

# TRAFFIC SAFETY BULLETIN

## OCTOBER 2024

### Pedestrian Safety

**Map and Table:**  
**2019-2024 YTD<sup>1</sup>**  
**Pedestrian-Related Crashes**

OSHP District	Number of Crashes
District 1	1,124
District 2	404
District 3	3,621
District 4	709
District 5	1,449
District 6	3,243
District 7	321
District 8	2,704
District 9	259

**Total 13,834**

### Ohio Pedestrian-Related Crashes

- Since 2019<sup>1</sup>, 13,834 pedestrian-related traffic crashes have occurred on Ohio roadways. This includes 857 fatal crashes that resulted in 862 pedestrian deaths (and 9 others). Only 1% of all crashes involve pedestrians and only 2% of all crash injuries are the result of a pedestrian-related crash. However, 12% of all fatally injured people are pedestrians.
- Franklin (2,718), Cuyahoga (2,215) and Hamilton (2,092) Counties had the most pedestrian-related crashes since 2019. Altogether, these three counties accounted for 51% of these types of crashes. Seventy-eight percent (78%) of fatal pedestrian-related crashes took place in urban areas.
- Overall, the pedestrian was at-fault in about one-third of pedestrian-related crashes. However, a pedestrian was at-fault in more than half (53%) of fatal pedestrian-related crashes.
- The average age of a pedestrian killed in a motor vehicle crash was 47 and ranged from less than one to 94-years-old. More than two-thirds (68%) of pedestrians killed in motor vehicle crashes were male.
- Around 44% of pedestrians killed in motor vehicle crashes were suspected of being impaired by alcohol and/or drugs. Marijuana played a role in more than 16% of these incidents.
- Additional information on pedestrian-related crashes is available on the Ohio Statistics and Analytics for Traffic Safety (OSTATS) crash dashboard at: <https://statepatrol.ohio.gov/ostats>.

<sup>1</sup>2024 data through 8/31 and is provisional as of 9/9/2024.
