The background features a series of overlapping, semi-transparent blue parallelograms and rectangles, creating a dynamic, layered effect. The colors range from a deep navy blue to a very light, almost white blue. A solid dark blue horizontal bar is positioned in the center, containing the word "Background" in white.

Background

What is an MPO?

As per federal transportation law, urbanized areas with a population of 50,000 or more, are required to carry out a comprehensive, continuous, and coordinated transportation planning process. A Metropolitan Planning Organization (MPO) is created to carry out that process as well as further planning for their area. Each urbanized area (determined by the federal census), must either create an MPO or merge with an existing one. Ohio is home to 17 MPOs:

- AMATS
- Bel-O-Mar
- BHJ-MPC
- CCSTCC
- Eastgate
- ERPC
- KYOVA
- LACRPC
- LCATS
- MORPC
- MVRPC
- NOACA
- OKI
- RCRPC
- SCATS
- TMACOG
- WWWIPC

How were MPOs created?

The federal government has created rules/regulations that each MPO must adhere to. [Title 23 of the United States Code \(U.S.C.\) Section 134](#) contains the laws applicable to MPO transportation planning processes. The code establishes laws surrounding MPO designation and requirements of the planning process. The U.S.C. is supplemented by the Code of Federal Regulations (CFR), specifically [23 CFR 450](#), where further details regarding rules and regulations can be found. The CFR is regularly updated and must be continually reviewed to ensure organizations are remaining in compliance. MPOs are policy boards of an organization established as a result of the designation process and formed in accordance with Ohio Revised Code, typically as a Regional Planning Commission under [ORC 713.21](#), Regional Council of Governments under [167.01](#), or Association of Counties under [307.14](#).

More information can be found in ODOT's [MPO Administration Manual](#)

What is an RTPO?

Rural areas not within the boundaries of an MPO, historically, were regarded as stakeholders in the state of Ohio's transportation planning process. As of 2012, rural areas were given the opportunity to develop Regional Transportation Planning Organizations (RTPOs) in an effort to have more comprehensive, area specific efforts and focuses for transportation planning and management. Some RTPOs are housed within an MPO and work as an extension for the MPO adjacent rural counties. Ohio is home to 6 certified RTPOs:

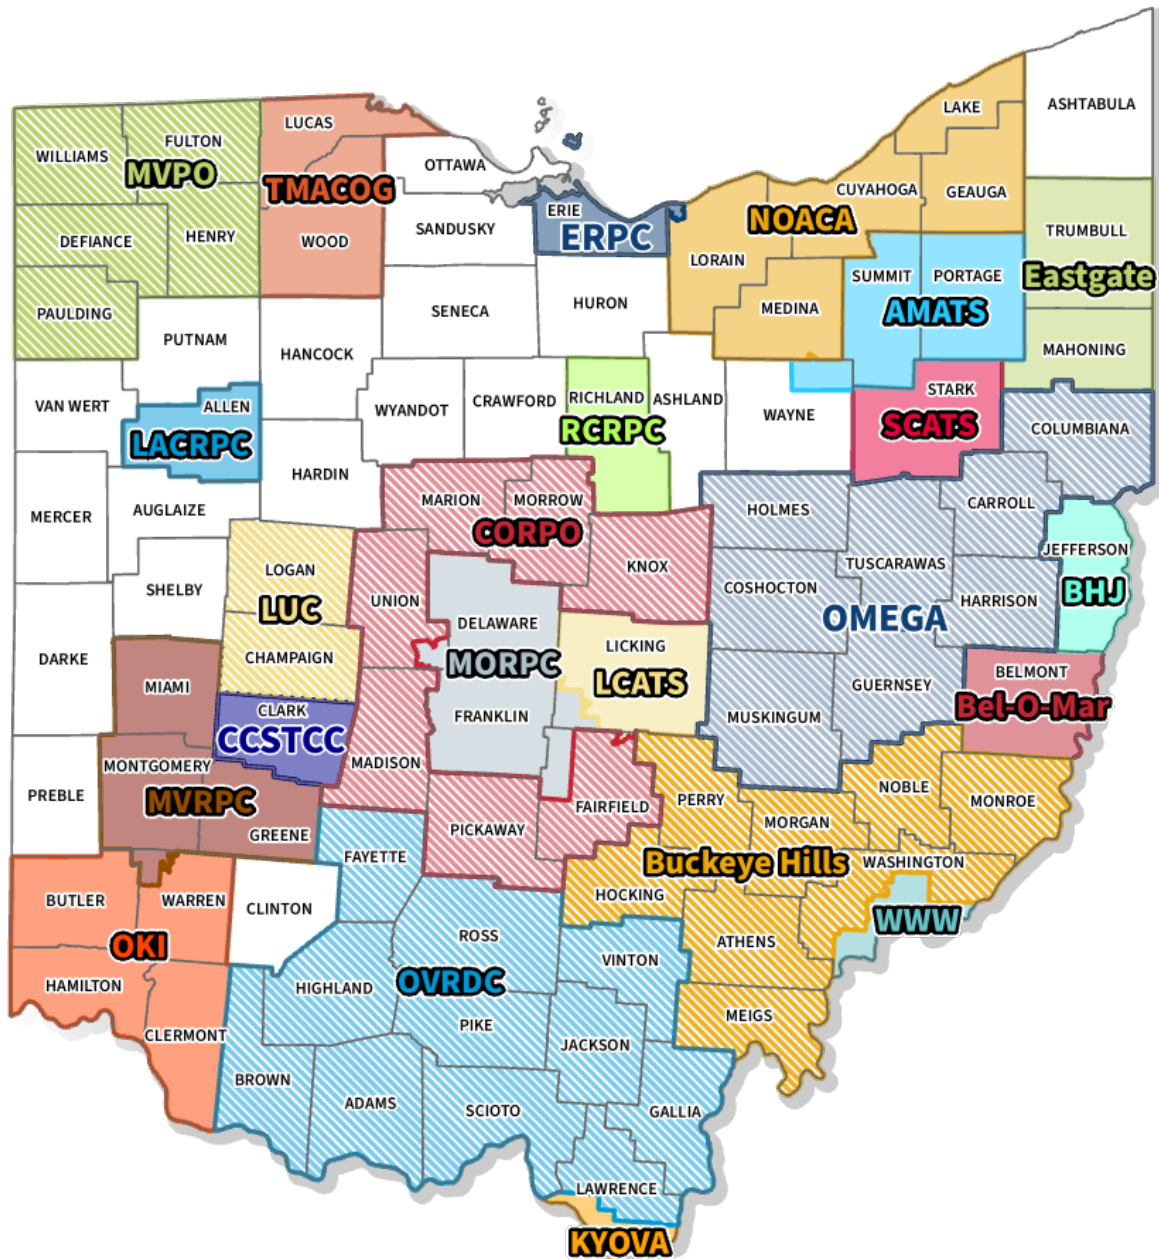

- Buckeye Hills
- CORPO
- DPS
- LUC
- MVPO
- OMEGA
- OVRDC
- WORPO

How were RTPOs created?

The federal government signed in to law the Moving Ahead for Progress in the 21st Century ([MAP-21](#)) law which established a definition of a RTPO. The definition stated that RTPOs were intended to identify local transportation needs, conduct planning, assist local governments, and support state transportation processes in non-metropolitan areas. Along with this, [23 USC 135](#) requires that RTPOs are consulted with in conducting non-metropolitan transportation planning. In Ohio, a pilot program aimed at developing RTPOs in the state was initiated in 2012. This began the work of 5 RTPOs to develop long-range transportation plans and seek formal designation from the state. These included Buckeye Hills Regional Council, Logan-Union-Champaign Regional Planning Commission, Maumee Valley Planning Organization, Ohio Mid-Eastern Governments Association, and the Ohio Valley Regional Development Commission. In 2016, former Governor Kasich gave the five developing agencies the official RTPO designation. CORPO was signed in as an official RTPO by Governor, Mike DeWine in 2019.

More information can be found in ODOT's [RTPO Administration Manual](#)

Ohio MPOs and RTPOs

Type of Planning Agency

RTPO

MPO

Required Products

Each MPO and RTPPO has three required transportation documents that have a designated update cycle.

Long Range Transportation Plan (LRTP)

The LRTP is a product that focuses on the region's transportation system as a whole and is required by federal code for MPOs. The LRTP must have a minimum horizon of 20 years and must be updated every 4-5 years. The plan should include existing condition information for all modes of transportation. Through this, gaps and inadequacies in the system are identified and suggestions for improvement are made. The plan also looks at forecasts for the coming years in the region and how the transportation system should respond. For more information, go to page 43 in the manual or click [here](#).

Transportation Improvement Program (TIP)

The TIP focuses on identified projects across a 4 year period. It is a financially constrained document that goes into detail on the planned and identified projects. Each TIP is required to be updated every two years and be approved by the state DOT and included in the [Statewide Transportation Improvement Program \(STIP\)](#). All projects in the TIP for those MPOs not in attainment, must also be analyzed to ensure alignment with identified conformity procedures. For more information, go to page 53 in the manual or click [here](#).

Unified Planning Work Program (UPWP)

The UPWP is an annually updated work program that outlines the priorities for each planning organization. The UPWP must explain details of all transportation planning projects including: of who will perform the work, the expected timeframe, and the anticipated products created as a result of the project. The UPWP must be submitted and approved by the state DOT. For more information, go to page 65 in the manual or click [here](#).

Financial Background

How are these agencies funded?

All MPOs and RTPPOs are funded through federal and state dollars that are managed by the Ohio Department of Transportation (ODOT). After funding is established at the beginning of the year, agencies can seek reimbursement of spent federal and state dollars. Which means that the MPO or RTPPO will pay expenses upfront and then submit an invoice to ODOT. ODOT will then process that invoice to reimburse those funds to the organization.

What types of funding are available to these organizations?

A variety of programs provide funding to planning organizations. These include Consolidated Planning Grant (CPG) funds, Congestion Mitigation/Air Quality (CMAQ) funds, and Surface Transportation Block Grant (STBG) funding. For more information on each of these funds, go to page 83 of the MPO Administration Manual or click [here](#).

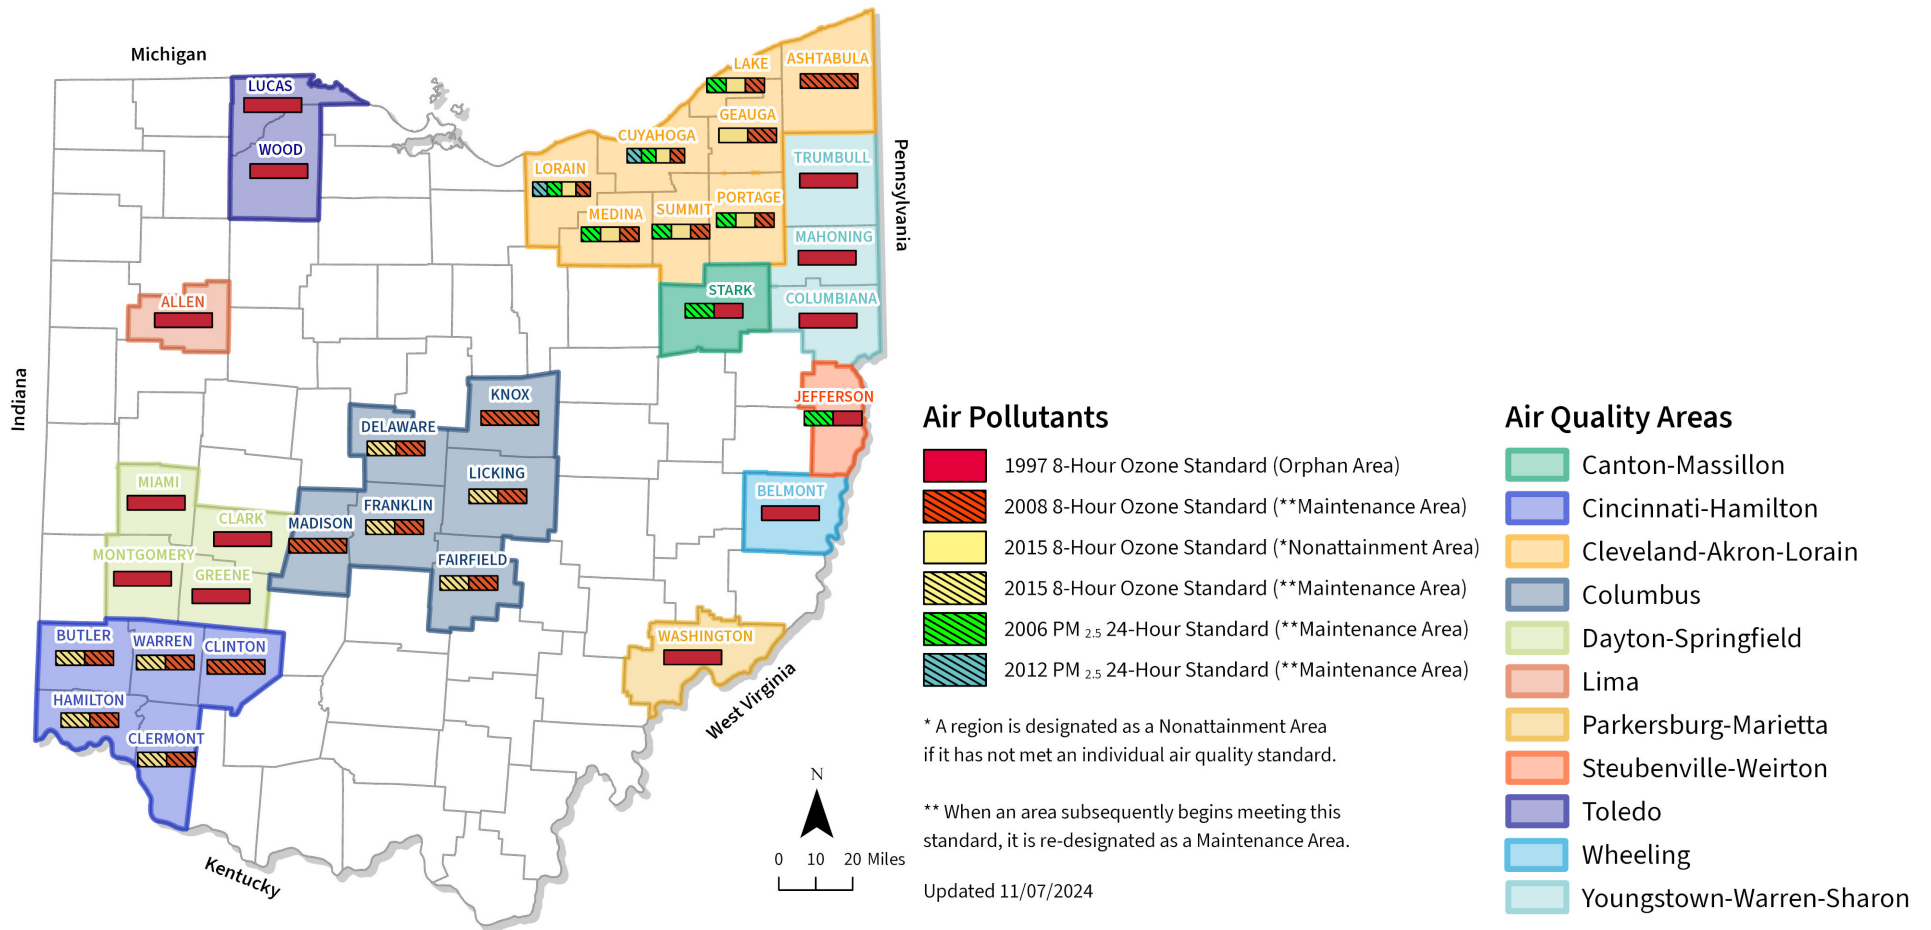

Can these planning organizations secure other funding resources?

MPOs and RTPPOs are also able to pursue and administer other grant programs, such as USDOT discretionary program funding. MPOs/RTPPOs are eligible to develop and submit funding applications, administer funding and project activities, and serve as the direct recipient of awarded funding. Depending on the rules and regulations of the agency and the applicable grant programs these activities may be administered differently. Some will be a direct money disbursement and others will operate on a reimbursement format. See [Grants.gov](#) for current and upcoming notices of funding opportunities.

Air Quality & Transportation Planning

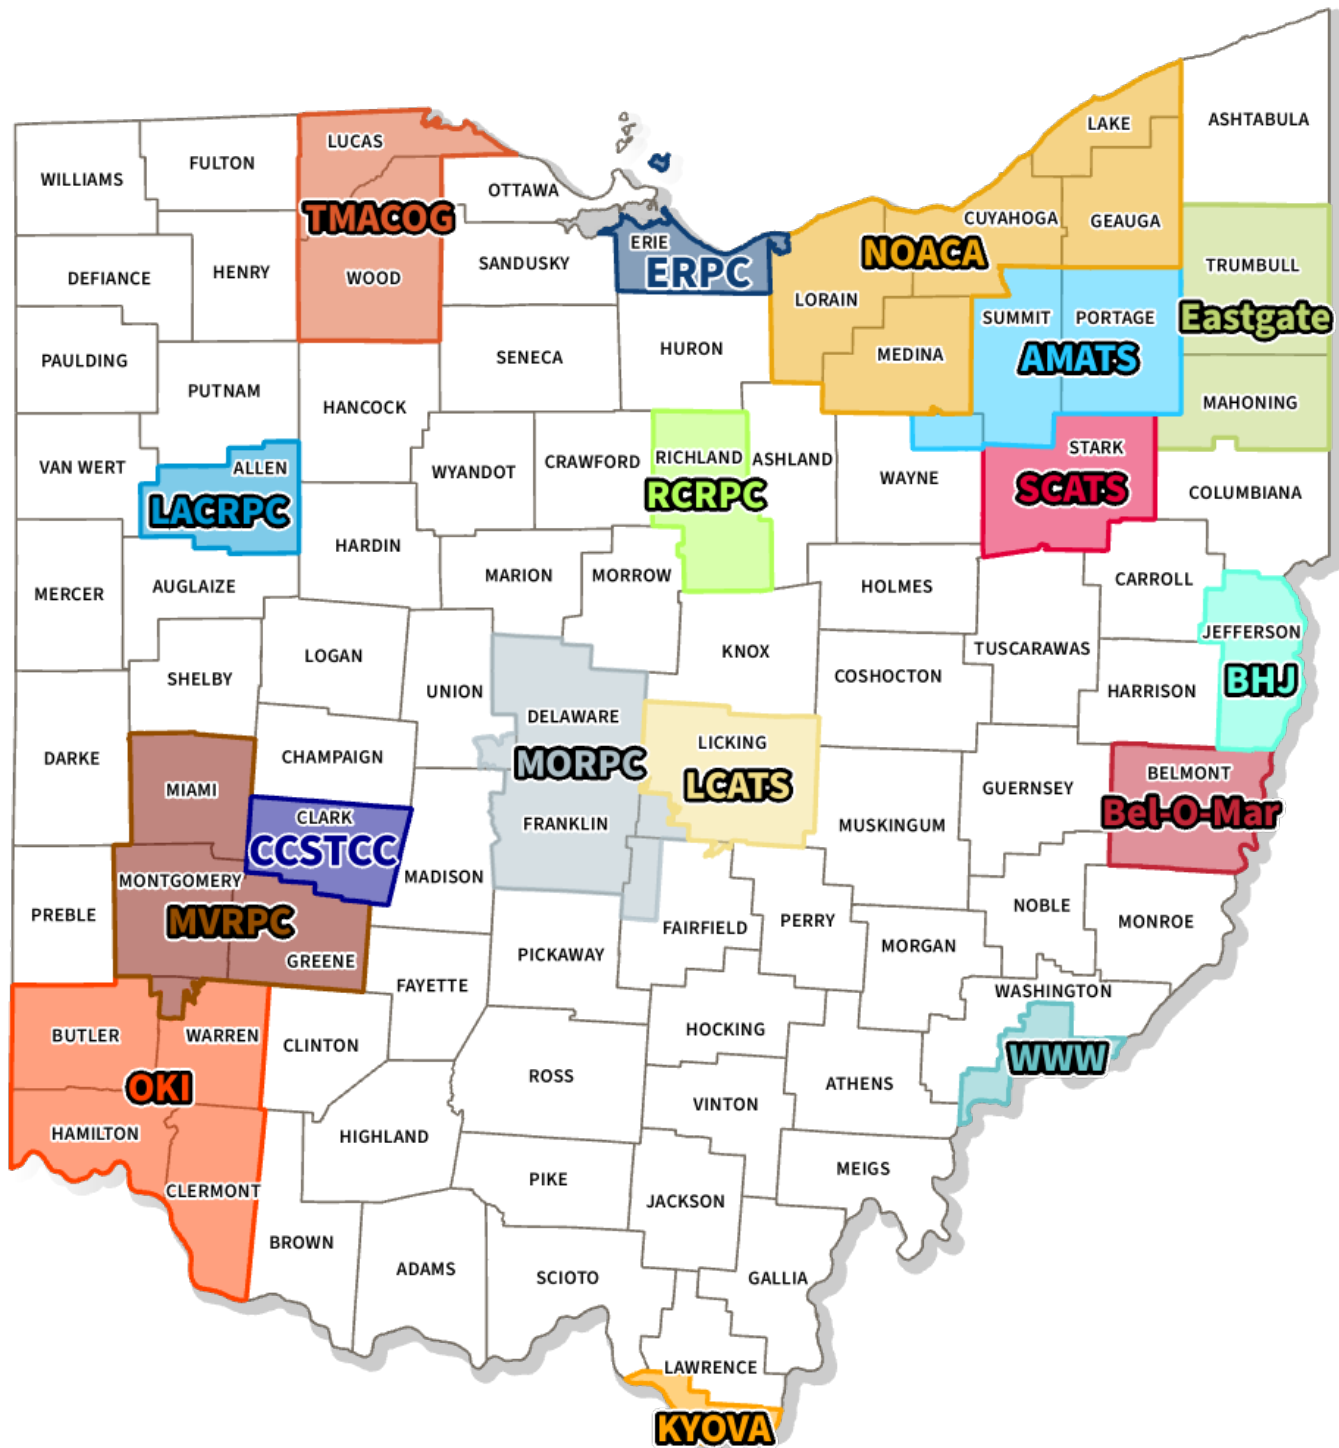

Why is air quality important?

Transportation conformity is a process that ensures that federal funding and approval are provided to highway and transit activities that are consistent with State Implementation Plan (SIP) air quality goals. Transportation conformity is required by the [Clean Air Act \(CAA\)](#), which established the framework for improving air quality to protect public health and the environment. As part of CAA, the US EPA was given the responsibility to better and safeguard America's air quality. To carry out their obligations, the US EPA set in place [National Ambient Air Quality Standards \(NAAQS\)](#) for various air pollutants. If an air quality area is found to be in violation of or in maintenance for any NAAQS, MPOs in the region must ensure that transportation plans and programs will not cause the area to exceed NAAQS or delay attainment of said standards. For more information on transportation conformity, please see page 73 of the ODOT MPO Administration Manual or click [here](#).

MPO Profiles

Akron Metropolitan Area Transportation Study

The Akron Metropolitan Area Transportation Study (AMATS) is the designated MPO for the urbanized area of Akron, OH. The agency serves Portage and Summit Counties, Ohio, the Chippewa and Milton Townships of Wayne County, Ohio, the City of Rittman in Wayne and Medina Counties, Ohio and touches two of ODOT's districts (Districts 3 and 4). AMATS was officially designated as an MPO in 1962.
