator sets utilized in the generation of electrical power for locomotive propulsion and head end power.

Y **MSMARAX** **MARINE AUX COMMERCIAL** . . . . . 0 **NC**
All engines and generator sets utilized in boats and ships for auxiliary applications such as cargo winches, electrical power generation, pumps, bow thrusters, etc.

Y **MSPETDR** **PETROLEUM DRILLING** . . . . . 0 **NC**
Engines, transmissions and packages used to drill oil and gas wells (including emergency GEN Sets). This includes Petroleum, Industrial, EPG, and Marine price list products.

Warning/shutdown with common LED indication of shutdowns for:
- Low oil pressure
- High coolant temperature
- Overspeed
- Emergency stop
- Failure to start (overcrank)
- Low coolant temperature
- Low coolant level

Programmable protective relaying functions:
- Generator phase sequence
- Over/Under voltage (27/59)
- Over/Under Frequency (81 o/u)
- Overcurrent (50/51)

Programmable Input/Output
- 2 programmable digital inputs
- 2 programmable relay outputs (Form A)

PRICING INFORMATION

These prices are manufacturer suggested resale prices and are subject to change without notice. Shipment will usually be made from source of manufacture, or at factory discretion. Attachment prices are for attachments installed as original equipment unless otherwise specified.

Net price items are subject to no further discounts.
All prices are installed list prices unless otherwise specified.
* SHIPMENT DATE SPECIFIC PRICING IS BEST FOUND THROUGH THE PSQ AND ISA QUOTING TOOLS* .

AVAILABILITY

For product availability go to Power Net at https://engines.cat.com Under the quick links, select Engine Availability Letters.

GLOSSARY OF TERMS

For product abbreviations go to Power Net at https://engines.cat.com Under the quick links, select TMI Web. Once in TMI select Abbreviations, listed under TMI Definitions.

DESIGN TO ORDER (DTO)

Orders requiring special engineering (referred to as DTO) will require additional process time. This time is over and above normal order processing or product availability.

Attachments listed in the price list are NOT interchangeable between sales models or applications. If attachments are required for a particular model or configuration but are not listed as compatible for this model in a specific price list, the order will require a DTO. This is true even when the same attachment or configuration has been ordered in the past.

A DTO will require an application and installation (A & I) marketing quote. For further information contact the Application Support Center.

Requests for special ratings not listed in the Price List should also be sent to the Application Support Center. If the special rating is possible, it may also require a DTO and could require additional processing time if the appropriate details have not yet been established.

Please keep this information in mind when discussing or quoting approximate availability to your customers.

DTO quotes are typically valid for six (6) months. If the quote expires, regardless if it has been ordered or not, a new DTO quote will be required before an order can be placed.

The EPG Ratings Guide may be ordered through Media Logistics by calling + 1 (800) 566-7782 or + 1 (309) 266-0942. The current EPG Ratings Guide media number for Cat Generator Sets is LEXE7582.

Current EPG ratings are also available by accessing the Electronic Media Center at https://emc.cat.com and on Power Net at https://engines.cat.com, select Electric Power then select References/Sales Tools.

EXHAUST SYSTEM

- Exhaust manifold; dry.

AIR INLET SYSTEM

- Aftercooler core.
- Turbocharger.

FUEL SYSTEM

- Primary fuel filter w/integral water separator & secondary filter.
- Fuel cooler.
- Fuel priming pump.
- Flexible fuel lines.
- Engine fuel transfer pump.

GENERATORS AND GENERATOR ATTACHMENTS

- Brushless, self-excited 2/3 pitch, random wound.
- IP23 Protection.
- Insulation Class H and temperature rise
- Power center, IP22 bottom cable entry
- Segregated low voltage wiring panel

GOVERNING SYSTEM

Cat Electronic Governor (ADEM A4).

LUBE SYSTEM

- Oil cooler.
- Lubricating oil.
- Oil filter and dipstick.
- Oil drain lines with valve; piped to edge of base.
- Fumes disposal; piped to front of radiator.

MARKET SEGMENTATION

Y **MSEPGGN** **END USE: GENERAL EPG** . . . . . 0 **NC**
All engines and generator sets utilized in the generation of electrical power for general residential, commercial, utility, construction and communications, commercial and residential building, agricultural, construction, mining, manufacturing, public and civil services. This category should not be used for EP Rental, Petroleum, Locomotive or Marine electric power applications.

Y **MSPMDXQ** **End Use: EP Dealer Rental** . . . . . 0 **NC**
All generator sets utilized ONLY in Rental Applications. This category should not be used for General EP, Petroleum, Locomotive or Marine electric power applications.
TECHNICAL: Dealer is responsible for selecting appropriate attachments and certifications for their application.

Y **MSEPASP** **EP-ADDED SCOPE PRODUCT** . . . . . 0 **NC**
This EP market segment code applies to customized solutions (DTO) type gensets not contained in the price list and not already covered by other EP market segment codes. Intended for applications that contain additional systems scope such as enclosures, electrical controls, co-generation systems etc. The added scope is invoiced to dealers through supplemental invoices tied to the original ESO.

Y **MSLOCEP** **END USE: LOCOMOTIVE EPG** . . . . . 0 **NC**
All engines and generator sets utilized in the generation of electrical power for locomotive propulsion and head end power.

Y **MSMARAX** **MARINE AUX COMMERCIAL** . . . . . 0 **NC**
All engines and generator sets utilized in boats and ships for auxiliary applications such as cargo winches, electrical power generation, pumps, bow thrusters, etc.

Y **MSPETDR** **PETROLEUM DRILLING** . . . . . 0 **NC**
Engines, transmissions and packages used to drill oil and gas wells (including emergency GEN Sets). This includes Petroleum, Industrial, EPG, and Marine price list products.

Y **MSPETPG** **PETROLEUM PRODUCTION/PUMPING** . . . . . 0 **NC**
All engines utilized in the generation of mechanical and electrical power for exploration, recovery and transmission of petroleum products including gathering, production, pumping, and refining, (but not gas compression). Applications include camp power, emergency gen sets (non-drilling), prime power at production and storage facilities, cranes, fire pumps, air compressors, primary or secondary recovery systems such as down hole pumps, water flood or disposal systems, etc. This includes rental products which fit Petroleum Production/Pumping market segment description. This includes industrial, marine, and EPG price list products.

PRICING INFORMATION

These prices are manufacturer suggested resale prices and are subject to change without notice. Shipment will usually be made from source of manufacture, or at factory discretion. Attachment prices are for attachments installed as original equipment unless otherwise specified.

Net price items are subject to no further discounts.

All prices are installed list prices unless otherwise specified.

* SHIPMENT DATE SPECIFIC PRICING IS BEST FOUND THROUGH THE PSQ AND ISA QUOTING TOOLS* .

AVAILABILITY

NOT Available to the following territory CIS: Armenia, Belarus, Kyrgyzstan, Russia.

GLOSSARY OF TERMS

For product abbreviations go to Power Net at https://engines.cat.com Under the quick links, select TMI Web. Once in TMI select Abbreviations, listed under TMI Definitions.

DESIGN TO ORDER (DTO)

Orders requiring special engineering (referred to as DTO) will require additional process time. This time is over and above normal order processing or product availability.

Attachments listed in the price list are NOT interchangeable between sales models or applications. If attachments are required for a particular model or configuration but are not listed as compatible for this model in a specific price list, the order will require a DTO. This is true even when the same attachment or configuration has been ordered in the past.

A DTO will require an application and installation (A & I) marketing quote. For further information contact the Application Support Center.

Requests for special ratings not listed in the Price List should also be sent to the Application Support Center. If the special rating is possible, it may also require a DTO and could require additional processing time if the appropriate details have not yet been established.

Please keep this information in mind when discussing or quoting approximate availability to your customers.

DTO quotes are typically valid for six (6) months. If the quote expires, regardless if it has been ordered or not, a new DTO quote will be required before an order can be placed.

DEALER SPECIFIC PRICING TERMS

To obtain the latest specific conditions from Caterpillar to individual Cat dealers please use Engine Order Management Process (EOMP) quoting and order tools like ISA or PSQ. For questions or

TECHNICAL PERFORMANCE DATA

Technical performance data and Engine rating information is available in Power Net at https://engines.cat.com. Under the quick links, select TMI Web. Once in TMI select TMI Performance Definitions.

To request dealer specific authorization, please follow links to Engine Order Management Process (EOMP) at Caterpillar Power Net (https://engines.cat.com). CWS logon id is needed to access Power Net.

RATINGS GUIDE

The EPG Ratings Guide may be ordered through Media Logistics by calling + 1 (800) 566-7782 or + 1 (309) 266-0942. The current EPG Ratings Guide media number for Cat Generator Sets is LEXE7582 or or LEXE7581 for Olympian Generator Sets.

Current EPG ratings are also available by accessing the Electronic Media Center at https://emc.cat.com and on Power Net at https://engines.cat.com, select Electric Power then select References/Sales Tools.

PRICING INFORMATION

These prices are manufacturer suggested resale prices and are subject to change without notice. Shipment will usually be made from source of manufacture, or at factory discretion. Attachment prices are for attachments installed as original equipment unless otherwise specified.

Net price items are subject to no further discounts.

All prices are installed list prices unless otherwise specified.

* SHIPMENT DATE SPECIFIC PRICING IS BEST FOUND THROUGH THE PSQ AND ISA QUOTING TOOLS* .

GLOSSARY OF TERMS

For product abbreviations go to Power Net at https://engines.cat.com Under the quick links, select TMI Web. Once in TMI select Abbreviations, listed under TMI Definitions.

DESIGN TO ORDER (DTO)

Orders requiring special engineering (referred to as DTO) will require additional process time. This time is over and above normal order processing or product availability.

Attachments listed in the price list are NOT interchangeable between sales models or applications. If attachments are required for a particular model or configuration but are not listed as compatible for this model in a specific price list, the order will require a DTO. This is true even when the same attachment or configuration has been ordered in the past.

A DTO will require an application and installation (A & I) marketing quote. For further information contact the Application Support Center.

Requests for special ratings not listed in the Price List should also be sent to the Application Support Center. If the special rating is possible, it may also require a DTO and could require additional processing time if the appropriate details have not yet been established.

Please keep this information in mind when discussing or quoting approximate availability to your customers.

DTO quotes are typically valid for six (6) months. If the quote expires, regardless if it has been ordered or not, a new DTO quote will be required before an order can be placed.

DEALER SPECIFIC PRICING TERMS

To obtain the latest specific conditions from Caterpillar to individual Cat dealers please use Engine Order Management Process (EOMP) quoting and order tools like ISA or PSQ. For questions or special requests, please contact your Caterpillar representative.

TECHNICAL PERFORMANCE DATA

Technical performance data and Engine rating information is available

TECHNICAL PERFORMANCE DATA (CONT.)

in Power Net at https://engines.cat.com. Under the quick links, select TMI Web. Once in TMI select TMI Performance Definitions.

To request dealer specific authorization, please follow links to Engine Order Management Process (EOMP) at Caterpillar Power Net (https://engines.cat.com). CWS logon id is needed to access Power Net.

RATINGS GUIDE

The EPG Ratings Guide may be ordered through Media Logistics by calling + 1 (800) 566-7782 or + 1 (309) 266-0942. The current EPG Ratings Guide media number for Cat Generator Sets is LEXE7582 or or LEXE7581 for Olympian Generator Sets.

Current EPG ratings are also available by accessing the Electronic Media Center at https://emc.cat.com and on Power Net at https://engines.cat.com, select Electric Power then select References/Sales Tools.

ENGINE PACKAGE DESCRIPTION

ENGINE
Electrical system,12 VDC
Std Air Cleaner - Medium Duty
Oil temperature Gauge and Sender
Coolant and lube drains piped to the edge of base
D40-2LC and D50-2LC product includes Electronic Governor
D60-2LC product includes A4:E2 electronic
engine contrl w/Speed Adjust thru EMCP
Tier 3 EPA Approved Emissions Certified
EPA certified for stationary use only during defined emergency conditions
Outside EPA-regulated territories and in Guam,American Samoa or the Commonwealth of the Northern Mariana Islands,these restrictions do not apply

INTEGRATED VOLTAGE REGULATOR (Digital):
EM10 Excitation Module
Voltage within + /- 0.25% at steady state from no load to full load
Provides fast recovery from transient load changes

CHARGING SYSTEM

CAT Premium High Output Battery(s) with rack & cables Installed (wet);1000CCA;90amp hr;12V.

CONTROL PANELS

NEMA 1 enclosure
Wiring loom
DC and Ac wiring harness
EMCP 4.2 controls including:

Warning/shutdown with common LED indication of shutdowns for:
std -Low Oil Pressure
•optionalì -Low Coolant level
std -Low Coolant temperature alarm (detects jacket water heater failure)
std -High Coolant temperature shutdown
Programmable protective relaying functions:
std -Generator phase sequence
std -Over/Under voltage (27/59)
std -Over/Under Frequency (81 o/u)
std -Reverse Power (kW) (32)
std -Reverse Reactive Power (kVAr) (32RV)
std -Overcurrent (50/51)
Communications
std -Customer DATA link (Modbus RTU)
•optionalì -Accessory module DATA link
std -RS485 Serial DATA link (terminals only)
std -8 programmable digital outputs available
std -2 relays pre-programmed
•optionalì -4 programmable relay outputs (Form A)
std -8 programmable digital inputs available
std -2 pre-programmed
•optionalì -6 programmable digital inputs
•optionalì -1 analog inputs

Compatible with the following optional modules:
•optionalì -Remote CAN annunciator

COOLING SYSTEM

Radiator and cooling fan complete with protective guards
Standard ambient temperatues up to 50degC (122degF)
50% coolant antifreeze/corrosion inhibitor

EXTENDED SERVICE COVERAGE

Must select one of the following Extended Service Coverage contracts
for CAT branded commercial power systems. If no ESC is desired,
select feature codes for NO ESC.
See applicable contract @ CatInsurance.CAT.com for * covered components
and exclusions

DEDUCTIBLE -$0 on all offerings

* Silver coverage includes a wide range of covered components
* Gold coverage includes all the same items as Silver, as well as
turbocharger, fuel nozzles and injectors, and water pumps
* Platinum includes all original factory equipment, excluding
consumables such as filters, hoses and belts.

PRICING INFORMATION

These prices are manufacturer suggested resale prices and are subject to change without notice. Shipment will usually be made from source of manufacture, or at factory discretion. Attachment prices are for attachments installed as original equipment unless otherwise specified.

Net price items are subject to no further discounts.

All prices are installed list prices unless otherwise specified.

* SHIPMENT DATE SPECIFIC PRICING IS BEST FOUND THROUGH THE PSQ AND ISA QUOTING TOOLS* .

AVAILABILITY

NOT Available to the following territory CIS: Armenia, Belarus, Kyrgyzstan, Russia.

GLOSSARY OF TERMS

For product abbreviations go to Power Net at https://engines.cat.com Under the quick links, select TMI Web. Once in TMI select Abbreviations, listed under TMI Definitions.

DESIGN TO ORDER (DTO)

Orders requiring special engineering (referred to as DTO) will require additional process time. This time is over and above normal order processing or product availability.

Attachments listed in the price list are NOT interchangeable between sales models or applications. If attachments are required for a particular model or configuration but are not listed as compatible for this model in a specific price list, the order will require a DTO. This is true even when the same attachment or configuration has been ordered in the past.

A DTO will require an application and installation (A & I) marketing quote. For further information contact the Application Support Center.

Requests for special ratings not listed in the Price List should also be sent to the Application Support Center. If the special rating is possible, it may also require a DTO and could require additional processing time if the appropriate details have not yet been established.

Please keep this information in mind when discussing or quoting approximate availability to your customers.

DTO quotes are typically valid for six (6) months. If the quote expires, regardless if it has been ordered or not, a new DTO quote will be required before an order can be placed.

DEALER SPECIFIC PRICING TERMS

To obtain the latest specific conditions from Caterpillar to individual Cat dealers please use Engine Order Management Process (EOMP) quoting and order tools like ISA or PSQ. For questions or

special requests, please contact your Caterpillar representative.

TECHNICAL PERFORMANCE DATA

Technical performance data and Engine rating information is available in Power Net at https://engines.cat.com. Under the quick links, select TMI Web. Once in TMI select TMI Performance Definitions.

To request dealer specific authorization, please follow links to Engine Order Management Process (EOMP) at Caterpillar Power Net (https://engines.cat.com). CWS logon id is needed to access Power Net.

RATINGS GUIDE

The EPG Ratings Guide may be ordered through Media Logistics by calling + 1 (800) 566-7782 or + 1 (309) 266-0942. The current EPG Ratings Guide media number for Cat Generator Sets is LEXE7582 or or LEXE7581 for Olympian Generator Sets.

Current EPG ratings are also available by accessing the Electronic Media Center at https://emc.cat.com and on Power Net at https://engines.cat.com, select Electric Power then select References/Sales Tools.

ENGINE PACKAGE DESCRIPTION

ENGINE
Electrical system,12 VDC

COUPLER

The use of a quick coupler on a excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool.
For more information on Cat Pin Grabber Couplers and hydraulics refer to media number GEJQ1298 or contact CWTS at 800-255-2372.

COUPLERS

The use of a quick coupler on a excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool. Contact your Caterpillar dealer for additional information.

COUPLERS

The use of a quick coupler on a excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool. For more information on Cat Pin Grabber Couplers and hydraulics refer to media number GEJQ1298 or contact CWTS at 800-255-2372.

SHEARS

HYDRAULIC SCRAP SHEAR INFORMATION
360 degrees rotatable tool
Speed valve for faster jaw closing
Removable and reversible cutters
Easy cutting-tolerance adjustment
To have an operational demolition tool you need:
1) Hydraulic scrap shearear
2) Mounting bracketket
3) Connecting linesnes

Tool carrying machines require these hydraulic functions to operate:
1. Double or Combined function (Open/Close)
2. Low flow Double Function circuit (Rotate)
3. High Pressure boom and stick auxiliary lines (Open/Close)
4. Medium pressure boom and stick lines (Rotate)
5. Hand control or foot valve to operate open/close

Please contact CWTS for ordering assistance and consulting regarding your hydraulic requirements at 1-800-255-2372.

WARNING:
This product can create a hazard from flying objects. Caterpillar recommends installing front guarding on the cabs of the excavators. Failure to do so can lead to injury or death.

THUMBS, HYDRAULIC

To have an Operational Thumb you will need to order one part number from each section:

Section 1. Thumb Group
Section 2. Bracket Group (if machine does not have thumb ready stick)
Section 3. Thumb hydraulic lines

Machines REQUIRE these Hydraulic Functions to Operate the Thumb:

COUPLERS

The use of a quick coupler on a excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool.
For more information on Cat Pin Grabber Couplers and hydraulics refer to media number GEJQ1298 or contact CWTS at 800-255-2372.

SHEARS

HYDRAULIC SCRAP SHEAR INFORMATION
360 degrees rotatable tool
Speed valve for faster jaw closing
Removable and reversible cutters
Easy cutting-tolerance adjustment
To have an operational demolition tool you need:
1) Hydraulic scrap shear
2) Mounting bracket
3) Connecting lines

Tool carrying machines require these hydraulic functions to operate:
1. Double or Combined function (Open/Close)
2. Low flow Double Function circuit (Rotate)
3. High Pressure boom and stick auxiliary lines (Open/Close)
4. Medium pressure boom and stick lines (Rotate)
5. Hand control or foot valve to operate open/close, rotate

Please contact CWTS for ordering assistance and consulting regarding your hydraulic requirements at 1-800-255-2372.

WARNING:
This product can create a hazard from flying objects. Caterpillar recommends installing front guarding on the cabs of the excavators. Failure to do so can lead to injury or death.

FOR USE WITH "DB" FAMILY LINKAGE ONLY!!

To have an Operational Thumb you will need to order one part number from each section:

Section 1. Thumb Group (Order from Section 1)
Section 2. Bracket Group
Section 3. Thumb hydraulic lines

Machines REQUIRE these Hydraulic Functions to Operate the Thumb:

1. **Double or Combined Function Hydraulics**

For ordering assistance for both Thumbs and Hudraulics
1. dWING: https://gwtapps.cat.com/dWING/
2. Refer to the following media numbers
- **a. GEJQ0212: Thumb Product Bulletin**
- **b. GEJQ0503: Thumb Quick Reference Card**
- **c. GEJQ0215 for hydraulics**

COUPLERS

The use of a quick coupler on a excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool. Contact your For more information on Cat Pin Grabber Couplers and hydraulics refer to media number GEJQ1298 or contact CWTS at 800-255-2372.

COUPLERS

The use of a quick coupler on a excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool. Contact your Caterpillar dealer for additional information.

COUPLERS

The use of a quick coupler on a excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool. Contact your Caterpillar dealer for additional information.

ORDERING INSTRUCTIONS:

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list. You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

Lane 1 Distribution Center Arrangements
If no reference number is listed, Lane 1 configuration is not available.

Lane 2 / Lane 3 - Factory Arrangements
Machines ordered in this section will be sourced from the factory.

353-2917	**120M2 AWD MOTOR GRADER**	37,622	**$384,520**

NOTE: To be complete, your machine order must contain:
- Base machine
- Regional Packages
- Performance Packages
- Hydraulics
- Electrical
- Operator Environment
- Technology Products
- Tires
- Service Instruction
- Associated 0P Numbers

Weight and price for the no-charge items are included in the base Motor Grader weight and price. Ship weight does not include operator or fuel.

The general arrangement does not include an allowance for FULL tire and rim price or weight. Please see Mandatory Attachments for tire and rim information.

NOTE: Each Motor Grader will be shipped with a Parts Book on CD ROM. The CD will be shipped in a bag in the tool box or with other Motor Grader literature. If a paper copy is desired, please order through the dealer parts department.

HYDRAULICS

NOTE: Optional Control Locations

Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX =  Index Finger (front lift)(float capability)
MID   =  Middle Finger(dozer angle 1)
RING  =  Ring Finger (dozer angle 2)
LITTLE=  Little Finger (float capability)

HYDRAULICS (CONT.)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

(Must Select One)

Tires listed below include a set of six tires.

****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

ORDERING INSTRUCTIONS:

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list. You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

Lane 1 Distribution Center Arrangements(DCA's)
If no reference number is listed, Lane 1 configuration is not available.

To be complete,your Lane 1 machine order must at least contain:
1)Distribution Center Arrangement (DCA)
2)0P-9001 Lane 1 order
3)0P numbers for packing shipment

Effective 12 September,2011 Exact Lane 1 confinguration may also be sourced from the factory with Lane 2 Availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator Instead of 0P9001 Lane Indicator and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order.

Lane 2 / Lane 3 - Factory Arrangements
Machines ordered in this section will be sourced from the factory.

HYDRAULICS

NOTE: Optional Control Locations

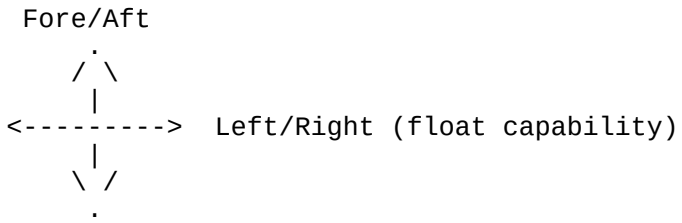
Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX =  Index Finger (front lift)(float capability)
MID   =  Middle Finger(dozer angle 1)
RING  =  Ring Finger (dozer angle 2)
LITTLE=  Little Finger (float capability)
```

NOTE: Mini-Joystick



NOTE: Ripper Control Pod

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

(Must Select One)

Tires listed below include a set of six tires.

****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change, the total machine price will be decreased or increased relative to the price of the new tire selection.

ORDERING INSTRUCTIONS:

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list. You must order your machine from Lane 1, Lane 2, or Lane 3. The lane you order from will determine capability to order additional attachments and service level you will receive.

Lane 1 Distribution Center Arrangements
If no reference number is listed, Lane 1 configuration is not available.

Lane 2 / Lane 3 - Factory Arrangements
Machines ordered in this section will be sourced from the factory.

353-2916	**120M2 MOTOR GRADER**	35,038	**$332,410**

NOTE: To be complete, your machine order must contain:
- Base machine
- Regional Packages
- Performance Packages
- Hydraulics
- Electrical
- Operator Environment
- Technology Products
- Tires
- Service Instruction
- Associated 0P Numbers

Weight and price for the no-charge items are included in the base Motor Grader weight and price. Ship weight does not include operator or fuel.

The general arrangement does not include an allowance for FULL tire and rim price or weight. Please see Mandatory Attachments for tire and rim information.

HYDRAULICS

NOTE: Optional Control Locations

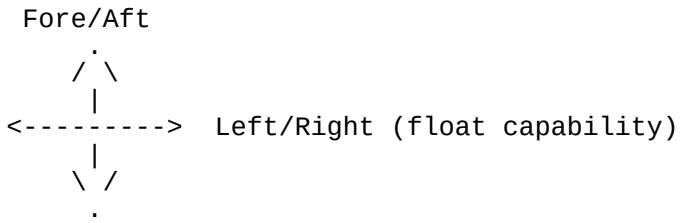
Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX =  Index Finger (front lift)(float capability)
MID   =  Middle Finger(dozer angle 1)
RING  =  Ring Finger (dozer angle 2)
LITTLE=  Little Finger (float capability)
```

NOTE: Mini-Joystick



NOTE: Ripper Control Pod

```
RH1   =  Front Lift (float capability)
RH2   =  Ripper-Scarifier Control
RHD   =  Ripper Handle Dual Switch (RH1 & RH2)

HYDRAULICS (CONT.)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

(Must Select One)

Tires listed below include a set of six tires.

****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (Angles front blade left OR right)
DA2 = Dozer Angle 2 (Angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

(Must Select Only One)

Tires listed below include a set of six tires.

****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change, the total machine price will be decreased or increased relative to the price of the new tire selection.

HYDRAULICS

NOTE: Optional Control Locations

Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX = Index Finger (front lift)(float capability)
MID = Middle Finger(dozer angle 1)
RING = Ring Finger (dozer angle 2)
LITTLE= Little Finger (float capability)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute). Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

HYDRAULICS

NOTE: Optional Control Locations

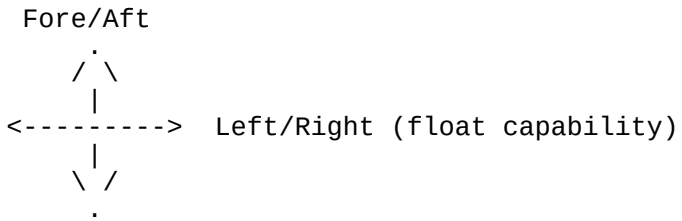
Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX = Index Finger (front lift)(float capability)
MID = Middle Finger(dozer angle 1)
RING = Ring Finger (dozer angle 2)
LITTLE= Little Finger (float capability)
```

NOTE: Mini-Joystick



NOTE: Ripper Control Pod

```
RH1   =  Front Lift (float capability)
RH2   =  Ripper-Scarifier Control
RHD   =  Ripper Handle Dual Switch (RH1 & RH2)
```

HYDRAULICS (CONT.)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

HYDRAULICS

NOTE: Optional Control Locations

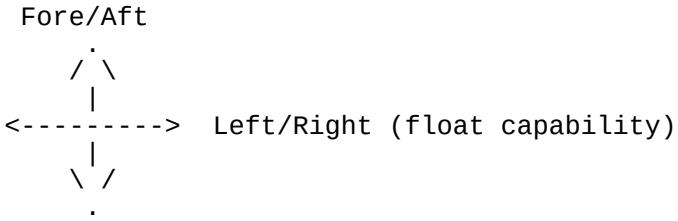
Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX = Index Finger (front lift)(float capability)
MID = Middle Finger(dozer angle 1)
RING = Ring Finger (dozer angle 2)
LITTLE= Little Finger (float capability)
```

NOTE: Mini-Joystick



NOTE: Ripper Control Pod

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute). Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

HYDRAULICS

NOTE: Optional Control Locations

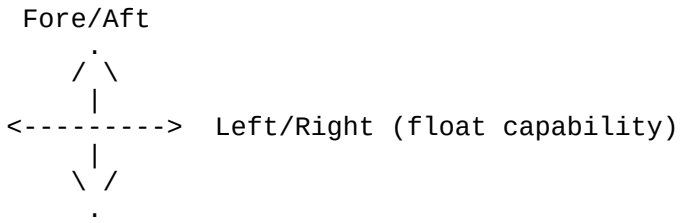
Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX = Index Finger (front lift)(float capability)
MID = Middle Finger(dozer angle 1)
RING = Ring Finger (dozer angle 2)
LITTLE= Little Finger (float capability)
```

NOTE: Mini-Joystick



NOTE: Ripper Control Pod

```
RH1   =  Front Lift (float capability)

HYDRAULICS (CONT.)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute). Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

HYDRAULICS

NOTE: Optional Control Locations

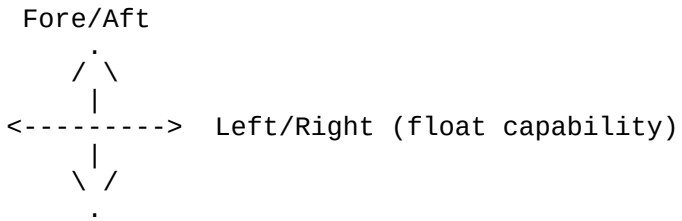
Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX = Index Finger (front lift)(float capability)
MID = Middle Finger(dozer angle 1)
RING = Ring Finger (dozer angle 2)
LITTLE= Little Finger (float capability)
```

NOTE: Mini-Joystick



NOTE: Ripper Control Pod

```
RH1   =  Front Lift (float capability)
RH2   =  Ripper-Scarifier Control
RHD   =  Ripper Handle Dual Switch (RH1 & RH2)

HYDRAULICS (CONT.)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

HYDRAULICS

NOTE: Optional Control Locations

Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX = Index Finger (front lift)(float capability)
MID = Middle Finger(dozer angle 1)
RING = Ring Finger (dozer angle 2)
LITTLE= Little Finger (float capability)
```

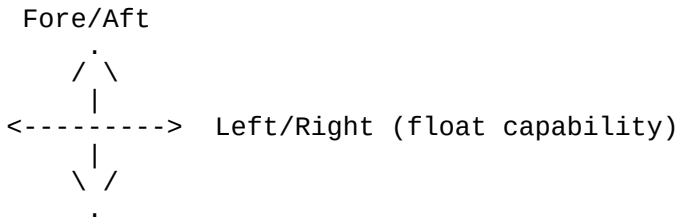
NOTE: Mini-Joystick



NOTE: Ripper Control Pod

```
RH1   =  Front Lift (float capability)
RH2   =  Ripper-Scarifier Control
RHD   =  Ripper Handle Dual Switch (RH1 & RH2)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute). Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
**** To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

HYDRAULICS

NOTE: Optional Control Locations

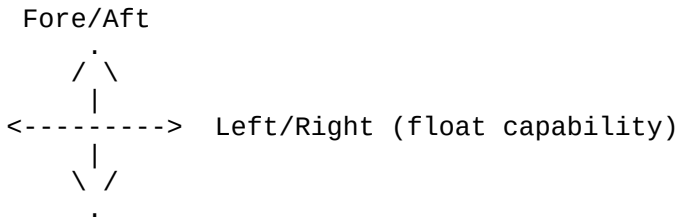
Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX = Index Finger (front lift)(float capability)
MID = Middle Finger(dozer angle 1)
RING = Ring Finger (dozer angle 2)
LITTLE= Little Finger (float capability)
```

NOTE: Mini-Joystick



NOTE: Ripper Control Pod

```
RH1   =  Front Lift (float capability)
RH2   =  Ripper-Scarifier Control
RHD   =  Ripper Handle Dual Switch (RH1 & RH2)

HYDRAULICS (CONT.)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

HYDRAULICS

NOTE: Optional Control Locations

Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

Auxiliary Pod controls

```
INDEX =  Index Finger (front lift)(float capability)
MID   =  Middle Finger(dozer angle 1)
RING  =  Ring Finger (dozer angle 2)
LITTLE=  Little Finger (float capability)

HYDRAULICS (CONT.)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

(Must Select Only One)

Tires listed below include a set of six tires.

****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (Media #AEXQ0182) available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change, the total machine price will be decreased or increased relative to the price of the new tire selection.

HYDRAULICS

NOTE: Optional Control Locations

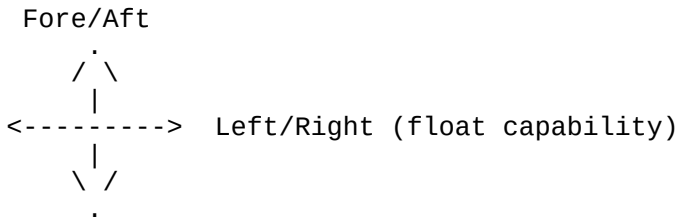
Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX = Index Finger (front lift)(float capability)
MID = Middle Finger(dozer angle 1)
RING = Ring Finger (dozer angle 2)
LITTLE= Little Finger (float capability)
```

NOTE: Mini-Joystick



NOTE: Ripper Control Pod

```
RH1   =  Front Lift (float capability)

HYDRAULICS (CONT.)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

Reference numbers below are kits used to upgrade existing motor graders with new features or technology

463-6258 KIT, JOYSTICK,ADVANCED CONTROL
Improves operational efficiency when utilizing ACCUGRADE or GRADE CONTROL X SLOPE.
Estimated install Hours: 2.5
Special Instructions: REHS8847

442-8145 KIT, ACCUMULATOR, BLADE LIFT
Provides hydraulic lines for base functions and accumulators for the blade lift. Allows approximately 1-3" of vertical blade travel to reduce impact loads. Nitrogen/oil accumulators activated by electric switch.
Estimated install Hours: 8
Special Instructions: REHS4230

466-5233 KIT, EXTENSIONS, MIRROR STD
9" extension from Current Mirror, adds 2 additional mirrors, 1 for front visibility and 1 rear visibility
Estimated install Hours: 2

466-5255 KIT, EXTENSIONS, MIRROR HEATED
9" extension from Current Mirror, adds 2 additional mirrors 1 for front visibility and 1 rear visibility. Heated to keep free of ice and snow in cold weather

HYDRAULICS

NOTE: Optional Control Locations

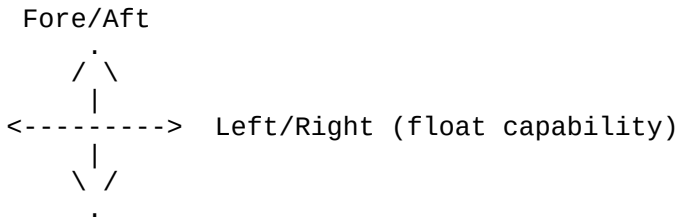
Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

NOTE: Auxiliary controls that can have float

Auxiliary Pod Controls

```
INDEX = Index Finger (front lift)(float capability)
MID = Middle Finger(dozer angle 1)
RING = Ring Finger (dozer angle 2)
LITTLE= Little Finger (float capability)
```

NOTE: Mini-Joystick



NOTE: Ripper Control Pod

```
RH1   =  Front Lift (float capability)
RH2   =  Ripper-Scarifier Control
RHD   =  Ripper Handle Dual Switch (RH1 & RH2)
```

HYDRAULICS (CONT.)

NOTE: Common Functions

COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

FL = Front Lift (moves front work tools up/down)
DA1 = Dozer Angle 1 (angles front blade left OR right)
DA2 = Dozer Angle 2 (angles front blade left AND right)
RIP = Rear Mounted Ripper (moves ripper up/down)
MMS = Mid-Mounted Scarifier
WM = Wing Mast
WT = Wing Tilt
Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A* in LPM (liters per minute).

*NOTE: Each valve section has two work ports (Port A and Port B).
Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.
Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.
****To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**
All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs on schedule, maintain equipment condition and reduce the costs of owning and operating your fleet. Availability varies by country. Please contact your Cat marketing representative with questions.

L **441-4819** **PRODUCT LINK, CELLULAR PL641** . . . . . 0 **$870 NET**
Product Link Pro series PL641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.

WORK TOOLS

To view and order all available Work Tool Selections refer to WT-SSL or WT-HAMR price lists.
NOTE: Work Tools, except Hammers, are sourced via Caterpillar parts distribution system.
CMOPS orders for Skid Steer Loaders and Work Tools MUST be ordered separately.

474-5632 KIT, SINGLE POINT LIFT
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 KIT, FOPS LEVEL 2 W/ 4 PT LIFT
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 2 hours
Refer to media number REHS8718 for appropriate parts list.

Available Through ANTARES Parts Ordering.

NOTE: US & Canada ONLY may place orders in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.
When ordering via CMOPS include top level reference numbers (0P-3622) and 0P number for packing.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

474-5632 KIT, SINGLE POINT LIFT
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 KIT, FOPS LEVEL 2 W/ 4 PT LIFT
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 2 hours
Refer to media number REHS8718 for appropriate parts list.

Available Through ANTARES Parts Ordering.

NOTE: US & Canada ONLY may place orders in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.
When ordering via CMOPS include top level reference numbers (0P-3623) and 0P number for packing.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

345-6070 KIT, FOPS, LEVEL 2
For proper installation, refer to media number REHS8703.
Falling Object Protective Structure level 2.
Provides additional overhead protection.
Recommended for use in demolition applications.
Meets ISO 3449: 1992

474-5632 KIT, SINGLE POINT LIFT
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 KIT, FOPS LEVEL 2 W/ 4 PT LIFT
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

466-1959 KIT, CCB HEATER
Required for operating in temperatures BELOW -32C (-18F). Provides a second heater for the engine closed crankcase breather (CCB) system.
Estimated time to install: 1.0 Hr

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 1 hour

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs on schedule, maintain equipment condition and reduce the costs of owning and operating your fleet. Availability varies by country. Please contact your Cat marketing representative with questions.

L **441-4819** **PRODUCT LINK, CELLULAR PL641** . . . . . 0 **$870 NET**
Product Link Pro series PL641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.

WORK TOOLS

To view and order all available Work Tool Selections refer to WT-SSL or WT-HAMR price lists.
NOTE: Work Tools, except Hammers, are sourced via Caterpillar parts distribution system.
CMOPS orders for Compact Track Loaders and Work Tools MUST be ordered separately.

FLUIDS

FIELD INSTALLED ATTACHMENTS (CONT.)

Available Through Parts Distribution. (Cont.)

418-5883 KIT, FOPS LEVEL 2 W/ 4 PT LIFT
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 2 hours
Refer to media number REHS8718 for appropriate parts list.

Available Through ANTARES Parts Ordering.

NOTE: US & Canada ONLY may place orders in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.
When ordering via CMOPS include top level reference numbers (0P-3625) and 0P number for packing.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

388-8283 **KIT, RADIO, READY** . . . . . 0 **$149 NI**
For proper installation, refer to media number REHS8710.
Provides Speakers, Wiring, Radio Box, Antenna & Cable, and hardware required to install a single DIN radio.
Estimated time to install: 1 hour

388-8286 **KIT, RADIO, AM/FM/BLUETOOTH** . . . . . 0 **$572 NI**
For proper installation, refer to media number REHS8705.
Includes radio with Bluetooth interface, microphone and auxiliary inputs (USB port and aux input jack) to connect external audio devices.
Requires: Radio Ready operator station.
Estimated time to install: 45 minutes

458-0074 **KIT, DEBRIS BARRIER** . . . . . 0 **$1,939 NI**
For proper installation, refer to media number REHS9186.
This kit provides additional protection for customers in debris intensive applications by restricting debris and other material from entering the engine compartment and the lower frame.
This kit contains various seals and covers that are designed to cover the openings that exist between the frame, body, cab and rear door of the machine. This kit also includes front and rear light guards, exhaust stack guard, lockable hydraulic fill cap door and quick disconnect guard.
Estimated time to install: 11 hours

388-7849 **KIT, A/C BREATHER** . . . . . 0 **$339 NI**
For proper installation, refer to media number REHS5802.
This kit provides increased cab air filter life for machines used in dusty or high airborne debris applications. Kit contains duct work and hardware required to relocate the cab fresh air intake to a higher location near the roof of the cab.
Estimated time to install: 30 minutes

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

480-2215 **KIT, DEBRIS PROTECTION** . . . . . 0 **$1,417 NI**
For proper installation, refer to media number SEHS0151.
This kit provides additional protection for customers in debris intensive applications by restricting debris and other material from entering the engine compartment and the lower machine frame.
Provided are various seals and covers that are designed to cover the openings that exist between the frame/body/cab of the machine as well as a fuel strainer and an exhaust stack cover.
Also recommended: Turbo Debris Guard Kit
Note: If additional component protection is required, please refer to the Guarding Kit.
Estimated time to install: 7 hours

480-2217 **KIT, GUARDING** . . . . . 0 **$485 NI**
For proper installation, refer to media number SEHS0153.
This kit provides additional guarding for customers in demanding applications where extra component protection is required. This kit provides guarding for the front work lights, rear work lights, auxiliary hydraulic connections, work tool electrical harness connection and work tool coupler area.
Note: If additional debris protection is required, please refer to the Debris Protection Kit.
Estimated time to install: 1.5 hours

388-7849 **KIT, A/C BREATHER** . . . . . 0 **$339 NI**
For proper installation, refer to media number REHS5802.
This kit provides increased cab air filter life for machines used in dusty or high airborne debris applications. Kit contains duct work and hardware required to relocate the cab fresh air intake to a higher location near the roof of the cab.
Estimated time to install: 30 minutes

415-2795 **KIT,ENG AIR INTAKE, PRECLEANER** . . . . . 0 **$743 NI**

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs on schedule, maintain equipment condition and reduce the costs of owning and operating your fleet. Availability varies by country. Please contact your Cat marketing representative with questions.

L **441-4819** **PRODUCT LINK, CELLULAR PL641** . . . . . 0 **$870 NET**
Product Link Pro series PL641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.

WORK TOOLS

To view and order all available Work Tool Selections refer to WT-SSL or WT-HAMR price lists.
NOTE: Work Tools, except Hammers, are sourced via Caterpillar parts distribution system.
CMOPS orders for Compact Track Loaders and Work Tools MUST be ordered separately.

418-5883 KIT, FOPS LEVEL 2 W/ 4 PT LIFT
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 2 hours
Refer to media number REHS8718 for appropriate parts list.

Available Through ANTARES Parts Ordering.

NOTE: US & Canada ONLY may place orders in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.
When ordering via CMOPS include top level reference numbers (0P-3627) and 0P number for packing.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 **KIT, FOPS LEVEL 2 W/ 4 PT LIFT**
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

466-1959 **KIT, CCB HEATER**
Required for operating in temperatures BELOW -32C (-18F). Provides a second heater for the engine closed crankcase breather (CCB) system.
Estimated time to install: 1.0 Hr

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

480-2216 **KIT, DEBRIS PROTECTION** . . . . . 0 **$2,146 NI**
For proper installation, refer to media number SEHS0152.
This kit provides additional protection for customers in debris intensive applications by restricting debris and other material from entering the engine compartment and the lower machine frame.
Provided are various seals and covers that are designed to cover the openings that exist between the frame/body/cab of the machine as well as a fuel strainer and an exhaust stack cover.
Also recommended: Turbo Debris Guard Kit
Note: If additional component protection is required, please refer to the Guarding Kit.
Estimated time to install: 7 hours

480-2217 **KIT, GUARDING** . . . . . 0 **$485 NI**
For proper installation, refer to media number SEHS0153.
This kit provides additional guarding for customers in demanding applications where extra component protection is required. This kit provides guarding for the front work lights, rear work lights, auxiliary hydraulic connections, work tool electrical harness connection and work tool coupler area.
Note: If additional debris protection is required, please refer to the Debris Protection Kit.
Estimated time to install: 1.5 hours

388-7849 **KIT, A/C BREATHER** . . . . . 0 **$339 NI**
For proper installation, refer to media number REHS5802.
This kit provides increased cab air filter life for machines used in dusty or high airborne debris applications. Kit contains duct work and hardware required to relocate the cab fresh air intake to a higher location near the roof of the cab.
Estimated time to install: 30 minutes

415-2795 **KIT,ENG AIR INTAKE, PRECLEANER** . . . . . 0 **$743 NI**
For proper installation, refer to media number REHS5798.
Turbine-type precleaner for the engine air filter. For use in high dust/debris applications.
Estimated time to install: 1 hour

416-5705 **KIT, TURBO DEBRIS GUARD** . . . . . 0 **$360 NI**
For proper installation, refer to media number REHS7828.
This kit contains a steel mesh guard that is designed to cover the exhaust manifold and turbocharger. The guard provides a second level of protection, by preventing any material that does enter the engine compartment from collecting on the hot surfaces of the exhaust manifold and turbocharger. It is recommended that the turbo guard kit be used in conjunction with the debris barrier kit.
Estimated time to install: 1 hour 30 minutes

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Effective 12 September, 2011 some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

LANE 2 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2 configuration is not available.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs on schedule, maintain equipment condition and reduce the costs of owning and operating your fleet. Availability varies by country. Please contact your Cat marketing representative with questions.

L **441-4819** **PRODUCT LINK, CELLULAR PL641** . . . . . 0 **$870 NET**
Product Link Pro series PL641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.

WORK TOOLS

345-6070 **KIT, FOPS, LEVEL 2**
For proper installation, refer to media number REHS8703.
Falling Object Protective Structure level 2.
Provides additional overhead protection.
Recommended for use in demolition applications.
Meets ISO 3449: 1992

474-5632 **KIT, SINGLE POINT LIFT**
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 **KIT, FOPS LEVEL 2 W/ 4 PT LIFT**
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

345-3590 **KIT,ENG AIR INTAKE, PRECLEANER**
Turbine-type precleaner for use in high dust/debris applications
For proper installation, refer to media number REHS5764.
Estimated time to install: 45 minutes

388-6660 **KIT, TURBO DEBRIS GUARD**
For proper installation, refer to media number REHS5793.
This kit contains steel mesh guards that are desinged to cover the exhaust manifold and turbocharger. The guards provide a second level of protection, by preventing any material that does enter the engine compartment from collecting on the hot surfaces of the exhaust manifold and turbocharger. It is recommended that the turbo guard kit be used in conjunction with the debris barrier kit.
Estimated time to install: 1 hour 30 minutes

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $200 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

388-6660 KIT, TURBO DEBRIS GUARD
For proper installation, refer to media number REHS5793.
This kit contains steel mesh guards that are desinged to cover the exhaust manifold and turbocharger. The guards provide a second level of protection, by preventing any material that does enter the engine compartment from collecting on the hot surfaces of the exhaust manifold and turbocharger. It is recommended that the turbo guard kit be used in conjunction with the debris barrier kit.
Estimated time to install: 1 hour 30 minutes

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 1 hour
Refer to media number REHS8718 for appropriate parts list.

Available Through ANTARES Parts Ordering.

NOTE: US & Canada ONLY may place orders in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Effective 12 September, 2011 some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

ORDERING INSTRUCTIONS

272D2 SKID STEER LOADER XHP SANFORD, NC, USA	Ship Weight lbs	LIST PRICE AT DEALER

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Effective 12 September, 2011 some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

462-6000 **KIT, DEBRIS PROTECTION** . . . . . 0 **$1,775 NI**

For proper installation, refer to media number REHS9195.
This kit provides additional protection for customers in debris intensive applications by restricting debris and other material from entering the engine compartment and the lower machine frame. Provided are various seals and covers that are designed to cover the openings that exist between the frame/body/cab of the machine as well as a fuel strainer and an exhaust stack cover.
Also recommended: Turbo Debris Guard Kit
Note: If additional component protection is required, please refer to the Guarding Kit.
Estimated time to install: 7 hours

472-2965 **KIT, GUARDING** . . . . . 0 **$642 NI**

For proper installation, refer to media number REHS9959.
This kit provides additional guarding for customers in demanding applications where extra component protection is required. This kit provides guarding for the front work lights, rear work lights, auxiliary hydraulic connections, work tool electrical harness connection and work tool coupler area.
Note: If additional debris protection is required, please refer to the Debris Protection Kit.
Estimated time to install: 1.5 hours

388-7849 **KIT, A/C BREATHER** . . . . . 0 **$339 NI**

For proper installation, refer to media number REHS5802.
This kit provides increased cab air filter life for machines used in dusty or high airborne debris applications. Kit contains duct work and hardware required to relocate the cab fresh air intake to a higher location near the roof of the cab.
Estimated time to install: 30 minutes

444-6050 **KIT, TURBO DEBRIS GUARD** . . . . . 0 **$285 NI**

For proper installation, refer to media number REHS9969.
This kit contains a steel mesh guard that is designed to cover the exhaust manifold and turbocharger. The guard provides a second level of protection, by preventing any material that does enter the engine compartment from collecting on the hot surfaces of the exhaust manifold and turbocharger. It is recommended that the turbo guard kit be used in conjunction with the debris barrier kit.
Estimated time to install: 1 hour 30 minutes

416-5965 **KIT,ENG AIR INTAKE, PRECLEANER** . . . . . 0 **$467 NI NET**

For proper installation, refer to media number REHS8735.

433-9697 **TANK, WATER**
Mounted to top of cab
42 gallon capacity
Includes tank, pump, filter, lines, mounting brackets and quick disconnect
For proper installation, refer to media number REHS7826.
Estimated time to install: 9 hours 30 minutes
Water Sprinkler Kit: Angle Broom
Pick Up Broom
Utility Broom
Cold Planer
CANNOT BE USED WITH: KIT, LIFTING EYES, FOUR POINT

345-6070 **KIT, FOPS, LEVEL 2**
For proper installation, refer to media number REHS8703.
Falling Object Protective Structure level 2.
Provides additional overhead protection.
Recommended for use in demolition applications.
Meets ISO 3449: 1992

474-5632 **KIT, SINGLE POINT LIFT**
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 **KIT, FOPS LEVEL 2 W/ 4 PT LIFT**
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

466-1959 **KIT, CCB HEATER**
Required for operating in temperatures BELOW -32C (-18F). Provides a second heater for the engine closed crankcase breather (CCB) system.
Estimated time to install: 1.0 Hr

454-6081 **KIT, GENERAL DUTY TRACK**
General Duty Rubber Tracks provide a value track option, that can help lower owner and operating costs for customers with lower hour accumulation.
Consists of two 420-9877 (18") general duty tracks. Compatible with 277/287/297C/C2/D.

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 1 hour
Refer to media number REHS8718 for appropriate parts list.

Available Through ANTARES Parts Ordering.

NOTE: US & Canada ONLY may place orders in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.

480-2215 **KIT, DEBRIS PROTECTION** . . . . . 0 **$1,417 NI**
For proper installation, refer to media number SEHS0151.
This kit provides additional protection for customers in debris intensive applications by restricting debris and other material from entering the engine compartment and the lower machine frame.
Provided are various seals and covers that are designed to cover the openings that exist between the frame/body/cab of the machine as well as a fuel strainer and an exhaust stack cover.
Also recommended: Turbo Debris Guard Kit
Note: If additional component protection is required, please refer to the Guarding Kit.
Estimated time to install: 7 hours

480-2217 **KIT, GUARDING** . . . . . 0 **$485 NI**
For proper installation, refer to media number SEHS0153.
This kit provides additional guarding for customers in demanding applications where extra component protection is required. This kit provides guarding for the front work lights, rear work lights, auxiliary hydraulic connections, work tool electrical harness connection and work tool coupler area.
Note: If additional debris protection is required, please refer to the Debris Protection Kit.
Estimated time to install: 1.5 hours

388-7849 **KIT, A/C BREATHER** . . . . . 0 **$339 NI**
For proper installation, refer to media number REHS5802.
This kit provides increased cab air filter life for machines used in dusty or high airborne debris applications. Kit contains duct work and hardware required to relocate the cab fresh air intake to a higher location near the roof of the cab.
Estimated time to install: 30 minutes

415-2795 **KIT,ENG AIR INTAKE, PRECLEANER** . . . . . 0 **$743 NI**

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 1 hour
Refer to media number REHS8718 for appropriate parts list.

Available Through ANTARES Parts Ordering.

NOTE: US & Canada ONLY may place orders in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.
When ordering via CMOPS include top level reference numbers (0P-2734) and 0P number for packing.

480-2215 **KIT, DEBRIS PROTECTION** . . . . . 0 **$1,417 NI**
For proper installation, refer to media number SEHS0151.
This kit provides additional protection for customers in debris intensive applications by restricting debris and other material from entering the engine compartment and the lower machine frame.
Provided are various seals and covers that are designed to cover the openings that exist between the frame/body/cab of the machine as well as a fuel strainer and an exhaust stack cover.
Also recommended: Turbo Debris Guard Kit
Note: If additional component protection is required, please refer to the Guarding Kit.
Estimated time to install: 7 hours

480-2217 **KIT, GUARDING** . . . . . 0 **$485 NI**
For proper installation, refer to media number SEHS0153.
This kit provides additional guarding for customers in demanding applications where extra component protection is required. This kit provides guarding for the front work lights, rear work lights, auxiliary hydraulic connections, work tool electrical harness connection and work tool coupler area.
Note: If additional debris protection is required, please refer to the Debris Protection Kit.
Estimated time to install: 1.5 hours

388-7849 **KIT, A/C BREATHER** . . . . . 0 **$339 NI**
For proper installation, refer to media number REHS5802.
This kit provides increased cab air filter life for machines used in dusty or high airborne debris applications. Kit contains duct work and hardware required to relocate the cab fresh air intake to a higher location near the roof of the cab.
Estimated time to install: 30 minutes

415-2795 **KIT,ENG AIR INTAKE, PRECLEANER** . . . . . 0 **$743 NI**

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

LANE 2 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2 configuration is not available.

345-5287	**287D MTL TIER 4 FINAL HRC** . . . . . 0 Available for ADSD-N and EU		**$78,740**
0P-2733	**287D MISC MATERIAL SANFORD** . . . . . 0 Use this top level reference number only when ordering KITS in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.		**NC**

Work Tools are sourced via Caterpillar Parts Distribution system. Skid Steer Loader and Work Tools order REQUIRE individual CMOPS order entries. Zeebrugge Distribution Center (ZDC) orders do NOT require individual CMOPS order entries and may include both the machine and work tool orders.

Refer to WT_SSL price list to order Work Tools.

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 1 hour
Refer to media number REHS8718 for appropriate parts list.

Available Through ANTARES Parts Ordering.

NOTE: US & Canada ONLY may place orders in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.
When ordering via CMOPS include top level reference numbers (0P-2733) and 0P number for packing.

480-2216 **KIT, DEBRIS PROTECTION** . . . . . 0 **$2,146 NI**
For proper installation, refer to media number SEHS0152.
This kit provides additional protection for customers in debris intensive applications by restricting debris and other material from entering the engine compartment and the lower machine frame.
Provided are various seals and covers that are designed to cover the openings that exist between the frame/body/cab of the machine as well as a fuel strainer and an exhaust stack cover.
Also recommended: Turbo Debris Guard Kit
Note: If additional component protection is required, please refer to the Guarding Kit.
Estimated time to install: 7 hours

480-2217 **KIT, GUARDING** . . . . . 0 **$485 NI**
For proper installation, refer to media number SEHS0153.
This kit provides additional guarding for customers in demanding applications where extra component protection is required. This kit provides guarding for the front work lights, rear work lights, auxiliary hydraulic connections, work tool electrical harness connection and work tool coupler area.
Note: If additional debris protection is required, please refer to the Debris Protection Kit.
Estimated time to install: 1.5 hours

388-7849 **KIT, A/C BREATHER** . . . . . 0 **$339 NI**
For proper installation, refer to media number REHS5802.
This kit provides increased cab air filter life for machines used in dusty or high airborne debris applications. Kit contains duct work and hardware required to relocate the cab fresh air intake to a higher location near the roof of the cab.
Estimated time to install: 30 minutes

415-2795 **KIT,ENG AIR INTAKE, PRECLEANER** . . . . . 0 **$743 NI**
For proper installation, refer to media number REHS5798.
Turbine-type precleaner for the engine air filter. For use in high dust/debris applications.
Estimated time to install: 1 hour

416-5705 **KIT, TURBO DEBRIS GUARD** . . . . . 0 **$360 NI**
For proper installation, refer to media number REHS7828.
This kit contains a steel mesh guard that is designed to cover the exhaust manifold and turbocharger. The guard provides a second level of protection, by preventing any material that does enter the engine compartment from collecting on the hot surfaces of the exhaust manifold and turbocharger. It is recommended that the turbo guard kit be used in conjunction with the debris barrier kit.
Estimated time to install: 1 hour 30 minutes

456-5190 **KIT, DOOR, HYD FILL CAP** . . . . . 0 **$82 NI**

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

433-9697 **TANK, WATER**
Mounted to top of cab
42 gallon capacity
Includes tank, pump, filter, lines, mounting brackets and quick disconnect
For proper installation, refer to media number REHS7826.
Estimated time to install: 9 hours 30 minutes
Water Sprinkler Kit: Angle Broom
Pick Up Broom
Utility Broom
Cold Planer
CANNOT BE USED WITH: KIT, LIFTING EYES, FOUR POINT

345-6070 **KIT, FOPS, LEVEL 2**
For proper installation, refer to media number REHS8703.
Falling Object Protective Structure level 2.
Provides additional overhead protection.
Recommended for use in demolition applications.
Meets ISO 3449: 1992

474-5632 **KIT, SINGLE POINT LIFT**
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 **KIT, FOPS LEVEL 2 W/ 4 PT LIFT**
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

466-1959 **KIT, CCB HEATER**
Required for operating in temperatures BELOW -32C (-18F). Provides a second heater for the engine closed crankcase breather (CCB) system.
Estimated time to install: 1.0 Hr

454-6085 **KIT, GENERAL DUTY TRACK**
General Duty Rubber Tracks provide a value track option, that can help lower owner and operating costs for customers with lower hour accumulation.

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $255 USD Dealer Net (August, 2013). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $843 USD Dealer Net (August, 2013). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 1 hour
Refer to media number REHS8718 for appropriate parts list.

Available Through ANTARES Parts Ordering.

NOTE: US & Canada ONLY may place orders in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.

480-2216 **KIT, DEBRIS PROTECTION** . . . . . 0 **$2,146 NI**
For proper installation, refer to media number SEHS0152.
This kit provides additional protection for customers in debris intensive applications by restricting debris and other material from entering the engine compartment and the lower machine frame.
Provided are various seals and covers that are designed to cover the openings that exist between the frame/body/cab of the machine as well as a fuel strainer and an exhaust stack cover.
Also recommended: Turbo Debris Guard Kit
Note: If additional component protection is required, please refer to the Guarding Kit.
Estimated time to install: 7 hours

480-2217 **KIT, GUARDING** . . . . . 0 **$485 NI**
For proper installation, refer to media number SEHS0153.
This kit provides additional guarding for customers in demanding applications where extra component protection is required. This kit provides guarding for the front work lights, rear work lights, auxiliary hydraulic connections, work tool electrical harness connection and work tool coupler area.
Note: If additional debris protection is required, please refer to the Debris Protection Kit.
Estimated time to install: 1.5 hours

388-7849 **KIT, A/C BREATHER** . . . . . 0 **$339 NI**
For proper installation, refer to media number REHS5802.
This kit provides increased cab air filter life for machines used in dusty or high airborne debris applications. Kit contains duct work and hardware required to relocate the cab fresh air intake to a higher location near the roof of the cab.
Estimated time to install: 30 minutes

415-2795 **KIT,ENG AIR INTAKE, PRECLEANER** . . . . . 0 **$743 NI**

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Effective 12 September, 2011 some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

LANE 2 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2 configuration is not available.

435-9097	**297D MULTI TERRAIN LOADER** . . . . . 0 Available for ADSD-N, EU and APD (Australia/New Zealand only)	**$87,430**
0P-3529	**297D MISC. MATERIAL** . . . . . 0 Use this top level reference number only when ordering KITS in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.	**NC**

Work Tools are sourced via Caterpillar Parts Distribution system. Skid Steer Loader and Work Tools order REQUIRE individual CMOPS order entries. Zeebrugge Distribution Center (ZDC) orders do NOT require individual CMOPS order entries and may include both the machine and work tool orders.

Refer to WT_SSL price list to order Work Tools.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs on schedule, maintain equipment condition and reduce the costs of owning and operating your fleet. Availability varies by country. Please contact your Cat marketing representative with questions.

L **441-4819** **PRODUCT LINK, CELLULAR PL641** . . . . . 0 **$870 NET**
Product Link Pro series PL641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.

WORK TOOLS

To view and order all available Work Tool Selections refer to WT-SSL or WT-HAMR price lists.
NOTE: Work Tools, except Hammers, are sourced via Caterpillar parts distribution system.
CMOPS orders for Compact Track Loaders and Work Tools MUST be ordered separately.

345-6070 KIT, FOPS, LEVEL 2
For proper installation, refer to media number REHS8703.
Falling Object Protective Structure level 2.
Provides additional overhead protection.
Recommended for use in demolition applications.
Meets ISO 3449: 1992

474-5632 KIT, SINGLE POINT LIFT
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 KIT, FOPS LEVEL 2 W/ 4 PT LIFT
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

345-3590 KIT,ENG AIR INTAKE, PRECLEANER
Turbine-type precleaner for use in high dust/debris applications
For proper installation, refer to media number REHS5764.
Estimated time to install: 45 minutes

388-6660 KIT, TURBO DEBRIS GUARD
For proper installation, refer to media number REHS5793.
This kit contains steel mesh guards that are desinged to cover the exhaust manifold and turbocharger. The guards provide a second level of protection, by preventing any material that does enter the engine compartment from collecting on the hot surfaces of the exhaust manifold and turbocharger. It is recommended that the turbo guard kit be used in conjunction with the debris barrier kit.
Estimated time to install: 1 hour 30 minutes

454-6081 KIT, GENERAL DUTY TRACK
General Duty Rubber Tracks provide a value track option, that can help lower owner and operating costs for customers with lower hour accumulation.
Consists of two 420-9877 (18") general duty tracks. Compatible with 277/287/297C/C2/D.

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

LIST PRICE AT DEALER

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Effective 12 September, 2011 some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

LANE 2 FACTORY ARRANGEMENTS
If no reference number is listed, a Lane 2 configuration is not available.

345-6070 **KIT, FOPS, LEVEL 2**
For proper installation, refer to media number REHS8703.
Falling Object Protective Structure level 2.
Provides additional overhead protection.
Recommended for use in demolition applications.
Meets ISO 3449: 1992
CANNOT BE USED WITH: Auxiliary Hydraulic Cooler

474-5632 **KIT, SINGLE POINT LIFT**
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 **KIT, FOPS LEVEL 2 W/ 4 PT LIFT**
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

345-3590 **KIT,ENG AIR INTAKE, PRECLEANER**
Turbine-type precleaner for use in high dust/debris applications
For proper installation, refer to media number REHS5764.
Estimated time to install: 45 minutes

388-6660 **KIT, TURBO DEBRIS GUARD**
For proper installation, refer to media number REHS5793.
This kit contains steel mesh guards that are desinged to cover the exhaust manifold and turbocharger. The guards provide a second level of protection, by preventing any material that does enter the engine compartment from collecting on the hot surfaces of the exhaust manifold and turbocharger. It is recommended that the turbo guard kit be used in conjunction with the debris barrier kit.
Estimated time to install: 1 hour 30 minutes

454-6081 **KIT, GENERAL DUTY TRACK**
General Duty Rubber Tracks provide a value track option, that can help lower owner and operating costs for customers with lower hour accumulation.
Consists of two 420-9877 (18") general duty tracks. Compatible with 277/287/297C/C2/D.

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Effective 12 September, 2011 some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

LANE 2 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2 configuration is not available.

435-8997	**297D2 MULTI TERRAIN LOADER** . . . . . 0 Available for ADSD-N, EU and APD (Australia/New Zealand only)		**$93,440**
0P-3618	**297D2 MISC MATERIAL** . . . . . 0 Use this top level reference number only when ordering KITS in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.		**NC**

Work Tools are sourced via Caterpillar Parts Distribution system. Skid Steer Loader and Work Tools order REQUIRE individual CMOPS order entries. Zeebrugge Distribution Center (ZDC) orders do NOT require individual CMOPS order entries and may include both the machine and work tool orders.

Refer to WT_SSL price list to order Work Tools.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs on schedule, maintain equipment condition and reduce the costs of owning and operating your fleet. Availability varies by country. Please contact your Cat marketing representative with questions.

L **441-4819** **PRODUCT LINK, CELLULAR PL641** . . . . . 0 **$870 NET**
Product Link Pro series PL641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.

WORK TOOLS

To view and order all available Work Tool Selections refer to WT-SSL or WT-HAMR price lists.
NOTE: Work Tools, except Hammers, are sourced via Caterpillar parts distribution system.
CMOPS orders for Compact Track Loaders and Work Tools MUST be ordered separately.

345-6070 KIT, FOPS, LEVEL 2
For proper installation, refer to media number REHS8703.
Falling Object Protective Structure level 2.
Provides additional overhead protection.
Recommended for use in demolition applications.
Meets ISO 3449: 1992

474-5632 KIT, SINGLE POINT LIFT
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 KIT, FOPS LEVEL 2 W/ 4 PT LIFT
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

454-6081 KIT, GENERAL DUTY TRACK
General Duty Rubber Tracks provide a value track option, that can help lower owner and operating costs for customers with lower hour accumulation.
Consists of two 420-9877 (18") general duty tracks. Compatible with 277/287/297C/C2/D.

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $212 USD Dealer Net (February, 2015). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

The 258-4110 KIT, SELECT PATTERN CONTROL and 292-7927 KIT, DEDICATED ALT. PATTERN are no longer available for order as a kit. The components required are available for order from the Parts Department. This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password.

For the DEDICATED ALTERNATE PATTERN:
The SEA cost to enable the feature via password is approximately $265 USD Dealer Net (February, 2015). Configures the machine to operate using the alternative "H" control pattern only. The operator MAY NOT choose between two patterns. Estimated time to install: 30 minutes
Refer to media number REHS8719 for appropriate parts list.

For the SELECTABLE PATTERN CONTROL:
The SEA cost to enable the feature via password is approximately $876 USD Dealer Net (February, 2015). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 2 hours
Refer to media number REHS8718 for appropriate parts list.

LIST PRICE AT DEALER

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Effective 12 September, 2011 some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

LANE 2 FACTORY ARRANGEMENTS
If no reference number is listed, a Lane 2 configuration is not available.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1 or Lane 2.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

No orders will be accepted for DCAs until official communication via Marketing bulletin that the DCA order board is open.
If no reference number is listed, a Lane 1 configuration is not available.

Effective 12 September, 2011 some exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order. For this model no Lane 1 configurations from Zeebrugge Distribution Center (ZDC) may be ordered from the factory.

LANE 2 FACTORY ARRANGEMENTS

If no reference number is listed, a Lane 2 configuration is not available.

422-3299	**299D COMPACT TRACK LOADER** . . . . . 0 Available for ADSD-N, EU and APD (Australia/New Zealand only)		**$83,250**
0P-2742	**299D MISC MATERIAL SANFORD** . . . . . 0 Use this top level reference number only when ordering KITS in CMOPS to be transferred via the bridge to ANTARES Parts Ordering.		**NC**

Work Tools are sourced via Caterpillar Parts Distribution system. Skid Steer Loader and Work Tools order REQUIRE individual CMOPS order entries. Zeebrugge Distribution Center (ZDC) orders do NOT require individual CMOPS order entries and may include both the machine and work tool orders.

Refer to WT_SSL price list to order Work Tools.

345-6070 KIT, FOPS, LEVEL 2
For proper installation, refer to media number REHS8703.
Falling Object Protective Structure level 2.
Provides additional overhead protection.
Recommended for use in demolition applications.
Meets ISO 3449: 1992

474-5632 KIT, SINGLE POINT LIFT
Contains parts that attach to cab roof and allow machine to be lifted from a single point. The part number provided is for reference only. Individual parts must be ordered to install this device. Please reference REHS9970 for parts list and installation instructions.

418-5883 KIT, FOPS LEVEL 2 W/ 4 PT LIFT
For proper installation, refer to media number REHS9989.
This kit combines the Falling Object Protective Structure level 2 and 4 point lifting functionality. Recommended for use in applications where additional overhead protection and 4 point lifting are both desired (ex. demolition).

376-8077 KIT, STEEL TRACK
For proper installation, refer to media REHS5766.
This kit contains all needed components for a dealer installation of a steel track undercarriage. Kit includes triple grouser steel tracks (SALT; 15.7 in. wide), sprockets, idler wheels, roller wheels and carrier rollers.
Estimated time to install: 10 hours
** Not for use with EU dealers

345-3590 KIT,ENG AIR INTAKE, PRECLEANER
Turbine-type precleaner for use in high dust/debris applications
For proper installation, refer to media number REHS5764.
Estimated time to install: 45 minutes

388-6660 KIT, TURBO DEBRIS GUARD
For proper installation, refer to media number REHS5793.
This kit contains steel mesh guards that are desinged to cover the exhaust manifold and turbocharger. The guards provide a second level of protection, by preventing any material that does enter the engine compartment from collecting on the hot surfaces of the exhaust manifold and turbocharger. It is recommended that the turbo guard kit be used in conjunction with the debris barrier kit.
Estimated time to install: 1 hour 30 minutes

454-6086 KIT, GENERAL DUTY TRACK
General Duty Rubber Tracks provide a value track option, that can help lower owner and operating costs for customers with lower hour accumulation.
Consists of two 372-5798 (450mm) general duty tracks. Compatible with 279/289/299C and 299D.

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately $205 USD Dealer Net (August, 2013). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.
