1099-R Upload Specifications

1099-R Upload Specifications

The specifications for tax year 2024 Form 1099-R, Distributions From Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc. submitted in calendar year 2025, are contained in this document.

The Ohio Department of Taxation (ODT) follows the 1099-R layout required by the Internal Revenue Service in Publication 1220.

Ohio law requires all employers and retirement system payers to electronically file returns and submit income statements (W-2s & 1099-Rs) to the Department per Ohio Revised Code 5747.07, 5747.071 and Ohio Administrative Rule 5703-7-19. All employers and retirement system payers who file and pay their employer withholding taxes electronically will be required to upload their 1099-R information electronically through the Upload Income Statement feature on OH|TAX eServices. No paper IT 3 is required to be filed, the Upload Income Statement feature creates an IT 3 from the 1099-R information submitted.

You are required to maintain tax records, including 1099-R information, for a period of at least four (4) years from the due date. If the information is not submitted to the agency, ODT may request 1099-R information when conducting compliance programs.

Files must contain 1099-R information for each recipient from whom you withheld Ohio individual income tax or Ohio school district income tax during the reported year. Also include recipients who were Ohio residents but did not have Ohio individual income tax or Ohio school district tax withheld from their distribution.

The due date to file 1099-Rs is **January 31, 2025**.

This document is reissued every tax year and may be updated at any time to ensure that it contains the most current information.

Issuer “A” Record General Field Descriptions

The second record on the file must be an Issuer “A” Record.

The Issuer “A” Record identifies the person making payments. The issuer will be held responsible for the completeness, accuracy, and timely submission of electronic files. Examples of an issuer include:

- Recipient of mortgage payments
- Recipient of student loan interest payments
- Educational institution
- Broker
- Person reporting a real estate transaction
- Barter exchange
- Creditor
- Trustee or issuer of any IRA or MSA plan
- Lender who acquires an interest in secured property or who has a reason to know that the property has been abandoned

A transmitter may include Payee “B” Records for more than one issuer in a file; however, each group of “B” Records must be preceded by an “A” Record and followed by an End of Issuer “C” Record. **The Department of Taxation requests that only 1099-Rs are included in the file submitted to Ohio.**

The number of “A” Records depends on the number of issuers. Do not submit separate “A” Records for each payment amount being reported. For example, if an issuer is filing Form 1099-R to report Amount Codes 1, 2, 4, and 9, all four amount codes should be reported under one “A” Record, not four separate “A” Records.

The maximum number of “A” Records allowed in a file is 99,000. All records must be a fixed length of 750 positions. All alpha characters entered in the “A” Record must be upper case.

For all fields marked “Required,” the transmitter must provide the information described under “General Field Description”. For those fields not marked “Required,” a transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated field position(s) and for the indicated length.

For all fields marked “**Required**,” the transmitter must provide the information described under “General Field Description.” For those fields not marked “**Required**,” the transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated field position(s) and for the indicated length.

A field is also provided for Special Data Entries. This field may be used to record information required by state or local governments, or for the personal use of the filer. The IRS does not use the data provided in the Special Data Entries Field; therefore, the IRS program does not check the content or format of the data entered in this field. It is the filer’s option to use the Special Data Entries Field.

Following the Special Data Entries Field, payment fields have been allocated for State Income Tax Withheld and Local Income Tax Withheld. The information is not used by the IRS but is required by the Ohio Department of Taxation.

21-40	Issuers Account Number for Payee	20	<p>Required if submitting more than one information return of the same type for the same payee. Enter any number assigned by the issuer to the payee that can be used by the IRS to distinguish between information returns. This number must be unique for each information return of the same type for the same payee. If a payee has more than one reporting of the same document type, it is vital that each reporting have a unique account number. For example, if an issuer has three separate pension distributions for the same payee and three separate Forms 1099-R are filed; three separate unique account numbers are required. A payee's account number may be given a unique sequencing number, such as 01, 02, or A, B, etc., to differentiate each reported information return. Do not use the payee's TIN since this will not make each record unique. This information is critical when corrections are filed. This number will be provided with the backup withholding notification and may be helpful in identifying the branch or subsidiary reporting the transaction. The account number can be any combination of alpha, numeric, or special characters. If fewer than 20 characters are used, filers may either left or right justify, filling the remaining positions with blanks.</p>
41-44	Issuers Office Code	4	<p>Enter the office code of the issuer. Otherwise, enter blanks. For issuers with multiple locations, this field may be used to identify the location of the office submitting the information returns. This code will also appear on backup withholding notices.</p>

Payment Amount Fields (Must be numeric)			Required. Filers should allow for all payment amounts. For those not used, enter zeros. Each payment field must contain 12 numeric characters. Each payment amount must contain U.S. dollars and cents. The right-most two positions represent cents in the payment amount fields. Do not enter dollar signs, commas, decimal points, or negative payments. Payment amounts must be right justified, and unused positions filled with zeros.
Caution: If payment amounts exceed the 12 field positions allotted, a separate Payee “B” Record must be submitted for the remainder. The files cannot be exactly the same to avoid duplicate filing discrepancies. For example: For Form 1099-R reporting 12,000,000,000.00, the first “B” record would show 8,000,000,000.00 and the second “B” record would show 4,000,000,000.00. One substitute Form 1099-R may be sent to the recipient aggregating the multiple Forms 1099-R.

For example, the “T” Record sequence number would appear as “00000001” in the field, the first “A” Record would be “00000002,” the first “B” Record, “00000003,” the second “B” Record, “00000004”, and so on until the final record of the file, the “F” Record.</p>

State Total “K” Record General Field Descriptions

The State Total “K” Record is a summary for a given issuer and a given state.

Submit a separate “K” Record for each state being reported. The “K” Record is a fixed length of 750 positions. The control total fields are each 18 positions in length.

The “K” Record contains the total number of payees, and the total of the payment amount fields filed by a given issuer for a given state. The “K” Record(s) must be written after the “C” Record for the related “A” Record. Refer to the file format diagram on page 5. Example: If an issuer used Amount Codes 1, 3, and 6 in the “A” Record, the totals from the “B” Records coded for this state would appear in Control Totals 1, 3, and 6 of the “K” Record.
