

Project locations are provided by applicants. Case and construction status is determined by the case filings. The nameplate capacity shown in the legend is the maximum capacity in megawatts (MW) that could be built based on the number of approved photovoltaic panels and the highest nameplate capacity of the approved panel models. The estimated project size is shown in acres. Pre-Application project locations, capacity, and acreage may be approximated. MW and acreage totals in the legend represent the entire State of Ohio.

*Project application contains a battery storage component. Capacity values in the legend do not represent any portion of battery storage.
