Chapter 1: Introduction & Overview

What is the STIP? Who develops it and why is it needed? These are the first questions that will be covered in this document. Having a general understanding of what this document is and why it is needed provides the framework for how transportation projects get done in Ohio.

This chapter will briefly discuss:

Section 1: What is the STIP? Who develops it and why is it needed?

Section 2: When and how is the STIP developed?

Section 3: How are projects in the STIP identified and selected?

Section 4: How are the projects in the STIP funded?

Section 5: How and when is the STIP revised?

Section 6: How can I be involved and why is it important?

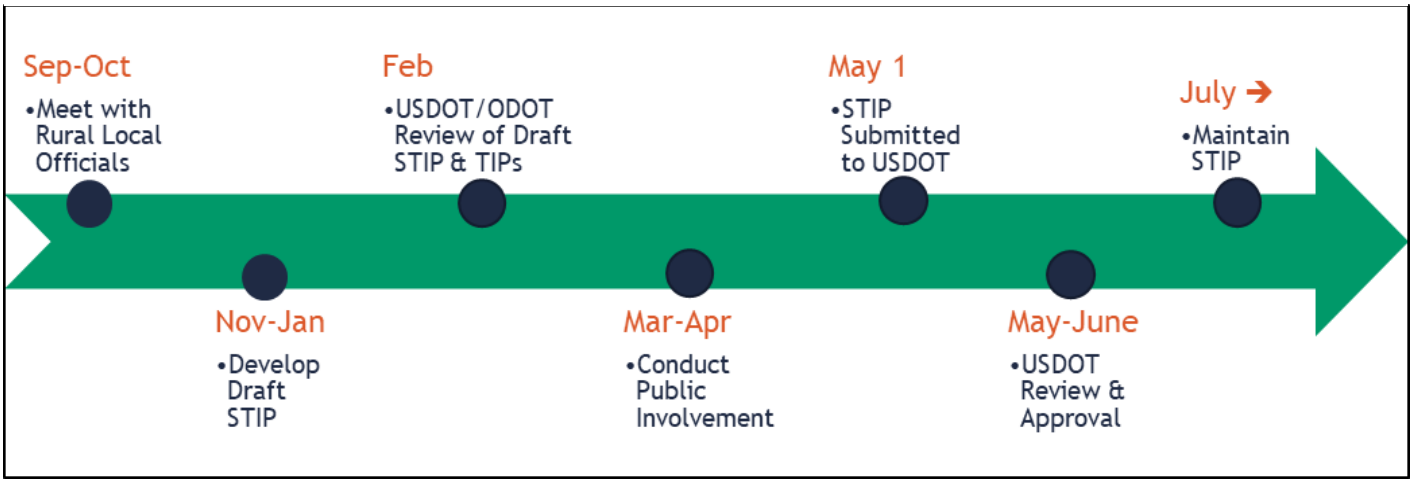

Section 1: What is the STIP? Who develops it and why is it needed?

The STIP or Statewide Transportation Improvement Program is Ohio's four-year transportation planning document. A project is included in the STIP when funding has been secured and work on any phase of it will occur during the four-year period. The STIP is developed and maintained by the Ohio Department of Transportation (ODOT) in collaboration with the Ohio Metropolitan Planning Organizations (MPOs), the Ohio Regional Transportation Planning Organizations (RTPOs), and rural officials. The STIP is required by both the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). The document is used by these agencies to approve federal funds for transportation projects in Ohio. The STIP is developed in accordance to Title 23 and Title 49 of the United States Code.

Section 2: When and how is the STIP developed?

ODOT, in consultation with the MPOs, RTPOs, and rural officials, updates the STIP every two years to reflect changes in project schedule, scope, funding, and status. MPOs and RTPOs are required by federal regulations to create a Transportation Improvement Program (TIP) for their region. The draft MPO TIPs are incorporated by reference into the draft STIP to create the statewide four-year program. The draft is reviewed by the United States Department of Transportation (USDOT) to ensure all required components are included and then it is provided to the public for review and comment. The final STIP is then submitted to USDOT for review and approval. See

Figure 1.1: STIP Development Timeline & Process Overview

Section 3: How are projects in the STIP identified and selected?

Transportation needs and projects in Ohio are identified from a wide variety of sources and studies such as Access Ohio 2045, Walk.Bike.Ohio, transportation asset management, Strategic Highway Safety Plan, travel demand modeling, planning studies, regional and metropolitan long–range plans, ODOT district work plans, and local and private sponsors. (See **Chapter 10** for additional information on the planning performance measures).

Federal and state laws provide ODOT the basis to collect and analyze data to identify transportation needs and make funding decisions. Projects are selected based on a continuous, comprehensive, and cooperative planning process in accordance with federal and state laws and the specific program's guidelines. The selected projects are included in the STIP when a phase of the project is scheduled to occur within the four-year STIP period and is federally or state funded or regionally significant. The chapters in this document discuss various planning processes and regulations needed to include a project in the STIP. Additional information on ODOT's programs and projects can be found in **Chapters 8** and **9** with the project listings in **Appendices 3**, **4**, and **5.**

Section 4: How are projects in the STIP funded?

The funds used to finance projects may come from federal, state, local, and/or private sources. Various ODOT reports and data tools are used to identify priorities and to determine how to allocate the available budgets to ODOT programs for project funding. See the Citizen's Guide to Transportation Funding in Ohio and the ODOT Resource Guide for additional information on how projects are funded and the funding programs available in Ohio. Further discussion on funding and the fiscal constraint of the STIP can be found in **Chapter 8** and **Chapter 9**.

Section 5: **How and when is the STIP revised?**

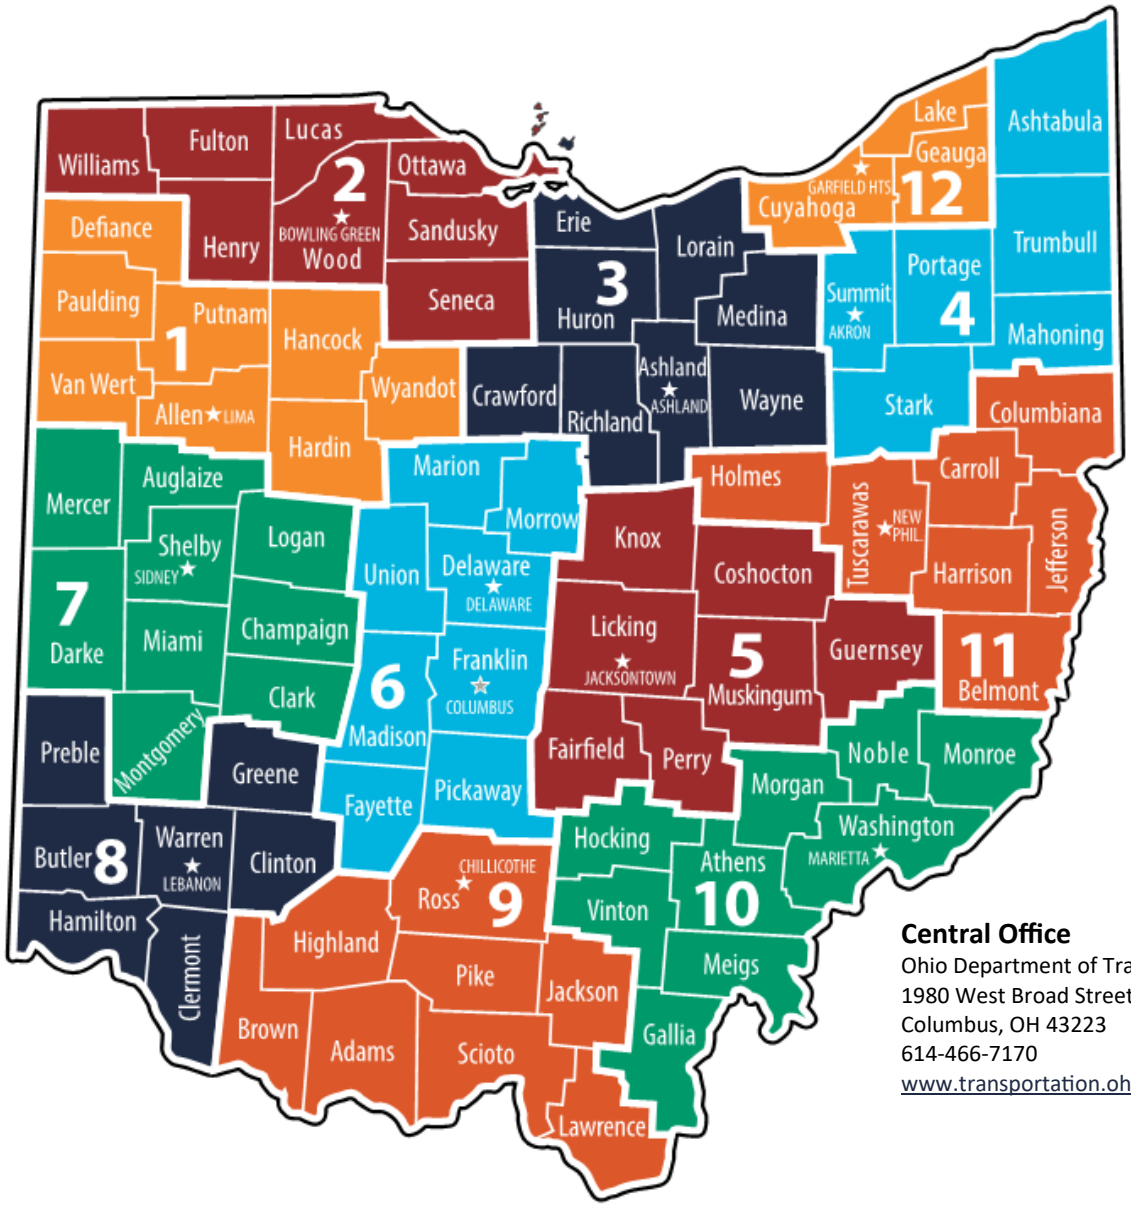

STIP revisions are coordinated jointly between ODOT and the applicable MPO or RTPO. Major revisions to the STIP occur on a quarterly schedule while minor revisions occur monthly. Revisions may also occur as needed upon coordination. For specifics on STIP revisions, see the Ohio STIP Revisions Guidelines.

Section 6: **How can I be involved and why is it important?**

All transportation-related projects begin with a plan. That plan can take several years to develop before it becomes a project. The time to be involved in a project in your area is during the planning stage, before construction begins.

Public input has changed the scope and direction of transportation projects many times and can determine if a project moves forward or not. Participation in the STIP offers the public and partner agencies the best opportunity to be active in planning their future transportation system. It's an important way ODOT maintains transparency in government and keeps all parties engaged in the process. Visit ODOT's STIP website to review and comment on the draft STIP during the STIP development comment period. Contact your region's MPO, RTPO, county, or city official to participate in a regional transportation meeting of interest. **Figure 1.2** provides a map of the ODOT district offices and contact information. **Figure 1.3** provides a map of the MPO and RTPO regions with a related contact link for their organization. **Chapter 7** and **Appendix 1** furthers the discussion on public involvement and provides documentation.

Chapter 2: 2024-2027 STIP Accomplishments & Carry Forward

Supporting ODOT's mission and following a continuing, cooperative, and comprehensive performance-based planning approach, 7,851 projects at an investment of $22.7 billion were planned for some phase of implementation during the four-year 2024-2027 STIP period as of January 2025.

Figure 2.1 reflects the majority of the investment over the 2024-2027 STIP period was to operate, maintain, and preserve the surface transportation network while also providing for the safe and effective movement of people and freight by providing transit assistance and addressing safety. An estimated $13.3 billion was invested during state fiscal years (SFYs) 2024 and 2025 with over $9.2 billion planned in SFYs 2026 and 2027 as shown in **Figure 2.2**. ODOT is making a concerted effort to minimize the carry forward of projects/phases of projects that may not be authorized at the close of the SFY. These efforts include:

- Working with FTA and recipient agencies of FHWA flex dollars to monitor/inform transit agencies when they have flex dollars available for obligation into their FTA grants.
- Overprogramming allocated funds for capital programs due to projects coming in under programmed amounts, projects being delayed, and/or projects being cancelled due to shifting local and regional priorities.

While ODOT endeavors to minimize carry forward with annual program delivery goals of obligating over 90% of funds, it is important to note that projects/phases of projects with SFY 2025 funding in the 2024-2027 STIP that were not authorized or awarded in SFY 2025 will be carried forward into the approved 2026-2029 STIP in accordance to the Ohio STIP Revisions Guidelines.

Figure 2.1: 2024-2027 STIP Investments by Primary Work Group

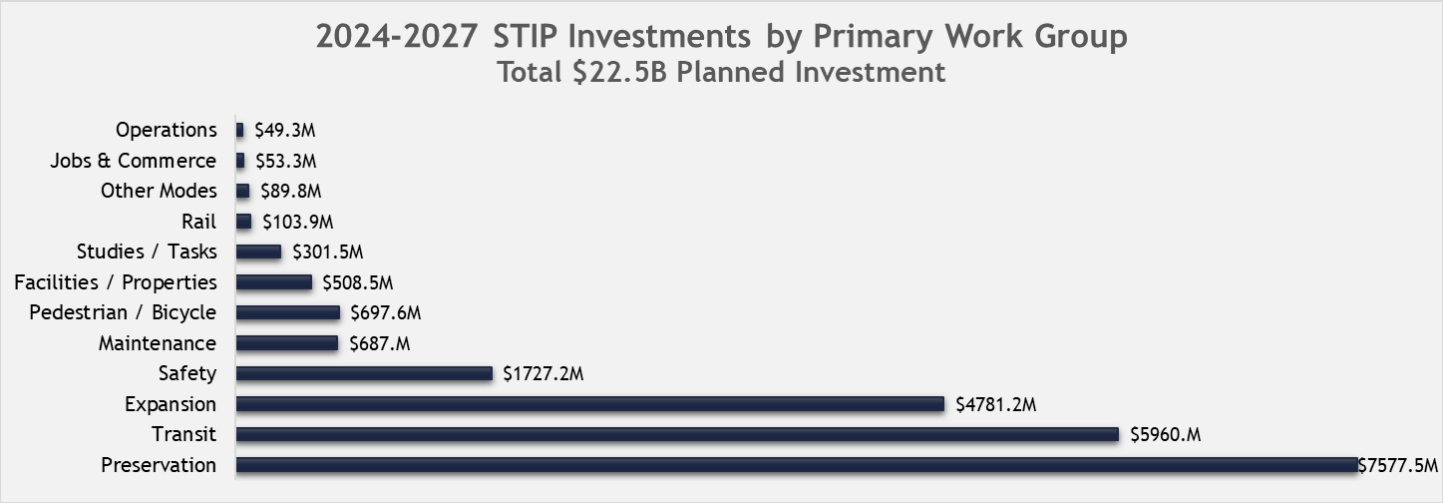

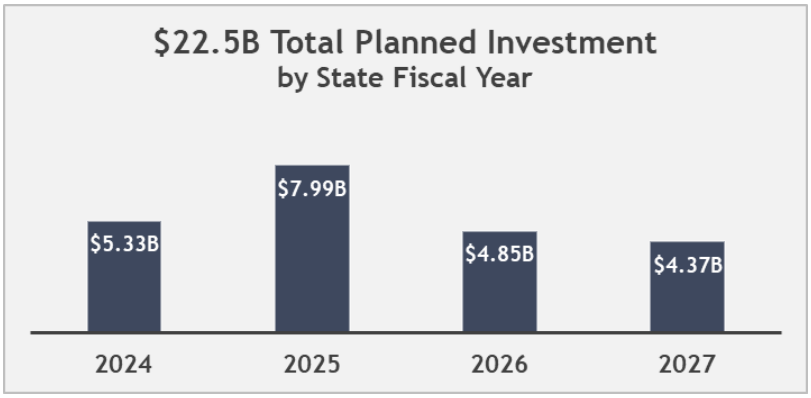

Figure 2.2: 2024-2027 STIP Investments by SFY

Chapter 3: Operation & Maintenance

According to Federal Law, before considering expansion of the transportation system (additional lanes or new facilities), states must demonstrate that the existing transportation system is being maintained to acceptable performance levels and that the system is operating efficiently. To this end, ODOT has established target thresholds for system conditions, including pavements, bridges, conduits, and system reliability. ODOT ensures that resources are allocated to programs that will maintain these conditions near or above their targets thresholds. Over 90% of state and federal highway funding is used to operate, maintain, and preserve the transportation system.

Figure 3.1 shows that Ohio is maintaining its assets above target areas and that the system is operating at or above posted speed limits over 90% of the time. **Chapter 10** discusses how the SFY 2026-2029 projects will continue to both maintain and improve the condition of Ohio's transportation assets.

Figure 3.1: ODOT's Critical Success Factors

Ohio Department of Transportation — CRITICAL SUCCESS FACTORS DASHBOARD — FY 25 Q2

MEETS GOAL | DOES NOT MEET GOAL

CSF Category and Metric		Statewide State Goal	Statewide State Overall
PRESERVE OUR ASSETS			
Bridges: % Good and Fair (as of December 2024)	% of bridges in good or fair condition (General Appraisal and Deck conditions are all above 5 on a 0-9 scale).	97%	98.3%
Conduits: % Good and Fair (as of December 2024)	% of conduits in good or fair condition (General Appraisal and Deck conditions are all above 5 on a 0-9 scale).	95%	96.2%
Pavements: Priority System (as of December 2024)	Average pavement conditions for Interstates and four-lane divided highways (Priority System); and rural, two-lane U.S. and State Routes outside of cities (General System). Ratings are on a scale of 0-100, with 100 being new pavement.	85.0	87.0
Pavements: General System (as of December 2024)		80.0	84.5
SYSTEM EFFICIENCY			
Travel Time Performance (July 2024 - December 2024)	Measures the percentage of time between the 5 a.m.-9 p.m. travelers experience free flow on Ohio's freeways.	88%	90.1%
Snow & Ice Control (July 2024 - December 2024)	Percent of priority routes that recovered speeds within the recovery goal after a snow event. (Recovery Goals: Priorty 1 = 2 hrs, Priority 2 = 4 hrs)	96.%	99.6%

Chapter 4: Air Quality Conformity

The US Environmental Protection Agency (US EPA) establishes National Ambient Air Quality Standards (NAAQS) for the entire United States. For the transportation sector the NAAQS are related to ozone, carbon monoxide, particulate matter, and nitrogen dioxide pollutants. US EPA utilizes its partner state air quality agencies to monitor actual localized (regional) pollutant levels to assess regional compliance with the NAAQS.

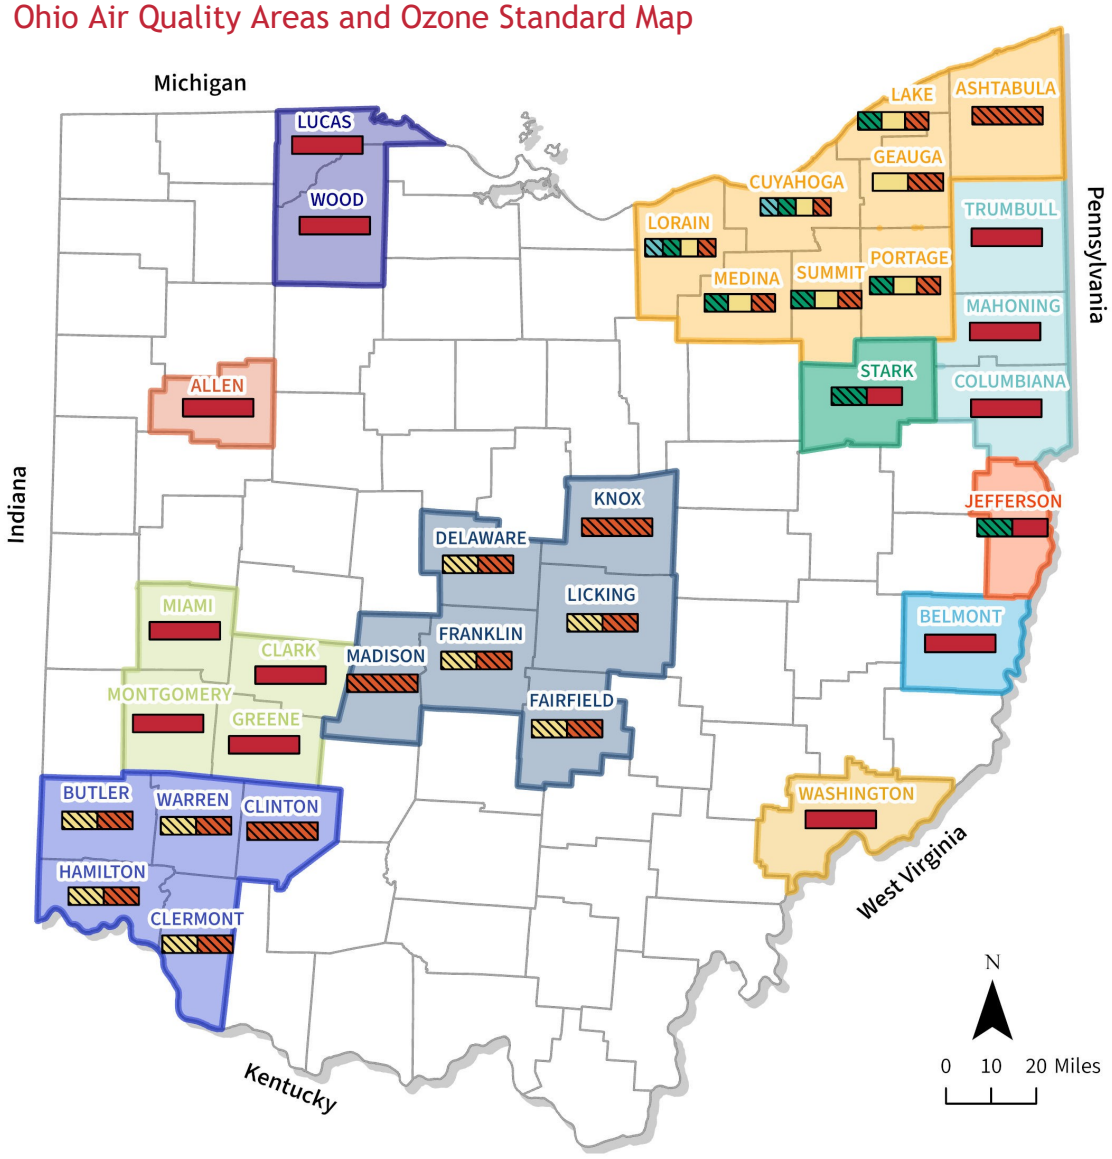

If an air quality region of the nation is identified as not meeting an individual air quality standard, based on EPA monitoring, the US EPA designates the region as a Non-attainment Area. Following a nonattainment designation, the affected state and region are required to develop a plan recording the pollution reduction strategies that will be implemented to enable the region to meet and maintain the air quality standard. This plan is referenced as a State Implementation Plan (SIP). There are three types of emissions that are quantified as part of the SIP - Area, Point, and Mobile. The existing and future emissions, from all three sources, are measured to see if they meet the respective NAAQS. Once an area subsequently begins meeting the standard, US EPA re-designates the affected region as an Attainment/Maintenance Area. Ohio includes designated nonattainment/maintenance areas for five separate US EPA mobile air quality standards: 2006 24-Hour Small Particulates ($PM_{2.5}$), 2012 Annual Small Particulates ($PM_{2.5}$), 1997 8-Hour Ozone, 2008 8-hour Ozone, and 2015 8-Hour Ozone. (Refer to **Figure 4.1**).

Joint US EPA and US DOT regulations, embodied in 40 CFR 93, establish and define the linkage between transportation system investments and the SIP process for meeting and maintaining the NAAQS. The regulations identify a process called Transportation Conformity, whereby US DOT funded or approved projects in air quality nonattainment and maintenance areas are analyzed to demonstrate their consistency with the SIP. The conformity process assures that federally supported highway and transit activities, identified in Transportation Plans, Programs (this STIP), and projects, "are consistent with (conform to) the purpose of the state air quality implementation plan (SIP). Conformity to the SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the relevant national ambient air quality standards (NAAQS)." US DOT must issue a formal Conformity Determination for nonattainment and maintenance area MPO Transportation Plans and the STIP (inclusive of MPO TIPs) concurrent with approving the STIP and prior to approving federal funding for "regionally significant" (capacity additions) transportation system improvement projects identified in the STIP.

Conformity for MPO Transportation Plans and Programs (this STIP) is established based on analyses of estimated aggregate regional emissions resulting from vehicles traversing the transportation networks that will result from implementing the transportation improvement projects documented in Transportation Plans and the STIP. The aggregate Plan/STIP networks' emissions (pollution) estimates are then compared to maximum allowable mobile source emission thresholds (SIP mobile source emission budgets) identified in the SIP. Conformity is demonstrated when the Plan/STIP emissions are below the SIP emissions thresholds/budgets. Individual project level conformity analyses are performed separately and are typically documented in federally required environmental publications.

Ohio's Ozone and $PM_{2.5}$ nonattainment and maintenance areas are concentrated around Ohio's major metropolitan regions. The areas' geographic boundaries encompass counties that are within the boundaries of an Ohio MPO and non-MPO area (rural) counties. This geography results in projects necessitating air quality conformity analyses being recorded in both the STIP and, if applicable, MPO TIPs. Similarly, the resulting conformity analyses combine both MPO and non-MPO geography and data inputs to develop emissions data needed to provide complete geographic coverage for each Ohio nonattainment/maintenance area conformity demonstration. ODOT and the affected MPOs engage in interagency consultation and coordination to complete the conformity demonstrations. The complete air quality conformity documentation for each Ohio nonattainment/maintenance area is included in the affected MPO TIP.

Figure 4.1: Ohio Air Quality Areas and Ozone Standard Map

Air Pollutants

- 1997 8-Hour Ozone Standard (Orphan Area)
- 2008 8-Hour Ozone Standard (**Maintenance Area)
- 2015 8-Hour Ozone Standard (*Nonattainment Area)
- 2015 8-Hour Ozone Standard (**Maintenance Area)
- 2006 $PM_{2.5}$ 24-Hour Standard (**Maintenance Area)
- 2012 $PM_{2.5}$ 24-Hour Standard (**Maintenance Area)

* A region is designated as a Nonattainment Area if it has not met an individual air quality standard.

** When an area subsequently begins meeting this standard, it is re-designated as a Maintenance Area.

Chapter 5: Environmental Justice (EJ) Analysis

EJ is identifying and addressing disproportionately high and adverse effects of an agency's programs, policies, and activities on minority populations and low-income populations to achieve an equitable distribution of benefits and burdens. State Departments of Transportation incorporate EJ considerations into planning processes by evaluating the effect of transportation programs, projects and policies on low income and minority populations, which will be referred to as target populations in this chapter.

The following sections identify target populations and provide an analysis of the impacts of STIP projects on these populations.

Section 1: Identifying Target Populations

Section 2: Public Involvement of Target Populations

Section 3: Analysis of Disproportionately High and Adverse Impacts on Target Populations

Section 4: Analysis of Proportionate Share of Benefits for Target Populations

Section 1: Identifying Target Populations

For the EJ analysis ODOT identified target census tracts for minority and poverty populations. Below are the definitions that were used to determine minority and poverty populations.

Minority: All individuals that are not 100% white.

Poverty: All individuals whose 2023 income was below the poverty level as determined by the US Department of Health and Human Services.

A census tract was considered a target for minorities if the percent of minorities in the census tract exceeded the percent of minorities in the state, which is **22.2%**. A census tract was considered a target for poverty if the percent of individuals whose income was below the poverty level exceeded statewide levels of **13.3%**.

A map of target minority and poverty census tracts is shown in **Figure 5.1** on the next page. As can be seen, target minority census tracts seem to cluster around Ohio's larger cities, while target poverty census tracts are more widespread around cities of all sizes as well as large sections of rural regions, particularly in the rural regions of Southeast Ohio.

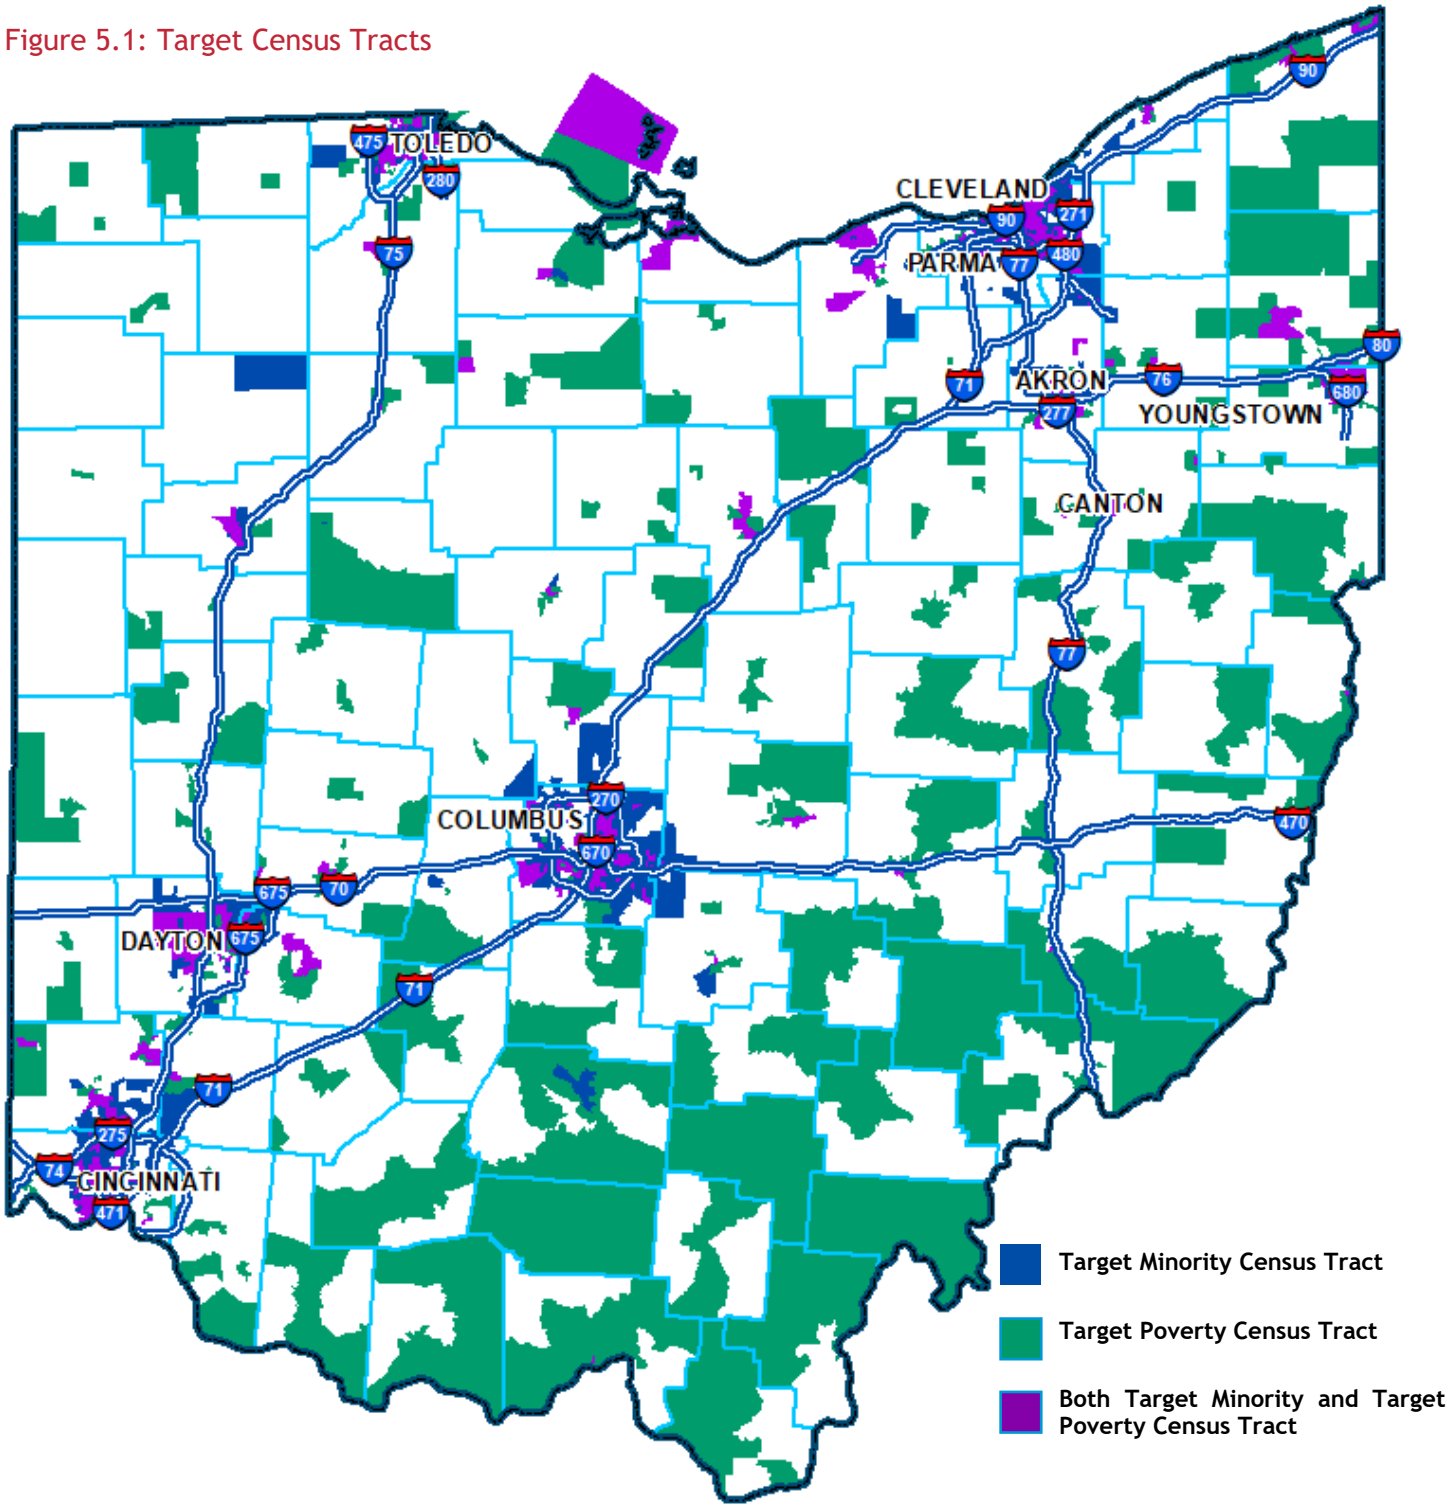

Section 2: Public Involvement of Target Populations

The general public, including low income and minority populations, have several opportunities to participate in ODOT's program decision making process. Opportunities to provide input on the STIP are explained in **Chapter 7**. This environmental justice analysis is available for review providing people the opportunity to comment if they disagree with the methodology of this EJ analysis as part of the STIP public involvement.

Figure 5.1: Target Census Tracts

Section 3: Analysis of Disproportionately High and Adverse Impacts on Target Populations

This section of the EJ analysis will ensure that minority and low income populations do not bear an unreasonably high proportion of negative impacts. Potential negative impacts of transportation projects include:

- **Property acquisitions** - which are burdensome to landowners and can potentially fragment neighborhoods.
- **Disruption of waterways, wetlands, and habitats**.

Figure 5.2 shows the percent of STIP period property acquisitions planned in target areas compared to the percent of population in those areas. **Figure 5.3** shows the percent of STIP projects that will impact wetlands in target areas compared to the total number of projects. As shown, there is not a disproportionate amount of property acquisitions in minority or poverty areas compared to the percent of people living in those areas. There is also not a disproportionate amount of projects impacting wetlands in target areas.

Figure 5.2: Target Area Property Acquisitions Compared to Target Area Populations

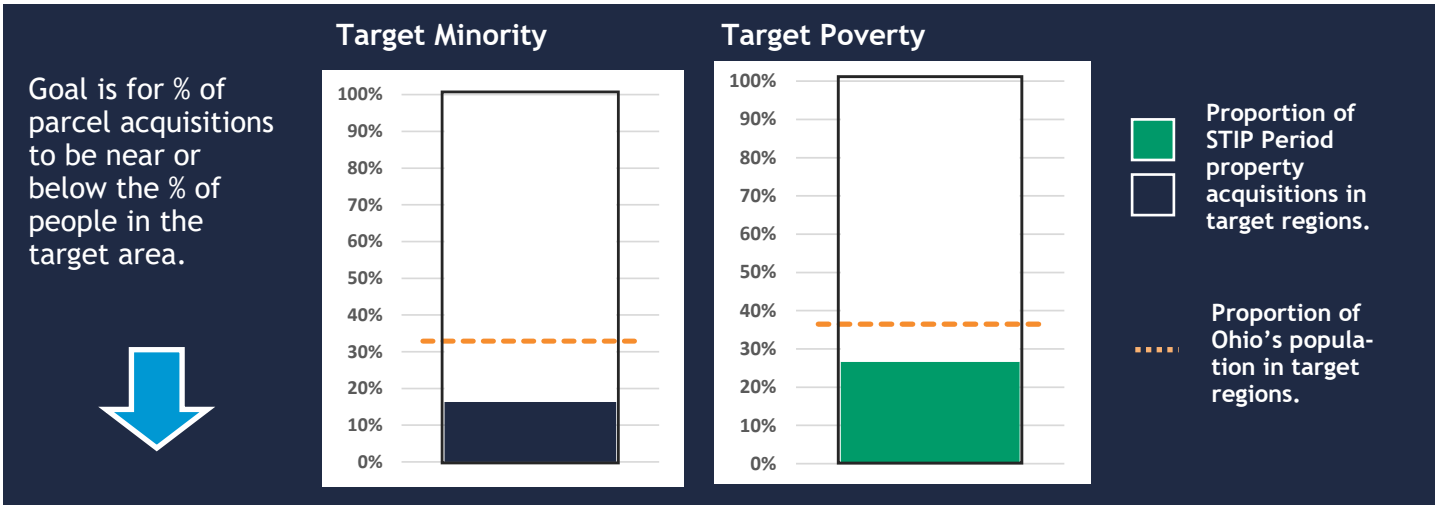

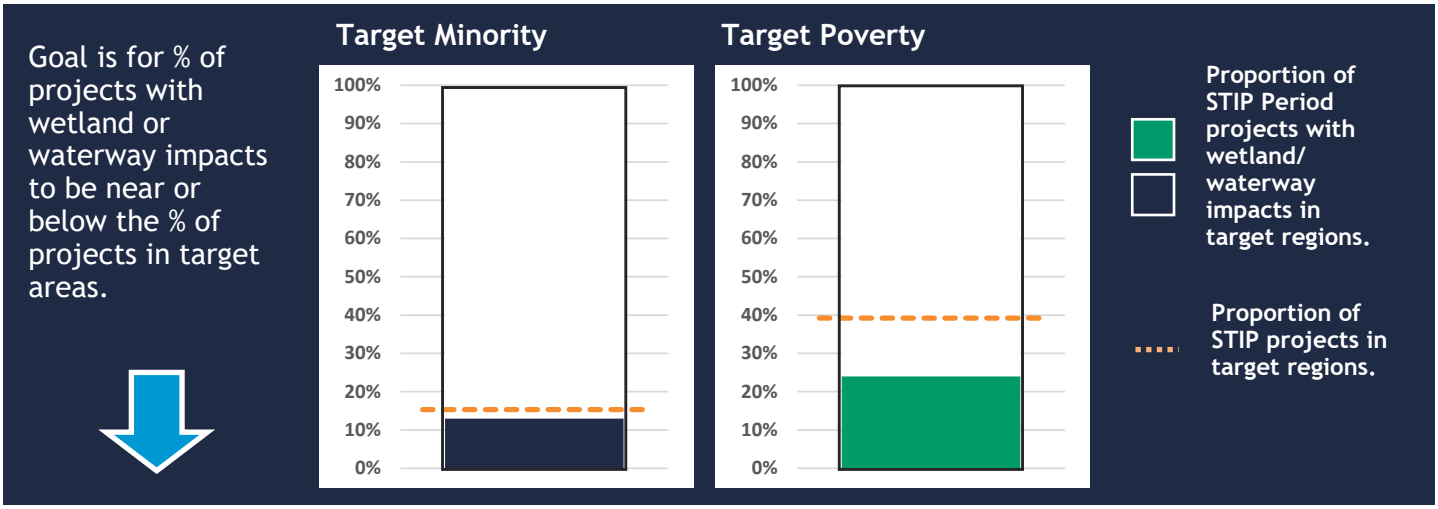

Figure 5.3: Target Area Projects with Waterway Impacts Compared to Total STIP Projects

Section 4: Analysis of Proportionate Share of Benefits for Target Populations

This section of the EJ analysis will ensure that minority and low income populations will receive a proportionate share of transportation improvements in the STIP period. **Figure 5.4** shows the percent of STIP Period pavement improvements in target areas compared to the percent of Ohio's roads in these regions. **Figure 5.5** shows the percent of STIP Period bridge improvements in target areas compared to the percent of Ohio's bridges in these regions. **Figure 5.6** shows the percent of STIP period funding in target areas compared to the percent of population in these regions. As shown, target minority regions will receive a proportionate share of pavement, bridge, and total project improvements. Target poverty regions have less proportion of treated pavement miles than in past years, however, almost 50% of the funding in the STIP is in target poverty areas. This is more than proportionate when considering that 36% of Ohio's population are in target poverty regions and 40% of Ohio's roads are in target poverty regions.

Figure 5.4: Target Area Pavement Improvements (miles) Compared to Total Lane Miles

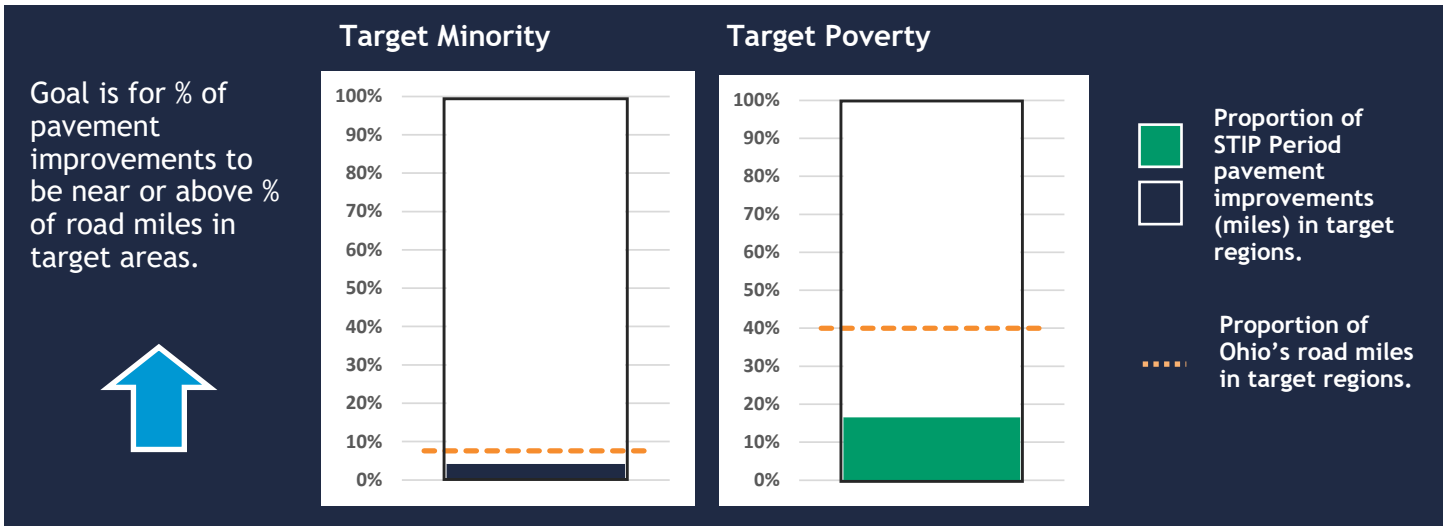

Figure 5.5: Target Area Bridge Improvements (# bridges) Compared to Total Bridges

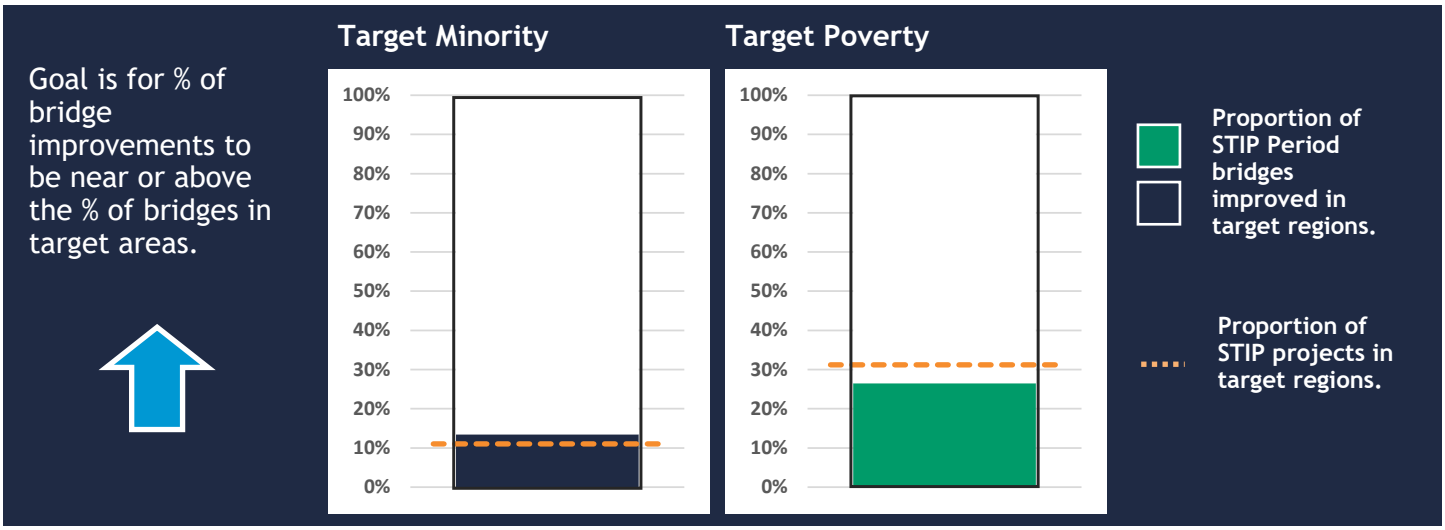

Figure 5.6: Target Area Road and Bridge Project Expenditures Compared to Population

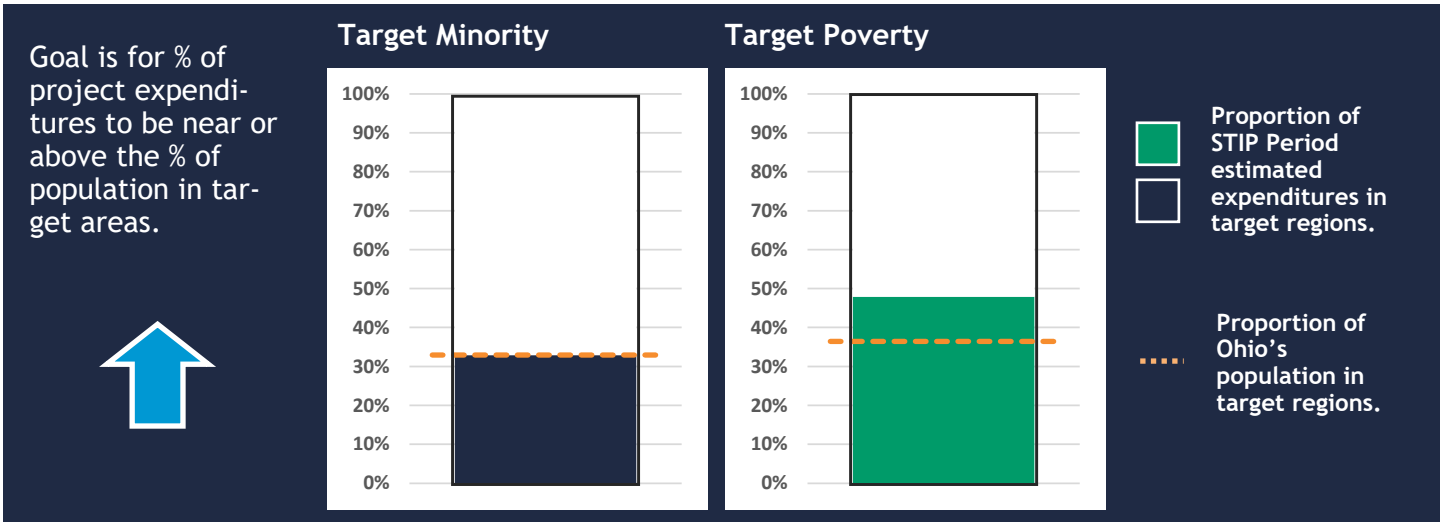

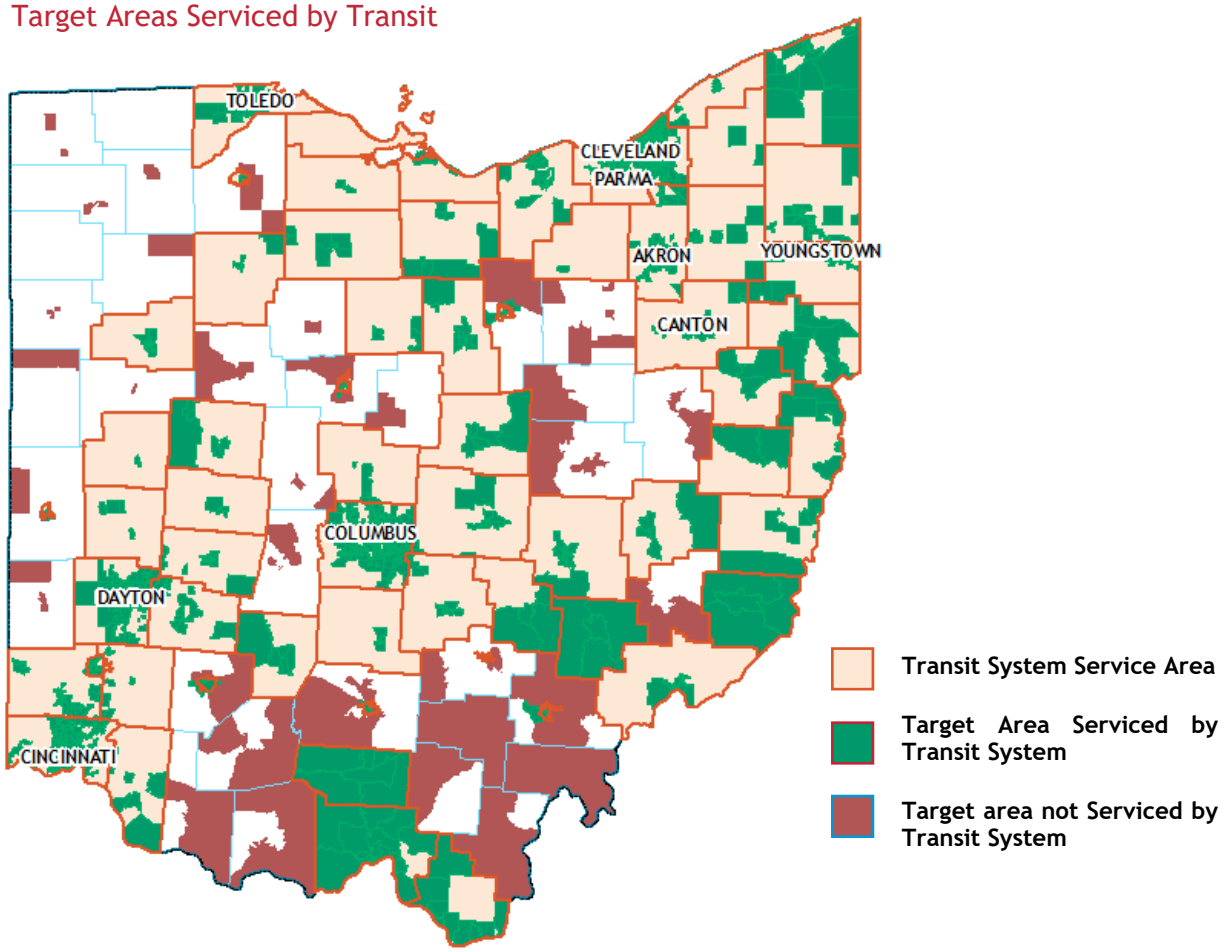

Figure 5.7 below shows the target areas estimated to receive STIP period transit funding. **96%** of the population in target minority regions is serviced by a transit agency that is estimated to receive funding in the STIP period. **73%** of the population in target poverty regions is serviced by a transit agency that is estimated to receive funding in the STIP period. This demonstrates that target areas will receive a proportionate amount of transit funding.

Figure 5.7: Target Areas Serviced by Transit

Conclusion

ODOT has reviewed the targeted population areas and the projects scheduled in those areas within the four year STIP. Based upon this review, ODOT believes that a reasonable distribution of benefits is scheduled to be made with this program of projects. This includes all projects, transit, maintenance and new construction. In addition, ODOT could not identify any "disproportionate burden" on any targeted population in Ohio from projects listed in this STIP. The review of the EJ impacts of the specific projects is or will be evaluated and addressed through mitigation, minimization, or avoidance as part of the project development and NEPA processes.

Chapter 6: ADA & Title VI Compliance

ADA

The Americans with Disabilities Act (ADA) of 1990 is a civil rights law that prohibits discrimination against individuals with disabilities in all areas of public life, including transportation and access to general public places. The purpose of the ADA is to ensure equal access and opportunities for persons with disabilities, including participating in State and local government programs and services, including being able to use the transportation system in a safe manner.

ODOT's commitment to the ADA is widespread and continuously developing, which is evident through our compliance efforts, in particular the enhancements that have been made to our design and implementation standards. An integral component of the ADA planning process for government and transportation infrastructure owners to prepare and implement both ADA Self-Evaluations and Transition Plans that inventory current accessibility conditions, define strategies to correct recognized deficiencies, and prioritize schedules for implementing accessible pedestrian networks.

ODOT works with our transportation planning partners, including MPOs and RTPOs and local governments, to ensure the correct standards and regulations are engrained into daily operations as a part of every project that contains ADA related elements, as well as incorporating ADA Self-Evaluations and Transition Plans into their transportation planning programs.

In recent years, ODOT formed a wide-ranging interdisciplinary team which has worked diligently to accurately inventory and assess its transportation related assets in the rights of way (i.e., curb ramps, sidewalks, pedestrian signal heads/ buttons, and bridges with pedestrian access), including building a comprehensive asset management and collection web-based application tailored to ADA specifications (ODOT ADA Collector App). This data collection piece has proved integrally vital to our long-term data management, as well as being an effective tool to analyze and work to improve our proactive stance on deficiency management and eradication.

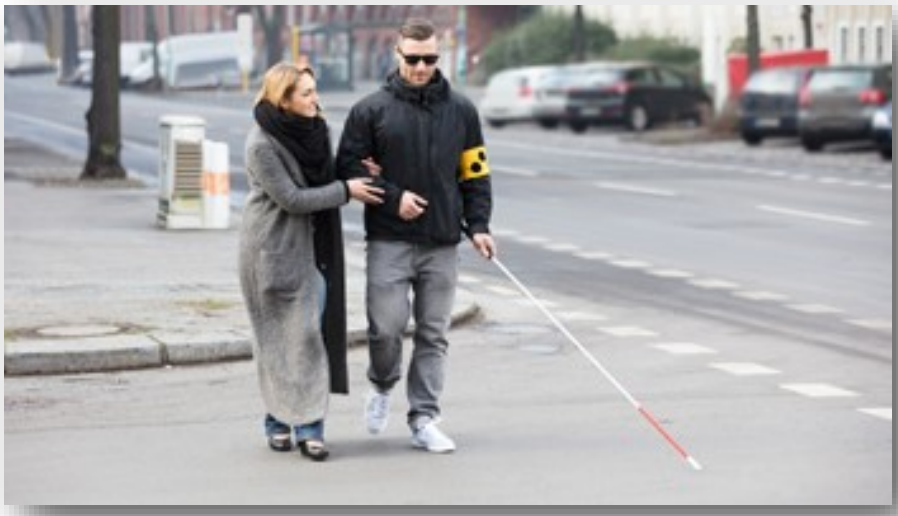

Some highlights of the interdisciplinary teams changes that have been implemented are as follows:

- Created a single location for ADA standards, guidance, background information and other resources—ADA Design Resources .
- Updated the Design Reference Resource Packet for Traffic Signals to emphasize ADA traffic signal requirements.
- Established a waiver process for curb ramps that cannot be feasibly constructed. This process includes: design guidance, an evaluation form, waiver workflow and an electronic waiver form, modifications to construction plan title sheets to identify projects with an ADA Waiver, and modifications to the ODOT ADA Collector App to ensure a comprehensive process.
- Provided additional design guidance (Section 300 of the L&D Vol. 1 Manual) for optimum curb ramp selection and blended transitions. Additionally, ramps were divided into tiers with a preference listed.
- Provided best practice examples of plan detail sheets on the ADA reference website .
- Created construction tolerances – Updated Location & Design Manual Vol. I and Standard Construction Drawing BP-7.1. The values for cross slope changed from a maximum of 2% to 1.56% and ramp slope changed from a maximum of 8.33% to a maximum of 7.69%.
- To prevent a curb ramp from being completed before any construction issues are identified, construction check points were created for the contractor to check-in with the Department during construction to ensure compliant construction. These check points were added to the Manual of Procedures.
- Created 4 training videos covering changes to the ADA curb ramps process: Design, Waivers, and Construction and Inspection.

ODOT developed a toolkit for local governments, which includes a template for both a self-evaluation and a transition plan, along with detailed instructions and resources in order to accomplish these requirements. ODOT continually assesses and adds tools as needed. Additionally, ODOT works closely with its Office of Local Technical Assistance (LTAP) to build and provide ongoing ADA related training classes, webinars, and workshops tailored to local governments and their responsibilities under the ADA. ODOT has a series of training webinars/videos on the LTAP webpage that provide additional education and guidance to local governments on how to assess and manage their ADA assets in the rights of way.

Just like the assets in the rights of way, ODOT completed a comprehensive review of its physical facility locations, including its central office complex, each of its twelve district headquarter buildings, its full-service maintenance facilities in each of Ohio's 88 counties, and its numerous rest areas. As a result, ODOT created an annual capital improvement budget in order to remove and correct barriers to accessibility within its facilities. Numerous deficiencies have been corrected over the last several years and will continue to be eradicated and improved upon. These corrections will be highlighted in the agencies next Transition Plan. In the coming years, 28 new rest area facilities will be created and will incorporate ADA accessible features into each one, including a family restroom space equipped with adult sized special needs changing tables.

ODOT is committed to ensuring that its ADA program is continuing to evolve, making barrier removal a priority, and ensuring proper design and construction of ADA related assets, in the rights of way and in our facilities statewide.

Title VI Compliance

As a recipient of federal financial assistance, ODOT, including its sub-recipients, is obligated to adhere to, and is committed to achieving full compliance with Title VI of the Civil Rights Act of 1964 (Title VI) and all related nondiscrimination laws. ODOT incorporates the principles of EJ into its programs, policies, and activities to ensure there are no transportation system-related disproportionate adverse impacts particularly to low-income and minority populations. See **Chapter 5** for additional information on the STIP EJ analysis.

Executive Order 13166 on Limited English Proficiency (LEP) is also included to ensure meaningful access is provided to persons who are limited in the English language. The basic philosophy of Title VI is that "no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance" (42 U.S.C. Section 2000d).

ODOT has taken the following steps to ensure compliance with Title VI and its related nondiscrimination statutes.

- ODOT submits its Title VI/Nondiscrimination Program Implementation Plan to FHWA annually, every October 1. Upon approval by FHWA, the most current version of the Title VI Plan is available for the public on ODOT's Title VI Program's webpage.
- ODOT executes a Title VI/Nondiscrimination Policy to ensure that no person will be denied the benefits of or be excluded from participation in or be subjected to discrimination under any program, service, or activity on the basis of race, color, national origin, sex, age, disability, low-income status, or limited English proficiency. ODOT updates its policy to reflect any needed changes.
- ODOT entered into a Nondiscrimination Agreement, Title VI Assurances, with the FHWA and the FTA. The assurances set forth ODOT's commitment to comply with Title VI in all its programs and activities. In accordance with DOT Order No. 1050.2A, ODOT updates its Standard Title VI/Nondiscrimination Assurances annually.
- ODOT created the Division of Opportunity, Diversity & Inclusion (ODI) on July 1, 2015 in an effort to promote diversity and provide equitable opportunities both internally and externally. ODI is comprised of the Office of Civil Rights Compliance, the Office of Business and Economic Opportunity, and, the Office of Outreach.
- ODOT's designated Title VI Coordinator has easy access to the ODOT Director on Title VI issues and is responsible for monitoring ODOT's Title VI activities, as well as preparing required reports.

To obtain additional information on ODOT's Title VI and Non-Discrimination Program, including how to file a complaint, please visit ODOT's Title VI webpage.

Chapter 7: Public Involvement

Public involvement is an integral part of STIP development. Continual coordination between ODOT, MPOs, RTPOs, transit authorities, local governments, and other stakeholders through active public participation is an important element in STIP development. MPOs and RTPOs lead the development and public review of TIPs for their regions; while ODOT coordinates the development and public review of the STIP for Ohio counties outside of the MPO and RTPO boundaries.

ODOT's Planning Program Public Involvement Process outlines the procedures to be used for the STIP public involvement period. Various forms of notification for statewide outreach are used to engage the public in the review of the draft STIP including:

- ODOT's social media outlets such as Facebook , X, and LinkedIn;
- Media Releases (regional and statewide media releases sent by the ODOT Office of Communications);
- Mailing Lists (email notifications to various transportation partners statewide); and
- Statewide meeting invitations and flyers.

The public involvement period for the draft 2026-2029 STIP is to be held Tuesday, March 11 to Friday, April 11, 2025. Comments can be made during this time by visiting the Ohio STIP webpage, by attending one of the scheduled meetings, or by contacting ODOT, an MPO, or an RTPO. Public involvement for the draft TIPs and STIP is held in accordance to the MPO and RTPO public involvement participation plans and ODOT's Planning Program Public Involvement Process respectively.

The Ohio Department of Transportation is committed to providing access and inclusion and reasonable accommodation in its services, activities, programs, and employment opportunities in accordance with the Americans with Disabilities Act (ADA) and other applicable laws. To request a reasonable accommodation due to a disability, or language interpretation or translation services, to participate in the review of the 2026-2029 draft STIP, please contact the meeting coordinator or the ODOT ADA Coordinator 15 days prior to the scheduled meeting. A list of the scheduled meetings can be found on the STIP website. Public participation is solicited without regard to race, color, sex, age, national origin, or disability.

Documentation for the draft 2026-2029 STIP period will be included in **Appendix 1**.

Chapter 8: Funding & Fiscal Constraint for Highway Revenues

The STIP is a financially responsible and fiscally constrained multi-modal program of highway and transit transportation projects. This chapter explains how Ohio receives and allocates revenues and demonstrates that Ohio has reasonably expected funding to finance the highway projects in Ohio's STIP. The chapter contains the following 6 Sections:

Section 1: Revenue Sources
Section 2: Funding Allocation of Ohio Managed Programs
Section 3: Project Selection
Section 4: Federal Authorization and Advanced Construction
Section 5: Demonstration of Fiscal Constraint
Section 6: STIP Groups

Figure 8.1: Federal Highway Funds Allocated to Ohio by Formula (~$1.8B Annually)

- National Highway Performance Program
- Surface Transportation Block Grant
- Highway Safety Improvement Program
- Railway-Highway Crossings Program
- Congestion Mitigation and Air Quality
- Metropolitan Planning
- National Highway Freight Program
- Carbon Reduction Program
- PROTECT Formula Program
- Recreational Trails

Section 1: Revenue Sources

The majority of Ohio's 2026-2029 highway transportation funding will come from federal and state gas taxes. **Figure 8.1** below shows the sources of federal funds that are allocated by formula to all states, including Ohio. Ohio also receives approximately $1.8 Billion in state funds including: motor fuel tax, fuel use tax, and other income. Approximately $1Billion of this state funding is set aside to finance transportation projects and the remainder is spent on operations and maintenance and paying back loans/bonds (debt service).

Section 2: Funding Allocation of Ohio Managed Programs

ODOT takes the federal and state funds and allocates them into ODOT managed programs. Each program has the following characteristics:

Program Purpose - such as improving pavement conditions, improving safety of the transportation system, expanding the system, etc. which include the MPO managed program for federally required and discretionary funding.

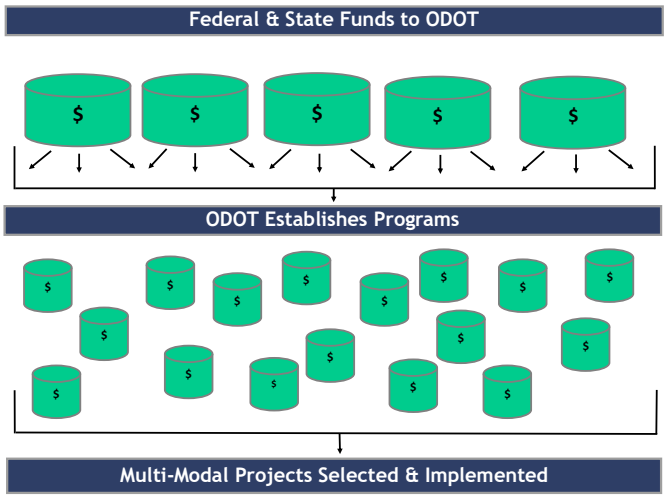

Program Funding – each program receives funding every year depending on alignment with different program goals and need. For example, Safety program funding has increased from approximately $100M in 2018 to over $190M in the upcoming 2026-2029 STIP period.

Eligibility Requirements – Such as what types of entities are eligible to apply, in what regions of the state, and for what purposes.

Program Oversight – Typically, programs are managed by an Agency such as a Metropolitan Planning Organization, an Office in ODOT such as the Office of Transportation and Economic Development, or an individual Program Manager. The role of the program owner is to identify goals, solicit for projects, and select projects in coordination with applicable planning partners.

Figure 8.2 Shows how the process of program allocation works. Below that is a list of the primary program groups that ODOT establishes. Some of these programs, such as the MPO Capital Program, align directly with the Federal Funding sources in **Figure 8.1,** but for the most part each of the ODOT managed programs contains a variety of sources of federal and state revenues. Program groups shown below align with the Fiscal Constraint in **Table 8.3.**

Figure 8.2: Ohio Program Allocation

Ohio Managed Programs

DERG—Diesel Emissions Reduction Grant (DERG)

Discretionary/Earmark
- Appalachian Development
- Discretionary
- Earmark

Emergency

FLAP—Federal Lands Access Program

Garvee/SIB—Garvee Bonds and SIB Loans

Local Programs
- County Local Bridge Replacement (CEAO)
- County Highway Safety Improvement (CEAO)
- County Surface Transportation (CEAO)
- County Bridge Partnership Program
- Municipal Bridge
- Local Major Bridge
- Small City
- Transportation Alternative
- Safe Routes to School

Major Programs
- Major Programs
- Transportation Review Advisory Council (TRAC)

MPO Capital Program
- MPO and Large City

National Highway Freight Program
- Maritime & Freight Program

Other Programs
- Noise Wall Program
- Geologic Site Management
- Disadvantaged Business Enterprise
- Carbon Reduction
- National Electric Vehicle Infrastructure

Preservation
- District Pavement and Bridge Preservation

Rail
- Railroad Crossing Safety

Recreational Trails (*administered by Ohio Department of Natural Resources*)

Safety
- Highway Safety Improvement Program

State Funded Programs
- District Maintenance
- Intelligent Traffic Systems
- Jobs and Commerce
- Oil and Shale Program
- Parks—Metro Parks and ODNR Roadway Maintenance Program
- Transportation Improvement Districts
- Unmanned Aerial

Additional information on Ohio's managed programs and funding, including eligibility and evaluation criteria for project selection, can be found on ODOT's website.
- Programs Catalog
- ODOT Resource Guide
- Transportation Funding

Section 3: Project Selection

The projects identified for funding by each program have been thoughtfully selected through performance based planning selection processes in order to ensure the operation, maintenance and improvement of Ohio's robust transportation system. The projects are consistent with the goals of Ohio's Long Range Plan (AO2045) and align with the priorities to take care of the current transportation assets before considering expansion.

The projects identified in the Appendices of the STIP align with the priorities of the state and have funding scheduled for some phase of implementation within the four-year STIP period. These projects are identified in the STIP either individually or by group in accordance to 23 CFR 450.218(j). Section 6 discusses STIP groups in more detail. As the STIP is a planning document, the projects, schedules, and established costs identified are based on the most current project information at the time of preparing the STIP.

Note, highway projects with SFY 2025 funding in the 2024-2027 STIP that have yet to receive federal authorization will be considered carry forward projects. These projects will be administratively modified into the 2026-2029 STIP in accordance to the Ohio STIP Revisions Guidelines.

Section 4: Federal Authorization and Advanced Construction

Ohio requests federal authorization of funds as project phases are ready to incur costs. ODOT utilizes advanced construction for most projects, enabling work to begin on project phases without obligating the specific federal fund that will be used to reimburse the work. For projects utilizing advanced construction, actual obligations of federal funds occur as costs are incurred on a project or as bond/ loan repayments (debt service) are made. Visit the ODOT Budget Facts webpage for additional details on ODOT's finances.

Section 5: Demonstration of Fiscal Constraint

The STIP is required to be reasonably fiscally constrained by federal law which simply means that ODOT will not spend more than the anticipated planned budget. **Table 8.3** provides an overview of the various planned program budgets and project estimates from **Appendix 3**. The following budget assumptions were made in order to demonstrate reasonable fiscal constraint for transit and highway projects:

- Most recent federal apportionment amounts were used as budgets for 2026.
- 0% growth was assumed for 2026 - 2029.
- Budgets include anticipated carry forward from prior years.
- The budget for highway state funds was established by ODOT after funding was designated for maintenance & operations and snow & ice funding.
- Project cost estimates reflect "year of expenditure dollars" based on reasonable financial principles and information developed cooperatively by the State, MPOs, and public transportation operators.
- Up to 15% overprogramming of allocated funds planned for capital programs due to projects coming in under the programmed amounts at the time of bid, projects being delayed, and/or projects being cancelled due to shifting local and regional priorities.

As shown in **Table 8.3**, ODOT demonstrates reasonable fiscal constraint is maintained for the four-year STIP period.

Table 8.3: Fiscal Constraint for Highway Funds

Federal budgets are apportionment amounts assuming no inflation.
Funding information is for S/TIP planning purposes only and is not intended to be the official financial record of carry forward, budgets, and fiscal balances.
Amounts are shown in millions.

Section 6: STIP Groups

In accordance with the parameters established in 23 CFR 450.218(j) and 23 CFR 450.326(h), projects not considered to be of appropriate scale for individual identification in a given program year may be added to the TIPs and STIP by grouped projects. (*Note that ODOT previously identified grouped projects as Statewide Line Item or SLI projects and some TIPs may still reference them as such.*) Grouped projects have an air quality status of exempt, do not have a significant environmental impact, and do not add capacity. **Table 8.4** shows the groups in the STIP for highway projects and the total estimates planned for each group. Fiscal constraint is maintained on a statewide level and is demonstrated in **Table 8.3.** Projects contained within the groups are coordinated on a monthly basis with the MPOs and RTPO for inclusion in the TIPs/STIP. These groups are subject to the *Ohio STIP Revision Guidelines*. See the *STIP Grouped Project Guidance* for additional information.

Table 8.4: STIP Groups for Highway Projects

STIP Year	2026	2027	2028	2029	Total
STIP Fund Type	Budget	Budget	Budget	Budget	Budget

Chapter 9: Funding & Fiscal Constraint for Transit Revenues

The STIP is a financially responsible and fiscally constrained multi-modal program of highway and transit transportation projects. This chapter explains how Ohio receives and allocates revenues and demonstrates that Ohio has reasonably expected funding to finance the transit projects in Ohio's STIP. The chapter contains the following 6 Sections:

Section 1: Revenue Sources
Section 2: ODOT Administered Program and Project Management Practices
Section 3: Demonstration of Fiscal Constraint
Section 4: STIP Groups

Section 1: Revenue Sources

The majority of Ohio's 2026-2029 transit funding comes from the Federal sources listed below. Most of these federal transit funds are allocated directly to Ohio's transit agencies and Metropolitan Planning Organizations. Other sources of transit revenue come from federal discretionary, state, and local funding.

- Section 5307—Urbanized Area Formula Grants Program
- Section 5310—Enhanced Mobility of Seniors and Individuals with Disabilities Program
- Section 5311—Formula Grants for Rural Areas Program
- Section 5337—State of Good Repair Grants Program
- Section 5339(a)—Grants for Buses & Bus Facilities Program

ODOT also manages a few state funded transit programs as listed below. ODOT provides for operating, planning, and capital expenses. According to the Ohio Constitution, no state gasoline tax revenues can go to public transportation; as such, all sate funding for transit is drawn from the General Revenue Fund (GRF). GRF are part of the programs listed below and a small portion is used for administration costs. GRF are awarded to match federal dollars.

- Ohio Transit Partnership Program (OTPP)
- Urban Transit Program - UTP
- Rural Transit Program—RTP
- Specialized Transportation Program—STP

Section 2: ODOT Administered Program and Project Management Practices

Beginning each TIP/STIP development cycle, ODOT identifies the amount of funds that are anticipated to be awarded to each small urbanized and rural region within the upcoming STIP period. The estimated amounts are based upon historic expenditures in each region. These estimates are programmed in ODOT's internal project management system Ellis and the estimates are coordinated with each MPO and RTPO for TIP inclusion. ODOT follows an annual solicitation process for each program. Based on applications, ODOT recommends projects, coordinates those recommendations with its planning partners, and posts the recommended projects to the ODOT website for review and comment. ODOT also asks its planning partners to post the respective recommended projects to their website for review and comment. After the comment period, ODOT updates Ellis with the final projects selected. The TIPs and STIP are then updated with the final selected projects in accordance with the STIP Grouped Project Guidance by ways of the monthly grouped project report. See the MPO TIPs for non-ODOT administered programs. See **Appendix 4** for the Transit projects within the four-year STIP period.

Note, transit projects with SFY 2025 funding in the 2024-2027 STIP that are not yet awarded are considered carry forward projects. These projects will be administratively modified into the approved 2026-2029 STIP in accordance to the Ohio STIP Revisions Guidelines.

Section 3: Demonstration of Fiscal Constraint

The following budget assumptions were made in order to demonstrate reasonable fiscal constraint for transit projects:

- Most recent full year federal apportionment amounts were used as anticipated budgets for 2026.
- 2% growth year-over-year was assumed for 2026-2029.
- Budgets include anticipated carry forward from prior years.
- Up to 10% overprogramming of allocated funds assumed for capital programs due to projects coming in under the programmed amounts, projects being delayed, and/or projects being cancelled due to shifting local and regional priorities.

As shown in **Table 9.1**, ODOT demonstrates reasonable fiscal constraint is maintained for the four-year STIP period based on the above assumptions.

Table 9.1: Fiscal Constraint for Transit Funds

Year	2025	2026			2027			2028			2029		
STIP Fund Type	Carry Forward	Total			Total			Total			Total

Amounts are shown in millions.

Section 4: STIP Groups

In accordance with the parameters established in 23 CFR 450.218(j) and 23 CFR 450.326(h), projects not considered to be of appropriate scale for individual identification in a given program year may be added to the TIPs and STIP by grouped projects. (*Note that ODOT previously identified grouped projects as Statewide Line Item or SLI projects and some TIPs may still reference them as such.*) Grouped projects have an air quality status of exempt, do not have a significant environmental impact, and do not add capacity. **Table 9.2** shows the groups in the STIP for transit projects and the total budgets planned for each group. Fiscal constraint is maintained on a statewide level and is demonstrated in **Table 9.1.** Projects contained within the groups are coordinated with the MPOs and RTPO for inclusion in the TIPs/STIP as part of the revision process. These groups are subject to the *Ohio STIP Revision Guidelines*. See the *STIP Grouped Project Guidance* for additional information.

Table 9.2: STIP Groups for Transit Projects

Chapter 10: Performance Measures

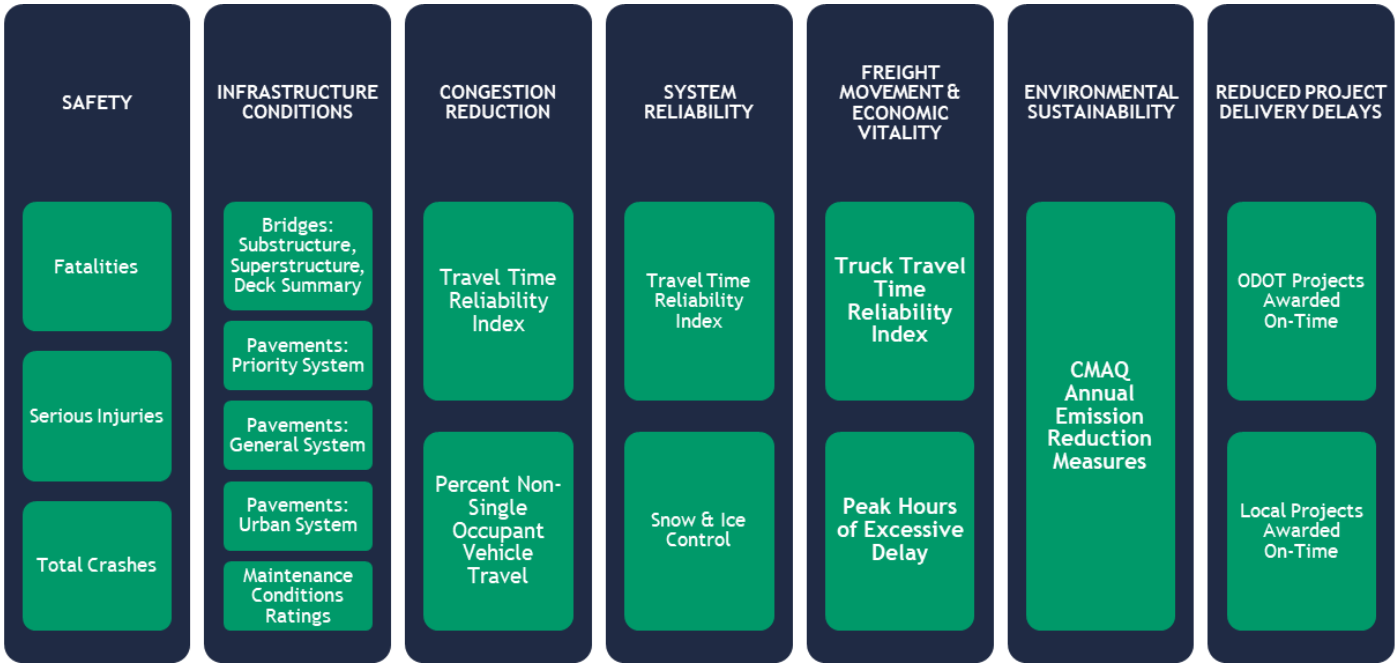

The FAST Act placed emphasis on incorporating performance management into transportation planning and programming processes. National performance goals have been established for seven key areas, and states are required to establish performance targets in support of these national goals. Projects on Ohio's STIP address transportation needs in one or more of these key areas, which are:

Safety	Infrastructure Condition	Congestion Reduction	System Reliability	Freight Movement & Economic Vitality	Environmental Sustainability	Reduced Project Delivery Delays

FHWA and FTA have developed a series of performance measures that every state must monitor to determine how effectively their transportation investments are advancing the national performance goals. FHWA transportation performance management occurs in 4-year cycles except for safety measures, which are updated annually. The current cycle is 2022 to 2025. Ohio analyzed standardized data for 2021 to determine a baseline condition, then established 2-year and 4-year targets (for 2023 and 2025, respectively) that reflect the anticipated performance level for each measure based on the state's plans and programs. ODOT coordinated with relevant MPOs on the selection of targets. States report their performance to FHWA biennially to see if the state is making significant progress toward the attainment of its established targets. States' performance is published on FHWA's State Performance Dashboard.

In addition to the federally required performance measures, ODOT will continue to monitor its own performance metrics known as Critical Success Factors. Monitoring these federal and state performance measures has assisted ODOT in setting new goals, adjusting priorities, allocating resources, and developing policy. A list of the performance measures that support the national goal areas is shown below in **Figure 10.1**.

Figure 10.1 Performance Measures

For additional information on ODOT's current performance measures and a breakdown of each metric, please visit ODOT's Strategic Plan webpage. For additional information on Performance Based Planning, please visit the websites of FHWA (www.fhwa.dot.gov) and FTA (www.fta.dot.gov) and enter *Performance Based Planning* in the search box.

Safety Performance Measures

Federal Rule 23 CFR 490 established five safety performance measures and requires states to set annual targets for those measures on all public roads. In accordance with federal legislation, ODOT used five-year rolling averages to calculate historic crash trends and identify statewide reduction targets. In 2024, ODOT analyzed crash data for 2019-2023 in the Ohio Department of Public Safety's Crash Report System to establish baselines for the five statewide safety measures.

BASELINES

Number of Fatalities = 1,228.2
Number of Serious Injuries = 7,790.5
Fatality Rate per 100 Million Vehicle Miles Traveled = 1.12
Serious Injury Rate per 100 Million Vehicle Miles Traveled = 6.77
Number of Non-Motorized Fatalities & Non-Motorized Serious Injuries = 842.4

After reviewing historical crash trends, external factors, and through consultation with Ohio's MPOs and RTPOs, ODOT adopted statewide targets for calendar year 2025 based on a 2 percent annual reduction across all five measures.

TARGETS

Number of Fatalities < 1,180.0
Number of Serious Injuries < 7,482.0
Fatality Rate per 100 Million Vehicle Miles Traveled < 1.08
Serious Injury Rate per 100 Million Vehicle Miles Traveled < 6.51
Number of Non-Motorized Fatalities & Non-Motorized Serious Injuries < 809.0

The table below shows the total projects and amount of money that Ohio is investing to improve safety of Ohio's transportation system.

Table 10.1 STIP Projects Improving Safety[1]

Total Safety Projects	Total Safety $ (Millions)	Projects with HSIP $	HSIP $ (Millions)
705	$1457.1 M	316	$615.3 M

1a Projects that have safety program funding or
1b Projects containing funding with one of the following federal improvement codes (Safety, Safety & Education of Pedestrians/Bicycles).
Note: HSIP funding is SAC 4HJ7.

Pavement and Bridge Performance Measures

23 CFR 490.307 and 23 CFR 490.407 established performance measures for the condition of all pavements and bridges on the National Highway System (NHS). In 2022, ODOT established two and four-year statewide targets for the 2022 to 2025 performance period as shown below. Ohio met its 2-year targets for infrastructure condition in 2023.

Table 10.2 Pavement and Bridge Performance Measures

Performance Measure	Baseline (2021)	2-Year Performance (2023)	2-Year Target (2023)	4-Year Target (2025)	2-Year Target Met?
Interstate Pavement Condition					
% Good	72.9%	75.4%	> 55%	> 55%	Yes
% Poor	0.1%	0.1%	< 1%	< 1%	Yes
Non-Interstate NHS Pavement Condition					
% Good	46.4%	50.4%	> 40%	> 40%	Yes
% Poor	1.9%	1.3%	< 2%	< 2%	Yes
NHS Bridge Conditions					
% Good	60.9%	60.8%	> 55%	> 55%	Yes
% Poor	2.0%	2.0%	< 3%	< 3%	Yes

The tables below show the total projects and amount of money that Ohio is investing to maintain and improve pavement and bridge conditions on the NHS during the STIP period.

Table 10.3 STIP Projects Improving Pavements[1]

Road Type	Number of Projects	Lane Miles Improved	Construction $ (Millions)
Interstate	104	2,618	$1293.2 M
Non-Interstate NHS	269	3,524	$1272.5 M

1 Projects that have construction contract funds assigned to treated interstate or Non-Interstate NHS segments.

Table 10.4 STIP Projects Improving NHS Bridges[1]

Number of Projects	Bridges Improved	Construction $ (Millions)
244	928	$1017.9 M

1 Projects that have construction contract funds assigned to treaded bridges on the NHS system.

Travel Time Reliability Performance Measures

There are three performance measures related to travel time reliability. Two of these measures were established by 23 CFR 490.507 to assess the reliability of the National Highway System (NHS). They are:

- Percent of the person-miles traveled on the Interstate that are reliable (referred to as the Interstate Travel Time Reliability measure)
- Percent of person-miles traveled on the non-Interstate NHS that are reliable (referred to as the Non-Interstate Travel Time Reliability measure

The other travel time reliability performance measure assesses freight movement on the Interstate System, and is called the Truck Travel Time Reliability (TTTR) Index. Ohio met its 2-year targets for all three of these performance measures 2023.

Table 10.5 Travel Time Reliability Performance Measures

Performance Measure	Baseline (2021)	2-Year Performance (2023)	2-Year Target (2023)	4-Year Target (2025)	2-Year Target Met?
Travel Time Reliability (TTR) - Interstates	98.8%	97.1%	> 85.0%	> 85.0%	Yes
Travel Time Reliability (TTR) - Non-Interstates	96.4%	95.9%	> 80.0%	> 80.0%	Yes
Truck Travel Time Reliability (TTTR) Index	1.19	1.22	< 1.50	< 1.50	Yes

The tables below show the total projects and amount of money that Ohio is investing to maintain and improve travel time reliability on the NHS during the STIP period.

Table 10.6 STIP Projects Improving Travel Time Reliability[1]

Road Type	Number of Projects	Construction $ (Millions)[2]
Interstate	15	$710.8 M
Non-Interstate NHS	11	$572.1 M

1a Projects that have one of the following primary project purposes (Bridge Expansion, Intersection Expansion, Interchange Expansion, New Roadway, Add Through Lane(s), Rail Grade Separation, Transport System Mgmt. and Ops) or

1b Projects that have funding with one of the following federal improvement codes (New Construction, Reconstruction -Added Capacity, Bridge - New Construction, Bridge Replacement - Added Capacity, Rail/ Highway Crossing).

2 Total project cost for projects meeting criteria 1a above or sum of funding with federal improvement code listed in 1b above.

CMAQ Traffic Congestion Performance Measures (Urban Areas)

23 CFR 490.707 established two performance measures to assess traffic congestion in applicable urban areas. Annual Hours of Peak Hour Excessive Delay (PHED) Per Capita (referred to as the PHED measure) quantifies traffic delay, per capita, above a federally-defined average for an urbanized area's peak travel period. The Percent of Non-Single Occupant Vehicle (Non-SOV) Travel measure quantifies the percentage of daily commuters in an urbanized area who use some form of transportation (including tele-commuting) other than driving alone in a personal vehicle.

Table 10.7 CMAQ Traffic Congestion Performance Measures for Urban Areas

Performance Measure	Baseline (2021)	2-Year Performance (2023)	2-Year Target (2023)	4-Year Target (2025)	2-Year Target Met?
Annual Peak Hours of Excessive Delay (PHED) per Capita					
Akron Region	5.6	4.8	< 5.0	< 5.0	Yes
Canton Region	1.6	1.9	< 3.0	< 3.0	Yes
Cincinnati Region	7.1	6.1	< 9.0	< 9.0	Yes
Cleveland Region	6.8	6.5	< 21.0	< 21.0	Yes
Columbus Region	5.1	5.9	< 10.0	< 10.0	Yes
Dayton Region	6.3	6.9	< 7.2	< 7.2	Yes
Toledo Region	6.1	7.1	< 7.0	< 7.0	No
Percent of Non-Single Occupancy Vehicle (Non-SOV) Travel					
Akron Region	17.3%	19.4%	> 16.0%	> 16.0%	Yes
Canton Region	16.3%	17.7%	> 15.0%	> 15.0%	Yes
Cincinnati Region	20.0%	22.2%	> 18.5%	> 18.5%	Yes
Cleveland Region	20.6%	22.7%	> 18.5%	> 19.0%	Yes
Columbus Region	20.8%	24.0%	> 18.5%	> 19.0%	Yes
Dayton Region	18.1%	19.6%	> 16.1%	> 16.1%	Yes
Toledo Region	16.1%	17.6%	> 15.0%	> 15.0%	Yes

Table 10.8 on the next page summarizes CMAQ funded projects for each of the applicable urban areas. These projects are generally selected by the MPOs in which the urban areas are located. However, MPOs and ODOT apply funds from many other federal programs to projects that improve performance for these measures. **Table 10.9** and **Table 10.10** also on the next page summarize all projects and investments in these regions that will contribute to a reduction in Peak Hour Excessive Delay (PHED) and encourage Non-Single Occupancy Vehicle (SOV) travel and the subset of those projects using CMAQ funds.

Table 10.8 STIP Projects with CMAQ Funding in Urban Areas[1]

Urbanized Area	Number of Projects	CMAQ $ (Millions)
Akron	14	$18.3 M
Canton	3	$10.5 M
Cincinnati	14	$22.4 M
Cleveland	24	$49.5 M
Columbus	15	$53. M
Dayton	24	$29. M
Toledo	16	$13.7 M

1 Projects that have CMAQ funding (SAC 4TB7, 4TE7, or 4NG5).

Table 10.9 STIP Projects Improving Peak Hour Excessive Delay in Urban Areas[1]

Urbanized Area	Total PHED Projects	Total PHED $ (Millions)	PHED Projects with CMAQ $	PHED CMAQ $ (Millions)
Akron	3	$33.9 M	1	$3. M
Canton	0	$. M	0	$. M
Cincinnati	13	$1075. M	0	$. M

Toledo	1	$.9 M	0	$. M

1a Projects that have one of the following primary project purposes (Bridge Expansion, Intersection Expansion, Interchange Expansion, New Roadway, Add Through Lane(s), Rail Grade Separation) and contain committed construction contract funding or

1b Projects that have funding with one of the following federal improvement codes (New Construction, Reconstruction -Added Capacity, Bridge - New Construction, Bridge Replacement - Added Capacity, Rail/ Highway Crossing, Traffic Management Engineering - HOV) and contain committed construction contract funding.

Table 10.10 STIP Projects Improving Non-SOV Travel in Urban Areas[1]

Urbanized Area	Total Non-SOV Projects	Total Non-SOV $ (Millions)	Non-SOV Projects with CMAQ $	Non-SOV CMAQ $ (Millions)
Akron	12	$8.4 M	4	$.3 M
Canton	5	$6. M	0	$. M
Cincinnati	40	$124.6 M	5	$31.7 M
Cleveland	36	$100.9 M	9	$61.1 M
Columbus	26	$114.9 M	6	$14.2 M
Dayton	33	$35.2 M	7	$7.7 M
Toledo	25	$41.4 M	4	$.3 M

1a Projects that contain an FTA Transfer or

1b Projects that contains 'Rideshare' in the project name or

1c Projects that have a primary project purpose related to one of the following (Bike Facility, Enhanced Crossing, Pedestrian Facilities, Shared Use Path) and have committed construction contract funding

Total CMAQ Emissions Reduction Performance Measures

The performance measure for assessing on-road mobile source emissions is known as Total Emissions Reduction, established in 23 CFR 490.807. Total Emissions Reduction is the 2-year and 4-year cumulative reported emission reductions, for all projects funded by CMAQ funds, of certain pollutants for which the area is designated nonattainment or maintenance by USEPA. In Ohio, these pollutants comprise Volatile Organic Compounds (VOCs), Nitrous Oxides (NOx), and Particulate Matter at 2.5 Micrometers in Diameter (PM2.5). The table below summarizes Ohio's emission reduction performance for the 2022 to 2025 reporting period.

Table 10.11 Total CMAQ Emissions Reduction Performance Measures

Performance Measure	Baseline (2018-2021)	2-Year Performance (2022-2023)	2-Year Target (2022-2023)	Adjusted 4-Year Target (2022-2025)	2-Year Target Met?
Total Emissions Reduction - VOC (kg/day)	320.195	144.106	> 60.000	> 60.000	Yes
Total Emissions Reduction - NOx (kg/day)	1018.130	222.595	> 250.000	> 250.000	No
Total Emissions Reduction - PM 2.5 (kg/day)	246.405	18.78	> 30.000	> 18.200	No

The amount of achievable emissions reduction is declining in the long term because vehicles being retired now have lower emissions than vehicles being retired in the past. With this knowledge, ODOT set relatively low targets compared to the baselines. Even so, Ohio did not meet its 2-year target for reduction of NOx and PM2.5 emissions. The high degree of variability in annual reported emissions reductions in recent years may explain why these 2-year targets were not met.

Observing that past performance has been a poor indicator for estimating future emissions reduction, ODOT analyzed CMAQ funding commitments programmed for the next two years to better estimate the 4-year performance. As a result of the analysis, ODOT did not expect that the previously established 4-year targets for PM-2.5 would be achieved. In addition, the analysis revealed that the baseline and 2-Year performance metrics include emission reductions for all air quality areas, regardless of whether that area is in non-attainment or maintenance for the specific pollutant. Excluding ineligible emissions reductions, ODOT estimated 4-year performance for PM 2.5 emissions reduction would be 18.2 kg/day, and adjusted the target accordingly.

The CMAQ program funds projects that reduce emissions of these mobile source pollutants. The table below shows the STIP period CMAQ funded projects in Ohio.

Table 10.12 STIP Projects with CMAQ Funding[1]

Number of Projects	CMAQ $ (Millions)
150	$226.8 M

1 Projects that have CMAQ funding (SAC 4TB7, 4TE7, or 4NG5).

In addition projects that reduce the total number of vehicles on Ohio's roadways and those which improve traffic flow/ reduce vehicle idling, also contribute to the reduction in these mobile source pollutants. The tables below show projects and investments in Ohio that will assist with non-Single Occupancy Vehicle (SOV) travel and will reduce Peak Hour Excessive Delay (PHED).

Table 10.13 STIP Projects Improving Non-SOV Travel[1]

1c Projects that have a primary project purpose related to one of the following (Bike Facility, Enhanced Crossing, Pedestrian Facilities, Shared Use Path)

Table 10.14 STIP Projects Improving Peak Hour Excessive Delay[1]

Total PHED Projects	Total PHED $ (Millions)	PHED Projects with CMAQ $	PHED CMAQ $ (Millions)
42	$911.8 M	8	$11.9 M

1a Projects that have one of the following primary project purposes (Bridge Expansion, Intersection Expansion, Interchange Expansion, New Roadway, Add Through Lane(s), Rail Grade Separation) and contain committed construction contract funding or

1b Projects that have funding with one of the following federal improvement codes (New Construction, Reconstruction -Added Capacity, Bridge - New Construction, Bridge Replacement - Added Capacity, Rail/ Highway Crossing, Traffic Management Engineering - HOV) and contain committed construction contract funding.

Transit Asset Management (TAM)

Overview

In 2012 as part of Moving Ahead for Progress in the 21st Century (MAP-21), the FTA safety programs were changed with significantly higher expectations and responsibilities for safety oversight and safety performance for the FTA, states, and their transit agencies. The MAP-21 version of FTA's safety programs include a rulemaking for Transit Asset Management (TAM) to encompass state of good repair and the data collection, prioritization, and data delivery to the National Transit Database (NTD). The TAM rule was authorized in 49 U.S.C. 5326 and applies to all recipients and subrecipients of Federal financial assistance that own, operate, or manage capital assets used for providing public transportation.

ODOT's Office of Transit has sponsored a Group TAM Plan which outlines methods by which ODOT and their subrecipients will maintain in compliance with the data collection, evaluation and submission of transit asset data. Within this plan, ODOT had identified Useful Life Benchmarks (ULBs) that apply to rolling stock revenue vehicles, non-revenue vehicles, equipment, and facilities. These ULBs allow ODOT to assign assets a rating on the Transit Economic Requirements Model (TERM) scale, which indicate the condition of the asset.

TAM Group Plan Background

The state of Ohio serves as the administrator and recipient of FTA Section 5310 , 5311, and 5339 rural and small urban transit providers and social service agencies that provide public transportation. These organizations provide demand response, flex route, and fixed route service. All 38 rural transit providers are recipients of FTA Section 5311 funding and are eligible to be Tier II agencies under the TAM rules. In addition, 62 of the Section 5310 transit agencies provide "open-door" service and are also eligible to be part of the TAM Group Plan as Tier II agencies.

Performance Targets and Measures

ODOT has set the following performance targets and measures for facilities, equipment, and revenue vehicles.

Facilities

Table 10.15 TAM Facilities Performance Targets and Measures

Asset Class (NTD)	Performance Target	Performance Measure
Passenger Facilities	0% below a 3	0%
Maintenance Facilities	22% below a 3	16%
Administrative Facilities	38% below a 3	16%

ODOT assess all 20 transit facilities as part of the Transit Asset Management program. Generally, each year ODOT Transit staff assess 25 percent of the 20 facilities. For 2024, four facilities were assessed.

Equipment

Table 10.16 TAM Equipment Targets and Measures

Asset Class (NTD)	Asset Class (ODOT)	Performance Target	Performance Measure
Non-Revenue Vehicle	Service Vehicle	100% less than 10 years old	36%
Equipment	Mobile Vehicle Lift	100% less than 14 years old	100%
Equipment	Generator	100% less than 10 years old	100%

Equipment includes service vehicles and equipment not attached to or a part of a facility that has a replacement value greater than $50,000. ODOT and our transit partners are continuing to make progress toward achieving the set targets.

Rolling Stock Revenue Vehicles

ODOT along with its transit partners are continuing to make progress toward achieving the set targets for Rolling Stock Revenue Vehicles.

Table 10.17 TAM Rolling Stock Revenue Vehicles Targets and Measures

Asset Class (NTD)	Asset Class (ODOT)	Performance Target	Performance Measure
Automobile	Automobile (AO)	30% older than 8 years	20%
Bus	Heavy Duty Bus (B30-HD, B35-HD, B40-HD, B45-HD, B60-HD); Medium Duty Bus (B30-D, B35-MD); Light Duty Bus (B30-LD)	21% older than 14 years	0%
Cutaway Bus	LTL/LTN, LTV, LTV-FS, LTV-HC, LTV-N, LTV-S	2% older than 10 years	8%
Van	Accessible Vans (AV); (BSV); Converted Vans (CV); Modified Mini Van (MMV); (MV-1); Mini Vans (SMV)	10% older than 8 years	23%

Getting to the State of Good Repair (SGR)

ODOT assessed the facility and vehicle conditions for all Tier II agencies using the FTA's Transit Economic Requirements Model (TERM) scale in the last TAM Plan cycle from 2018-2021, and continues to assess 25 percent of facilities every year as required by the FTA. The TERM scale is a five point numerical scale (1–5) with 5 being the highest rating and 1 being the lowest rating. The TERM Scale for vehicles is based on the FTA's Useful Life Benchmark. As the vehicle journeys through its useful life, its TERM rating declines as a greater percentage of its useful life is used up. The percentage of a vehicle's useful life used up and the equivalent TERM rating is listed below.

Table 10.18 Percentage of Vehicle's Useful Life Used and Equivalent TERM Rating

5 = 25% percent and below
4 = 49 to 26% percent
3 = 99 to 50% percent
2 = 100 to 149% percent
1 = 150% and above useful life used up

Rating	Condition	Description
5	Excellent	No visible defects, new or near new condition, may still be under warranty if applicable
4	Good	Good condition, but no longer new, may be slightly defective or deteriorated, but is overall functional
3	Adequate	Moderately deteriorated or defective; but has not exceeded useful life
2	Marginal	Defective or deteriorated; in need of replacement; exceeded useful life
1	Poor	Critically damaged or in need of immediate repair; well past useful life

Prioritized List of Investments

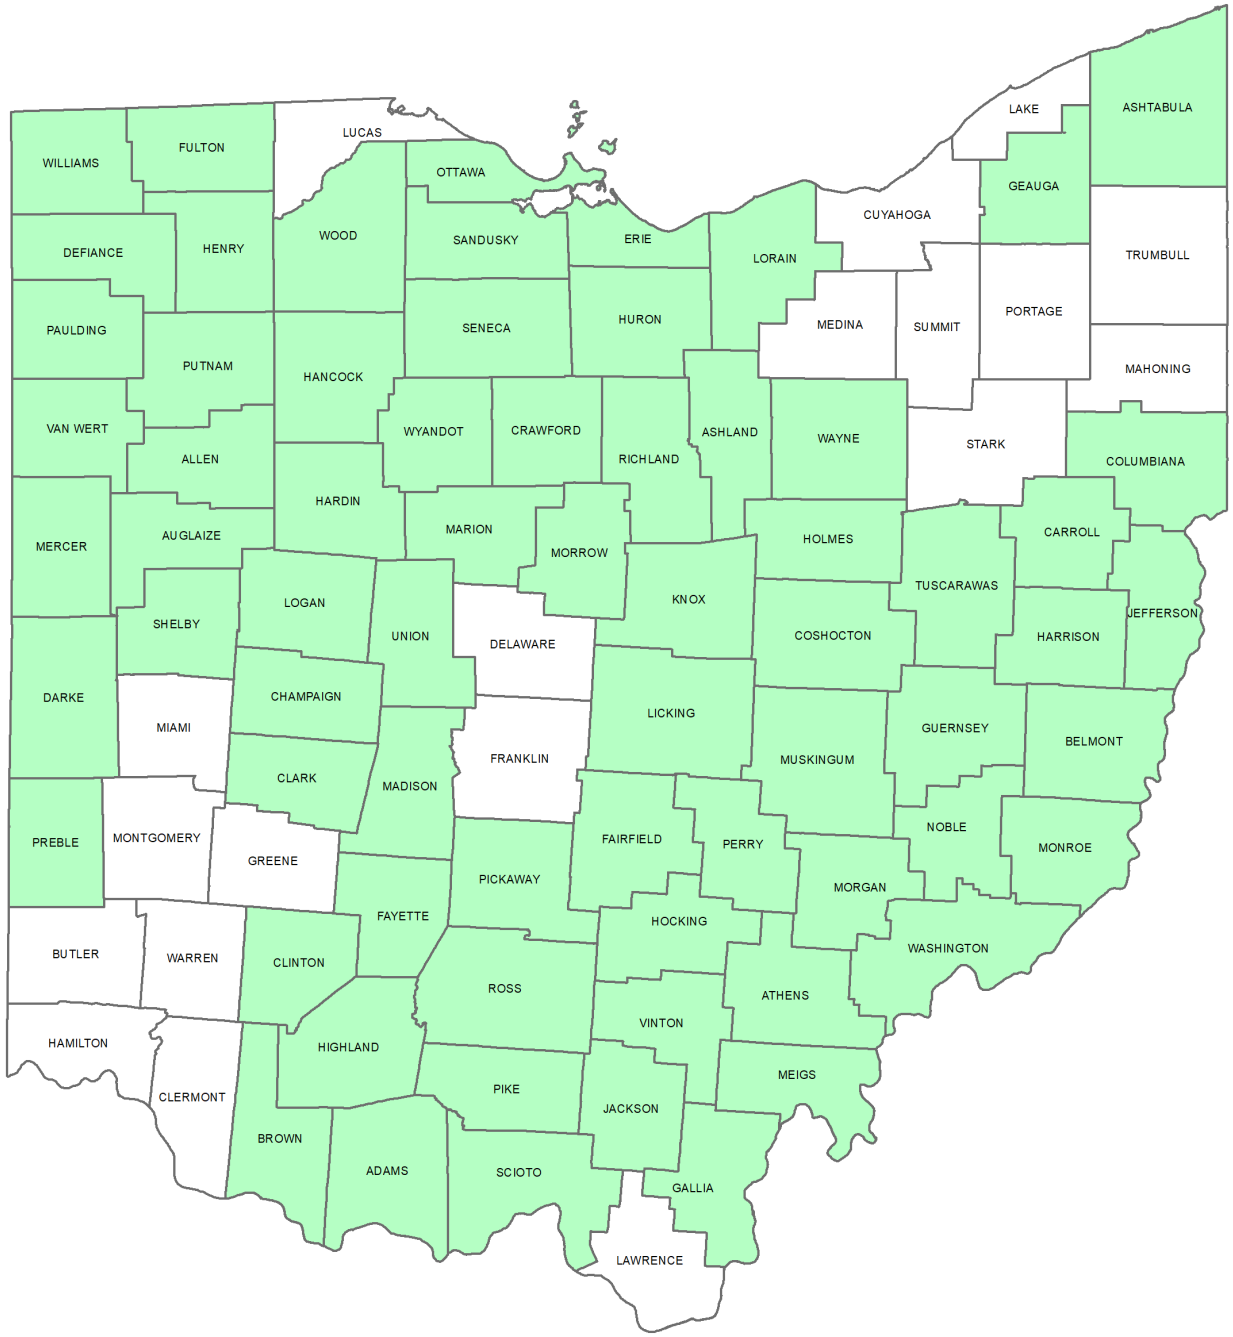

Table 10.19 shows the funding estimates anticipated in the SFY 2026-2029 STIP period. These investments will make progress toward achieving the set targets for Transit Asset Management.

Table 10.19 TAM Funding Program Estimates in SFY 2026-2029 STIP

Funding Program	SFY 2026	SFY 2027	SFY 2028	SFY 2029
5310	$16.5	$13.5	$3.2	$3.3
5311	$56.1	$37.8	$2.1	$2.2
5339	$23.9	$24.6	$9.1	$9.2

Amounts shown in Millions.

Figure 10.2: ODOT Group TAM Plan Sponsor Map

ODOT's Group TAM Plan (ODOT-Administered FTA Section 5310 and 5311 programs)

Note: Direct recipients of FTA Section 5307 and/or Section 5310 funding are not included in ODOT's Group TAM plan.

Transit Safety Performance Measures

Overview

As required in the Infrastructure Investment and Jobs Act (IIJA), the FTA established updated rules for transit agencies, MPOs, and state departments of transportation to gauge the safety performance of the public transportation assets and operations within their jurisdictions. Per 49 U.S.C. 5329, the FTA published a National Public Transportation Safety Plan (updated April 2024), which guides the management of safety risks and hazards at the national level. This plan also established a set of performance measures to improve the safety of public transit operators receiving federal assistance.

On April 11, 2024, FTA published the updated Final Rule of 49 CFR Part 673 Public Transportation Agency Safety Plan. The final federal rule regulating these matters went into effect on May 13, 2024. These plans are required to include local safety performance targets in support of the national safety targets. These Public Transportation Agency Safety Plans (PTASPs) will need to be re-certified annually, and targets may be revised as necessary.

MPOs are required to establish their own transit safety performance targets for their respective urbanized areas. Federal regulations require ODOT, Ohio's MPOs, and statewide public transit agencies to coordinate to the maximum extent possible to ensure consistency.

All transit agencies are required to establish a PTASP. ODOT has established performance targets for the state's small transit agencies (agencies operating 100 or fewer revenue vehicles during peak service). **Table 10.20** illustrates the federally required transit performance measures for which targets must be set.

Table 10.20 Transit Safety Performance Measures

Category	Criteria
Fatalities	Total number of reportable fatalities and rate per total revenue vehicle miles by mode
Injuries	Total number of reportable injuries and rate per total vehicle revenue miles by mode
Safety Events	Total number of reportable events and rate per total vehicle revenue miles by mode
System Reliability	Mean distance between major mechanical failures by mode

Table 10.21 explains each of the three modes for which ODOT currently tracks transit safety performance measures and for which individual targets must be established.

Table 10.21 Transit Safety Performance Measures Modes and Targets

Abbreviation	Vehicle/Service Type	Vehicle/Service Description
CB	Commuter Bus	Fixed-route service primarily connecting outlying areas with a central city. Generally use large motor coach buses. Limited stops.
DR	Demand Response	Vans or smaller buses that respond to passenger requests for pickups and drop-off at specific locations. No fixed routes or schedules.
MB	Bus	Operate on fixed routes according to published, regular schedules.

1. **PID**: Unique Project ID for every project as assigned in Ohio's Transportation Project Management system called Ellis.
2. **Project Name**: Unique project name, often identifying the county and primary route or basic intent of the project.
3. **Primary Work Category**: Indicates the primary purpose of the project.
4. **Sponsoring Agency**: Agency that requested the project.
5. **Air Quality Status**: Indicates whether project is subject to air quality conformity determination.
6. **ODOT Dist(s)**: ODOT District where project work takes place. A map of ODOT Districts can be found in Figure 1.2.
7. **Locale**: Primary area where work will be completed. Locale can be a county (e.g. Adams), ODOT District (e.g. D01), or statewide (STW).
8. **MPO(s)/RTPO(s)**: Lists all metropolitan or regional planning agencies within project limits.
9. **Performance Measures**: Indicates the performance measure goal areas the project addresses.
10. **STIP Type**: Indicates whether the project is listed in the STIP by Group or Individual.
11. **Total Project Estimate**: Total estimate of all phases of the PID. This may include costs outside of the STIP period.
12. **Termini**: Brief description of the project limits.
13. **Description**: Brief description of the project, often indicating what is being done and where.
14. **TIP Project Comment**: Optional comment field from MPO TIPs.
15. **Phase**: Indicates the phase of work
    - CO - Construction
    - DD - Detailed Design
    - ENV - Environmental
    - OTH - Other
    - RW - Right of Way
    - DBT - Debt Service Repayments
    - SP - Statewide Planning
    - SR - Statewide Research
16. **STIP Fund Type**: Aligns with fiscal constraint. See Chapter 8.
17. **Phase Total**: Total estimate of the project phase which may include costs outside of the STIP period.
18. **STIP Period Cost Estimates**: Estimates within the STIP period by Phase, STIP Fund Type, and State Fiscal Year.

11230 - CUY SR 175 00.56 Replace

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
11230	CUY SR 175 00.56 Replace	Bridge Preservation	ODOT SPONSORING AGENCY	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
12	CUY	NOACA		Group

Termini:
Solon; S of Cannon Rd under NS RR spur

Total Project Estimate:
$689,703

Description:
Replace the NS RR (Cleveland Commercial Railway) spur track bridge over Cannon Rd (SR-175) with a new overhead structure. This structure is located just between Valley Lane and Brainard Road in Solon. The new structure span will provide clearance for a standard 2-lane roadway.

90202 - CUY IR 490/010 01.73/16.08 Paint

PID: 90202

Project Name: CUY IR 490/010 01.73/16.08 Paint

Primary Work Category: Bridge / Culvert Maintenance

Sponsoring Agency: ODOT SPONSORING AGENCY

Air Quality Status: Exempt

ODOT Dist(s): 12

Locale: CUY

MPO(s) / RTPO(s): NOACA

Performance Measures: Bridge (NHS)

STIP Type: Group

Termini: Cleveland; Over IR-490 and Lorian Road over W 18th

Total Project Estimate: $2,150,000

Description: Painting of four (4) bridges over IR-490 from IR-71 to Broadway Ave and the Lorain Rd (SR-10) bridge over W 18th St, all in city of Cleveland, Cuyahoga county.

Termini:
Union & Rome Townships in Lawrence County

Total Project Estimate:
$1,096,926

Description:
Phase 1. Proposed is the construction of a comprehensive trail system throughout the Union and Rome Township areas of Lawrence County, inclusive of the Village of Chesapeake and Proctorville, along with interconnections with other Tri-State Trail Systems. The trails would be utilized to accommodate pedestrian, bi-cycles, motored wheelchairs and other like equipment off the current corridor streets and busy roadways. The project is anticipated to be built in multiple phases, all targeted to interconnect to the Eastern Campus of Ohio University which would also serve as an interconnecting point of a proposed Park and Ride and Public Transportation facility.

02	WOO	TMACOG	Bridge (NHS), Pavement (Interstate)	Individual

Termini:
From Glenwood Rd to Segur Rd/South Ave

Total Project Estimate:
$215,781,375

Description:
A Major Bridge and Multi Lane funded project (project # 1) to perform major reconstruction and minor widening to existing pavement; rehabilitate/widen/replace existing bridges; perform necessary related work.
See PID 93594 for project # 2 and PID 93604 for project # 3.
Proposed work for section south of Wales Rd: widen shoulder & replace deteriorating pavement.
Proposed work for section north of Wales Rd: correct deficient NB sight distance & ramp deficiencies at Miami St & South Ave, correct horizontal sight distance on I-75 mainline, correct RR clearance, poor deck condition of Maumee River/NS RR/South Ave bridge (south end bridge-Disalle); these changes will require new road alignments.
CSX RR project OH0968, review by HDR (Todd Reily).
NS RR project BR0020001, review by Jacobs. See PID 102227 for Miami St connector.; See PID 106547 for the Demolition project. 5/2/18: Created PID 108398 for Tree Removal

101075 - ATB IR 0090 03.70

PID: 101075
Project Name: ATB IR 0090 03.70
Primary Work Category: Roadway Minor Rehab
Sponsoring Agency: DISTRICT 4-PLANNING
Air Quality Status: Exempt

ODOT Dist(s): 04
Locale: ATB
MPO(s) / RTPO(s):
Performance Measures: Bridge (NHS), Pavement (Interstate)
STIP Type: Group

Termini: ATB IR 90 from 3.70 to 7.58
Total Project Estimate: $652,000

Description:
Concrete Pavement Repair on ATB-IR 90-3.70 to 7.58. Includes minor work to several structures.

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
04	SUM	AMATS	Bridge (NHS), Pavement (Interstate), Pavement (Non-Interstate NHS), Safety	Individual

Termini:	Total Project Estimate:
SUM IR76 from 8.24 to 9.96 and 11.01 to 12.03; SUM IR77 from 9.74 to 12.11 and 15.18 to 15.87; SUM SR 8 from 0.00 to 1.75	$173,062,028

Description:

Pavement replacement over SUM IR76 from 8.24 to 9.96 and 11.01 to 12.03 and SUM IR77 from 9.74 to 12.11 and 15.18 to 15.87. Covers the "South Leg" and "West Leg", includes work to several structures, in the City of Akron, Summit County, Ohio. Resurfacing of SUM SR 8 from 0.00 to 1.75.

Also included with this project is the work on PID 101402 as a Design-Bid-Build portion of the Scope of Services: The Akron Beltway Planning Study (PID 95831) identified the need to replace the left handed exit ramps (Ramps N & R) from both WB and EB I-76 in the Central Interchange. Reconstruction of these ramps will address both the poor bridge condition and the substandard ramp geometrics. Reconfiguring the lane arrangements on both WB and EB I-76 to provide drop lanes for NB and SB exits in each direction as well as two thru lane movements for I-76 addresses both safety and operations. The Central Interchange project (PID 101402) is the first identified project from the Akron Beltway Planning Study and has been advanced prior to the finalization of that study due to the condition of the bridges on Ramps N & R. These improvements do not preclude potential future improvements with the Central Interchange.

103828 - DEL CR21/CR72 3.85/3.45

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
103828	DEL CR21/CR72 3.85/3.45	Roadway Minor Rehab	DELAWARE COUNTY ENGINEER	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	DEL	MORPC		Individual

Termini:
CR72: Berlin Twp. Cheshire Rd from CR10 to CR21. CR21: Orange/Berlin Twp. Africa Rd from CR106 to CR72

Total Project Estimate:
$5,591,059

Description:
Minor widening and resurfacing; construction of paved shoulders; replacement of deficient guardrail and signage; addition of left and right turn lanes at the intersection of CR21 (Africa Road) and TR105 (Plumb Road).
CR21 (Africa Road). Orange/Berlin Townships. From CR106 (Lewis Center Road) to CR72 (Cheshire Road). MORPC STP Funds.
CR72 (Cheshire Road). Berlin Township. From CR10 (Old State Road) to CR21 (Africa Road). CEAO STP Funds.
Local-let by Delaware County Engineer's office.

TIP Project Comments:
This project represents debt service repayments for the SFY 2020 project. This project includes a commitment of MORPC-Attributable Funding.

114042	CLE US 52 4.67 New Richmond	Bike Facility	New Richmond, Village of	Non-Exempt (Analyzed)

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
08	CLE	OKI	CMAQ, Non-SOV, Safety	Individual

Termini:
US 52 from Front Street to just east of the Village of New Richmond corporation limit.

Total Project Estimate:
$15,362,997

Description:
Convert the existing four lane divided section of US 52 to one lane of traffic in each direction using existing northbound lanes of US 52, and convert the existing southbound lanes to a shared use path. Convert four existing intersections (Front, Sycamore, Walnut, Augusta) to roundabouts.

114665 - D09 RPM FY2027

PID: 114665
Project Name: D09 RPM FY2027
Primary Work Category: Traffic Control Maintenance
Sponsoring Agency: ODOT SPONSORING AGENCY
Air Quality Status: Exempt

ODOT Dist(s): 09
Locale: D09
MPO(s) / RTPO(s): OVRDC
Performance Measures: Safety
STIP Type: Group

Termini:
FY2027 District wide raised pavement markers.

Total Project Estimate:
$275,000

Description:
FY27 D09 Districtwide raised pavement markers.

TIP Project Comments:

115178 - MOT Findlay St Reconstruction

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
115178	MOT Findlay St Reconstruction	Roadway Major Rehab	Dayton, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
07	MOT	MVRPC		Individual

Termini:
Findlay Street, SLM 0.72 to 1.22; Springfield Street to Monument Avenue

Total Project Estimate:
$2,155,000

Description:
Reconstruction of the existing roadway. Curbs, sidewalks, driveway approaches, and lighting, traffic signals, signage, pavement markings and a buried interconnect will be rebuilt to replace existing. There will be minor storm sewer work including new manholes, catch basins, and some pipe replacement.

TIP Project Comments:

115179 - FRA-161-8.08

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
115179	FRA-161-8.08	Intersection Improvement (Safety)	Franklin County TID	Exempt
ODOT Dist(s):	**Locale:**	**MPO(s) / RTPO(s):**	**Performance Measures:**	**STIP Type:**
06	FRA	MORPC	CMAQ, Safety	Individual

Termini:
Franklin County. SR 161 (from Answorth Dr to Strathaven Dr incl. Linworth intersection) and safety improvements at Bellbrook Pl

Total Project Estimate:
$15,334,422

Description:
161/Linworth: Intersection improvement to reduce the severe congestion and long queues experienced by vehicles and add pedestrian/multi-use facilities.
161/Bellbrook Place: extend sidewalk, install high visibility crosswalks and ramps, and install RRFB with crosswalk lighting at 161. (formerly PID 122351)

The improvements will be maintained by ODOT, Columbus and Worthington after construction. The local funding share may be provided by several partners on this project: ODOT, Cities of Columbus and Worthington, Perry Township, the Franklin County Engineer, and the Franklin County Transportation Improvement District.
Previous corridor study PID101775.

TIP Project Comments:
MTP ID: 1119 186
Bicycle and Pedestrian Components Included: Yes, sidewalk on one side and shared-use path on the other side
Additional Project Information: This project includes a commitment of MORPC-Attributable Funding.

03	WAY		Safety	Group

Termini:	Total Project Estimate:
Millborne Rd to Orr Rd	$1,178,611

Description:

This project will improve 0.88 miles of Back Orrville Road (CH23) from North Millborne Road (LT) to Orr Road (RT) in Green Township, Wayne County, Ohio. Proposed improvements include the widening/replacement of three major drainage structures, the enclosure of approximately 650' of ditch line, an intersection improvement to increase sight distance and driver safety, embankment construction and relocation of ditches, pavement widening, and resurfacing. The project will also include safety countermeasures of the installation of signage, pavement markings, rumble stripes and raised pavement markers. The existing curves will be adjusted to meet current design speed as necessary in addition to widening the existing twenty (20.0') roadway to twenty-two (22.0') throughout the segment.

02	LUC	TMACOG		Individual

Termini:
Summit St from New York Ave to Manhattan Blvd

Total Project Estimate:
$6,021,105

Description:
Pavement reconstruction and addition of a Cycle Track on Summit St from New York Ave to Manhattan Blvd. Project includes new curbs, drive aprons, and sidewalk. Also included is a road diet from four lanes to three, and the fourth lane would become a Cycle Track on the east side of the road to Suder Ave where it will then become a multi-use path (replacing the existing sidewalk) to Manhattan to tie into the existing bike path. In addition, the west side of the road from Bassett to Pontiac will widen with a bump-out to accommodate on-street parking. The east side of Summit will have new sidewalk where there is none currently (Lasalle to Manhattan).

02	LUC	TMACOG		Individual

Termini:
Emerald Ave from SR-25 (AWT) to Ottawa St.

Total Project Estimate:
$2,135,000

Description:
Project in City of Toledo to improve bicycle access on Emerald Ave. Includes a new side path between SR-25 and SR-2 and pavement reconstruction with a new bike lane from Logan St. to Ottawa St. This project will complete the City's Riverside Bike Trail by connecting two existing portions of this trail.

118156 - MIA SR 41 11.32

PID: 118156
Project Name: MIA SR 41 11.32
Primary Work Category: Interchange Improvement (Safety)
Sponsoring Agency: ODOT SPONSORING AGENCY
Air Quality Status: Exempt

ODOT Dist(s): 07
Locale: MIA
MPO(s) / RTPO(s): MVRPC
Performance Measures: Safety
STIP Type: Group

Termini: Interstate route 75 and State Route 41
Total Project Estimate: $4,594,259

Description:
Construct safety improvements at the Interstate 75 and State Route 41 interchange in Miami County and construct pedestrian facilities on State Route 41.

TIP Project Comments:

06	DEL	MORPC		Group

Termini:
DEL US 23 between Pennsylvania Ave and SR 229

Total Project Estimate:
$10,300,000

Description:
Develop individual construction projects resulting from the US 23 Corridor Study (PID 112768) thru Detailed Design. These projects will be separate stand-alone PIDs.

Consultant to provide design and environmental services for multiple locations on the 23 corridor from Pennsylvania Ave to the Marion County line. The intersections with SR 229 and Coover Rd will be excluded from this contract because they have been previously contracted. Improvements will range from R-cuts, overpasses, right in/right outs to interchanges. The final scope will be determined after the completion of the corridor planning study in 2024. Corridor study information is available at https://www.transportation.ohio.gov/projects/projects/112768.

09	LAW	KYOVA	CMAQ	Individual

Termini:
LAW-93/52/Storms Creek

Total Project Estimate:
$18,650,000

Description:
Intersection improvement project in Lawrence County.

This project will address the remaining weave safety issue, as well as other identified safety issues. It will provide the direct interchange access needed to serve the proposed developments in that area of the City and County. The proposed project creates a 3rd Roundabout that would make it possible to eliminate the current half cloverleaf to traditional off and on ramps, thus eliminating the US 52 westbound lane weave. The project would include the construction of a short third roundabout at the CR 26 Lawrence Street Road and an interconnector to the northern roundabout.

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC	Non-SOV	Individual

Termini:
City of Columbus, SR 161 from Sawmill Rd to Linworth Rd

Total Project Estimate:
$6,873,555

Description:
This project consists of installing a new shared use path (SUP) along the north side of SR161 from Sawmill Rd to Brookdown Dr and along the south side from
Brookdown Dr to Thompson St. Sidewalk will be installed along the south side of SR161 from Sawmill Rd to Federated Blvd and the north side from McVey Blvd
to Thompson St. In addition to the pedestrian and bicycle facilities, the project will install curb ramps, drive aprons, and storm sewer as needed. Stormwater
quality and quantity will be required. Two new Pedestrian Hybrid Beacons are proposed at Brookdown Dr and McVey Blvd. The City of Columbus would retain maintenance authority for facilities constructed within its right of way, although the City plans to discuss maintenance with other local agencies.

TIP Project Comments:
MTP ID: 364
Bicycle and Pedestrian Components Included: Yes, shared-use path
Additional Project Information: This project includes a commitment of MORPC-Attributable Funding.

Termini:
City of Columbus, Livingston Avenue, from Alum Creek Trail to James Road

Total Project Estimate:
$24,158,164

Description:
This project will resurface Livingston Avenue from the bridge over Alum Creek to Kellner Road. Shared Use Paths will be constructed on both sides of Livingston Avenue throughout the project limits with a connection to the Alum Creek Trail Scenic River Corridor. The project will include the replacement or upgrading of the existing street lighting. Upgrades will be made to the storm water drainage components and will include the necessary storm control practices. Three signals will be replaced (at College Avenue, Roosevelt Avenue, and Kenwich Rd). The project corridor serves COTA Route #1 with 11 stops in the corridor, these will be repaired, updated, or replaced as warranted in accordance with COTA's present standards.

TIP Project Comments:
MTP ID: 960 and 2072
Bicycle and Pedestrian Components Included: Yes, shared-use path on both sides
Additional Project Information: This project includes a commitment of MORPC-Attributable Funding. This project includes a commitment of COTA TSI Funding. (Phase CO: $2,066,580)

120103 - FRA-Cemetery Rd SUP

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
120103	FRA-Cemetery Rd SUP	Shared Use Path	Hilliard, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC	Non-SOV, Safety	Individual

Termini:
Franklin Co, Hilliard; Cemetery Road from Britton Parkway to Trueman Boulevard

Total Project Estimate:
$13,262,154

Description:
Construction of shared use path on the south side of Cemetery Road from Britton Parkway to Trueman Boulevard. Includes new pedestrian bridge over I-270 and tunnel under the eastbound Cemetery Road to southbound I-270, realignment of Cemetery Road EB to I-270 SB entrance ramp, and pedestrian safety improvements study and modifications at the intersection of I-270 NB exit ramp and Cemetery Road that may include additional grade separation.

TIP Project Comments:
MTP ID: 186
Bicycle and Pedestrian Components Included: Yes, shared-use path
Additional Project Information: This project includes a commitment of MORPC-Attributable Funding.

Termini:
City of Columbus, East Spring, Martin Luther King Jr, Mt. Vernon Ave St

Total Project Estimate:
$5,249,581

Description:
This is Phase 1 of 2 of multimodal / bikeway improvements to Martin Luther King Jr Blvd and Mount Vernon Ave within the King-Lincoln Bronzeville neighborhood. The project limits for Phase 1 are on East Spring St from Elijah Pierce Ave to Hamilton Ave, Martin Luther King Jr Blvd from Hamilton Ave to St. Clair Ave, and Mount Vernon Ave from St. Clair Ave to Champion Ave. The project will consist of installing bike lanes on both sides of the street on East spring St. The project will also consist of installing two-way, on-street protected bike facilities from Hamilton Ave to Champion Ave on Martin Luther King Jr Blvd and Mt. Vernon Ave. The new bicycle facilities will be constructed within existing curb lines, using concrete medians and vertical separation. The project will include floating bus stops in various locations.

TIP Project Comments:
MTP ID: 186
Bicycle and Pedestrian Components Included: Yes, bicycle lanes

Termini:
City of Whitehall, Fairway Blvd from East Main St to South Hamilton Road

Total Project Estimate:
$4,798,422

Description:
The scope of this project is to install a new, multi-use path within the existing Eastern/Northern Right of Way along Fairway Boulevard in the City of Whitehall. The path will run between East Main Street (southern terminus) to South Hamilton Road (northern/western terminus). It is anticipated that this will be a 10' wide asphalt trail, typical, and will be built per COC Standard Drawing 2300. The project will also install new, post-top style street lighting between the multi-use path and the edge pavement to enhance night-time visibility in the corridor.

TIP Project Comments:
MTP ID: 297
Bicycle and Pedestrian Components Included: Yes, shared-use path
Additional Project Information: This project includes a commitment of MORPC-Attributable Funding. This project includes a commitment of COTA TSI Funding. (CO: $1,958,563)

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
120301	FRA-SRTS Muirfield Dr	Enhanced Crossing	Dublin, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC	Non-SOV, Safety	Group

Termini:
City of Dublin, Intersection of Muirfield Drive/Sells Mill Drive/Mojave Street

Total Project Estimate:
$346,078

Description:
Scottish Corners Elementary School is a Dublin City School and has sidewalks and shared paths leading from the neighborhoods to the school. The 85 foot
crosswalk on Muirfield Drive across four busy lanes of traffic at Sells Mill Drive/Mojave Street is unsignalized. The project builds a pedestrian hybrid beacon (HAWK signal) to provide the right of way to pedestrians and promote safe crossing at this intersection. In addition, the curb ramps will be reconstructed to shorten the crosswalk and to make the entry perpendicular to the travelway. New street lighting, pavement resurfacing, striping and signs are also part of the project, enhancing the pedestrian environment.

TIP Project Comments:
MTP ID: 186
Bicycle and Pedestrian Components Included: Yes, enhanced pedestrian crossings

121267 - D01 WPA FY28

PID: 121267
Project Name: D01 WPA FY28
Primary Work Category: Bridge Preservation
Sponsoring Agency: ODOT SPONSORING AGENCY
Air Quality Status: Exempt

ODOT Dist(s): 01
Locale: D01
MPO(s) / RTPO(s): LACRPC, MVPO
Performance Measures: Bridge (NHS)
STIP Type: Group

Termini: Various structures throughout District 1.
Total Project Estimate: $440,000

Description: Waterproofing Asphalt overlays on various bridges in D1 using SS856 Bridge Deck Waterproofing Asphalt Surface Course

TIP Project Comments:

121512 - MAD CR 71 4.16

PID: 121512
Project Name: MAD CR 71 4.16
Primary Work Category: Bridge Preservation
Sponsoring Agency: MADISON COUNTY ENGINEER
Air Quality Status: Exempt

ODOT Dist(s): 06
Locale: MAD
MPO(s) / RTPO(s): CORPO
Performance Measures:
STIP Type: Group

Termini: CR 71 Spring Valley Road north of SR 665
Total Project Estimate: $531,000

Description:
Replace the bridge MAD-CR 71-4.16 (Spring Valley Road) over a Tributary of Deer Creek. SFN 4932471. Fed/State Exchange.

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
122986	WAR US 42 Bike Path Connection	Bike Facility	Mason, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
08	WAR	OKI	Non-SOV, PHED	Individual

Termini:
US-42 from Heritage Oak Park to State Route 741

Total Project Estimate:
$1,197,198

Description:
US 42 bike path connection will construct a 4,800-foot long, 10-foot-wide path separated by a grass lawn from the roadway. The project will connect an existing path that circles Heritage Oak Park to new sections of path constructed during the 2023 SR-741 improvements.

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
NP-38	Brice Road Corridor Revitalization and Active Transportation Improvements	Roadway Improvement (Safety)	Reynoldsburg, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Group

Termini:
Brice Rd from E Main St to Livingston Ave

Total Project Estimate:
$18,200,000

Description:
This project includes full reconstruction of the roadway including replacement of curb, sidewalk, storm sewer, watermain, and traffic signal. The project will incorporate a “road diet” reducing the width of the roadway from the current 5-lane to a 3-lane configuration. The area of the roadway vacated will be replaced with dedicated cycle tracks that are separated from both the roadway and pedestrian walks with tree lawn and curbs. The intersection of the East Main Street and Brice Road has been a source of many accidents, will be realigned as part of this project .The multi-modal enhancements proposed will be designed to improve access to COTA facilities and the future BRT transit stop that is planned for the intersection of East Main Street and Brice Road.

TIP Project Comments:
MTP ID: 185, 186, and 1767
Bicycle and Pedestrian Components Included: Yes, bicycle lanes and sidewalk
Additional Project Information: This project includes a commitment of COTA TSI Funding. (CO: $4,280,548)

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Group

Termini:
Livingston Ave from 18th St to Nelson Rd

Total Project Estimate:
$46,950,000

Description:
This project consists of infrastructure improvements on Livingston Avenue from 18th Street to Nelson Road. The corridor will be reconfigured from a 4-lane section to a 3-lane section to enhance pedestrian, bicyclists, and motorist safety. Improvements include: raised bike lanes, center-planted medians, street lighting, water line replacement, and street trees. Traffic signals will be replaced at 8 intersections at 18th St (north leg), Ohio Ave, Champion Ave, Lockbourne Rd, Miller Ave, Kelton Ave, Fairwood Ave, and Nelson Rd. The south leg of Linwood Ave and the north leg of Fairwood Ave will each be realigned to improve safety and efficiency at each intersection.

TIP Project Comments:
MTP ID: 510
Bicycle and Pedestrian Components Included: Yes, bicycle lanes and sidewalk

NP-44 - Arterial Street Rehabilitation - Hamilton Rd from SR161 to Central College Rd

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
NP-44	Arterial Street Rehabilitation - Hamilton Rd from SR161 to Central College Rd	Add Through Lane(s)	Columbus, City of	Non-Exempt (Analyzed)

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Individual

Termini:
Hamilton Rd from SR-161 to Central College Rd

Total Project Estimate:
$20,939,000

Description:
This project will widen N. Hamilton Road from SR-161 to Central College Road. N. Hamilton will consist of two through lanes in each direction with a raised median, shared use path, walk, curb and gutter, street trees, street lighting, and storm sewer. The signals at Heathland Lane/Walton Breck Way and Warner Road will be replaced with roundabouts.

The eastbound SR-161 entrance ramp from Hamilton Road will be widened to two lanes for approximately 200 feet and transition back to the existing width before merging with SR- 161. The westbound SR-161 exit ramp will be widened to three lanes approaching Hamilton Road.

TIP Project Comments:
MTP ID: 1490
Bicycle and Pedestrian Components Included: Yes, sidewalk on one side and shared-use path on the other side

NP-46 - Arterial Street Rehabilitation - Avery Road Widening

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
NP-46	Arterial Street Rehabilitation - Avery Road Widening	Add Through Lane(s)	Columbus, City of	Non-Exempt (Analyzed)

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Individual

Termini:
Avery Rd from Hayden Run Rd to proposed extension of Tuttle Crossing Blvd

Total Project Estimate:
$17,010,240

Description:
This project will reconstruct and widen Avery Road from the CSX railroad tracks to approximately Avery Run Road (private) and connect in the future to improvements by a City of Dublin project extending Tuttle Crossing Boulevard to Avery Road. The reconstructed roadway will be converted to a curb and gutter section with the addition of a 10’ wide shared use path along the east side, sidewalk along the west side, street lighting, and street trees. The typical lane configuration is two through lanes in each direction with a two-way left turn lane or dedicated left turns at intersections.

South of the railroad tracks, the existing roadway section is not modified with the exception of resurfacing for lane control modifications. Sidewalk and street lighting will be extended south of the railroad tracks to Winters Run Road on the west side of Avery Road. A shared use path will be placed on the east side of Avery Road from the tracks to Hayden Run Road.

TIP Project Comments:
MTP ID: 130 and 2069
Bicycle and Pedestrian Components Included: Yes, sidewalk on one side and shared-use path on the other side

NP-111 - Bridge Street & High Street Intersection ADA Improvements

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
NP-111	Bridge Street & High Street Intersection ADA Improvements	Enhanced Crossing	Dublin, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Group

Termini:
Intersection of Bridge St and High St

Total Project Estimate:
$1,600,000

Description:
This project provides for Americans with Disabilities Act (ADA) improvements at the Bridge Street and High Street Intersection. The existing sidewalk ramps at the intersection are not in compliance with ADA guidelines. Upgrades to the intersection will construct directional ramps at each corner, increasing the number of ramps to eight at the intersection and adding ADA-compliant pedestrian push buttons. These improvements will require an analysis of the elevation changes at the southeast corner of the intersection and a small acquisition of a sidewalk easement at the southwest corner of the intersection.

TIP Project Comments:
MTP ID: 186
Bicycle and Pedestrian Components Included: Yes, enhanced pedestrian crossings

NP-114 - Cosgray and Rings Roads Intersection Improvements

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
NP-114	Cosgray and Rings Roads Intersection Improvements	Intersection Improvement (Safety)	Dublin, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Group

Termini:
Intersection of Cosgray Rd and Rings Rd

Total Project Estimate:
$5,380,000

Description:
As annexation and development increase in the general area of this intersection, improvements will be needed at this location to properly manage the increase in traffic volumes. The project will address the dog-leg intersection of Cosgray Road at Rings Road, ease wait times and ultimately improve safety.
Dublin has been coordinating with Franklin County Engineer's Office regarding the operational improvements at Cosgray Road and Rings Road. This project is in coordination and cooperation with the FCEO, which administered the intersection evaluation study on Dublin's behalf. The FCEO contributed 100% of the study cost to advance the work in the earlier years of the program, assuming that Dublin would contribute 50% of that study cost during the design phase. The remaining costs are assumed to be shared equally.

TIP Project Comments:
MTP ID: 185
Bicycle and Pedestrian Components Included: Yes, sidewalk on one side and shared-use path on the other side

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
NP-115	Frantz Road Streetlight and Streetscape Improvements	Shared Use Path	Dublin, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Group

Termini:
Frantz Rd from Tuttle Rd to Metro Place North

Total Project Estimate:
$4,285,000

Description:
This project will design and construct pedestrian-friendly streetscape improvements along Frantz Road between Tuttle Road and Metro Place North. The improvements include new streetlights, landscaping at the public street intersections, median landscaping, enhanced crosswalks at the existing public street intersections and curb ramp replacements. This upgrade will create a contiguous shared use path on Frantz Road between SR-161/W Bridge Street and Tuttle Road/Tuttle Crossing Boulevard, providing a high-comfort, low-stress route for commuters, visitors and residents via walking, biking or scooting.
Approximately 2,900 feet of sidewalk on the west side of Frantz Road between Rings Road to Tuttle Road will be upgraded to a 11-foot shared use path. This upgrade will create a contiguous shared use path on the Frantz Road corridor between SR 161 and Tuttle Road.

TIP Project Comments:
MTP ID: 186
Bicycle and Pedestrian Components Included: Yes, shared-use path

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
NP-119	Sawmill Road - Snouffer Road Intersection Improvement	Intersection Improvement (Safety)	Dublin, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Group

Termini:
Intersection of Sawmill Road and Snouffer Road

Total Project Estimate:
$550,000

Description:
This project is based on the recommendations of the Sawmill Road Corridor Study, completed in 2019 and adds a west approach to the Sawmill Road and Snouffer Road intersection. The recommendation includes dual northbound left turn lanes into the Dublin Village Center site while only allowing right-turn movements from the west with traffic signal control. The eastern approach turning restrictions remain unchanged in the recommendation, which the City of Columbus approved during the study process. This intersection is located near the Dublin Village Center shopping center.

TIP Project Comments:
MTP ID: 186
Bicycle and Pedestrian Components Included: Yes, enhanced pedestrian crossings

NP-120 - Riverside Drive & Summit View Road Intersection and Shared Use Path Improvement

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
NP-120	Riverside Drive & Summit View Road Intersection and Shared Use Path Improvement	Intersection Improvement (Safety)	Dublin, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Group

Termini:
Intersection of Riverside Drive and Summit View Road

Total Project Estimate:
$3,355,000

Description:
The project includes the widening of Riverside Drive at Summit View Road for left turn lanes, stormwater improvements, signal upgrades and landscaping. The project would connect the shared-use path to the south of Summit View Road and extend it to Arrowhead Road. The existing traffic signal was installed on a diagonal span using wood poles as a temporary signal. Since then, one of the poles was replaced with a steel strain pole and video detection was installed for traffic on Summit View Road and the private residential driveway opposite Summit View Road. As such, this signalized intersection does not meet current Dublin standards and commitment to high-quality aesthetics. A roundabout has been investigated but has not been determined to be feasible due to the larger intersection footprint moving eastward to accommodate the circulatory roadway and the resulting impacts on adjacent properties.

TIP Project Comments:
MTP ID: 185
Bicycle and Pedestrian Components Included: Yes, shared-use path

NP-121 - Blazer Parkway Bike/Ped Improvements

PID:	Project Name:	Primary Work Category:	Sponsoring Agency:	Air Quality Status:
NP-121	Blazer Parkway Bike/Ped Improvements	Shared Use Path	Dublin, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Group

Termini:
Blazer Parkway from Rings Rd to Frantz Rd

Total Project Estimate:
$11,399,145

Description:
This project includes the design and construction of a shared use path along the west/north side of Blazer Parkway, on the opposite side of the existing shared use path, connecting bike/pedestrian facilities between Rings Road and Frantz Road. It also includes a bus shelter to support transportation options for area businesses. Existing businesses in the area have requested an upgraded bus shelter for employees. The bus stop improvements include a concrete pad, shelter structure, seating, trash receptacle and two bike racks.

This project was submitted to and prioritized in the LinkUS TSI program.

TIP Project Comments:
MTP ID: 186
Bicycle and Pedestrian Components Included: Yes, shared-use path on both sides
Additional Project Information: This project includes a commitment of COTA TSI Funding. (RW: $339,150; CO: $2,647,513)

NP-128	Riverside Drive East Shared Use Path 1	Shared Use Path	Dublin, City of	Exempt

ODOT Dist(s):	Locale:	MPO(s) / RTPO(s):	Performance Measures:	STIP Type:
06	FRA	MORPC		Group

Termini:
Riverside Drive from Tonti Drive to Wyandotte Woods Boulevard

Total Project Estimate:
$1,800,000

Description:
This project provides funding for the construction of 1,400 feet of eight-foot asphalt shared use path on the east side of Riverside Drive between the existing paths at Tonti Drive and Wyandotte Woods Boulevard. This project will work to mitigate larger impacts while providing connectivity to the shared use path system. Costs assume; a pedestrian crossing over an existing storm culvert, loose stacked limestone wall impacts, right of way easements, storm sewer, and landscaping. Utility relocations are likely, but will avoid impacts to the electric transmission main along the proposed alignment. This project was identified in the Riverside Drive shared use path study performed in 2016.

TIP Project Comments:
MTP ID: 759
Bicycle and Pedestrian Components Included: Yes, shared-use path

Appendix 4: Transit Project List

Figure A4.1 Transit Project List Legend

1. **PID**: Unique Project ID for every project as assigned in Ohio's Transportation Project Management system called Ellis.
2. **Project Name**: Unique project name, often identifying basic intent of the project.
3. **Air Quality Status**: Indicates whether project is subject to air quality conformity determination.
4. **STIP Type**: Indicates whether the project is listed in the STIP by Group or Individual.
5. **Total Project Estimate**: Total STIP estimate of all subawards of the project.
6. **Project Description**: Brief description of the project.
7. **TIP Project Comment**: Optional comment field from MPO TIPs.
8. **Subaward Name**: Unique name of activity funded by transit program.
9. **Grantee Agency**: Agency responsible for handling the subaward funding.
10. **Grantee District**: the ODOT District that this subaward will impact. This relates directly to the Grantee County.
11. **Grantee County**: Indicates county for transit expenditure.
12. **Grantee MPO**: The Metropolitan Planning Organization region(s) that this subaward will impact. Tied directly to the Grantee County.
13. **Quantity**: Number of vehicles or equipment being purchased.
14. **Scope**: FTA code that identifies the primary scope (purpose) of the subaward.
15. **ALI**: Activity Line Code identifies the type of transit expenditure. Provides scope of project.
16. **STIP Fund Type**: Type of STIP funding on the project. Aligns with Fiscal Constraint in Chapter 9.
14. **STIP Period Cost Estimates:** Estimate of funds in the STIP period broken down by Subaward, STIP Fund Type, State Fiscal Year.

109079 - HAM Uptown Smart Hub

PID:	Project Name:	Air Quality Status:	STIP Type:	Total Project Estimate:
109079	HAM Uptown Smart Hub	Non-Exempt (Analyzed)	Individual	$8,255,159

Project Description:

Construction of a multi-modal transportation facility which would provide connections between Metro buses and Uptown institutional shuttles. City envisions hub to include park and ride facilities, zip car and bike rental options, as well as connection to bicycle and pedestrian facilities. Added SFY2023 OTP2 funds for the SORTA Uptown Smart Hub design & engineering using 100% state GRF.

PID: 112531
Project Name: 5311 OH-2023-025 Traditional
Air Quality Status: Exempt
STIP Type: Group
Total Project Estimate: $6,147,394

Project Description:
Section 5311 - Rural Transit Grant

Award Executive Summary
AMENDMENT 1:
ODOT is seeking a grant amendment to use part of the un-obligated FFY2022 Section 5311 lapsing funds in the amount of $26,076,579. Also being added to this grant will be FFY2023 Section 5311 funds in the amount of $23,834,092 as well as FFY2023 Section 5311 Appalachian funds in the amount of $1,294,124. In total there will be $51,204,795 in federal funds being added to this grant which will result in total federal funds of $73,943,819. To match these additional federal funds, there will be additional local match of $49,425,856 used for a total of $69,152,382 for the grant. This federal funding will be used for operating and preventive maintenance projects.

*FFY2022 Section 5311 lapsing funds- $26,076,579
*FFY2023 Section 5311 funds- $23,834,092
Total FFY2022 Section 5311 Funds Unobligated: $4,618,519

Total FFY2023 Section 5311 Funds Unobligated: $10,460,225

*FFY2023 Section 5311 Appalachian funds- $1,294,124

Sources of local match for subrecipients include: contract revenue, agency funds, advertising and tax revenue.

Supporting documents attached to the Application Documents section of this grant application include:
-Program of Projects
-Department of Labor Assurance letter
-2024-2027 STIP documentation and approval letter

All projects in this grant are included in the 5311 group projects listed in Chapter 9 of the STIP in Figure 9.1.

ORIGINAL:
This application is to request to use part of the un-obligated FFY2021 Section 5311 lapsing funds in the amount of $20,509,355. Also being used in this grant will be lapsing FFY2021 Section 5311 Appalachian funds in the amount of $964,000 as well as FFY2022 Section 5311 Appalachian funds in the amount of $1,265,669. In total there will be $22,739,024 in federal funds being used in this grant. This funding will be used for operating and preventive maintenance projects.

*FFY2021 Section 5311 lapsing funds- $20,509,355
*FFY2021 Section 5311 Appalachian lapsing funds- $964,000
*FFY2022 Section 5311 Appalachian funds- $1,265,669

Sources of local match in the total amount of $20,741,408 for subrecipients include: contract revenue, agency funds, advertising and tax revenue.

Supporting documents attached to the Application Documents section of this grant application include:
-Program of Projects
-Department of Labor Assurance letter
-2021-2024 STIP documentation and approval letter

All projects in this grant are included in the 5311 group projects listed in Chapter 9 of the STIP and in Figures 9.5 & 9.6.
