Welcome to the Campus Safety Survey

This questionnaire asks about your perceptions of safety on campus, including your personal safety in relationship to various types of harassment/violence. The questionnaire takes about 5 minutes to complete. Your participation is voluntary, and you may choose to stop responding at any point. However, your cooperation will be greatly appreciated and will contribute to our understanding of a very important aspect of student life on your campus. We are committed to ensuring a safe, healthy, and nondiscriminatory environment for our campus communities. Your participation in this survey will help us evaluate and improve our efforts to keep all students, faculty, staff and administrators safe. Please be advised that the questionnaire asks for responses to sexual violence that you may have experienced or been witness to.

If you agree to participate, you can be assured that your responses will remain completely confidential. Your responses will be reported in terms of groups rather than as individual cases. Even though reasonable efforts will be taken to minimize breeches in confidentiality, you should know that any form of communication over the internet carries a minimal risk of loss of confidentiality. If other individuals (e.g. co-worker, partner, roommate) have access to your computer, they might be able to view your web browsing history, including the link to this survey.

For information on how to delete your web browsing history, you can visit http://computerhope.com/issues/ch000510.htm

We recognize that some of the questions might trigger emotional discomfort. If at any time during the survey you feel discomfort, simply log out of the survey and get support. Your campus should have provided information regarding support services in the body of the email that contained the link to this survey.
