Equipment requirements

E-bikes must have a label that displays:

- (1)The class level of the electric bicycle.
- (2)The top assisted speed of the electric bicycle.
- (3)The total electric motor wattage of the electric bicycle

Class 3 e-bikes must have a speedometer.

Safety tips

You must wear a helmet while operating a class 3 e-bike, regardless of age.

Ohio does not require a driver's license or any other specialized license to operate an e-bike or micromobility device. Per ORC 4511.01 and 4511.522

Whatever and wherever you're riding, always:

- Operate at a safe speed and give space to pass, especially on trails
- Get on an e-bike with the motor off and brakes engaged
- Increase space and stopping distance around other vehicles
- Be cautious downhill and on tight turns as e-bikes have added weight that can increase speed quickly
- Follow all rules of the road and be predictable
